A Practical Guide to Teaching ICT in the Secondary School - Steve Kennewell

2007-04-11

This practical and accessible workbook is designed to support student and newly qualified teachers as they develop their basic teaching skills. A Practical Guide to Teaching ICT in the Secondary School draws on the best available research concerning student-teachers' needs

and approaches to learning. It focuses on the key pedagogical issues which arise during the school experience, including: managing the class and learning environment developing pupils' understanding of concepts including challenging misconceptions different ways of explaining aspects of the subject which pupils find problematic. It provides a wealth of practical activities and materials, underpinned by relevant theory, which have been developed through the authors' vast experience of working with student teachers. These activities provide opportunities to analyze learning and performance. The book has been designed to be written in directly, and so provide a useful record of progress. Case studies are also included, as are examples of existing good practice and a range of tried-and-tested strategies. The book has been written to complement Learning to Teach ICT in the Secondary School: A Companion to School Experience, but can also be used equally successfully as a stand alone book. It has been

designed to be used by student teachers, on their own or with others, or by school- or university-based tutors with their student teachers, to develop and reinforce their understanding of learning to teach IT.

Education for the 21st Century - Impact of ICT and Digital Resources - Deepak Kumar

2006-10-11

It is a pleasure to offer you this book containing papers about ICT and education from the World Computer Congress 2006 (WCC 2006), held in Santiago, Chile and sponsored by the International Federation for Information Processing (IFIP). A lot of people worked very hard to make this event happen and to produce this book. The programme committee with IFIP members from around the world issued a call for papers inspiring almost 80 people to submit papers, posters, demonstrations, and workshops to the IFIP TC3 (Technical Committee on

Education) sub-conference of WCC 2006. The submitted papers were reviewed by a large group of referees to select the papers to be presented at the conference. What is really amazing is that all these people freely contributed their time and effort to do all this work. The TC3 sub-conference of WCC 2006 has two themes: Informatics Curricula, TEaching Methods and best practice (ICTEM II), and Teaching and Learning with ICT: Theory, Policy and Practice. These themes represent many of the broad range of interests of the Working Groups of IFIP TC3. Two kinds of papers are included in this book: full papers and short papers. Full papers are standard papers that are appropriate for an international conference on ICT and informatics education. Of the 64 full paper submissions, 28 (44%) were accepted. A short paper represents work in progress, opinion, a proposal, work with untested results, or an experience report.

Primary ICT: Extending Knowledge in Practice - John Duffy 2006-08-15

Still the biggest concern for many on initial teacher training courses is the acquisition of subject knowledge and the ability to translate that into effective teaching. This book addresses this - building on the core subject knowledge covered in the Achieving QTS series and relating it to classroom practice. It supports trainees in extending and deepening their knowledge of ICT and demonstrating how to apply it to planning and implementing lessons. Practical and up-to-date teaching examples are used to clearly contextualize subject knowledge. A clear focus on classroom practice helps trainees to build confidence and develop their own teaching strategies.
