Give allied health students the chemistry they need...how and when they need it! Designed to prepare students for health-related careers, General, Organic, and Biological Chemistry:

Structures of Life breaks chemical concepts and problem solving into clear, manageable pieces, ensuring students follow along and stay motivated throughout their first, and often only, chemistry course. Karen Timberlake's friendly writing style, student focus, vetted and refined clinical chemistry problems, and engaging health-related applications help today's students make connections between chemistry and their intended careers as they develop the problem-solving skills they'll need beyond the classroom. The Fifth Edition fully integrates the text with MasteringChemistry to provide an interactive and engaging experience. New Construct a Concept Map activities help students connect ideas through video solutions and live demonstrations, while the text

and media establish a clinical focus that ties chemistry directly to allied health. Instructors can also assign MasteringChemistry's new Dynamic Study Modules, which enable students to remediate core math and chemistry skills outside of class, freeing professors to focus on GOB Chemistry concepts and problem solving during class. Also available with MasteringChemistry MasteringChemistry from Pearson is the leading online homework, tutorial, and assessment system, designed to improve results by engaging students before, during, and after class with powerful content. Instructors ensure students arrive ready to learn by assigning educationally effective content before class, and encourage critical thinking and retention with in-class

resources such as Learning Catalytics. Students can further master concepts after class through traditional and adaptive homework assignments that provide hints and answer-specific feedback. The Mastering gradebook records scores for all automatically graded assignments in one place, while diagnostic tools give instructors access to rich data to assess student understanding and misconceptions. Mastering brings learning full circle by continuously adapting to each student and making learning more personal than ever-before, during, and after class.

Designed primarily for the one-semester GOB course, Chemistry: An Introduction to General, Organic, & Biological Chemistry w/MasteringChemistry(tm) Student Access Kit, continues to lead the market with its clear and friendly writing style and real-world health related applications that students can relate to. This new package introduces more problem-solving strategies and new conceptual and challenge problems, as well as each Chapter Review being enhanced with Learning Goals to reinforce the

mastery of concepts for students. This package also includes the award winning MasteringChemistry(tm), the most advanced chemistry homework and tutorial system available. This online homework and tutoring system utilizes the Socratic Method to coach students through problem-solving techniques, offering hints and simpler questions on request. It tutors students individually with feedback specific to their errors. MasteringChemistry helps students learn, not just practice. Key Topics Covered in this Package Include: Measurements, Atoms and Elements, Nuclear Radiation, Compounds and Their Bonds, Chemical Reactions and Quantities, Energy and Matter, Gases, Solutions, Acids and Bases, Introduction to Organic Chemistry, Unsaturated Hydrocarbons, Organic

Compounds with Oxygen and Sulfur, Carboxylic Acids, Esters, Amines, and Amides, Carbohydrates, Lipids, Amino Acids, Proteins, and Enzymes, Nucleic Acids and Protein Synthesis, Metabolic Pathways and Energy Production. Special Features Include: Students using MasteringChemistry tutorials make 15% fewer errors, solve problems 15% faster and perform better on exams. Immediate and specific feedback on wrong answers coach students individually. Specific feedback on common errors helps explain why a particular answer is not correct. Hints provide individualized coaching. Skip the hints you don't need and access only the ones that you need, for the most efficient path to the correct solution. Award winning author Karen Timberlake, has 36 years of in-class

expertise, and her teaching materials have sold over 1 million copies! Health, Environmental, and Green Chemistry Notes throughout the text relate chemistry chapters to real-life topics in health, the environment, and medicine that are interesting and motivating to students. Understanding the Concept questions at the end of each chapter to test students' understanding of the basic ideas of chemistry rather than just the math facility in working quantitative problems. Sample Problems with Study Checks help students read, recognize, set up, and solve numerous problem types, while developing critical thinking skills and building confidence before moving on to other topics. Tutorial content tested by thousands of students. During testing, we capture all

student answer submissions and write/rewrite hints and feedback for their most common actual wrong answers. As a result, MasteringChemistry addresses not just where Chemistry instructors expect students to go wrong, but where they actually do go wrong. Concept Maps, now found at the end of each chapter, give students a big picture overview of concepts and how they connect to each other. Macro-to-Micro art illustrations visually connect the real-life world with atomic-level representations. Explore Your World hands-on activities in each chapter make chemistry exciting, relevant, and non-threatening to students. Media icons direct students to tutorials and case studies on The Chemistry Place website. What students/instructors say about

utilizing MasteringChemistry with their textbooks: Overall, students who completed assignments from MasteringChemistry scored 24% higher on exams than those who did not- Online Administrator, University of Nebraska-Lincoln MasteringChemistry has definitely been an amazing experience for me. MasteringChemistry is so easy to use, any high schooler can easily understand it. The preparations in the beginning of the program, where it teaches you how to input answers, were very informative- Student, University of California, Davis Over half of my class has test averages above 70% and that has never happened before. The students say the homework and tutorials are really helpful- Professor, Colorado State University Pueblo About Professor Karen Timberlake: Karen Timberlake,

heralded professor emeritus of chemistry at Los Angeles Valley College, taught chemistry for allied health and preparatory chemistry for 36 years. She received her bachelor's degree in chemistry from the University of Washington and her Master's degree in biochemistry from the University of California at Los Angeles. During that time, her name has become associated with the strategic use of learning tools that promote student success in chemistry and the application of chemistry to real-life situations. More than one million students have learned chemistry using texts, laboratory manuals, and study guides written by Karen Timberlake. Professor Timberlake belongs to numerous science and educational organizations including the American Chemical

Society (ACS) and the National Science Teachers Association (NSTA). She was a Western Regional Winner of Excellence in College Chemistry Teaching Award given by the Chemical Manufacturers Association. In 2004, she received the McGuffey Award in Physical Sciences from the Text and Academic Authors Association, and in 2006, she received the Textbook Excellence Award. She also speaks frequently at conferences and educational meetings on the use of student-centered teaching methods in chemistry to promote the learning success of students. Included in this package are: -Chemistry: An Introduction to General, Organic, & Biological Chemistry, 10th Edition (ISBN: 0136019706) - MasteringChemistry(tm) with myeBook Student Access Kit (ISBN: 0321570138)

Allied Health' Tutorials, and Dynamic Study Modules bring chemistry to life and walk students through different approaches to problem solving, providing remediation where needed. This program provides a better teaching and learning experience—for you and your students. It will help you to: Personalize learning with optional MasteringChemistry®: This online homework, tutorial, and assessment program helps students master core concepts and problem-solving skills, thus freeing up time in the classroom for instructors to focus on complex topics. Show the relevance of chemistry through real-world examples: Activities and applications throughout the program couple chemistry concepts with health and environmental career applications to help students understand why

course content matters. Foster development of problem-solving skills: The program introduces a variety of clear problem-solving strategies early in the text that are reinforced through Allied Health Tutorials in MasteringChemistry and revisited when needed. Help students visualize and understand concepts: The text's engaging visual features, including macro-to-micro illustrations, a rich photographic program, and concept maps, help students understand chemistry by seeing chemistry. Note: You are purchasing a standalone product; MasteringChemistry does not come packaged with this content. MasteringChemistry is not a self-paced technology and should only be purchased when required by an instructor.

Chemistry - Karen C. Timberlake 2018-01-19

For courses in General, Organic, and Biological Chemistry Make connections between chemistry and future health-related careers General, Organic, and Biological Chemistry: Structures of Life engages students by helping them see the connections between chemistry, the world around them, and future health-related careers. Known for its friendly writing style, student focus, robust problem-solving pedagogy, and engaging health-related applications, the text prepares students for their careers. The text breaks chemical concepts and problem solving into clear, manageable pieces to ensure students stay on track and motivated throughout their first, and often only, chemistry course. With the newly revised 6th Edition, best-

selling author Karen Timberlake and new contributing author MaryKay Orgill connect chemistry to real-world and career applications. Their goal is to help students become critical thinkers by understanding scientific concepts that will form a basis for making important decisions about issues concerning health and the environment and their intended careers. The new edition introduces more problem-solving strategies, more problem-solving guides, new Analyze the Problem with Connect features, new Try It First and Engage features, conceptual and challenge problems, and new sets of combined problems--all to help students develop the problem-solving skills they'll need beyond the classroom. Also available with Mastering Chemistry or as an easy-to-use, standalone Pearson eText

Mastering(tm) is the teaching and learning platform that empowers you to reach every student. By combining trusted author content with digital tools developed to engage students and emulate the office-hour experience, Mastering personalizes learning and often improves results for each student. Students can further master concepts after class through traditional and adaptive homework assignments that provide hints and answer-specific feedback. Pearson eText allows educators to easily share their own notes with students so they see the connection between their reading and what they learn in class--motivating them to keep reading, and keep learning. Portable access lets students study on the go, even offline. And, reading analytics offer insight into how

students use the eText, helping educators tailor their instruction. Note: You are purchasing a standalone product; Mastering Chemistry and Pearson eText do not come packaged with this content. For one-semester courses in General, Organic, and Biological Chemistry A friendly, engaging text that reveals connections between chemistry, health, and the environment Chemistry: An Introduction to General, Organic, and Biological Chemistry, 13th Edition is the ideal resource for anyone interested in

learning about allied health. Assuming no prior knowledge of chemistry, author Karen Timberlake engages readers with her friendly presentation style, revealing connections between the structure and behavior of matter and its role in health and the environment. Aiming to provide a better learning experience, the text highlights the relevance of chemistry through real-world examples. Activities and applications throughout the program couple chemistry concepts with health and environmental career applications to help readers understand why the content matters. The text also fosters development of problem-solving skills, while helping readers visualize and understand concepts through its engaging figures, sample problems, and concept maps. The 13th

Edition expands on Karen Timberlake's main tenets: relevance, a clinical focus, educational research, and learning design. New applications added to questions and problem sets emphasize the material's relevance, while updated chapter openers with follow-up stories help readers form a basis for making decisions about issues concerning health and the environment. New problem-solving tools in this edition, including Try it First and Connect, urge readers to think critically about problem-solving while learning best practices.
