Handbook of Mobile Learning - Zane L. Berge
2013-06-19

Winner of the AECT Division of Distance Learning (DDL) Distance Education Book Award! This handbook provides a comprehensive compendium of research in all aspects of mobile learning, one of the most significant ongoing global developments in the entire field of education. Rather than focus on specific technologies, expert authors discuss how best to utilize technology in the service of improving teaching and learning. For more than a decade, researchers and practitioners have been exploring this area of study as the growing popularity of smartphones, tablets,

and other such devices, as well as the increasingly sophisticated applications for these devices, has allowed educators to accommodate and support an increasingly mobile society. This handbook provides the first authoritative account of the theory and research that underlies mobile learning, while also exemplifying models of current and future practice.

Rethinking Third Cinema
- Wimal Dissanayake
2004-06-02

This important anthology addresses established notions about Third Cinema theory, and the cinema practice of developing and postcolonial nations. The 'Third Cinema' movement called for a politicised film-making

practice in Africa, Asia and Latin America, one which would take on board issues of race, class, religion, and national integrity. The films which resulted from the movement, from directors such as Ousmane Sembene, Satyajit Ray and Nelson Pereira dos Santos, are among the most culturally significant, politically sophisticated and frequently studied films of the 1960s and 1970s. However, despite the contemporary popularity and critical attention enjoyed by films from Asia and Latin America in particular, Third Cinema and Third Cinema theory appears to have lost its momentum. Rethinking Third Cinema seeks to bring Third Cinema and Third Cinema theory back into the critical spotlight. The contributors address the most difficult and

challenging questions Third Cinema poses, suggesting new methodologies and redirections of existing ones. Crucially, they also re-examine the entire phenomenon of film-making in a fast-vanishing 'Third World', with case studies of the cinemas of India, Iran and Hong Kong, among others.

Voting Technology - Paul S. Herrnson 2009-03-19
Voting difficulties hung over America's presidential election in 2000 like a dark cloud. Hanging chads, a butterfly ballot, and the Supreme Court remain the most vivid memories of that political donnybrook. Passage of 2002's Help America Vote Act sparked further interest in the physical process of casting a ballot, yet several recent contests still produced confusion at the polls. A solution to at least some of those problems may be found in new technology, but such innovations carry their own concerns and questions. Voting Technology is the first

book to investigate in a scientific and authoritative manner how voters respond to the new equipment. The authors—an interdisciplinary group of experts in American elections, political behavior, human-computer interaction, and human factors psychology—assess five commercially available voting systems, each one representing a specific class based on shared design principles, as well as a prototype system not currently available. They evaluate the systems against different criteria (including ease of use, speed, and accuracy) using field experiments, laboratory experiments, and expert reviews. The results reveal the good and bad about the new systems, including specific features that contribute to clarity, confusion, or error.

Going beyond the concern with spoiled ballots, they determine whether voters actually cast their ballots for the candidates they intended to support. They address fundamental questions of whether voters like and trust the equipment and whether the various systems are equally usable by all voters. Their research also opens up an entirely new line of inquiry by asking about the interaction between ballot format and voter behavior. The concluding chapter pulls together best practices that will guide manufacturers of voting systems, ballot designers, election officials, political observers, and of course, voters. In a political system based on free exercise of personal choice, the least we can do is make sure our choices are being accurately

recorded and counted. Practicing Law in the Sharing Economy - Janelle Orsi 2012 Sharing economy lawyers make the exploding numbers of social enterprises, cooperatives, urban farms, local currencies, and the vast array of unique organizations arising from the sharing economy possible and legal. This essential guide will guide the practicing lawyer through areas of law they need to be familiar with from drafting agreements to employment regulations and managing intellectual property and risk.

The Royal Secret - I. Edward Clark 2017-07-11 A fascinating book on Symbolism and Astrology of Freemasonry first published in 1923. "Away back in 1887, when the city of Alpena was located in the heart of one of the lumber

districts of Michigan, Hopper Lodge, U. D. (now No. 386), of that city was pleased to honor me with membership in due and ancient form. "In those days, or at least in that Lodge, there was no horseplay; and I was so impressed with the work that I resolved to master all the lectures, which I did. The part which interested me the most was the one which I could learn the least about. I would have sacrificed a five-dollar note to learn why Pythagoras sacrificed a hecatomb, and would have given as much to anyone who would explain the mystery surrounding the 47th Problem of Euclid, as depicted on the lecture chart. When inquiry failed me, I made diligent search and finally discovered the KEY OF THE HOUSE OF DAVID, through the knowledge of which I was enabled to penetrate the

allegorical veil, just as Pythagoras did five hundred years before the Christian era. "On the night of my initiation I was told that Freemasonry was founded on the Bible, and all its secrets were hidden therein. In my research work I discovered that the true secrets of Freemasonry were written in the stars and the book of nature, and a knowledge of astronomy and astrology was necessary to lift the allegorical veil. Upon obtaining this knowledge I discovered that the Bible was founded upon the same law as Freemasonry, i.e., the stars and the book of nature."—Author's Foreword

The Funding of School Education - Organization for Economic Cooperation and Development 2017

This report on the funding of school education constitutes the first in a series of thematic comparative reports bringing together findings from the OECD School Resources Review. School systems have limited financial resources with which to pursue their objectives and the design of school funding policies plays a key role in ensuring that resources are directed to where they can make the most difference. As OECD school systems have become more complex and characterised by multi-level governance, a growing set of actors are increasingly involved in financial decision-making. This

requires designing funding allocation models that are aligned to a school system's governance structures, linking budget planning procedures at different levels to shared educational goals and evaluating the use of school funding to hold decision makers accountable and ensure that resources are used effectively and equitably. This report was co-funded by the European Commission. . *Brave, Not Perfect* - Reshma Saujani

Oceanography from Space

- Vittorio Barale

2010-04-26

To all those sailors /
Who dreamed before us /
Of another way to sail
the oceans. The
dedication of this
Volume is meant to
recall, and honour, the
bold pioneers of ocean
exploration, ancient as
well as modern. As a
marine scientist,
dealing with the oceans
through the complex
tools, filters and
mechanisms of
contemporary research, I
have always wondered
what it was like, in
centuries past, to look
at that vast ho- zon
with the naked eye, not
knowing what was ahead,
and yet to sail on. I
have tried to imagine
what ancient sailors
felt, when "the unknown
swirls around and

engulfs the mind", as a forgotten author simply described the brave, perhaps reckless, act of facing such a hostile, menacing and yet fascinating adventure. Innovation has always been the key element, I think, for their success: another way, a better way, a more effective, safer and worthier way was the proper answer to the challenge. The map of our world has been changed time and again, from the geographical as well as the social, economic and scientific points of view, by the new discoveries of those sailors. One of the positive qualities of human beings is without doubt the inborn desire to expand their horizons, to see what lies beyond, to learn and understand.

The Mesh - Lisa Gansky
2010-09-23

A simple, powerful idea that's reinventing the way smart, adaptive companies do business. Most businesses follow the same basic formula: create a product or service, sell it, and collect money. What Lisa Gansky calls "Mesh" businesses throw this model out the window. Instead, these companies use social media, wireless networks, and data crunched from every available source to provide people with goods and services at the exact moment they need them, without the burden and expense of owning them outright. The Mesh gives companies a better understanding of what customers really want. Already, hundreds of successful Mesh companies are redefining how we interact with the people, goods, and services in our lives.

These businesses are easier to start and spreading like wildfire, from bike sharing and home exchanges to peer-to-peer lending, energy cooperatives, and open source design. Consider:

- ZipCar profits from streamlined car sharing
- Kickstarter connects artists with funding from enthusiastic supporters
- Music Gym makes finding a recording studio as easy as joining a gym

The Mesh reveals the next wave of information-enabled commerce, showing readers how to plug in and profit.

Degradable Polymers - G. Scott 2012-12-06

Few scientific developments in recent years have captured the popular imagination like the subject of 'biodegradable' plastics. The reasons for this are complex and lie deep in the human subconscious. Discarded

plastics are an intrusion on the sea shore and in the countryside. The fact that nature's litter abounds in the sea and on land is acceptable because it is biodegradable - even though it may take many years to be bioassimilated into the ecosystem. Plastics litter is not seen to be biodegradable and is aesthetically unacceptable because it does not blend into the natural environment. To the environmentally aware but often scientifically naive, biodegradation is seen to be the ecologically acceptable solution to the problem of plastic packaging waste and litter and some packaging manufacturers have exploited the 'green' consumer with exaggerated claims to 'environmentally friendly' biodegradable

packaging materials. The principles underlying environmental degradation are not understood even by some manufacturers of 'biodegradable' materials and the claims made for them have been categorized as 'deceptive' by USA legislative authorities. This has set back the acceptance of plastics with controlled biodegradability as part of the overall waste and litter control strategy. At the opposite end of the commercial spectrum, the polymer manufacturing industries, through their trade associations, have been at pains to discount the role of degradable materials in waste and litter management. This negative campaign has concentrated on the supposed incompatibility of degradable plastics with aspects of waste management strategy,

notably materials recycling.

Party Politics in Southeast Asia - Dirk Tomsa 2013

Contributing to the growing discourse on political parties in Asia, this book looks at parties in Southeast Asia's most competitive electoral democracies of Indonesia, Thailand and the Philippines. It highlights the diverse dynamics of party politics in the region and provides new insights into organizational structures, mobilizational strategies and the multiple dimensions of linkages between political parties and their voters. The book focuses on the prominence of clientelistic practices and strategies, both within parties as well as between parties and their voters. It

demonstrates that clientelism is extremely versatile and can take many forms, ranging from traditional, personalized relationships between a patron and a client to the modern reincarnations of broker-driven network clientelism that is often based on more anonymous relations. The book also discusses how contemporary political parties often combine clientelistic practices with more formal patterns of organization and communication, thus raising questions about neat analytical dichotomies. Straddling the intersection between political science and area studies, this book is of interest to students and scholars of contemporary Southeast Asian politics, and political scientists and Asian Studies specialists with a

broader research interest in comparative democratization studies. Memoirs of a Kamikaze - Kazuo Odachi 2020-09-15 **Independent Publisher Book Award (IPPY) Winner** An incredible, untold story of survival and acceptance that sheds light on one of the darkest chapters in Japanese history. This book tells the story of Kazuo Odachi who--in 1943, when he was just 16 years-old--joined the Imperial Japanese Navy to become a pilot. A year later, he was unknowingly assigned to the Kamikaze Special Attack Corps--a group of airmen whose mission was to sacrifice their lives by crashing planes into enemy ships. Their callsign was "ten dead, zero alive." By picking up Memoirs of a Kamikaze, readers will experience the hardships of fighter pilot training--dipping and

diving and watching as other trainees crash into nearby mountainsides. They'll witness the psychological trauma of coming to terms with death before each mission, and breathe a sigh of relief with Odachi when his last mission is cut short by Japan's eventual surrender. They'll feel the anger at a government and society that swept so much of the sacrifice under the rug in its desperation to rebuild. Odachi's innate "samurai spirit" carried him through childhood, WWII and his eventual life as a kendo instructor, police officer and detective. His attention to detail, unwavering self-discipline and impenetrably strong mind were often the difference between life and death. Odachi, who is now well into his

nineties, kept his Kamikaze past a secret for most of his life. Seven decades later, he agreed to sit for nearly seventy hours of interviews with the authors of this book-- who know Odachi personally. He felt it was his responsibility to finally reveal the truth about the Kamikaze pilots: that they were unsuspecting teenagers and young men asked to do the bidding of superior officers who were never held to account. This book offers a new perspective on these infamous suicide pilots. It is not a chronicle of war, nor is it a collection of research papers compiled by scholars. It is a transcript of Odachi's words.

Reading Families - Catherine Compton-Lilly 2003

This dynamic text offers a rare glimpse into the literacy development of urban children and their families' role in it. Based on the author's candid interviews with her first-grade students, their parents and grandparents, this book challenges the stereotypical view that urban parents don't care about their children's education. By listening closely to the voices of her students and their families, the author helps us to move beyond negative assumptions, revealing complexities that have previously been undocumented.

Breaking Ranks II - 2004

Social Networking - Paul Lambert 2014

This book examines one of the greatest social and legal concerns of the modern age: social networking and the internet. The growing law and issues of, and created by, social networking and related websites involve real and diverse concerns. The concerns face the website operators, users, parents, schools, universities, employers, organisations, outsource organisations, the police, lawyers, courts, rights organisations and policymakers. Social networking is wonderful, yet staggering - in a short space of time,

user populations greater than the populations of nation states have joined social networks. One social networking website reports to have amassed over 1 billion regular users. Yet, the legal issues (and others) involved with social networking and related websites are getting as many media headlines as the technologies themselves. Some of these are similar to established legal issues, however, with increasing frequency, the issues are entirely new. In addition, the scale of the issues are at a level unprecedented in collective memory. If that was not enough, the pace of the legal issues which must be considered and, more importantly, the pace and urgency with which they must be dealt with, add significant temporal pressures. This timely

and appropriate book outlines the new law and issues relating to social networking. It offers a strong international comparative element and examines various legal jurisdictions. The growing law and issues of, and created by, social networking and related websites involve real and diverse concerns for policy. To victims, lawyers, parents, society, and policy makers, social networking in its various forms can be considered one of the most pressing legal issue today, with more issues and concerns than occur in any other field of contemporary law. Table of Contents include: Internet and Technology * Privacy and Data Protection * Social Networking Policies * Advertising and Marketing * Beacon Settlement * Europe

against Facebook * Facebook Audit * Laws 'Re-Phormed'? * Data Breaches * Tagging * Evidential Issues * Cloud Computing * Employees * Educational Institutions * Tracking the Trackers * Personal Relations * Social Networking after Death * Profiles in Purgatory * A Critical Approach to the Right to Be Forgotten * Children and Social Networking * Social Networking and Internet Access * Peer to Peer and Privacy * Social Networking and Sports * Social Networking and the Courts * Privacy by Design * Data Protection Audits * The Future.

Teacher Learning That Matters - Mary Kooy
2012-02-27

In the continuing global call for educational reforms and change, the contributors in this edited collection address the critical issue of teacher learning from diverse national contexts and perspectives. They define "teacher learning that matters" as it shapes and directs pedagogical practices with the goal of improving student learning. Student achievement is broadly and inclusively defined, beyond the test scores so often identified as the mark of "success" in the research literature. This book weaves together major studies,

research findings and theoretical orientations to represent a globalized network of inquiries into the what, how and why of teacher learning that shapes teacher skill and knowledge. Teacher learning matters on an international scale because teachers are the portals through which any initiative for change and reform is realized. Recognizing that a highly skilled teaching force is instrumental to improving student achievement adds import to generating interactive dialogue on teacher learning around the globe.

Professional Community and Professional

Development in the Learning-centered School

- Judith Warren Little
2006

Provides a research-based blueprint for teacher learning, including the goals it can serve, strategic content priorities, and effective approaches or strategies. In "learning-centered" schools - where there is an emphasis on both student and teacher learning - teacher professional communities are the hub of a learning system that focuses on instructional improvement. These communities are strategically linked with various other modes of professional development within and outside the school.
