Picasso, Line Drawings and Prints - Pablo Picasso 1981-01-01

Picasso may have the most uncanny line since Botticelli. Each medium or style he chose to master, no matter how solid or sculptural, can be seen as line disguised, metamorphic; as the labyrinth to which a single thread is the key. Theoretically, line is infinite; Picasso in his fertility nearly realized that theory in almost a century of ceaseless drawing, whether on paper, zinc, stone, or other media. Here is a sampling, rather than a comprehensive selection, from that plenitude; while nothing could be comprehensive within a single volume, the genius of Picasso's line manifests itself so clearly that this culling from various periods reveals the line in most of its guises. Beginning with a 1905 circus family in drypoint, 44 drawings cover Picasso's major themes, techniques, and styles. From the almost classic Ingresque clarity of the Diaghilev and Stravinsky portraits (1919, 1920) via cubist studies and "neo-classical" nudes, Picasso's restless hand remakes his world again and again with fresh energy, culminating here in six sketches of the artist/model dashed out in raging love/hate in the midst of personal crisis (1953-54). In between are times of serenity and introspection (Seven Dancers (1919), with the future Olga Picasso up front; many figures and bathers) and, particularity as book illustrations, many mythological studies; Eurydice

Stung by a Serpent (1930 etching), Dying Minotaur in the Arena (1933), an etching for a 1934 edition of *Lysistrata*. Balzac is represented by a striking lithographic portrait (1952) and by etching for Vollard's edition of *Le Chef-d'oeuvre inconnu*. The sudden appearance of an earthy, hirsute Rembrandt (1934) seems to confirm Picasso's membership in the select group of art history's greatest draughtsmen.

Matisse - Pierre Schneider 1984
...to devote my life to the essential thing-- the thing for which I am made and which can bring a little happiness to the great family, the greatest spiritual family.--Matisse to Andre Rouveyre, September 4, 1942
Of all the artists of this century, Henri Matisse is one of the greatest and most beloved. His influence on modern art, both during his lifetime and today, has never stopped growing; in the eyes of the world, he is the French painter par excellence. Henri Matisse is all the more cherished because his work celebrates the positive aspects of life, as evidenced by the titles of many of his major paintings: *Luxe, Calme et Volupte*, *La Joie de Vivre*, *La Danse*, *Musique*, to mention but a few. His explosions and juxtapositions of color and pattern inspire pure delight in the beholder, and his mastery of line, volume, and form are perhaps unequalled in the art of our time. The vitality, energy, and life-enhancing qualities that radiate from his art represent distillation of all that is affirmative in the human condition and are given immortality through that rare and indefinable quality known as genius. The art of Matisse describes a trajectory leading from realism to abstraction, from darkness to light, from the cold of the north to the heat of the south, a route marked off by such

revolutionary innovations as the burst of color found in Fauvism or the invention of his cut-outs. Matisse was still creating at a time in his life when many artists are content to rest on their laurels. Since its original publication in 1984, this book by Pierre Schneider stands alone as the bible on the art of Matisse. The author spent fourteen years amassing a prodigious amount of information on the artist, and includes his own personal and original views on the work. Including over nine hundred illustrations, this is the most substantial reference of the works of Matisse ever published. The reader will discover Matisse watercolorist, draftsman, ceramist, and the architect-- and unquestionably one of the greatest artists of the twentieth century.
