Shadows of War - Efrat Ben-Ze'ev 2010-02-25

Silence lies between forgetting and remembering. This book explores how different societies have constructed silences to enable men and women to survive and make sense of the catastrophic consequences of armed conflict. Using a range of disciplinary approaches, it examines the silences that have followed violence in twentieth-century Europe, the Middle East, and Africa. These essays show that silence is a powerful language of remembrance and commemoration and a cultural practice with its own rules. This broad-ranging book discloses the universality of silence in the ways we think about war through examples ranging from the Spanish Civil War and the Israeli-Palestinian conflict to the Armenian Genocide and South Africa's Truth and Reconciliation Commission. Bringing together scholarship on varied practices in different cultures, this book breaks new ground in the vast literature on memory, and opens up new avenues of reflection and research on the lingering aftermath of war.

Forgetful Remembrance - Guy Beiner 2018-11-09

Forgetful Remembrance examines the paradoxes of what actually happens when communities persistently endeavour to forget inconvenient events. The question of how a society attempts to obscure problematic historical episodes is addressed through a detailed case study grounded in the north-eastern counties of the Irish province of Ulster, where loyalist and unionist Protestants—and in particular Presbyterians—repeatedly tried to repress over two centuries discomfiting recollections of participation, alongside Catholics, in a republican rebellion in 1798. By exploring a rich variety of sources, Beiner makes it possible to closely follow the dynamics of social forgetting. His particular focus on vernacular historiography, rarely noted in official histories, reveals the tensions between professed oblivion in public and more subtle rituals of remembrance that facilitated muted traditions of forgetful remembrance, which were masked by a local culture of reticence and silencing. Throughout Forgetful Remembrance, comparative references demonstrate the wider relevance of the study of social forgetting in Northern Ireland to numerous other cases where troublesome memories have been concealed behind a veil of supposed oblivion.

Karl Marx's Social and Political Thought - Bob Jessop 1999

Visual Culture - Chris Jenks 2017-07-05

In Visual Culture the 'visual' character of contemporary culture is explored in original and lively essays. The contributors look at advertising, film, painting and fine art journalism, photography, television and propaganda. They argue that there is only a social, not a formal relation between vision and truth. A major preoccupation of modernity and central to an understanding of the postmodern, 'vision' and the 'visual' are emergent themes across sociology, cultural studies and critical theory in the visual arts. Visual Culture will prove an indispensable guide to the field.

Sensing the Past - Mark Michael Smith 2007

"Smith's history of the sensate is destined to precipitate a revolution in

our understanding of the sensibilities that underpinned the mentalities of past epochs."--David Howes, author of Sensual Relations: Engaging the Senses in Culture and Social Theory "Mark M. Smith presents a far-ranging essay on the history of the senses that serves simultaneously as a good introduction to the historiography. If one feels in danger of sensory overload from this growing body of scholarship, Smith's piece is a useful preventive."--Leigh E. Schmidt, author of Restless Souls: The Making of American Spirituality "This is a masterful overview. The history of the senses has been a frontier field for a while now. Mark Smith draws together what we know, with an impressive sensory range, and encourages further work. A really exciting survey."--Peter N. Stearns, author of American Fear: The Causes and Consequences of High Anxiety "Who would ever have guessed that a book on the history of the senses--seeing, hearing, touching, tasting, and smelling--could be informative, thought-provoking, and, at the same time, most entertaining? Ranging in both time and locale, Mark Smith's Sensing the Past makes even the philosophy about the senses from ancient times to now both learned and exciting. This work will draw scholars into under-recognized subjects and lay readers into a world we simply but unwisely take for granted."--Bertram Wyatt-Brown, author of Southern Honor: Ethics and Behavior in the Old South "Mark M. Smith has a good record of communicating his research to a broad constituency within and beyond the academy . . . This will be required reading for anyone addressing sensory history."--Penelope Gouk, author of Music, Science and Natural Magic in Seventeenth Century England "This is a fine cultural history of the body, which takes Western and Eastern traditions and their texts quite seriously. Smith views a history of the senses not only from 'below' but places it squarely in the historical imagination. It will be of interest to a wide range of readers."--Sander L. Gilman, author of Difference and Pathology

Concealed Silences and Inaudible Voices in Political Thinking - Michael Freeden 2022-09-22

Concealed Silences and Inaudible Voices in Political Thinking investigates silence as a normal, ubiquitous, and indispensable element of political thinking, theory, and language. It explores the diverse dimensions in which silences mould the different core features of the political, as a highly flexible power resource, both enabling and constraining major social practices, traditions, and currents. Departing from the typical focus on intentional silencing and the dominance of logos, the book instead highlights the concealed and unrecognized ways through which silence pervades socio-political life and adopts the guises of the unspeakable, the ineffable, the inarticulable, and the unconceptualizable. Drawing extensively from historical, philosophical, anthropological, psychoanalytical, theological, linguistic, and literary viewpoints, the book demonstrates the common threads that connect silences to those different disciplines, alongside the features that pull them asunder. In extracting and decoding their political implications, it explores both academic literature and colloquial, everyday discourse. Michael Freeden uses select case-studies to explore topics such as Buddhist nondualism, Locke's tacit consent, the submerging of historical narratives, state neutrality, Pinter's miscommunications and menace, and the separate ways ideologies integrate silence into their beliefs. The book offers an analysis of silence from a multi-perspectival range of disciplines, providing a comprehensive and holistic view of silence and the political.

From the Sayings to the Gospels - Christopher Tuckett 2014-05-27

The essays by Christopher Tuckett collected in this volume represent a number of studies, published over a period of 30 years, seeking to throw light on the way in which Jesus traditions were developed and used in early Christianity. Many of the essays are concerned in one way or another with the Sayings Source Q, discussing its existence, its possible pre-history, and key features of the material it contains. Further essays

look at Jesus traditions in Paul and in the Gospel of Thomas. In a final section the author focuses on the individual synoptic gospels, with a number of studies concerned with Christology, especially the use of the term Son of Man. These essays show that early Christian traditions about Jesus can provide valuable information not only about Jesus but also about how early Christians used these traditions to relate to their own situations and contexts.

Christ, Providence and History - Mike Higton 2004-10-12

This book is the first full study of the whole of Hans Frei's work. Higton draws on a wide range of unpublished material in the Frei archives to present a comprehensive, fresh, and original interpretation of Frei's theology. He places Frei's well-known work on biblical hermeneutics firmly in the context of his theological wrestling with Barth and of the dominant traditions of Western Protestant theology.

Inequality, Identity, and the Politics of Northern Ireland - Curtis C. Holland 2022-07-26

Utilizing a critical sociological perspective, this book examines how overlapping class, gender, and spatial inequalities within and across Unionist and Nationalist communities shape processes of identity formation and party politics in Northern Ireland and implications of such processes on community-based peacebuilding and conflict transformation.

Gender and Genre in Ethnographic Writing - Elisabeth Tauber 2021-06-07

This book provides new insights into an intense and long-standing debate on women, gender, and masculinity with an explicit focus on ethnographic writing. The six contributors to this book investigate and discuss the multiple connections between ethnographic writing and gender in both the history of anthropology and contemporary anthropology, underlining problems, potentialities, stereotypes, experiments, continuities, changes, and challenges. Building on a prologue by two Malinowski grandchildren and an exploration of the role that Bronislaw Malinowski's first wife, Elsie Masson, played in his literary presentation, the anthropologists collected here problematize writing gender and gendered writing in ethnography, revealing how these twin themes touch the history of the discipline itself and the classics of anthropology. Has the legacy of *Writing Culture* and *Women Writing Culture* obviated the need to consider gender in writing? Or could it be that the very mechanics of ethnographic writing are still imbued with hidden gendered divisions of labor? Following the editors' extensive overview of the question, the contributing authors tackle gender and ethnographic writing from various vantages: with a view to the past, but also to the influence of previous feminist critiques in the present, and with accounts of the issues they themselves have faced and the solutions they have devised.

Dreaming Equality - Robin E. Sheriff 2001

Robin E. Sheriff spent twenty months in a primarily black shantytown in Rio de Janeiro, studying the inhabitants' views of race and racism. How, she asks, do poor African Brazilians experience and interpret racism in a country where its very existence tends to be publicly denied? How is racism talked about privately in the family and publicly in the community--or is it talked about at all?

Trauma, Experience and Narrative in Europe after World War II - Ville Kivimäki 2021-12-03

This book promotes a historically and culturally sensitive understanding of trauma during and after World War II. Focusing especially on Eastern and Central Europe, its contributors take a fresh look at the experiences of violence and loss in 1939-45 and their long-term effects in different cultures and societies. The chapters analyze traumatic experiences among soldiers and civilians alike and expand the study of traumatic violence beyond psychiatric discourses and treatments. While acknowledging the problems of applying a present-day medical concept to the past, this book makes a case for a cultural, social and historical study of trauma. Moving the focus of historical trauma studies from World War I to World War II and from Western Europe to the east, it breaks new ground and helps to explain the troublesome politics of memory and trauma in post-1945 Europe all the way to the present day. This book is an outcome of a workshop project 'Historical Trauma Studies,' funded by the Joint Committee for the Nordic Research

Councils in the Humanities and Social Sciences (NOS-HS) in 2018-20. Chapters 4, 5 and 6 are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Transitional Justice and the 'Disappeared' of Northern Ireland - Lauren Dempster 2019-06-11

This book employs a transitional justice lens to address the 'disappearances' that occurred during the Northern Ireland conflict - or 'Troubles' - and the post-conflict response to these 'disappearances.' Despite an extensive literature around 'dealing with the past' in Northern Ireland, as well as a substantial body of scholarship on 'disappearances' in other national contexts, there has been little scholarly scrutiny of 'disappearances' in post-conflict Northern Ireland. Although the Good Friday Agreement brought relative peace to Northern Ireland, no provision was made for the establishment of some form of overarching truth and reconciliation commission aimed at comprehensively addressing the legacy of violence. Nevertheless, a mechanism to recover the remains of the 'disappeared' - the Independent Commission for the Location of Victims' Remains (ICLVR) - was established, and has in fact proven to be quite effective. As a result, the reactions of key constituencies to the 'disappearances' can be used as a prism through which to comprehensively explore issues of relevance to transitional justice scholars and practitioners. Pursuing an interdisciplinary approach, and based on extensive empirical research, this book provides a multifaceted exploration of the responses of these constituencies to the practice of 'disappearing.' It engages with transitional justice themes including silence, memory, truth, acknowledgement, and apology. Key issues examined include the mobilisation efforts of families of the 'disappeared,' efforts by a (former) non-state armed group to address its legacy of violence, the utility of a limited immunity mechanism to incentivise information provision, and the interplay between silence and memory in the shaping of a collective, societal understanding of the 'disappeared.'

Oakeshott's Skepticism, Politics, and Aesthetics - Eric S. Kos 2022-01-02

Moving Away from Silence - Thomas Turino 2010-02-15

Increasingly popular in the United States and Europe, Andean panpipe and flute music draws its vitality from the traditions of rural highland villages and of rural migrants who have settled in Andean cities. In *Moving Away from Silence*, Thomas Turino describes panpipe and flute traditions in the context of this rural-urban migration and the turbulent politics that have influenced Peruvian society and local identities throughout this century. Turino's ethnography is the first large-scale study to concentrate on the pervasive effects of migration on Andean people and their music. Turino uses the musical traditions of Conima, Peru as a unifying thread, tracing them through the varying lives of Conimeos in different locales. He reveals how music both sustains and creates meaning for a people struggling amid the dramatic social upheavals of contemporary Peru. *Moving Away from Silence* contains detailed interpretations based on comparative field research of Conimeo musical performance, rehearsals, composition, and festivals in the highlands and Lima. The volume will be of great importance to students of Latin American music and culture as well as ethnomusicological and ethnographic theory and method.

Sounds of Modern History - Daniel Morat 2014-09-01

Long ignored by scholars in the humanities, sound has just begun to take its place as an important object of study in the last few years. Since the late 19th century, there has been a paradigmatic shift in auditory cultures and practices in European societies. This change was brought about by modern phenomena such as urbanization, industrialization and mechanization, the rise of modern sciences, and of course the emergence of new sound recording and transmission media. This book contributes to our understanding of modern European history through the lens of sound by examining diverse subjects such as performed and recorded music, auditory technologies like the telephone and stethoscope, and the ambient noise of the city.

History: A Very Short Introduction - John H. Arnold 2000-02-24

There are many stories we can tell about the past, and we are not, perhaps, as free as we might imagine in our choice of which stories to tell, or where those stories end. John Arnold's *Very Short Introduction* is a stimulating essay about how we study and understand history. The book begins by inviting us to think about various questions provoked by

our investigation of history, and explores the ways these questions have been answered in the past. Concepts such as causation, interpretation, and periodization, are introduced by means of concrete examples of how historians work, giving the reader a sense of the excitement of discovering not only the past, but also ourselves. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Archives, Documentation, and Institutions of Social Memory -

Francis Xavier Blouin 2007-08-02

As sites of documentary preservation rooted in various national and social contexts, artifacts of culture, and places of uncovering, archives provide tangible evidence of memory for individuals, communities, and states, as well as defining memory institutionally within prevailing political systems and cultural norms. By assigning the prerogatives of record keeper to the archivist, whose acquisition policies, finding aids, and various institutionalized predilections mediate between scholarship and information, archives produce knowledge, legitimize political systems, and construct identities. Far from being mere repositories of data, archives actually embody the fragments of culture that endure as signifiers of who we are, and why. The essays in *Archives, Documentation, and Institutions of Social Memory* conceive of archives not simply as historical repositories but as a complex of structures, processes, and epistemologies situated at a critical point of the intersection between scholarship, cultural practices, politics, and technologies.

How to Disappear - Akiko Busch 2019-02-12

It is time to reevaluate the merits of the inconspicuous life, to search out some antidote to continuous exposure, and to reconsider the value of going unseen, undetected, or overlooked in this new world. Might invisibility be regarded not simply as refuge, but as a condition with its own meaning and power? The impulse to escape notice is not about complacent isolation or senseless conformity, but about maintaining identity, autonomy, and voice. In our networked and image-saturated lives, the notion of disappearing has never been more alluring. Today, we are relentlessly encouraged, even conditioned, to reveal, share, and promote ourselves. The pressure to be public comes not just from our peers, but from vast and pervasive technology companies that want to profit from patterns in our behavior. A lifelong student and observer of the natural world, Busch sets out to explore her own uneasiness with this arrangement, and what she senses is a widespread desire for a less scrutinized way of life—for invisibility. Writing in rich painterly detail about her own life, her family, and some of the world's most exotic and remote places, she savors the pleasures of being unseen. Discovering and dramatizing a wonderful range of ways of disappearing, from virtual reality goggles that trick the wearer into believing her body has disappeared to the way Virginia Woolf's Mrs. Dalloway finds a sense of affiliation with the world around her as she ages, Busch deliberates on subjects new and old with equal sensitivity and incisiveness. *How to Disappear* is a unique and exhilarating accomplishment, overturning the dangerous modern assumption that somehow fame and visibility equate to success and happiness. Busch presents a field guide to invisibility, reacquainting us with the merits of remaining inconspicuous, and finding genuine alternatives to a life of perpetual exposure. Accessing timeless truths in order to speak to our most urgent contemporary problems, she inspires us to develop a deeper appreciation for personal privacy in a vast and intrusive world.

A Social History of Museums - Kenneth Hudson 1975-06-18

Secrecy and Silence in the Research Process - Roisin Ryan-Flood 2013-05-13

Feminist research is informed by a history of breaking silences, of demanding that women's voices be heard, recorded and included in wider intellectual genealogies and histories. This has led to an emphasis

on voice and speaking out in the research endeavour. Moments of secrecy and silence are less often addressed. This gives rise to a number of questions. What are the silences, secrets, omissions and political consequences of such moments? What particular dilemmas and constraints do they represent or entail? What are their implications for research praxis? Are such moments always indicative of voicelessness or powerlessness? Or may they also constitute a productive moment in the research encounter? Contributors to this volume were invited to reflect on these questions. The resulting chapters are a fascinating collection of insights into the research process, making an important contribution to theoretical and empirical debates about epistemology, subjectivity and identity in research. Researchers often face difficult dilemmas about who to represent and how, what to omit and what to include. This book explores such questions in an important and timely collection of essays from international scholars.

The Silent Feminine - Araceli Colín Cabrera 2022-03-15

Blanks, Space, Print, and Void in English Renaissance Literature - Jonathan Sawday 2023-07-20

Blanks, Space, Print, and Void in English Renaissance Literature is an inquiry into the empty spaces encountered not just on the pages of printed books in c.1500-1700, but in Renaissance culture more generally. The book argues that print culture in the sixteenth and seventeenth centuries helped to foster the modern idea of the 'gap' (where words, texts, images, and ideas are constructed as missing, lost, withheld, fragmented, or perhaps never devised in the first place). It re-imagines how early modern people reacted not just to printed books and documents of many different kinds, but also how the very idea of emptiness or absence began to be fashioned in a way which still surrounds us. Jonathan Sawday leads the reader through the entire landscape of early modern print culture, discussing topics such as: space and silence; the exploration of the vacuum; the ways in which race and racial identity in early modern England were constructed by the language and technology of print; blackness and whiteness, together with lightness, darkness, and sightlessness; cartography and emptiness; the effect of typography on reading practices; the social spaces of the page; gendered surfaces; hierarchies of information; books of memory; pages constructed as waste or vacant; the genesis of blank forms and early modern bureaucracy; the political and devotional spaces of printed books; the impact of censorship; and the problem posed by texts which lack endings or conclusions. The book itself ends by dwelling on blank or empty pages as a sign of human mortality. Sawday pays close attention to the writings of many of the familiar figures in English Renaissance literary culture - Sidney, Shakespeare, Donne, Jonson, and Milton, for example - as well as introducing readers to a host of lesser-known figures. The book also discusses the work of numerous women writers from the period, including Aphra Behn, Ann Bradstreet, Margaret Cavendish, Lady Jane Gray, Lucy Hutchinson, Æmelia Lanyer, Isabella Whitney, and Lady Mary Wroth.

Silence - Jane Brox 2019

Offers a history of silence as a powerful shaper of the human mind, specifically in Eastern State Penitentiary and the monastic world of Medieval Europe.

In Pursuit of Silence - George Prochnik 2010-04-06

A brilliant, far-reaching exploration of the frontiers of noise and silence, and the growing war between them. Between iPods, music-blasting restaurants, earsplitting sports stadiums, and endless air and road traffic, the place for quiet in our lives grows smaller by the day. In *Pursuit of Silence* gives context to our increasingly desperate sense that noise pollution is, in a very real way, an environmental catastrophe. Traveling across the country and meeting and listening to a host of incredible characters, including doctors, neuroscientists, acoustical engineers, monks, activists, educators, marketers, and aggrieved citizens, George Prochnik examines why we began to be so loud as a society, and what it is that gets lost when we can no longer find quiet. *Golden: The Power of Silence in a World of Noise* - Justin Talbot-Zorn 2022-05-05

What if the most serious personal and global challenges won't be solved with more thinking or talking? The world is louder than ever. It's not just the noise in our ears, but also the noise on our screens and in our heads. 'Silence is golden,' the adage goes. But how do we find it in times like these? Justin Zorn and Leigh Marz take us on an unlikely journey exploring why silence is essential for physical health, mental clarity, professional fulfilment, nourishing relationships, ecological sustainability, and vibrant community. Drawing on lessons from neuroscience, philosophy, business, politics, activism, and the arts, *Golden* teaches us how to go beyond the ordinary rules and offers tools of mindfulness to help individuals, organisations and whole societies dial down the noise and reclaim pristine quiet. Quietly profound and constantly surprising, *Golden* is a field guide to finding silence.

A History of Silence - Alain Corbin 2018-05-29

Silence is not simply the absence of noise. It is within us, in the inner citadel that great writers, thinkers, scholars and people of faith have cultivated over the centuries. It characterizes our most intimate and sacred spaces, from private bedrooms to grand cathedrals - those vast reservoirs of silence. Philosophers and novelists have long sought solitude and inspiration in mountains and forests. Yet despite the centrality of silence to some of our most intense experiences, the transformations of the twentieth century have gradually diminished its value. Today, raucous urban spaces and a continual bombardment from different media pressure us into constant activity. We are losing a sense of our inner selves, a process that is changing the very nature of the individual. This book rediscovers the wonder of silence and, with this, a richer experience of life. With his predilection for the elusive, Corbin calls us to listen to another history.

Silence - Diarmaid MacCulloch 2013-09-12

A provocative meditation on the role of silence in Christian tradition by the New York Times bestselling author of *Christianity We Live In* a world dominated by noise. Religion is, for many, a haven from the clamor of everyday life, allowing us to pause for silent contemplation. But as Diarmaid MacCulloch shows, there are many forms of religious silence, from contemplation and prayer to repression and evasion. In his latest work, MacCulloch considers Jesus's strategic use of silence in his confrontation with Pontius Pilate and traces the impact of the first mystics in Syria on monastic tradition. He discusses the complicated fate of silence in Protestant and evangelical tradition and confronts the more sinister institutional forms of silence. A groundbreaking book by one of our greatest historians, *Silence* challenges our fundamental views of spirituality and illuminates the deepest mysteries of faith.

Social Epistemology - Steve Fuller 2002

This is the book that launched the research program of social epistemology, which has fuelled imaginations and provoked debates across many disciplines around the world. Its opening question remains as pressing as ever: How should knowledge production be organised. The second edition contains a substantial new introduction, in which Fuller reflects on social epistemology's place in the history of analytic and continental epistemology and discusses the inspiration he has drawn from a wide variety of fields in the humanities and social sciences. It also includes a spirited attack on alternative philosophical groundings for social epistemology and a detailed response to the standard criticism that social epistemology has received from realist philosophers and natural scientists during the "Science Wars." In *Social Epistemology* Fuller seeks to reconcile normative philosophy of science and empirical sociology of knowledge. He reinterprets key problems in the philosophy of science, such as realism, the nature of objectivity, the demarcation of science from other disciplines, and the nature of our knowledge of other times and places. In the course of this reinterpretation, which draws on concepts and arguments from many branches of the humanities and social sciences, Fuller considers such philosophically neglected questions

as: How is the burden of proof determined in science? On what basis is the historian licensed to say that a "consensus" has been reached on a scientific claim? What implications do our patently imperfect means of linguistic transmission have for the notion that science "retains and accumulates" knowledge? Finally, Fuller proposes a course of "Knowledge Policy Studies" designed to make the theory of knowledge a branch of political theory and thereby to hasten the evolution of the epistemologist into a knowledge policy maker. In its new edition, the book remains a provocative contribution to the debate on the production, dissemination, and interpretation of knowledge in the sciences. *Crusoe's Footprints* - Patrick Brantlinger 2013-02-01

"Cultural Studies" has emerged in British and American higher education as a movement that challenges the traditional humanities and social science disciplines. Influenced by the New Left, feminism, and poststructuralist literary theory, cultural studies seeks to analyze everyday life and the social construction of "subjectivities." *Crusoe's Footprints* encompasses the movement of many colleges and universities in the 1960s towards such interdisciplinary and "radical" programs as American Studies, Women's Studies, and Afro-American Studies. Brantlinger also examines the role of feminist criticism which has been particularly crucial in both Britain and the U.S.

Music, Politics, and Violence - Susan Fast 2012-10-30

Music and violence have been linked since antiquity in ritual, myth, and art. Considered together they raise fundamental questions about creativity, discourse, and music's role in society. The essays in this collection investigate a wealth of issues surrounding music and violence—issues that cross political boundaries, time periods, and media—and provide cross-cultural case studies of musical practices ranging from large-scale events to regionally specific histories. Following the editors' substantive introduction, which lays the groundwork for conceptualizing new ways of thinking about music as it relates to violence, three broad themes are followed: the first set of essays examines how music participates in both overt and covert forms of violence; the second section explores violence and reconciliation; and the third addresses healing, post-memorials, and memory. *Music, Politics, and Violence* affords space to look at music as an active agent rather than as a passive art, and to explore how music and violence are closely—and often uncomfortably—entwined. CONTRIBUTORS include Nicholas Attfield, Catherine Baker, Christina Baade, J. Martin Daughtry, James Deaville, David A. McDonald, Kevin C. Miller, Jonathan Ritter, Victor A. Vicente, and Amy Lynn Wlodarski.

Silence and Silencing in Psychoanalysis - Aleksandar Dimitrijević 2020-11-16

This book is the first comprehensive treatment in recent decades of silence and silencing in psychoanalysis from clinical and research perspectives, as well as in philosophy, theology, linguistics, and musicology. The book approaches silence and silencing on three levels. First, it provides context for psychoanalytic approaches to silence through chapters about silence in phenomenology, theology, linguistics, musicology, and contemporary Western society. Its central part is devoted to the position of silence in psychoanalysis: its types and possible meanings (a form of resistance, in countertransference, the foundation for listening and further growth), based on both the work of the pioneers of psychoanalysis and on clinical case presentations. Finally, the book includes reports of conversation analytic research of silence in psychotherapeutic sessions and everyday communication. Not only are

original techniques reported here for the first time, but research and clinical approaches fit together in significant ways. This book will be of interest to all psychologists, psychoanalysts, and social scientists, as well

as applied researchers, program designers and evaluators, educators, leaders, and students. It will also provide valuable insight to anyone interested in the social practices of silence and silencing, and the roles these play in everyday social interactions.
