Architects' Data - Ernst Neufert 1991-01-15

This is an essential aid in the initial design and planning of a project. The relevant building type is located by a comprehensive index and cross reference system, a condensed commentary covers user requirements, planning criteria, basic dimensions and other considerations of function, siting aspect etc. A system of references based on an extensive bibliography supports the text. In every section plans, sections, site layouts, design details and graphs illustrated key aspects of a building type's design. Most illustrations are dimensioned or scaled - the metric system of measurement is used throughout, and the equivalent in feet/inches can easily be read either off a graphic scale on the page or from the built-in conversion table. The illustrations are international in origin and include both well know and less famous designers. Architects Data is primarily a handbook of building types rather than of construction techniques and details. However its treatment of components (such as doors and windows) and of spaces for building services is extremely thorough, since consideration of this data is an essential element of the planning process. The opening pages of basic data on man and his buildings cover critical subjects such as scale, drawing practice, noise, light and space for the same reason. Particular attention has also been paid to the implications of energy conservation, means of escape from fire and the needs of the elderly and the disabled.

Best Practices for Credit-Bearing Information Literacy Courses - Christopher Vance Hollister 2014-05-14

This work is a collection of previously unpublished papers in which contributing authors describe and recommend best practices for creating, developing and teaching credit-bearing information literacy (IL) courses at the college and university level. Contributors include academic librarians from universities, four-year colleges and community colleges to demonstrate successful IL course endeavors at their respective institutions. It includes several case studies of both classroom and online IL courses; some are elective and some required, some are discipline-specific and others are integrated into academic programs or departments. Contributors discuss useful and effective methods for developing, teaching, assessing and marketing courses. Also included are chapters on theoretical approaches to credit bearing IL courses and their history in higher education. Organized around three themes, create, develop and teach, this book provides practitioners and administrators with a start-to-finish guide to best practices for credit-bearing IL courses.

Coding Places - Yuri Takhteyev 2012-09-21

An examination of software practice in Brazil that reveals both the globalization and the localization of software development. Software development would seem to be a quintessential example of today's Internet-enabled "knowledge work"—a global profession not bound by the constraints of geography. In Coding Places, Yuri Takhteyev looks at the work of software developers who inhabit two contexts: a geographical area—in this case, greater Rio de Janeiro—and a "world of practice," a global system of activities linked by shared meanings and joint practice. The work of the Brazilian developers, Takhteyev discovers, reveals a paradox of the world of software: it is both diffuse and sharply centralized. The world of software revolves around a handful of places—in particular, the San Francisco Bay area—that exercise substantial control over both the material and cultural elements of software production. Takhteyev shows how in this context Brazilian software developers work to find their place in the world of software and to bring its benefits to their city. Takhteyev's study closely examines Lua, an open source programming language developed in Rio but used in such internationally popular products as World of Warcraft and Angry Birds. He shows that Lua had to be separated from its local origins on the periphery in order to achieve success abroad. The developers, Portuguese speakers, used English in much of their work on Lua. By bringing to light the work that peripheral practitioners must do to give software its seeming universality, Takhteyev offers a revealing perspective on the not-so-flat world of globalization.

Innovative Policies and Institutions to Support Agro-industries Development - Carlos A. Da Silva 2011

Agro-industries are an important source of employment and income generation worldwide, occupying a dominant position in the manufacturing sector of the economy and representing a significant demand driver for agricultural products. As part of its mandate to provide food security for the world's growing population, FAO promotes the development of agro-industries through its technical programs, including activities in the areas of policy advice, capacity building, advocacy, awareness raising and investment promotion. This book represents a contribution of FAO to broaden the understanding of approaches and mechanisms to foster the emergence and sustainability of agro-industries that are competitive and inclusive. With emphasis on experiences from the developing world, the book presents and discusses innovative policies and institutions that are supportive of agro-industries development."

Philosophy as a Way of Life - Pierre Hadot 1995-08-03

This book presents a history of spiritual exercises from Socrates to early Christianity, an account of their decline in modern philosophy, and a discussion of the different conceptions of philosophy that have accompanied the trajectory and fate of the theory and practice of spiritual exercises. Hadot's book demonstrates the extent to which philosophy has been, and still is, above all else a way of seeing and of being in the world.

The Voynich Manuscript - M. E. D'Imperio 1978

In spite of all the papers that others have written about the manuscript, there is no complete survey of all the approaches, ideas, background information and analytic studies that have accumulated over the nearly fifty-five years since the manuscript was discovered by Wilfrid M. Voynich in 1912. This report pulls together all the information the author could obtain from all the sources she has examined, and to present it in an orderly fashion. The resulting survey will provide a firm basis upon which other students may build their work, whether they seek to decipher the text or simply to learn more about the problem.

Complete Works of Swami Abhedananda - Swami Abhedānanda 1968

Aging Criminals - Neal Shover 1985-11

What happens to criminals when they get old? Why do some "go straight"? This book looks at the lives of 50 male ex-convicts over the age of 50 to identify the social and psychological factors that may have contributed to decreasing their criminal conduct. Most of these subjects began their criminal involvement in adolescence, and all committed property offenses; 36 could be typed as unsuccessful criminals in that they viewed crime as a means of livelihood but actually had small financial reward and were frequently incarcerated. A majority of these men experienced a process of stock-taking, usually in their thirties and forties, that led to a transformation of orientational contingencies. This transformation usually involved the realization that crime was an unproductive enterprise, new perspectives on the self, growing awareness of time, changing aspirations and goals, and a growing sense of tiredness. Changes in the values they ascribed to intimate relations with others and to employment also contributed to lessening criminal involvement over time. These changes, cumulatively, resulted in changes in the decisionmaking processes that precede crime: benefits were seen as illusory or less important, and perceived risks and losses increased. Further, with successful performance of nondeviant roles and the passage of time, the salience of the ex-convict personal identity decreased and presented few interactional difficulties for these men. Case studies and extensive quotations illustrate these changes.

The Cambridge Companion to Modern Italian Culture - West 2001-08-16

This collection of essays provides a comprehensive account of the culture of modern Italy. Contributions focus on a wide range of political, historical and cultural questions. The volume provides information and analysis on such topics as regionalism, the growth of a national language, social and political cultures, the role of intellectuals, the Church, the left, feminism, the separatist movements, organised crime, literature, art, design, fashion, the mass media, and music. While offering a thorough history of Italian cultural movements, political trends and literary texts over the last century and a half, the volume also examines the cultural and political situation in Italy today and suggests possible future directions in which the country might move. Each essay contains suggestions for further reading on the topics covered. The Cambridge Companion to Modern Italian Culture is an invaluable source of materials for courses on all aspects of modern Italy.

Letters Writ by a Turkish Spy - Giovanni Paolo Marana 1970

Fire as an Agent in Human Culture - Walter Hough 1926

This work undertakes the presentation of salient features of an encyclopedic subject in a more or less condensed fashion. The importance of the study of heating and illumination is thought to be its contribution to the history of culture as connected with the inventiveness displayed by man in the adaptation of the primary natural key force nearest to his needs in all the earlier stages of progress. The history also suggests the intellectual, esthetic, and religious

reactions marking the several stages of culture gradually attained by man.

The Datafication of Education - Juliane Jarke 2020-05-21

This book attends to the transformation of processes and practices in education, relating to its increasing digitisation and datafication. The introduction of new means to measure, capture, describe and represent social life in numbers has not only transformed the ways in which teaching and learning are organised, but also the ways in which future generations (will) construct reality with and through data. Contributions consider data practices that span across different countries, educational fields and governance levels, ranging from early childhood education, to schools, universities, educational technology providers, to educational policy making and governance. The book demonstrates how digital data not only support decision making, but also fundamentally change the organisation of learning and teaching, and how these transformation processes can have partly ambivalent consequences, such as new possibilities for participation, but also the monitoring and emergence/manifestation of inequalities. Focusing on how data can drive decision making in education and learning, this book will be of interest to those studying both educational technology and educational policy making. The chapters in this book were originally published in Learning, Media and Technology. Chapter 4 of this book is freely available as a downloadable Open Access PDF at

Mountain Risks: From Prediction to Management and Governance - Theo Van Asch
2016-09-18

This book offers a cross disciplinary treatment of the rapidly growing field of integrated approaches in risk assessment in mountainous areas. All major aspects related to hazard and risk assessment, risk management, and governance are illustrated with a wide range of case studies. The first part of the book focuses on new techniques for assessing the natural hazards of different types of mass movements. State-of-the-art techniques for morphological characterization and monitoring of displacements are described. Computational advances are covered to explain the process systems and to quantify the hazards of fast and slow-moving landslides. In the second part of the book methodologies are included for assessing the impact of these natural hazards on the society in terms of risks. In this part, methodologies for defining the vulnerability of the elements at risk are shown and the use of run-out models for risk assessment of the dangerous rapid mass movements are evaluated. The third part of the book focuses on the response of society towards the problems of hazard and risk. It highlights the role of spatial planning, early warning systems and evacuation plans for risk management. It establishes practical thresholds for acceptable and tolerable risks and emphasizes the importance of education and communication to society. Audience The book is of interest to a wide range of experts from related disciplines, practitioners and stakeholders to demonstrate the importance of an integrated approach for all aspects of risks in mountainous areas.

Modern Indian Theatre - Nandi Bhatia 2011

Since the late nineteenth century, theatre has played a significant role in shaping social and political awareness in India. It has served to raise concerns in post-Independence India as well. Modern Indian Theatre: A Reader brings together writings that speak to the historical contexts from which theatrical practices emerged-colonization, socio-cultural suppression and appropriation, intercultural transformations brought about by the impact of the colonial forces, and acute critical engagement with socio-political issues brought about by the hopes and failures of Independence. The volume addresses pertinent questions like how drama influences social change, the response of drama to the emergence and domination of mass media and the proliferation and influence of western media in India, and how mediations of gender, class, and caste influence drama, its language, forms, and aesthetics. The Introduction by Nandi Bhatia provides a comprehensive understanding of the interface between Indian theatre and 'modernity'.
