From Pekin to Calais by Land - Harry De Windt 1889

Pierre Bonnard - Pierre Bonnard 2009

"The vibrant late paintings of Pierre Bonnard (1867-1947) are considered by many to be among his finest achievements. Working in a small converted bedroom of his villa in the south of France, Bonnard suffused his late canvases with radiant Mediterranean light and dazzling color.

Although his subjects were close at hand-usually everyday scenes taken from his immediate surroundings, such as the dining room table being set for breakfast, or a jug of flowers perched on the mantelpiece - Bonnard rarely painted from life. Instead, he preferred to make pencil sketches in small diaries and then rely on these, along with his memory, once in the studio." "This volume, which accompanies the first exhibition to focus on the interior and related still-life imagery from the last decades of Bonnard's

long career, presents more than seventy-five paintings, drawings, and works on paper, many of them rarely seen in public and in some cases, little known. Although Bonnard's legacy may be removed from the succession of trends that today we consider the foundation of modernism, his contribution to French art in the early decades of the twentieth century is far more profound than history has generally acknowledged. In their insightful essays and catalogue entries the authors bring fresh critical perspectives to the ongoing reappraisal of Bonnard's reputation and to his place within the narrative of twentieth-century art."--Jacket

Advertising as Multilingual Communication - H. Kelly-Holmes 2016-01-11

Advertising has traditionally communicated messages to consumers with strong local and national identities. However, increasingly, products, producers, advertising agencies and media are becoming internationalized. In the development of strategies that appeal to a large multinational consumer base, advertising language takes on new 'multilingual' features. The author explores the role of advertising language in this new globalized environment, from a communicative theory point of view, as well as from a close linguistic analysis of some major advertising campaigns within a multicultural and multilingual marketplace.

Cancer, Stress, and Death - Stacey B. Day 2013-06-29

This book has been well received in many places and in many countries. It was awarded a ranking in the top ten publications on behavioral medicine in the year that it first appeared. When, in 1977, we began to fit the components of *Cancer, Stress, and Death* together, the established medical view was that each subject represented a different discipline, and that to integrate fields so diverse in information content was to seek to achieve a synthesis beyond reasonable limits. Had we been required to concern ourselves with the knowledge of each component in its entirety, this might have been so, but our concern, of course, was to integrate only those items of knowledge in any one field that could bear upon the field of interest of another. Moreover, we were concerned that physicians and scientists take account of the inner forces that shape motivation and individual behavior, as well as the cultural identity of individuals, and we

hoped that the biopsychosocial way in which we believed would gain ground and win support. Now, with need for a second edition, one can hardly conceive of not bringing together diverse contributions in one volume. Such syntheses as we have made clearly confirm that one can arrive at several levels of understanding of human situations through wise integration of biological paradigms within various social, cultural, and psychological parameters—which essentially is a simple way of defining the biopsychosocial way.

Mystifying the Monarch - Jeroen Deploige 2006

The power of monarchs has traditionally been as much symbolic as actual, rooted in popular imagery of sovereignty, divinity, and authority. In Mystifying the Monarch, a distinguished group of contributors explores the changing nature of that imagery—and its political and social effects—in Europe from the Middle Ages to the present day. They demonstrate that, rather than a linear progression where perceptions of rulers moved inexorably from the sacred to the banal, in reality the history of monarchy has been one of constant tension between mystification and demystification.

Method for the Development of Supranormal Faculties - Eugene Caslant 2017-09

Studying psychic faculties is still a taboo subject in our occidental

societies. We are immersed in a world dominated by information, but no one ever teaches us how to use this wonderful tool that is thought. This progressive, simple and accessible method taught in this book is essentially positive and fills this void. It results from a thousand experiments undertaken for more than twenty years on a considerable number of subjects. Through it, you will be able to develop your skills in remote viewing, telepathy and even initiate yourself to sleepwalking. This method for the development of supranormal faculties, like an instruction manual for learning to draw or play music, gives positive results that every experimenter will be able to appreciate. Thousands of people have already learned to know themselves better and surpass the narrow sphere of the material world. It is now your turn to experiment, to evolve... and to testify. Editor's Note: In order to be more enjoyable during reading, this book is in 5" x 8" format. All our publications are carefully handled both in terms of typography and design.

This is Your Brain on Music - Daniel Levitin 2019-07-04

From the author of The Changing Mind and The Organized Mind comes a New York Times bestseller that unravels the mystery of our perennial love affair with music ***** 'What do the music of Bach, Depeche Mode and John Cage fundamentally have in common?' Music is an obsession at the heart of human nature, even more fundamental to our species than

language. From Mozart to the Beatles, neuroscientist, psychologist and internationally bestselling author Daniel Levitin reveals the role of music in human evolution, shows how our musical preferences begin to form even before we are born and explains why music can offer such an emotional experience. In *This Is Your Brain On Music* Levitin offers nothing less than a new way to understand music, and what it can teach us about ourselves.

***** 'Music seems to have an almost wilful, evasive quality, defying simple explanation, so that the more we find out, the more there is to know . . .

Daniel Levitin's book is an eloquent and poetic exploration of this paradox'

Sting 'You'll never hear music in the same way again' Classic FM

magazine 'Music, Levitin argues, is not a decadent modern diversion but

something of fundamental importance to the history of human

development' Literary Review

The Managed Heart - Arlie Russell Hochschild 2012-03-31

In private life, we try to induce or suppress love, envy, and anger through deep acting or "emotion work," just as we manage our outer expressions of feeling through surface acting. In trying to bridge a gap between what we feel and what we "ought" to feel, we take guidance from "feeling rules" about what is owing to others in a given situation. Based on our private mutual understandings of feeling rules, we make a "gift exchange" of acts of emotion management. We bow to each other not simply from the waist, but from the heart. But what occurs when emotion work, feeling rules, and the gift of exchange are introduced into the public world of work? In search of the answer, Arlie Russell Hochschild closely examines two groups of public-contact workers: flight attendants and bill collectors. The flight attendant's job is to deliver a service and create further demand for it, to enhance the status of the customer and be "nicer than natural." The bill collector's job is to collect on the service, and if necessary, to deflate the status of the customer by being "nastier than natural." Between these extremes, roughly one-third of American men and one-half of American women hold jobs that call for substantial emotional labor. In many of these jobs, they are trained to accept feeling rules and techniques of emotion management that serve the company's commercial purpose. Just as we

have seldom recognized or understood emotional labor, we have not appreciated its cost to those who do it for a living. Like a physical laborer who becomes estranged from what he or she makes, an emotional laborer, such as a flight attendant, can become estranged not only from her own expressions of feeling (her smile is not "her" smile), but also from what she actually feels (her managed friendliness). This estrangement, though a valuable defense against stress, is also an important occupational hazard, because it is through our feelings that we are connected with those around us. On the basis of this book, Hochschild was featured in *Key Sociological Thinkers*, edited by Rob Stones. This book was also the winner of the Charles Cooley Award in 1983, awarded by the American Sociological Association and received an honorable mention for the C. Wright Mills Award.

The City at Eye Level - Meredith Glaser 2012

Although rarely explored in academic literature, most inhabitants and visitors interact with an urban landscape on a day-to-day basis is on the street level. Storefronts, first floor apartments, and sidewalks are the most immediate and common experience of a city. These "plinths" are the ground floors that negotiate between inside and outside, the public and private spheres. *The City at Eye Level* qualitatively evaluates plinths by exploring specific examples from all over the world. Over twenty-five

experts investigate the design, land use, and road and foot traffic in rigorously researched essays, case studies, and interviews. These pieces are supplemented by over two hundred beautiful color images and engage not only with issues in design, but also the concerns of urban communities. The editors have put together a comprehensive guide for anyone concerned with improving or building plinths, including planners, building owners, property and shop managers, designers, and architects.

Revolutionary Paris and the Market for Netherlandish Art - Darius A.

Spieth 2017-11-06

Revolutionary Paris and the Market for Netherlandish Art restores attention to the aesthetic, intellectual, and economic link between two key periods in the history of art: the “Golden Age” of Dutch and Flemish painting and that of the French Revolution.

Ethics and Sport in Europe - Dominique Bodin 2011-01-01

Defending ethics in sport is vital in order to combat the problems of corruption, violence, drugs, extremism and other forms of discrimination it is currently facing. Sport reflects nothing more and nothing less than the societies in which it takes place. However, if sport is to continue to bring benefits for individuals and societies, it cannot afford to neglect its ethical values or ignore these scourges. The major role of the Council of Europe and the Enlarged Partial Agreement on Sport (EPAS) in addressing the

new challenges to sports ethics was confirmed by the 11th Council of Europe Conference of Ministers responsible for Sport, held in Athens on 11 and 12 December 2008. A political impetus was given on 16 June 2010 by the Committee of Ministers, with the adoption of an updated version of the Code of Sports Ethics (Recommendation CM/Rec(2010)9), emphasising the requisite co-ordination between governments and sports organisations. The EPAS prepared the ministerial conference and stepped up its work in an international conference organised with the University of Rennes, which was attended by political leaders, athletes, researchers and officials from the voluntary sector. The key experiences described in the conference and the thoughts that it prompted are described in this publication. All the writers share the concern that the end result should be practical action - particularly in terms of the setting of standards - that falls within the remit of the EPAS and promotes the Council of Europe's core values.

Acoustic Properties - Tom McEnaney 2017-06-15

Acoustic Properties: Radio, Narrative, and the New Neighborhood of the Americas discovers the prehistory of wireless culture. It examines both the coevolution of radio and the novel in Argentina, Cuba, and the United States from the early 1930s to the late 1960s, and the various populist political climates in which the emerging medium of radio became the

chosen means to produce the voice of the people. Based on original archival research in Buenos Aires, Havana, Paris, and the United States, the book develops a literary media theory that understands sound as a transmedial phenomenon and radio as a transnational medium. Analyzing the construction of new social and political relations in the wake of the United States' 1930s Good Neighbor Policy, *Acoustic Properties* challenges standard narratives of hemispheric influence through new readings of Richard Wright's cinematic work in Argentina, Severo Sarduy's radio plays in France, and novels by John Dos Passos, Manuel Puig, Raymond Chandler, and Carson McCullers. Alongside these writers, the book also explores Che Guevara and Fidel Castro's *Radio Rebelde*, FDR's fireside chats, Félix Caignet's invention of the radionovela in Cuba, Evita Perón's populist melodramas in Argentina, Orson Welles's experimental New Deal radio, Cuban and U.S. "radio wars," and the 1960s African American activist Robert F. Williams's proto-black power *Radio Free Dixie*. From the doldrums of the Great Depression to the tumult of the Cuban Revolution, *Acoustic Properties* illuminates how novelists in the radio age converted writing into a practice of listening, transforming realism as they struggled to channel and shape popular power.

Authority in the Modern State (Works of Harold J. Laski) - Harold J. Laski
2014-10-30

As a sequel to *Studies in the Problem of Sovereignty*, this volume, originally published in 1919, expands Laski's pluralist doctrine of the state, (using France as its reference) but covers rather broader ground, since its main object is to insist that the problem of sovereignty is only a special case of the problem of authority. The result is a positive, constructive analysis of politics and the theory of the state which examines the division and organisation of power, the limitations of power and the significance of freedom, the political theory of Bonald, the revival of traditionalism and the role of the Church and the Civil Service.

Neuroplasticity: Your Brain's Superpower - Philippe Douyon MD

2019-04-23

We live in a time in which more than 100 million Americans suffer from a neurological illness. Not only is that number expected to rise and the annual cost to care for people with neurological disorders expected to surpass 1 trillion dollars, but the impact of these illnesses on our lives is unlike any other. Neurological disorders affect every fiber of our being. They cause physical, psychological, emotional, and cognitive impairments. They rob us of our lives and families in a way that diseases of other organs can't. Oftentimes it seems that we are helpless to do anything about it. But, what if that wasn't true? *Neuroplasticity: Your Brain's Superpower* empowers us to have a different relationship with our brains. Instead of just succumbing to whatever potential dysfunction, degeneration, or disease that may impact our nervous system, in this book we explore the ways in which we can give our brains exactly what they need to adapt, heal, and thrive. *Neuroplasticity: Your Brain's Superpower* takes us on a journey through things that influence the evolution of our brains, including various diseases. Not only do we learn about these

illnesses, but also about the potential healing that can take place after the injury. This book expands the conversation about brain health so that we can include the principles of neuroplasticity to help us take control of our neurological destinies.

Returning to Reims - Didier Eribon 2018-06-07

'A deeply intelligent and searching book, one that makes you re-consider the narrative of your own life and reframe the story you tell yourself' Hilary Mantel "There was a question that had come to trouble me a bit earlier, once I had taken the first steps on this return journey to Reims... Why, when I have had such an intense experience of forms of shame related to class ... why had it never occurred to me to take up this problem in a book?" *Returning to Reims* is a breath-taking memoir of return, a family story of class, sexuality, gender and of the shifting political allegiances of the French working classes. A phenomenon in France and a huge bestseller in Germany, Didier Eribon has written the defining memoir of our times.

Coaching Across Cultures bridges the gap between coaching and interculturalism.

Rabelais and His World - Mikhail Mikhailovich Bakhtin 1984

This classic work by the Russian philosopher and literary theorist Mikhail Bakhtin (1895–1975) examines popular humor and folk culture in the Middle Ages and the Renaissance. One of the essential texts of a theorist who is rapidly becoming a major reference in contemporary thought, *Rabelais and His World* is essential reading for anyone interested in problems of language and text and in cultural interpretation.

Idea Man - Paul Allen 2011-04-28

By his early thirties, Paul Allen was a world-famous billionaire-and that was just the beginning. In 2007 and 2008, Time named Paul Allen, the cofounder of Microsoft, one of the hundred most influential people in the world. Since he made his fortune, his impact has been felt in science, technology, business, medicine, sports, music, and philanthropy. His

passion, curiosity, and intellectual rigour - combined with the resources to launch and support new initiatives-have literally changed the world. The book features previously untold stories about everything from the true origins of Microsoft to Allen's role in the dawn of private space travel (with SpaceShipOne) and in discoveries at the frontiers of brain science. With honesty, humor, and insight, Allen tells the story of a life of ideas made real.
