Let History into the Mathematics Classroom -  
Évelyne Barbin 2017-10-27

This book brings together 10 experiments which introduce historical perspectives into mathematics classrooms for 11 to 18-year-olds. The authors suggest that students should not only read ancient texts, but also should

construct, draw and manipulate. The different chapters refer to ancient Greek, Indian, Chinese and Arabic mathematics as well as to contemporary mathematics. Students are introduced to well-known mathematicians—such as Gottfried Leibniz and Leonard Euler—as well as to less famous practitioners and engineers. Always, there is the attempt to associate the experiments with their scientific and cultural contexts. One of the main values of history is to show that the notions and concepts we teach were invented to solve problems. The different chapters of this collection all have, as their starting points, historic problems—mathematical or not. These are problems of exchanging and sharing, of dividing figures and volumes as well as engineers' problems, calculations, equations and congruence. The mathematical reasoning which accompanies these actions is illustrated by the use of drawings, folding, graphical constructions and the production of machines. **The Hidden Crisis** - 2011-01-01

When wars break out, international attention and media reporting invariably focus on the most immediate images of human suffering. Yet behind these images is a hidden crisis. Across many of the world's poorest countries, armed conflict is destroying not just school infrastructure, but the hopes and ambitions of generations of children. The hidden crisis: Armed conflict and education documents the devastating effects of armed conflict on education. It examines the widespread human rights abuses keeping children out of school. The Report challenges an international aid system that is failing conflict-affected states, with damaging consequences for education. It warns

that schools are often used to transmit intolerance, prejudice and social injustice. This ninth edition of the Education for All Global Monitoring Report calls on governments to demonstrate greater resolve in combating the culture of impunity surrounding attacks on schoolchildren and schools. It sets out an agenda for fixing the International aid architecture. And it identifies strategies for strengthening the role of education in peacebuilding. The Report includes statistical indicators on all levels of education in more than 200 countries and territories. It serves as an authoritative reference for education policy-makers, development specialists, researchers and the media

### **Lifestyle Migration** - Michaela Benson

2016-05-06

Relatively affluent individuals from various corners of the globe are increasingly choosing to migrate, spurred on by the promise of a better and more fulfilling way of life within their

destination. Despite its increasing scale, migration academics have yet to consolidate and establish lifestyle migration as a subfield of theoretical enquiry, until now. This volume offers a dynamic and holistic analysis of contemporary lifestyle migrations, exploring the expectations and aspirations which inform and drive migration alongside the realities of life within the destination. It also recognizes the structural conditions (and constraints) which frame lifestyle migration, laying the groundwork for further intellectual enquiry. Through rich empirical case studies this volume addresses this important and increasingly common form of migration in a manner that will interest scholars of mobility, migration, lifestyle and culture across the social sciences.

Along the way, she becomes obsessed with the Beatles... which might be just what she needs to find her way back to being okay. Yeah yeah yeah!

## Sociocultural Aspects of Translating and Interpreting - Anthony Pym 2006-01-01

Translation Studies has recently been searching for connections with Cultural Studies and Sociology. This volume brings together a range of ways in which the disciplines can be related, particularly with respect to research methodologies. The key aspects covered are the agents behind translation, the social histories revealed by translations, the perceived roles and values of translators in social contexts, the

hidden power relations structuring publication contexts, and the need to review basic concepts of the way social and cultural systems work. Special importance is placed on Community Interpreting as a field of social complexity, the lessons of which can be applied in many other areas. The volume studies translators and interpreters working in a wide range of contexts, ranging from censorship in East Germany to English translations in Gujarat. Major contributions are made by Agnès Whitfield, Daniel Gagnon, Franz Pöchhacker, Michaela Wolf, Pekka Kujamäki and Rita Kothari, with an extensive introduction on methodology by Anthony Pym.

## Effective Learning and Teaching of Writing - Gert Rijlaarsdam 2007-11-23

Effective Learning and Teaching of Writing is a handbook on research on the effective teaching and learning of writing. It is a reference for researchers and educators in the domain of written composition in education. Effective

Learning and Teaching of Writing covers all age ranges and school settings and it deals with various aspects of writing and text types.

Research methodology varies from experimental studies to reflective classroom practitioners' research. This new volume in the series Studies in Writing brings together researchers from all kinds of disciplines involved in writing research and countries in their endeavour to improve the teaching of written composition. It is the result of co-operation of researchers all over the world and shows that in spite of the differences in educational regions over the world, research in writing shares similar problems, and tries to find answers, and generate new questions. The body of knowledge in this volume will inspire researchers and teachers to improve research and practice.

Thinking Syntactically - Liliane Haegeman

2009-02-04

Thinking Syntactically: A Guide to Argumentation and Analysis is a textbook designed to teach introductory students the skills of relating data to theory and theory to data. Helps students develop their thinking and argumentation skills rather than merely introducing them to one particular version of syntactic theory. Structured around a wide range of exercises that use clear and compelling logic to build arguments and lead up to theoretical proposals. Data drawn from current media sources, including newspapers, books, and television programs, to help students formulate and test hypotheses. Generative in spirit, but does not focus on specific theoretical approaches but enables students to understand and evaluate different approaches more easily. Written by an established author with an international reputation.

**The Phantom of the Opera** - Gaston Leroux  
2014-10-28

The classic Gothic novel that inspired the blockbuster musical There is a ghost in the Paris Opera House. Singers, dancers, and stagehands have all seen him lurking in the shadows of the set, and each describes his face differently. Some say it is on fire, others that it is bare bone, and a terrified few say that he has no face at all. Outsiders dismiss the stories as theatrical superstition, but soon the phantom will reveal himself—and the Opera will never be the same. A crew member is found hanged, and every

denizen of the theater is quick to blame the phantom. More deaths follow, until the phantom is forced to make himself known in the most spectacular manner possible. But when the mysterious ghost begins to admire a beautiful singer, it is the beginning of something magnificent: a love story as heartfelt and tragic as any opera ever staged. This ebook features a new introduction by Otto Penzler and has been professionally proofread to ensure accuracy and readability on all devices. "The wildest and most fantastic of tales." —The New York Times Book Review

*The Plebeian Experience* - Martin Breugh  
2013-12-10

How do people excluded from political life achieve political agency? Through a series of historical events that have been mostly overlooked by political theorists, Martin Breugh identifies fleeting yet decisive instances of emancipation in which people took it upon themselves to become political subjects.

Emerging during the Roman plebs's first secession in 494 BCE, the plebeian experience consists of an underground or unexplored configuration of political strategies to obtain political freedom. The people reject domination through political praxis and concerted action, therefore establishing an alternative form of power. Breugh's study concludes in the nineteenth century and integrates ideas from sociology, philosophy, history, and political science. Organized around diverse case studies, his work undertakes exercises in political theory to show how concepts provide a different understanding of the meaning of historical events and our political present. *The Plebeian Experience* describes a recurring phenomenon that clarifies struggles for emancipation throughout history, expanding research into the political agency of the many and shedding light on the richness of radical democratic struggles from ancient Rome to Occupy Wall Street and beyond.

Gender and Technology in the Making - Cynthia Cockburn 1993-12-07

This innovative book demonstrates the making of gender and technology as comparable social processes, one helping shape the other. The authors take as an example the microwave oven, a recent innovation in domestic technology that neatly encapsulates the technology//gender relation. In the microwave, masculine engineering encounters an age old woman's technology: cooking. The authors show how the microwave begins as a state-of-the-art masculine technology, is translated in the retail trade into a 'family' commodity, one of a range of domestic white goods, and eventually settles into the kitchen alongside other humble feminine appliances; unlike the old cooker, however, the microwave retains just a whiff of aftershave. The au

**Theory and Practice of Writing** - William Grabe 2014-09-25

This book undertakes a general framework

within which to consider the complex nature of the writing task in English, both as a first, and as a second language. The volume explores varieties of writing, different purposes for learning to write extended text, and cross-cultural variation among second-language writers. The volume overviews textlinguistic research, explores process approaches to writing, discusses writing for professional purposes, and contrastive rhetoric. It proposes a model for text construction as well as a framework for a more general theory of writing. Later chapters, organised around seventy-five themes for writing instruction are devoted to the teaching of writing at the beginning, intermediate, and advanced levels. Writing assessment and other means for responding to writing are also discussed. William Grabe and Robert Kaplan summarise various theoretical strands that have been recently explored by applied linguists and other writing researchers, and draw these strands together into a coherent

overview of the nature of written text. Finally they suggest methods for the teaching of writing consistent with the nature, processes and social context of writing.

**Ready Player Two** - Shira Chess 2017-10-01

Cultural stereotypes to the contrary, approximately half of all video game players are now women. A subculture once dominated by men, video games have become a form of entertainment composed of gender binaries. Supported by games such as Diner Dash, Mystery Case Files, Wii Fit, and Kim Kardashian: Hollywood—which are all specifically marketed toward women—the gamer industry is now a major part of imagining what femininity should look like. In Ready Player Two, media critic

Shira Chess uses the concept of “Player Two”—the industry idealization of the female gamer—to examine the assumptions implicit in video games designed for women and how they have impacted gaming culture and the larger society. With Player Two, the video game industry has designed specifically for the feminine ideal: she is white, middle class, heterosexual, cis-gendered, and abled. Drawing on categories from time management and caregiving to social networking, consumption, and bodies, Chess examines how games have been engineered to shape normative ideas about women and leisure. Ready Player Two presents important arguments about how gamers and game developers must change their thinking about both women and games to produce better games, better audiences, and better industry practices. Ultimately, this book offers vital prescriptions for how one of our most powerful entertainment industries must evolve its ideas of women.

*History of AIDS* - Mirko D. Grmek 1993-06-21

By drawing on the latest discoveries in virology, microbiology, and immunology, Mirko Grmek depicts the AIDS epidemic not as an isolated incident but as part of the long, but far from peaceful, coexistence of humans and viruses.

Through Other Eyes - Sophie Alatorre

2009-05-27

The present volume represents the results of ideas put forward by specialists of literature, linguistics and translation studies at the Institution of Translation in Europe conference held at the University of Provence in June/July 2006. Its aim is to investigate how English-language literary works have been translated, with the focus primarily on French, and how they have been disseminated in Europe throughout a period going as far back as the Renaissance. Exactly how were translations carried out and with whose support? Which official institutions were involved? What were the translators' intentions? How 'faithful' were

translations with regard to source texts? What kind of linguistic and literary difficulties were involved in the translations? These are just some of the questions that the present volume aims to answer. It attempts to give an overview which covers a variety of aspects on the complex task of making suitable translations available to the European public. The result, however, is that translations have often been portrayed in quite a different light to the original...

**A Companion to Translation Studies** - Piotr Kuhiwczak 2007-04-12

A Companion to Translation Studies is the first work of its kind. It provides an authoritative guide to key approaches in translation studies. All of the essays are specially commissioned for this collection, and written by leading international experts in the field. The book is divided into nine specialist areas: culture, philosophy, linguistics, history, literary, gender, theatre and opera, screen, and politics. Contributors include Susan Bassnett, Gunilla

Anderman and Christina Schäffner. Each chapter gives an in-depth account of theoretical concepts, issues and debates which define a field within translation studies, mapping out past trends and suggesting how research might develop in the future. In their general introduction the editors illustrate how translation studies has developed as a broad interdisciplinary field. Accompanied by an extensive bibliography, this book provides an ideal entry point for students and scholars exploring the multifaceted and fast-developing discipline of translation studies.

*Vietnam and the Colonial Condition of French  
Literature -* Leslie Barnes 2014-12-01

Vietnam and the Colonial Condition of French Literature explores an aspect of modern French literature that has been consistently overlooked

in literary histories: the relationship between the colonies—their cultures, languages, and people—and formal shifts in French literary production. Starting from the premise that neither cultural identity nor cultural production can be pure or homogenous, Leslie Barnes initiates a new discourse on the French literary canon by examining the work of three iconic French writers with personal connections to Vietnam: André Malraux, Marguerite Duras, and Linda Lê. In a thorough investigation of the authors' linguistic, metaphysical, and textual experiences of colonialism, Barnes articulates a new way of reading French literature: not as an inward-looking, homogenous, monolingual tradition, but rather as a tradition of intersecting and interdependent peoples, cultures, and experiences. One of the few books to focus on Vietnam's position within francophone literary scholarship, Barnes challenges traditional concepts of French cultural identity and offers a new perspective on canonicity and the division

between “French” and “francophone” literature.

**Glosario Del Banco Mundial** - World Bank 1996

This edition of the World Bank has been revised and expanded by the Terminology Unit in the Languages Services Division of the World Bank in collaboration with the English, Spanish, and French Translation Sections. The Glossary is intended to assist the Bank's translators and interpreters, other Bank staff using French and Spanish in their work, and free-lance translator's and interpreters employed by the Bank. For this reason, the Glossary contains not only financial

and economic terminology and terms relating to the Bank's procedures and practices, but also terms that frequently occur in Bank documents, and others for which the Bank has a preferred equivalent. Although many of these terms, relating to such fields as agriculture, education, energy, housing, law, technology, and transportation, could be found in other sources, they have been assembled here for ease of reference. A list of acronyms occurring frequently in Bank texts (the terms to which they refer being found in the Glossary) and a list of international, regional, and national organizations will be found at the end of the Glossary.

*Europa! Europa?* - Sascha Bru 2009-10-29

The first volume of the new series "European Avant-Garde and Modernism Studies" focuses on the relation between the avant-garde, modernism and Europe. It combines interdisciplinary and intermedial research on experimental aesthetics and poetics. The essays,

written by experts from more than fifteen countries, seek to bring out the complexity of the European avant-garde and modernism by relating it to Europe's intricate history, multiculturalism and multilingualism. They aim to inquire into the divergent cultural views on Europe taking shape in avant-garde and modernist practices and to chart a composite image of the "other Europe(s)" that have emerged from the (contemporary) avant-garde and experimental modernism. How did the avant-garde and modernism in (and outside) Europe give shape to local, national and pan-European forms of identity and community? To what extent does the transnational exchange and cross-fertilisation of aesthetic tendencies illustrate the well-rehearsed claim that the avant-gardes form a typically European phenomenon? Dealing with canonised as well as lesser known exponents of modernism and the avant-garde throughout Europe, this book will appeal to all those interested in European

cultural, literary and art history.

**A Family in Brussels** - Chantal Akerman 2002

**Divine Names on the Spot** - Thomas Galoppin  
2021-12-23

Ancient Greek and Semitic languages resorted to a large range of words to name the divine. Gods and goddesses were called by a variety of names and combinations of onomastic attributes. This broad lexicon of names is characterised by plurality and a tendency to build on different sequences of names; therefore, the Mapping Ancient Polytheisms project focuses on the process of naming the divine in order to better understand the ancient divine in terms of a plurality in the making. A fundamental rule for reading ancient divine names is to grasp them in their context — time and place, a ritual, the form of the discourse, a cultural milieu —: a deity is usually named according to a specific situation. From Artemis Eulochia to al-Lat, al-'Uzza and Manat, from Melqart to Aeoemy

rockâe in the biblical book of Psalms, this volume journeys between the sanctuary on Mount Gerizim and late antique magical practices, revisiting rituals, hymnic poetry, oaths of orators and philosophical prayers. While targeting different names in different contexts, the contributors draft theoretical propositions towards a dynamic approach of naming the divine in antiquity.

**Half Awake and Half Asleep in the Water** - 2007

This series of images by Japanese photographer Asako Narahashi has been exhibited in Japan to wide acclaim; this monograph marks its first publication in book form. The photographs were made while the artist stood chest-deep in the ocean facing the shoreline; through them she accomplishes the extraction of the viewer's mind from its surrounding, and one finally succumbs to the hallucinatory power of the ocean. In the words of photographic historian, Kotaro Iizawa, "the feeling of being stranded, however, is strangely comforting."

Theory of Didactical Situations in Mathematics - Guy Brousseau 2006-04-11

This book is unique. It gathers texts which give the best presentation of the principles and key concepts of the Theory of Didactical Situations that Guy Brousseau developed in the period from 1970 to 1990. These texts provide a comprehensive presentation of the Theory. In order to facilitate the reading of certain points footnotes have been added, as well as preludes

and interludes to place in context the chosen texts and clarify the construction of the book.
