IFRS (INTERNATIONAL FINANCIAL REPORTING STANDARDS) in Q and A - Folorunsho MEJABI 2017-01-02

True teachers are those who use themselves as bridges over which they invite their students to cross; then, having facilitated their crossing, joyfully collapse, encouraging them to create their own. This book is aimed squarely at the new learning styles evident with today's students and addresses accounting industry changes as well. This textbook is not written as a reference text, rather it is written in another form where knowledge can be bridged and tested through questions and answers in a multiple choice format. To gain most from the text, we would advise you to read topics relevant to the multiple choices so as to be able to attempt the questions raised. The answers to the questions are provided towards the back pages of the text. The book will not in small measure assist students in preparation for their regular academic and professional exams. Accounting has evolved over

the years especially in the areas of Standard setting and adoption of International Financial Reporting Standards around the globe. The book basically covers all IASB standards including conceptual framework and IFRS on SMEs. It is good starting and ending points for accounting students, accountants, corporate gurus and managers of businesses. Let me conclude with the words of Confucius, who said "You cannot open a book without learning something."

One Size Fits All? Stakeholders' Perceptions of IFRS Adoption Across Europe and Brazil - Cristiane Benetti 2015

The main objective of this study is to put in evidence the perceptions of stakeholders about IFRS adoption across Europe and Brazil. By means of a survey, (816 completed questionnaires, 10% of population), we investigate whether producers (chief financial officers), users (financial analysts), and controllers (auditors) of accounting data share the same views on the usefulness and goals of

the international financial reporting process. We use descriptive statistics and univariate tests to analyze the responses to our multiple-choice questions. Results suggest that respondents' activity has less influence on their answers than the country where they are located.

The Role of Accounting Information and the Relevance of IFRS - Cristiane Benetti 2014-09-19

The main objective of this study is to determine how individuals involved in the accounting process view the role of accounting information in an economic environment where capital markets are dominant. The study also attempts to determine whether International Financial Reporting Standards (IFRS) play a part in fulfilling this role. To this end, I compare the perceptions

of financial officers, financial analysts and auditors from twenty distinctly market environments. By means of a survey, I investigate whether producers of accounting data (financial officers), users of that data (financial analysts), and controllers of accounting information (auditors) share the same views on the usefulness and goals of the financial accounting process. Extending the study to several countries is a useful means for determining whether and how the economic environment affects the respondents' views of accounting information. I use descriptive statistics, univariate tests and multiple correspondence analyses (MCA) to analyze the responses to our multiple-choice questions. Results suggest that respondents' activity has less influence on their answers than the country where they are located.
