Birds of the Horn of Africa - Nigel Redman 2020-05-28

This is the first field guide to the birds of this fascinating region, and a companion to Birds of East Africa by two of the same authors. The Horn of Africa has the highest endemism of any region in Africa, and around 70 species are found nowhere else in the world. Many of these are confined to the isolated highlands of

Ethiopia and Eritrea, but a large number of larks specialise in the arid parts of Somalia and adjoining eastern Ethiopia, whilst the island of Socotra has its own suite of endemic species. The region is also an important migration route and wintering site for many Palearctic birds. Over 200 magnificent plates by John Gale and Brian Small illustrate every species that has ever occurred in the five countries covered by the guide, and the succinct text covers the key identification criteria. Special attention is paid to the voices of the species, and over 1000 up-to-date colour distribution maps are included. This long-awaited guide is a much-needed addition to the literature on African birds and an essential companion for birders visiting the region.

Africa A to Z: Continental and Country Profiles - Esterhuysen, Pieter 2013-12-07

The popularity of the first two editions of this book necessitated a third revised and updated version to record the many challenges in Africa since the first edition appeared in 1998. Africa is a vast and fascinating continent whose population has exceeded the one billion mark. Africa A-Z attempts to provide, in a concise manner, the facts for an elementary understanding of the continent and its complex problems. The book falls into two main sections; the five chapters on the first main section focus on the continent as a whole, dealing with its physical and human diversity, its eventful history and Africans' struggle for economic survival. The second main section contains profiles of 58 independent countries, ranging from Algeria to Zimbabwe. Presentation of the profiles is uniform, in that the same themes are covered in each profile. The data panels with the profiles contain data not provided in the text. The maps, appearing throughout the text were produced by AISA's cartography department.

Somaliland - Philip Briggs 2019

The pioneering first edition of this guidebook was the first dedicated entirely to Somaliland, and this second edition, fully updated and with a foreword by Simon Reeve, continues Bradt's groundbreaking tradition of publishing highly specialist guides to newly emerging destinations. Significantly, this new edition also covers Addis Ababa and eastern Ethiopia - the main gateway into Somaliland. Also included is a detailed historical and archaeological background to a region whose wealth of rock art, ancient burial sites, ruined cities and historical ports stretches back 5,000 years and has links with ancient Egypt and Axum as well as the more recent Ottoman and British empires.

Comprehensive birdwatching and wildlife sections include details of where to look for of the region's endemic and near-endemic birds and mammals, while the guide also contains the only proper maps available for the capital Hargeisa and other large towns such as Burao, Berbera and Borama, compiled from scratch using GPS. Somaliland ranks among the world's most obscure and uncharted travel destinations. It comprises the former colony of British Somaliland, which merged with its Italian namesake to form the Somali Republic upon attaining independence in 1960, but unilaterally seceded from the rest of war-torn Somalia in 1991. Now a peaceful and fully functional self-governing democracy, Somaliland still awaits official recognition by the UN AU and most other such organisations more than quarter of a century later. Yet despite its obscurity, this ancient and largely arid land has much to offer the truly intrepid traveller, and the low-key, low-rise capital Hargeisa is easily reached by air or overland from neighbouring Ethiopia. With this unique guide, discover Las Geel, the most alluring rock art site on the Horn of Africa; the charmingly decayed Ottoman port of Berbera, which provides access to some splendid beaches and offshore reefs; the spectacular Daallo Escarpment, swathed in fragrant evergreen forests that support several endemic bird species; and the abandoned city of Maduna, the most impressive of several mediaeval Islamic ruins dotted around the arid interior.
