Recent Advances in Glucocorticoid Receptor Action - A. Cato 2013-04-17
The long-term use of glucocorticoids is associated with several deleterious effects. Attempts to separate the beneficial from the adverse effects of these compounds have met with varying degrees of difficulty. The discovery of distinct modes of action of the glucocorticoid receptor, the protein that mediates glucocorticoid action has opened up many possibilities for improving glucocorticoid therapy. This book provides an in-depth overview of the molecular actions of the glucocorticoid receptor and discusses the chances of an imminent identification of selective glucocorticoid agonists. Such compounds should fulfill all the criteria of a glucocorticoid but should lack the sideeffects so far linked with classical glucocorticoids.

Pidgins and Creoles - Jacques Arends 1994-12-20

This introduction to the linguistic study of pidgin and creole languages is clearly designed as an introductory course book. It does not demand a

high level of previous linguistic knowledge. Part I: General Aspects and Part II: Theories of Genesis constitute the core for presentation and discussion in the classroom, while Part III: Sketches of Individual Languages (such as Eskimo Pidgin, Haitian, Saramaccan, Shaba Swahili, Fa d'Ambu, Papiamentu, Sranan, Berbice Dutch) and Part IV: Grammatical Features (such as TMA particles and auxiliaries, noun phrases, reflexives, serial verbs, fronting) can form the basis for further exploration. A concluding chapter draws together the different strands of argumentation, and the annotated list provides the background information on several hundred pidgins, creoles and mixed languages. Diversity rather than unity is taken to be the central theme, and for the first time in an introduction to pidgins and creoles, the Atlantic creoles receive the attention they deserve. Pidgins are not treated as necessarily an intermediate step on the way to creoles, but as linguistic entities in their own right with their own characteristics. In addition to pidgins, mixed languages are treated in a separate chapter. Research on pidgin and creole languages during the past decade has yielded an abundance of uncovered material and new insights. This introduction, written jointly by the creolists of the University of Amsterdam, could not have been written without recourse to this new material.

LE GRAND DICTIONNAIRE HISTORIQUE, OU LE MÉLANGE CURIEUX DE L'HISTOIRE SACRÉE ET PROFANE - Louis Moréri 1702

Mammals of South America, Volume 2 - James L. Patton 2015-03-09

The second installment in a planned three-volume series, this book provides the first substantive review of South American rodents published in over fifty years. Increases in the reach of field research and the variety of field survey methods, the introduction of bioinformatics, and the explosion of molecular-based genetic methodologies have all contributed to the revision of many phylogenetic relationships and to a doubling of the recognized diversity of South American rodents. The largest and most diverse mammalian order on Earth—and an increasingly threatened one—Rodentia is also of great ecological importance, and Rodents is both a timely and exhaustive reference on these ubiquitous creatures. From spiny mice and guinea pigs to the oversized capybara, this book covers all native rodents of South America, the continental islands of Trinidad and Tobago, and the Caribbean Netherlands off the Venezuelan coast. It includes identification keys and descriptions of all genera and species; comments on distribution; maps of localities; discussions of subspecies; and summaries of natural, taxonomic, and nomenclatural history. Rodents also contains a detailed list of cited literature and a separate gazetteer based on confirmed identifications from museum vouchers and the published literature.

Children's Literature in Translation - Jan Van Coillie 2014-07-16

Children's classics from Alice in Wonderland to the works of Astrid Lindgren, Roald Dahl, J.K. Rowling and Philip Pullman are now generally recognized as literary achievements that from a translator's point of view are no less demanding than 'serious' (adult) literature. This volume attempts to explore the various challenges posed by the translation of children's literature and at the same time highlight some of the strategies that translators can and do follow when facing these challenges. A variety of translation theories and concepts are put to critical use, including Even-Zohar's polysystem theory, Toury's concept of norms, Venuti's views on foreignizing and domesticating translations and on the translator's (in)visibility, and Chesterman's prototypical approach. Topics include the ethics of translating for children, the importance of child(hood) images, the 'revelation' of the translator in prefaces, the role of translated children's books in the establishment of literary canons, the status of translations in the former East Germany; questions of taboo and censorship in the translation of adolescent novels, the collision of norms in different translations of a Swedish children's classic, the handling of 'cultural intertextuality' in the Spanish translations of contemporary British fantasy books, strategies for translating cultural markers such as juvenile expressions, functional shifts caused by different translation strategies dealing with character names, and complex translation strategies used in dealing with the dual audience in Hans Christian Andersen's fairy tales and in Salman Rushdie's Haroun and the Sea of Stories.

Contemporary Architects - Ann Lee Morgan 1987

" To strengthen the contemporary focus of this volume, we have added about forty architects and have deleted some whose activity ceased before World War II. In making these decisions, we have been assisted by an Advisory Board. As in the first volume, we have continued to define the word "architect" very broadly, so as to include planners, theorists, structural engineers, and landscape architects whose work seems to be central to the enterprise of creating habitable spaces in our day." -- Editor's note.

Repertoires and Choices in African Languages - Friederike Lüpke
2013-05-28

Most African languages are spoken by communities as one of several languages present on a daily basis. The persistence of multilingualism and the linguistic creativity manifest in the playful use of different languages are striking, especially against the backdrop of language death and expanding monolingualism elsewhere in the world. The effortless mastery of several languages is disturbing, however, for those who take essentialist perspectives that see it as a problem rather than a resource, and for the dominating, conflictual, sociolinguistic model of multilingualism. This volume investigates African minority languages in the context of changing patterns of multilingualism, and also assesses the status of African languages in terms of existing influential vitality scales. An important aspect of multilingual praxis is the speakers' agency in making choices, their repertoires of registers and the multiplicity of language ideology associated with different ways of speaking. The volume represents a new and original contribution to the ethnography of speaking of multilingual practices and the cultural ideas associated with them.

Oral Literature in Africa - Ruth Finnegan 2012-09

Ruth Finnegan's *Oral Literature in Africa* was first published in 1970, and since then has been widely praised as one of the most important books in its field. Based on years of fieldwork, the study traces the

history of storytelling across the continent of Africa. This revised edition makes Finnegan's ground-breaking research available to the next generation of scholars. It includes a new introduction, additional images and an updated bibliography, as well as its original chapters on poetry, prose, "drum language" and drama, and an overview of the social, linguistic and historical background of oral literature in Africa. This book is the first volume in the World Oral Literature Series, an ongoing collaboration between OBP and World Oral Literature Project. A free online archive of recordings and photographs that Finnegan made during her fieldwork in the late 1960s is hosted by the World Oral Literature Project (<http://www.oralliterature.org/collections/rfinnegan001.html>) and can also be accessed from publisher's website.

Introduction to Digital Audio Coding and Standards - Marina Bosi
2012-12-06

Introduction to Digital Audio Coding and Standards provides a detailed introduction to the methods, implementations, and official standards of state-of-the-art audio coding technology. In the book, the theory and implementation of each of the basic coder building blocks is addressed. The building blocks are then fit together into a full coder and the reader is shown how to judge the performance of such a coder. Finally, the authors discuss the features, choices, and performance of the main state-of-the-art coders defined in the ISO/IEC MPEG and HDTV standards and in commercial use today. The ultimate goal of this book is to present the reader with a solid enough understanding of the major issues in the theory and implementation of perceptual audio coders that they are able to build their own simple audio codec. There is no other source available where a non-professional has access to the true secrets of audio coding.

France in Black Africa - Francis Terry McNamara 1989

When, in 1960, France granted independence to its colonies in West and Central Africa-an empire covering an area the size of the contiguous United States-the French still intended to retain influence in Africa. Through a system of accords with these newly independent African nations, based upon ties naturally formed over the colonial years, France has succeeded for three decades in preserving its position in African affairs. The course of Franco-African relations in the near future, though, is less than certain. In this book, Ambassador Francis Terry McNamara outlines France's acquisition and administration of its Black African empire and traces the former colonies' paths to independence. Drawing upon that background, the ambassador examines the structure of post-independence Franco-African relations and recent strains on those relations, especially African economic crises and the French tendency to focus on Europe. Because of those strains, he suggests, France alone may be unable to support its former dependencies much longer. He believes that long-term solutions to African problems will have to involve international organizations like the World Bank and International Monetary Fund as well as other nations such as the United States and France's European partners. -- From Foreword.

Family Violence and Criminal Justice - Brian P. Payne 2014-09-25

The historical context of family violence is explored, as well as the various forms of violence, their prevalence in specific stages of life, and responses to it made by the criminal justice system and other agencies. The linkage among child abuse, partner violence and elder abuse is scrutinized, and the usefulness of the life-course approach is couched in terms of its potential effect on policy implications; research methods that recognize the importance of life stages, trajectories, and transitions; and crime causation theories that can be enhanced by it.

Rural societies in the face of climatic and environmental changes in West Africa - Collectif 2020-06-09

The future of West Africa depends on the capacity of its agriculture to ensure the food security of the population, which should double in the next 20 years, while facing up to the new risks resulting from climate warming. Indeed, the changes in temperature and precipitations already operating and that should become more marked will have serious effects on agricultural production and water resources in this part of Africa in the near future. One of the keys to meeting this new challenge is the

adaptation of rural societies to climate risks. To gain better knowledge of the potential, processes and barriers, this book analyses recent and ongoing trends in the climate and the environment and examines how rural societies perceive and integrate them: what are the impacts of these changes, what vulnerabilities are there but also what new opportunities do they bring? How do the populations adapt and what innovations do they implement—while the climate-induced effects interact with the social, political, economic and technical changes that are in motion in Africa? By associating French and African scientists (climatologists, agronomists, hydrologists, ecologists, demographers, geographers, anthropologists, sociologists and others) in a multidisciplinary approach, the book makes a valuable contribution to better anticipation of climatic risks and the evaluation of African societies to stand up to them.

The Changing South Pacific - Serge Tcherkézoff 2008-12-01

The texts collected in this volume take an anthropological approach to the variety of contemporary societal problems which confront the peoples of the contemporary South Pacific: religious revival, the sociology of relations between local groups, regions and nation-States, the problem of culture areas, the place of democracy in the transition of States founded on sacred chiefdoms, the role of ceremonial exchanges in a market economy, and so forth. Each chapter presents a society seen from a specific point of view, but always with reference to the issue of collective identity and its confrontation with history and change. The collection thus invites the reader to understand how the inhabitants of these societies seek to affirm both an individual identity and a sense of belonging to the contemporary world. In doing so, it informs the reader about the contemporary realities experienced by the inhabitants of the

South Pacific, with a view to contributing to an intercultural dialogue between the reader and these inhabitants.

Children's Literature in Translation - Jan Van Coillie 2020-10-30

For many of us, our earliest and most meaningful experiences with literature occur through the medium of a translated children's book. This volume focuses on the complex interplay that happens between text and context when works of children's literature are translated: what contexts of production and reception account for how translated children's books come to be made and read as they are? How are translated children's books adapted to suit the context of a new culture? Spanning the disciplines of Children's Literature Studies and Translation Studies, this book brings together established and emerging voices to provide an overview of the analytical, empirical and geographic richness of current research in this field and to identify and reflect on common insights, analytical perspectives and trajectories for future interdisciplinary research. This volume will appeal to an interdisciplinary audience of scholars and students in Translation Studies and Children's Literature Studies and related disciplines. It has a broad geographic and cultural scope, with contributions dealing with translated children's literature in the United Kingdom, the United States, Ireland, Spain, France, Brazil, Poland, Slovenia, Hungary, China, the former Yugoslavia, Sweden, Germany, and Belgium.
