Poe and Place - Philip Edward Phillips

2018-10-23

This collection of fifteen original essays and one original poem explores the theme of “place” in the life, works, and afterlife of Edgar A. Poe (1809-1849). *Poe and Place* argues that “place” is an important critical category through which to understand this classic American author in new and interesting ways. The geographical “places” examined include the cities in which Poe lived and worked, specific locales included in his fictional works, imaginary places featured in his writings, physical and imaginary places and spaces from which he departed and those to which he sought to return, places he claimed to have gone, and places that have embraced him as their own. The geo-critical and geo-spatial perspectives in the collection offer fresh

readings of Poe and provide readers new vantage points from which to approach Poe’s life, literary works, aesthetic concerns, and cultural afterlife.

The Pyramid - Ismail Kadare 2011-11-21

Egypt in the twenty-sixth century BC. The young pharaoh Cheops wants to forgo the construction of a pyramid in his honor, but

his court sages hasten to persuade him otherwise. The pyramid, they tell him, is not a tomb but a paradox, designed to appease the masses by oppressing them. It is a symbol of nothing, a useless and infinite project designed to waste the country's wealth and keep security and prosperity, ever the fonts of sedition, constantly at bay. And so the greatest pyramid in the world has ever seen begins to rise. Rumors multiply. A secret police is formed.

Conspiracies—real and imagined—swirl around the rising edifice. The most drastic purges follow. By the time the first stone is laid, Cheops's subjects are terrified enough to yield to his most murderous whims. Each time one of the massive stones is hoisted into place, dozens of men are crushed, and there are tens of thousands of stones. . . .

Needles from the Nile - Chris Elliott
2022-04-15

In the hearts of London and New York stand their two oldest public monuments, Cleopatra's Needles, the last of a series of

obelisks from Ancient Egypt to be moved abroad during a period of over two thousand years. This book uses the Needles to examine how objects embody the cultures that create them, and how the use, value, and meaning of these objects change as they are transferred between cultures by gift, sale, barter, or theft. It explores the way in which obelisks functioned as imperial trophies, how their transfer was part of the complex political manoeuvring between European powers, America, the Ottoman Empire, and the semi-autonomous rulers of Egypt, and how their acquisition reflected the relative power of these parties. In contrast, it also examines the crucial role that private individuals and finance played in the acquisition and transport of the obelisks, and how popular understanding of them, and of the culture they came from, often differed from those of social and professional elites. It also

relates the Needles to contemporary debates about the ownership of cultural artefacts, the legacy of colonial history, and the nature of reception as the process of understanding and valuing the past and its surviving material and immaterial culture.

A Dictionary of Literature in the English Language from 1940 to 1970 -

Robin Myers 1978

This is a short-title checklist on some 1,300 authors, each entry of which comprises brief biographical notes, bibliographical references, an index of titles and a checklist of books with their first publication date. Its main aim is to offer librarians, booksellers and researchers a finding tool for those authors currently in demand whether meritorious or meretricious. It brings together in a single volume, for the first time, a broad selection of English-speaking writers publishing between 1940 and 1970. What happened to the ancient Egyptians? The Persians? The Romans? The Mayans? ARE WE THEIR DESCENDANTS? Recent genetic discoveries are uncovering surprising links between us and the peoples of old—links that rewrite race, ethnicity, and human history. Today’s Native Americans descend from Central Asians who arrived in the early A.D. era. Abraham, Isaac, and Jacob still have clearly identifiable descendants, albeit rare ones.

Every people group on earth can genetically trace their origins to Noah and his three sons.
