**Contracts in Context** - Nadelle Grossman 2023-01-31

Buy a new version of this textbook and receive access to the Connected eBook with Study Center on CasebookConnect, including: lifetime access to the online ebook with highlight, annotation, and search capabilities; practice questions from your favorite study aids; an outline tool and other helpful resources. Connected eBooks provide what you need most to be successful in your law school classes. Contracts in Context: From Transaction to Litigation, covers contract law from a

transactional perspective, including: A contract's structure and terms, Contract formation legal requirements, andThe negotiation, drafting, and performance of contracts, as well as the litigation of contracts, including a review of a contract's interpretation, enforcement, and remedies. Contracts in Context: From Transaction to Litigation explores why parties enter into contracts, how written contracts are customarily structured, and how and why parties use contract design and terms to achieve their goals. The book is unique because it introduces students to customary contract provisions, and walks students through the lifecycle of a contract, including (i) pre-formation activities such as due diligence, preliminary negotiations, and contract drafting, (ii) contract formation, performance, and amendment, and (iii) dispute activities, such as interpretation, enforcement, defenses, and remedies. The book explores how parties "contract around" default requirements of the law, in addition to satisfying mandatory aspects of the law, through contracts. The book describes the role of both the transactional lawyer and litigator in working with contracts. It presents much of the material in expository fashion rather than only or primarily through cases. This allows students to learn the doctrine more easily. It also allows for more time on applying the law to new situations. The book challenges students to apply contract law through transactional and litigation practice and simulation problems, which are adaptable to the classroom and asynchronous setting. New to the Second Edition: Additional materials covering the professional identities of attorneys, in addition to their professional responsibilities. Revised practice problems for students to apply the contract law doctrine and private ordering principles they have learned. Expanded discussion of the role of contracts and contract law in widening and correcting power imbalances. Several new cases to enhance the learning experience. Professors and students will benefit from: Material presented on contract design and terms so that students understand how contracts are used in practice by businesspersons and how contract law supports this private ordering. Many examples of contract language to demonstrate why and how parties customize contracts to further their goals. Discussion of the role of the transactional lawyer in working with contracts so that students can begin to develop important transactional skills and wrestle with some of the professional dilemmas transactional lawyers frequently face. Explanations of contract law and other material presented through expository text to give students a more comprehensive and clearer view of what limits the law imposes on their private ordering through contracts and which requirements can be contracted around. A large set of problems, many of which involve tasks assigned to new transactional lawyers and litigators, to allow students to learn the material through active participation and critical thinking.

**Cases, Materials and Text on Contract Law** - Hugh Beale 2019-02-28

This is the third edition of the widely acclaimed and successful casebook on contract in the Ius Commune series, developed to be used throughout Europe and beyond by anyone who teaches, learns or practises law with a comparative or European perspective. The book contains leading cases, legislation and other materials from English, French and German law as the main representatives of the legal traditions within Europe, as well as EU legislation and case law and extracts from the Principles of European Contract Law. Comparisons are also made to other international restatements such as the Vienna Sales Convention, the UNIDROIT Principles of International Commercial Contracts, the Draft Common Frame of Reference and so on. Materials are chosen and ordered so as to foster comparative study, complemented with annotations and comparative overviews prepared by a multinational team. The third edition includes many new developments at the EU level (including the ill-fated proposal for a Common European Sales Law and further developments linked to the digital single market) and in national laws, in particular the major reform of the French Code civil in 2016 and 2018, the UK's Consumer Rights Act 2015 and new cases. The principal subjects covered in this book include: An overview of EU legislation and of soft law principles, and their interrelation with national law The distinctions between contract and property, tort and restitution Formation and pre-contractual liability Validity, including duties of disclosure Interpretation and contents; performance and non-

performance Remedies Supervening events Third parties.

**The Interaction of Contract Law and Tort and Property Law in Europe** - Christian von Bar 2004-01-01

Against the background of the creation of an EU-wide frame of reference for private law relevant to the Common Market, this study, which was requested by the EU Commission, analyses the dovetailing between contract and tort law on the one hand, and between contract and property law on the other. The study examines the legal orders of almost all the Member States of the EU, illustrates the differences between contractual and non-contractual liability and evaluates the different systems of the transfer of property, of movable and immovable securities as well as trust law. The study comes to the conclusion that the intensive considerations on the creation of a model-law in the area of European private law do not allow these thoughts to be limited to contract law. Such a limitation to the scope of the regarding of this area would probably cause more problems than it would solve, or at any rate not do justice to the needs of the Common Market.

**Management** - Ricky W. Griffin 2016-01-14

MANAGEMENT, 12E, takes a functional, skills-based approach to the process of management with a focus on active planning, leading, organizing and controlling. **Introduction to Construction Contract Management** - Brian Greenhalgh 2016-08-05

This book is an introduction to construction contract administration and management, covering the delivery and execution stage of a construction project and the various issues which the contract administrator needs to proactively manage. It can therefore be used as a contract administrator's resource book covering what needs to be done (and why) to keep a construction project on track from a commercial and contractual perspective. It is particularly appropriate for students and new practitioners from varied construction professions and whilst it covers domestic (UK) projects, it will be particularly useful for those studying and working on international projects where terminology, procedures and legal systems may differ from the UK. The content is split into four parts and is subdivided into easy-to-read chapters replicating the timeline of a project during the construction stage: Part A covers initiating the construction stage, project delivery mechanisms, contract administration and health and safety management;

Part B covers managing the construction stage, contractor performance and relationship management; Part C covers finalising the construction stage, project completion and close-out; Part D covers claims and disputes. Introduction to Construction Contract Management will be particularly useful for students enrolled on global construction programmes together with international distance learning students and non-cognate graduates starting out on an international career in construction contract administration and quantity surveying.
