Red Sparrow - Jason Matthews 2013-06-04

SOON TO BE A MAJOR MOTION PICTURE starring Jennifer Lawrence, Joel Edgerton and Jeremy Irons. Dominika Egorov, former prima ballerina, is sucked into the heart of Putin's Russia, the country she loved, as the twists and turns of a betrayal and counter-betrayal unravel. American Nate Nash, idealistic and ambitious, handles the double agent, codenamed MARBLE, considered one of CIA's biggest assets. He needs to keep his identity secret for as long as the mole can keep supplying golden information. Will Dominika be able to unmask MARBLE, or will the mission see her faith destroyed in the country she has always passionately defended? 'A great and dangerous spy-game is being played today between Russian intelligence and the CIA. Very few people know about it, including many of our politicians in Washington. But Jason Matthews does, and his thrilling Red Sparrow takes us deep inside this treacherous world. He's an insider's insider. He knows the secrets. And he is also a masterful story-teller. I loved this book and could not put it down. Neither will you' Vince Flynn 'Not since the good old days of the Cold War has a classic spy thriller like Red Sparrow come along. Jason Matthews is not making it up; he has lived this life and this story, and it shows on every page. High-level espionage, pulse-pounding danger, sex, double agents and double crosses. What more can any reader want?' Nelson DeMille

*Images of Katrina* - Teri McCormack 2006

Words alone cannot tell the story of the historic event that happened on August 29th, 2006.

Pictures say a thousand words. The city the way we knew it is gone forever, what we can have is the memory and the photos of what was, what is and what can be. Biloxi and the Coastal cities that were destroyed by Hurricane Katrina will never be the same again, but they will be again... Bigger, Better and just as Beautiful...

Geo-Economics: The Interplay between Geopolitics, Economics, and Investments - Joachim Klement 2021-04-28

Today's investors need to understand geopolitical trends as a main driving force of markets. This book provides just that: an understanding of the interplay between geopolitics and economics, and of the impact of that dynamic on financial markets. To me, geo-economics is the study of how geopolitics and economics interact in international relations. Plenty of books on geopolitics have been written by eminent experts in politics and international affairs. This book is not one of them. First, I am neither a political scientist nor an expert in international affairs. I am an economist and an investment strategist who has been fascinated by geopolitics for many years. And this fascination has led me to the realization that almost all books and articles written on geopolitics are useless for investors. Political scientists are not trained to think like investors, and they are not typically trained in quantitative methods. Instead, they engage in developing narratives for geopolitical events and processes that pose risks and opportunities for investors. My main problem with these narratives is that they usually do not pass the "so what?" test. Geopolitical risks are important, but how am I to assess which risks are important for my portfolio and which ones are simply noise? Because geopolitics experts focus on politics, they do not provide an answer to this crucial question for investors. What could be important for a geopolitics expert and for global politics could be totally irrelevant for investors. For example, the US wars in Iraq and Afghanistan have been going on for almost two decades now and have been an important influence on the political discussion in the United States. But for investors, the war in Afghanistan was a total nonevent, and the war in Iraq had only a fleeting influence, when it started in 2003. Geopolitics experts cannot answer the question of which geopolitical events matter for investors and which do not. Unfortunately, some experts thus claim that all geopolitical risks matter and that these risks cannot be quantified but only assessed qualitatively. Nothing could be further from the truth. In the chapters that follow, I discuss geopolitical and geo-economic events from the viewpoint of an investor and show that they can be quantified and introduced as part of a traditional risk management process. I do this in two parts. The first part of this book focuses on geopolitics that matters to investors. It reviews the literature on a range of geopolitical events and shows which events have a material economic effect and which do not. The second part of this book puts the insights from those first chapters into practice by applying them to current geopolitical trends. In this second part, I stick my head

out and examine the impact the geopolitical trends have on the economy and financial markets today and their likely development in the coming years. —Joachim Klement, CFA

*Convergence* - Institute for National Strategic Studies 2013-04

The Center for Complex Operations (CCO) has produced this edited volume, *Convergence: Illicit Networks and National Security in the Age of Globalization*, that delves deeply into everything mentioned above and more. In a time when the threat is growing, this is a timely effort. CCO has gathered an impressive cadre of authors to illuminate the important aspects of transnational crime and other illicit networks. They describe the clear and present danger and the magnitude of the challenge of converging and connecting illicit networks; the ways and means used by transnational criminal networks and how illicit networks actually operate and interact; how the proliferation, convergence, and horizontal diversification of illicit networks challenge state sovereignty; and how different national and international organizations are fighting back. A deeper understanding of the problem will allow us to then develop a more comprehensive, more effective, and more enduring solution.

**The Lost Wife** - Alyson Richman 2011-09-06

A rapturous novel of star-crossed love in a time of war—from the international bestselling author of *The Secret of Clouds*. During the last moments of calm in prewar Prague, Lenka, a young art student, and Josef, who is studying medicine, fall in love. With the promise of a better future, they marry—only to have their dreams shattered by the imminent Nazi invasion. Like so many others, they are torn apart by the currents of war. Now a successful obstetrician in America, Josef has never forgotten the wife he believes died in the war. But in the Nazi ghetto of Terezín, Lenka survived, relying on her skills as an artist and the memories of a husband she would never see again. Then, decades later and thousands of miles away, an unexpected encounter in New York leads to an inescapable glance of recognition, and the realization that providence has given Lenka and Josef one more chance. From the glamorous ease of life in Prague before the occupation to the horrors of Nazi Europe, *The Lost Wife* explores the power of first love, the resilience of the human spirit, and our capacity to remember.

As vines creep up the side of a home and graffiti appears on the walls of an abandoned building, Spielman captures rebirth and blight, perseverance and renewal.

*Catastrophe in the Making* - William R. Freudenburg 2011-08-08

When houses are flattened, towns submerged, and people stranded without electricity or even food, we attribute the suffering to “natural disasters” or “acts of God.” But what if they’re neither? What if we, as a society, are bringing these catastrophes on ourselves? That’s the provocative theory of *Catastrophe in the Making*, the first book to recognize Hurricane Katrina not as a “perfect storm,” but a tragedy of our own making—and one that could become commonplace. The authors, one a longtime New Orleans resident, argue that breached levees and sloppy emergency response are just the most obvious examples of government failure. The true problem is more deeply rooted and insidious, and stretches far beyond the Gulf Coast. Based on the false promise of widespread prosperity, communities across the U.S. have embraced all brands of “economic development” at all costs. In Louisiana, that meant development interests turning wetlands into shipping lanes. By replacing a natural buffer against storm surges with a 75-mile long, obsolete canal that cost hundreds of millions of dollars, they guided the hurricane into the heart of New Orleans and adjacent communities. The authors reveal why, despite their geographic differences, California and Missouri are building—quite literally—toward similar destruction. Too often, the U.S. “growth machine” generates wealth for a few and misery for many. Drawing lessons from the most expensive “natural” disaster in American history, *Catastrophe in the Making* shows why thoughtless development comes at a price we can ill afford.

**Illicit** - Moises Naim 2010-01-26

From Moses Naim, the author of *The End of Power*, which was Mark Zuckerberg's first ever Facebook book club selection. Any newspaper anywhere in the world, any day, carries news about illegal migrants, drug busts, smuggled weapons, laundered money, or counterfeit goods. The intense media coverage devoted to the war on terrorism has helped to obscure the other new wars of globalisation. Illicit international trade pits governments against agile, well-financed networks of highly dedicated individuals. Religious zeal or political goals drive terrorists, but profit is no less a motivator for murder, mayhem, and global insecurity than religious fanaticism. *Illicit* is the first book to reveal the full scale of this dark underground. It uncovers the connections between illegal industries and shows how they join forces to breed new lines of business, feed off political instability, foster violence and enable terrorism. How do pirated movies or CD's find their way to illegal markets worldwide even before they are released? And how, in our free, modern world, have over 30 million women and children - in South East Asia alone - been trafficked in the past ten years?

**War Without End** - Michael Schwartz 2008

"In this analysis, commentator Michael Schwartz demolishes the myths used to sell the U.S. public on the idea of an endless "war on terror" centered in Iraq. He shows how the U.S. occupation is fueling civil war in Iraq and beyond and how U.S. officials dismantled the Iraqi state and economy, helping to destroy rather than rebuild the country."--BOOK JACKET.

goodness and not our own. Beyond Being Good is an encouragement for every woman that her ability to be good has nothing to do with experiencing God's perfect love or walking in her calling and mission.

**My War** - Colby Buzzell 2014-11-28

'Once we passed the checkpoint at the border, it hit me. I was like, Holy Shit, this is it, I'm entering a combat zone. Cool!' At twenty-six Colby Buzzell, unemployed and living at home, decided to join the US Army. Within months he was in Iraq, a machine gunner in the controversial Stryker Brigade Combat Team, an army unit on the cutting edge of combat technology and the first of its kind. Trapped amid 'guerrilla warfare, urban-style' in Mosul, Iraq, Buzzell was struck by the bizarre and often frightening world surrounding him. He began writing a blog describing the war - not as being reported by CNN or official briefings - but as experienced by the soldier on the ground. His story is a brutally honest and hard-hitting account of the absurdities of modern war. These are the real stories of the war: a firefight where the resistance came from 'men in black'; a night spent chain-smoking in the guard tower counting the tracer bullets being fired over the city; and the hesitation of a young soldier who had been passed around from platoon to platoon because he was too afraid to fight. My War is a powerful story of a young man and a war, unlike any you have read before.

*Flood of Images* - Bernie Cook 2015-04-01

Anyone who was not in New Orleans during Hurricane Katrina and the subsequent flooding of the city experienced the disaster as a media event, a flood of images pouring across television and computer screens. The twenty-four-hour news cycle created a surplus of representation that overwhelmed viewers and complicated understandings of the storm, the flood, and the aftermath. As time passed, documentary and fictional filmmakers took up the challenge of explaining what had happened in New Orleans, reaching beyond news reports to portray the lived experiences of survivors of Katrina. But while these narratives presented alternative understandings and more opportunities for empathy than TV news, Katrina remained a mediated experience. In *Flood of Images*, Bernie Cook offers the most in-depth, wide-ranging, and carefully argued analysis of the mediation and meanings of Katrina. He engages in innovative, close, and comparative visual readings of news coverage on CNN, Fox News, and NBC; documentaries including Spike Lee's *When the Levees Broke* and *If God Is Willing and Da Creek Don't Rise*, Tia Lessin and Carl Deal's *Trouble the Water*, and Dawn Logsdon and Lolis Elie's *Faubourg Tremé*; and the HBO drama *Tremé*. Cook examines the production practices that shaped Katrina-as-media-event, exploring how those choices structured the possible memories and meanings of Katrina and how the media's memory-making has been contested. In *Flood of Images*, Cook intervenes in the ongoing process of remembering and understanding Katrina.

**How Democracies Die** - Steven Levitsky 2018-01-16

NEW YORK TIMES BESTSELLER • "Comprehensive, enlightening, and terrifyingly timely."—The New York Times Book Review (Editors' Choice) WINNER OF THE GOLDSMITH BOOK PRIZE • SHORTLISTED FOR THE LIONEL GELBER PRIZE • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post • Time • Foreign Affairs • WBUR • Paste Donald Trump's presidency has raised a question that many of us never thought we'd be asking: Is our democracy in danger? Harvard professors Steven Levitsky and Daniel Ziblatt have spent more than twenty years studying the breakdown of democracies in Europe and Latin America, and they believe the answer is yes. Democracy no longer ends with a bang—in a revolution or military coup—but with a whimper: the slow, steady weakening of critical institutions, such as the judiciary and the press, and the gradual erosion of long-standing political norms. The good news is that there are several exit ramps on the road to authoritarianism. The bad news is that, by electing Trump, we have already passed the first one. Drawing on decades of research and a wide range of historical and global examples, from 1930s Europe to contemporary Hungary, Turkey, and Venezuela, to the American South during Jim Crow, Levitsky and Ziblatt show how democracies die—and how ours can be saved. Praise for *How Democracies Die* "What we desperately need is a sober, dispassionate look at the current state of affairs. Steven Levitsky and Daniel Ziblatt, two of the most respected scholars in the field of democracy studies, offer just that."—The Washington Post "Where Levitsky and Ziblatt make their mark is in weaving together political science and historical analysis of both domestic and international democratic crises; in doing so, they expand the conversation beyond Trump and before him, to other countries and to the deep structure of American democracy and politics."—Ezra Klein, Vox "If you only read one book for the rest of the year, read *How Democracies Die*. . . . This is not a book for just Democrats or Republicans. It is a book for all Americans. It is nonpartisan. It is fact based. It is deeply rooted in history. . . . The best commentary on our politics, no contest."—Michael Morrell, former Acting Director of the Central Intelligence Agency (via Twitter) "A smart and deeply informed book about the ways in which democracy is being undermined in dozens of countries around the world, and in ways that are perfectly legal."—Fareed Zakaria, CNN

**A Guide to Gender (2nd Edition)** - Sam Killermann 2017-03-15

The first edition was featured as #1 best-seller in Gender on Amazon, and is being used by gender studies & sociology professors on 3 continents. Now with a new foreword by the author, brand new chapters, fixed typos, and more gender! 100% of royalties from this edition go directly to Hues, a global justice collective. Where do we start, when it comes to learning about something that's everywhere, infused into everything, and is often one of the primary lenses through which we see ourselves and others? When it comes to understanding gender, it's best to begin with deep breath, then with section one of this book by social justice advocate Sam

Killermann, who uses clear language, helpful examples, and a bit of humor to help the medicine go down. This book is not overwhelming, it's not overly complicated, and it's not exhausting to read. It is a few hundred pages of gender exploration, social justice how-tos, practical resources, and fun graphics & comics. Sam dissects gender using a comprehensive, non-binary toolkit, with a focus on making this subject accessible and enjoyable. All this to help you understand something that is so commonly misunderstood, but something we all think we get: gender. A Guide to Gender is broken into four sections: Basic Training (which sets the foundation of knowledge for the book, defining concepts of social justice, oppression, privilege, and more); Breaking through the Binary (beginning with a discussion of gender norms, and working toward a more nuanced understanding of gender identity, gender expression, and sex); Feminism & Gender Equity (how feminism can be a solution to the injustices folks of all genders face); and Social Justice Competence (a series of short, practical lessons that will help readers put the learning from the book to work). It's written for people who want to learn for themselves, educators who are hoping to better communicate themes of gender to others, and activists who want to add a gender equity lens to their vision of justice. It's not meant to be the end of one's journey into understanding gender, but a great place to start. Because gender is something we all deserve to understand.

It is an intimate, documentary record of the hurricane's impact and a tribute to human endurance. For his afterword, Ace Atkins revisits the scenes of Towell's photographs nine months on, reflecting on how the communities of the coast have been able to rebuild their lives.
