

Eldoret Polytechnic May Intake 2014

If you ally infatuation such a referred **Eldoret Polytechnic May Intake 2014** book that will meet the expense of you worth, acquire the certainly best seller from us currently from several preferred authors. If you want to droll books, lots of novels, tale, jokes, and more fictions collections are furthermore launched, from best seller to one of the most current released.

You may not be perplexed to enjoy all book collections Eldoret Polytechnic May Intake 2014 that we will very offer. It is not not far off from the costs. Its nearly what you infatuation currently. This Eldoret Polytechnic May Intake 2014, as one of the most full of life sellers here will agreed be among the best options to review.

Internationalisation of African Higher Education - Chika Sehoole 2013-10-30

The role of higher education, especially the international dimension, is given little importance in the discourse on achieving the Millennium Development Goals (MDGs) in Africa. This book aims to change that. The potential of higher education's contribution to Africa's development remains unrealized and often misunderstood. In today's globalised world, which prioritises economic growth through liberalised trade and competitive market strategies, much emphasis has been placed on higher education's ability to produce graduates to serve the labour market and produce new knowledge for the knowledge economy. While these are important contributions, the book argues that international higher education and new knowledge must go beyond economic purposes and serve the human and social development needs of the continent. It is against this background that the African Network for the Internationalisation of Education (ANIE) undertook research on the international dimension of higher education in Africa and its role in the achievement of the MDGs. Through empirical research, seven case studies address how international and regional higher education programmes and policies in African universities can address MDG priorities of promoting gender equality and women's empowerment, combating HIV/AIDS and establishing global partnerships for development through academic mobility, joint research initiatives, curriculum innovation and policy development.

A Commentary on the Civil Procedure Act - Steve Ouma 2013-12-29

This book presents a detailed and practical explanation of the law of Civil Procedure in Kenya. It discusses the principles of Civil procedure Law in a practical setting. The intricate points of law have been illustrated by examples, and in the introduction the subject has been dealt with by topics rather than in the strict order of sections in the Act and Rules. This has been done to avoid cross-referencing to enable users to adequately grasp the doctrinal aspects of the subject.

Handbook of Universities - 2006

The Most Authentic Source Of Information On Higher Education In India The Handbook Of Universities, Deemed Universities, Colleges, Private Universities And Prominent Educational & Research Institutions Provides Much Needed Information On Degree And Diploma Awarding Universities And Institutions Of National Importance That Impart General, Technical And Professional Education In India. Although Another Directory Of Similar Nature Is Available In The Market, The Distinct Feature Of The Present Handbook, That Makes It One Of Its Kind, Is That It Also Includes Entries And Details Of The Private Universities Functioning Across The Country. In This Handbook, The Universities Have Been Listed In An Alphabetical Order. This Facilitates Easy Location Of Their Names. In Addition To The Brief History Of These Universities, The Present Handbook Provides The Names Of Their Vice-Chancellor, Professors And Readers As Well As Their Faculties And Departments. It Also Acquaints The Readers With The Various Courses Of Studies Offered By Each University. It Is Hoped That The Handbook In Its Present Form, Will Prove Immensely Helpful To The Aspiring Students In Choosing The Best Educational Institution For Their Career Enhancement. In Addition, It Will Also Prove Very Useful For The Publishers In Mailing Their Publicity Materials. Even The Suppliers Of Equipment And Services Required By These Educational Institutions Will Find It Highly Valuable.

The United Nations world water development report 2016: water and jobs - UNESCO 2016-02-29

The United Nations World Water Assessment Programme (WWAP) is hosted and led by UNESCO. WWAP brings together the work of 31 UN-Water Members as well as 38 Partners to publish The United Nations World Water Development Report (WWDR) series. The annual World Water Development Reports focus on strategic water issues. UN-Water Members and Partners - all experts in their fields - contribute with latest

findings on a specific theme. This edition of the World Water Development Report focuses on Water and Jobs and seeks to inform decision-makers, inside and outside the water community, about the importance of the water and jobs nexus for the social and economic development and environmental sustainability of countries, rich and poor. The importance of water for jobs across economies is such that this report could be subtitled No water - No jobs. Indeed, a great majority of jobs are dependent upon water, and therefore increasingly at risk under conditions of water scarcity. T

Higher Education in Crisis - 1983

Endophytes: Mineral Nutrient Management, Volume 3 - Dinesh Kumar Maheshwari 2021-03-04

The challenges to meet the food requirement of the burgeoning population and stabilized productivity of agriculture lands can only be met by a second green revolution. After steadily declining for over a decade hunger is on the rise again, affecting million people of the global population. Therefore, crop yields must be increased substantially over the coming decades to keep pace with global food demand. The plant rhizosphere is a multidimensional and dynamic ecological environment of complicated microbe-plant interactions for harnessing essential macro and micronutrients from a limited nutrient pool. This book will showcase naturally-occurring endophyte which can be explored for nutrient mineralization and mobilization for sustainable agriculture. This will cover recent trends, prospects, critical commentaries and advancement in the research area focusing on naturally-occurring beneficial endophytic microbes. Thus, it is proposed to bring out new scientific insights and frontiers of research that have exploration of endophyte for mineral nutrient management in soil and crops. The chapters are contributed by leading scientists across the globe. The book will be useful to agronomists, microbiologists, ecologists, plant pathologists, molecular biologists, environmentalists, policy makers, conservationists, and NGOs working for the crop production and productivity development and consequently over all agricultural significance.

Understanding Global Higher Education - Georgiana Mihut 2017-08-24

This volume brings together selected articles published in University World News (UWN) and International Higher Education (IHE) between 2011 and 2016. Researchers, policy makers, and practitioners alike further the development of higher education as a field of study through public and ongoing conversations. It is news, analysis, and commentary publications like UWN and IHE that facilitate this dialogue and keep pace with the most up-to-date developments in the field. Together, the articles included in this volume—alongside the section introductions—offer a rich and relevant picture of the dynamic state of higher education globally. While both publications are freely available online, this book provides a thematically coherent selection of articles, offering an accessible and analytic perspective on the pressing concerns of contemporary higher education.

Work, Learning and Sustainable Development - John Fien 2008-10-26

This book is the first that provides a comprehensive overview of the way countries, education systems and institutions have responded to the call for an integration of learning for work, citizenship and sustainability at the Second International Conference on Technical and Vocational Education which was held in Seoul in 1999. Discussions on the central theme of the Seoul Conference - lifelong learning and training for all, a bridge to the future - led to the conclusion that a new paradigm of both development and Technical and Vocational Education (TVET) was needed. This book showcases the wide range of international initiatives that have sought to put such exhortations into practice. It includes: case studies of national TVET policy reforms, reoriented curricula, sustainable campus management programs, and examples of innovative approaches to

integrating learning in TVET with on-the-job training and in community service. It also focuses on the issues and challenges being faced and ways of moving forward. Case studies feature initiatives in a wide range of world regions and countries, and include authors from: UK, Germany, Finland, Canada, USA, Australia, South Africa, China, Republic of Korea, India, Pakistan and the Philippines.

[International Health Regulations \(2005\)](#) - World Health Organization 2008-12-15

In response to the call of the 48th World Health Assembly for a substantial revision of the International Health Regulations, this new edition of the Regulations will enter into force on June 15, 2007. The purpose and scope of the Regulations are "to prevent, protect against, control and provide a public health response to the international spread of disease in ways that are commensurate with and restricted to public health risks, and which avoid unnecessary interference with international traffic and trade." The Regulations also cover certificates applicable to international travel and transport, and requirements for international ports, airports and ground crossings.

Twelfth Annual Report - New Hampshire Agricultural Experiment Station 1900

[Multilingualism and Education in Africa](#) - Ruth W. Ndung'u 2014-10-16

This book is a must-read for every language teaching professional and researcher working in a multilingual context. Multilingualism and Education in Africa: The State of the State of the Art is an up-to-date exploration and wide-ranging review of the symbiotic relationship between multilingualism and education in Africa. The African continent is rich in languages. Most of her inhabitants are multilingual and many of the nations have embraced multilingual education. This book examines multilingualism in education from three broad perspectives: multilingualism and language in education policy in Africa; multilingualism as an educational resource in Africa; and attitudes and challenges of multilingualism and education in Africa. The book's nineteen chapters discuss these three perspectives from East, West, Central and South Africa. All the contributors are leading authorities in multilingualism and education. The chapters combine a wide range of viewpoints based on theoretical, empirical and personal experiences. The reader is left with a deeper understanding of the unique features of multilingualism and education in Africa that have seldom been addressed by those who experience them first-hand. The book demonstrates successful practices in multilingualism and education; showing how African nations have determined what works for them without ignoring challenges such as policies on paper, attitudes towards African languages and limited resources. The benefits of multilingual education override the challenges. The book's extensive coverage makes it an important resource for scholars and policy makers in the field of multilingualism and education. Overall, this book represents an important contribution to an important subject in education globally. The editors have provided an introductory overview to the book and commentaries on the three sections.

[Higher Education Financing in East and Southern Africa](#) - Pundy Pillay 2010-07-12

This nine-country study of higher education financing in Africa includes three East African states (Kenya, Tanzania and Uganda), five countries in southern Africa (Botswana, Lesotho, Mozambique, Namibia and South Africa), and an Indian Ocean island state (Mauritius). Higher Education Financing in East and Southern Africa explores trends in financing policies, paying particular attention to the nature and extent of public sector funding of higher education, the growth of private financing (including both household financing and the growth of private higher education institutions) and the changing mix of financing instruments that these countries are developing in response to public sector financial constraints. This unique collection of African-country case studies draws attention to the remaining challenges around the financing of higher education in Africa, but also identifies good practices, lessons and common themes.

[Improving the evidence base on aflatoxin contamination and exposure in Africa](#) - Okoth, S. 2016-12-31

This report reveals that substantial knowledge is available about the aflatoxin challenge that plagues African farmers, other agri-entrepreneurs, and governments. Commissioned by the ACP-EU Technical Centre for Agricultural and Rural Cooperation (CTA) in collaboration with the African Union Commission - Partnership for Aflatoxin Control in Africa (PACA), this literature review reveals that a wide range of commodities that are traded nationally, regionally and internationally are contaminated by aflatoxins. African citizens and economies are negatively impacted as a result.

Innovations as Key to the Green Revolution in Africa - Andre Bationo 2011-08-30

Africa can achieve self sufficiency in food production through adoption of innovations in the agriculture sector. Numerous soil fertility and crop production technologies have been generated through research, however, wide adoption has been low. African farmers need better technologies, more sustainable practices, and fertilizers to improve and sustain their crop productivity and to prevent further degradation of agricultural lands. The agricultural sector also needs to be supported by functional institutions and policies that will be able to respond to emerging challenges of globalization and climate change.

System Dynamics - Bilash Kanti Bala 2016-10-28

This book covers the broad spectrum of system dynamics methodologies for the modelling and simulation of complex systems: systems thinking, causal diagrams, systems structure of stock and flow diagrams, parameter estimation and tests for confidence building in system dynamics models. It includes a comprehensive review of model validation and policy design and provides a practical presentation of system dynamics modelling. It also offers numerous worked-out examples and case studies in diverse fields using STELLA and VENSIM. The system dynamics methodologies presented here can be applied to nearly all areas of research and planning, and the simulations provided make the complicated issues more easily understandable. System Dynamics: Modelling and Simulation is an essential system dynamics and systems engineering textbook for undergraduate and graduate courses. It also offers an excellent reference guide for managers in industry and policy planners who wish to use modelling and simulation to manage complex systems more effectively, as well as researchers in the fields of modelling and simulation-based systems thinking.

Radiotherapy in Cancer Care - International Atomic Energy Agency 2017-11-28

Cancer treatment is complex and calls for a diverse set of services. Radiation therapy is recognized as an essential tool in the cure and palliation of cancer. Currently, access to radiation treatment is limited in many countries and non-existent in some. This lack of radiation therapy resources exacerbates the burden of disease and underscores the continuing health care disparity among States. Closing this gap represents an essential measure in addressing this global health equity problem. This publication presents a comprehensive overview of the major topics and issues to be taken into consideration when planning a strategy to address this problem, in particular in low and middle income countries. With contributions from leaders in the field, it provides an introduction to the achievements and issues of radiation therapy as a cancer treatment modality around the world. Dedicated chapters focus on the new radiotherapy technologies, proton beams, carbon ion, intraoperative radiotherapy, radiotherapy for children, treatment of HIV-AIDS malignancies, and costing and quality management issues.

[Biotechnological Approaches to Barley Improvement](#) - Jochen Kumlehn 2014-11-20

This volume offers an up-to-date overview of biotechnologically oriented barley research. It is structured into two major sections: the first focusing on current agricultural challenges and approaches to barley improvement, and the second providing insights into recent advances in methodology. Leading scientists highlight topics such as: the global importance of barley; genetic diversity and genebanks; domestication; shoot and inflorescence architecture; reproductive development; mineral nutrition; photosynthesis and leaf senescence; grain development; drought tolerance; viral and fungal pathogens; phytophagous arthropods; molecular farming; sequence resources; induced genetic variation and TILLING; meiotic recombination; *Hordeum bulbosum*; genome-wide association scans; genomic selection; haploid technology; genetic engineering; and whole plant phenomics. Providing comprehensive information on topics ranging from fundamental aspects to specific applications, this book offers a useful resource for scientists, plant breeders, teachers and advanced students in the fields of molecular and plant cell biology, plant biotechnology, and agronomy.

Skills Development for Inclusive and Sustainable Growth in Developing Asia-Pacific - Rupert Maclean 2012-12-09

Focusing on the Asia-Pacific region, which in recent years has been the engine of global economic growth, this volume surveys trends and prospects in technical and vocational education and training (TVET) with particular reference to achieving inclusive growth and the greening of economies. Underlying the increasing pressure for new models of TVET provision is the rapid pace of technological change, demand for a work force which is highly responsive to evolving needs and a transforming

market place that calls for higher order skills and lifelong learning. The book proposes a re-engineered, modernized TVET system that fosters an innovative approach which enhances the employability of workers as well as the sustainability of their livelihoods. The book includes contributions from leading policy makers, researchers, and practitioners, including those in the private sector in analyzing and forecasting the most urgent priorities in skills development. The book argues for creative approaches to TVET design and delivery particularly with a view to improve job prospects, and meeting the goals of inclusion, sustainable development and social cohesion. Addressing issues such as the chronic mismatches between skills acquired and actual skills required in the work place, the volume proposes diversified approaches towards workforce development and partnerships with the private sector to improve the quality and relevance of skills development. The new imperatives created by 'greening' economies and responses required in skills development and training are addressed. Developing TVET is a high priority for governments in the Asia Pacific region as they seek to achieve long-term sustainable growth since the continued success of their economic destinies depend on it. The volume also includes an emerging framework for skills development for inclusive and sustainable growth in the Asia and Pacific region.

Advances in Integrated Soil Fertility Management in sub-Saharan Africa: Challenges and Opportunities - Andre Bationo 2007-10-16

Food insecurity is a fundamental challenge to human welfare and economic growth in Africa. Low agricultural production leads to low incomes, poor nutrition, vulnerability to risk and threat and lack of empowerment. This book offers a comprehensive synthesis of agricultural research and development experiences from sub-Saharan Africa. The text highlights practical lessons from the sub-Saharan Africa region.

Transportation on the Great Lakes - United States Engineering Department Staff

Chikungunya and Zika Viruses - Stephen Higgs 2018-06-01

Chikungunya and Zika Viruses: Global Emerging Health Threats is the go-to resource for both historical and current information on this important virus that is rapidly increasing its global range. Epidemics since 2005 have spread from Africa and Asia, and through Europe, and an ongoing epidemic has caused nearly two million cases in the Americas. It causes severe crippling arthritis, with symptoms lasting for months or years. As no vaccine or treatment is available, there is international interest in the virus, thus funding opportunities for research have dramatically increased. This book presents our understanding of the virus, bringing comprehensive knowledge in a single source.

Vocational Education and Training in Sub-Saharan Africa - Gesine Haseloff 2017-03-17

Report of the Board of Governors - University of Toronto 1921

Agribusiness and Innovation Systems in Africa - Kurt Larsen 2009

This book examines how agricultural innovation arises in four African countries? Ghana, Kenya, Tanzania, and Uganda? through the lens of agribusiness, public policies, and specific value chains for food staples, high value products, and livestock.

Chemical Speciation in the Environment - A. M. Ure 2008-04-15

Considerable recent research has focused on the topic of chemical speciation in the environment. It is increasingly realised that the distribution, mobility and biological availability of chemical elements depend not simply on their concentrations but, critically, on the forms in which they occur in natural systems. Continuing developments in analytical chemistry have made speciation practicable even where analytes are present at trace levels (as is often the case in natural samples). In the second edition of this book, the expertise of scientists involved in chemical speciation in various fields have been brought together to provide an overview of the current status of speciation science and indicate how the field may develop in the future.

Black Nightshades - Jennifer M. Edmonds 1997

Education Quality and Social Justice in the Global South - Leon Tikly 2013-06-07

How we understand education quality is inextricably linked with perspectives on social justice. Questions of inclusion, relevance and democracy in education are increasingly contested, most especially in the global South, and improving the quality of education, particularly for the most disadvantaged, has become a topic of fundamental concern for education policy makers, practitioners and the international development

community. The reality experienced by many learners continues to be of inadequately prepared and poorly motivated teachers, struggling to deliver a rapidly changing curriculum without sufficient support, and often using outmoded teaching methods in over-crowded or dilapidated classrooms. Education Quality and Social Justice in the South includes contributions from leading scholars in the field of education and development. The text draws upon state of the art evidence from the five year EdQual research programme, which focuses upon raising achievement in low income countries, and demonstrates how systems of high quality universal education can be sustained. By exploring recent research initiatives to improve education quality, the importance of supporting local policy makers, educators and parents as agents of change, and students as active inquirers is highlighted, and the challenge of taking successful initiatives to scale is explained. The book is divided into three main parts: -Framing Education Quality -Planning and Policies for Quality -Implementing Quality in Schools Education Quality and Social Justice in the South argues that implementing a high quality of education using theories of social justice can inform the understanding of inclusion, relevance and democracy in education. The book should be essential reading for both students and researchers within the fields of international and comparative education, along with educational policy, poverty and development studies.

Education and Skills for Inclusive Growth, Green Jobs and the Greening of Economies in Asia - Rupert Maclean 2017-11-19

This book presents an overview of the main research findings and case studies concerning education and skills for inclusive growth, green jobs and the greening of economies. Focusing on India, Indonesia, Sri Lanka and Viet Nam, it discusses government and business sector responses to these issues and how Technical and Vocational Education and Training (TVET) systems and institutions are addressing both the renewal of curricula in the context of green growth dynamics, and patterns of training and skills development to meet demands. In addition, the book examines cross-country issues, concerns and prospects regarding education and skills for inclusive growth and green jobs for the four countries. These include critical themes and issues in the selected industry sectors triggering a demand for green jobs in the region; how industry is responding to those demands; areas impeding the transition from traditional to green practices; the importance of skills development; the role of TVET in addressing industry needs; and reasons for the slow response of TVET to green skills. While other studies conducted in Asia - and internationally - on the same topic have largely relied on secondary sources, this study conducted by the Asian Development Bank and the Education University of Hong Kong (ADB-EdUHK) is unique in that the findings, conclusions and recommendations reported on are based on primary data. As part of the study, TVET providers, business enterprises, policy makers and practitioners were surveyed using questionnaires and face-to-face interviews. In addition, workshops were held in each of the four countries to ascertain the views of key stakeholders in government, nongovernment organisations, members of the international development community, TVET providers and members of the business sector. The book also provides summaries of the case studies undertaken for India, Indonesia, Sri Lanka and Viet Nam.

Complications of Cirrhosis - Andrew P. Keaveny 2015-04-08

This volume presents a concise yet comprehensive overview on all facets concerning the complications of cirrhosis. Structured in three sections, the book reviews the natural history of cirrhosis, the diagnostic and predictive tools available to assess the disease, complications, and treatment options such as liver assist devices and transplantation. Topical concerns in the management of patients with cirrhosis are also addressed, including issues pertaining to the delivery of quality care in this patient population. Written by experts in their fields, *Complications of Cirrhosis: Evaluation and Management* serves as a valuable resource for practitioners and physicians-in-training on the subject of cirrhosis.

Education in Kenya - George S. Eshiwani 1993

Transportation Research - Tom V. Mathew 2020-10-26

This book presents selected papers from the 4th Conference of the Transportation Research Group of India. It provides a comprehensive analysis of themes spanning the field of transportation encompassing economics, financial management, social equity, green technologies, operations research, big data analysis, econometrics and structural mechanics. This volume will be of interest to researchers, educators, practitioners, managers, and policy-makers world-wide.

Election Management in Regions - Thomas Otieno Juma 2020-06-30

The nature of regional security/insecurity among neighbouring states

which for long have been viewed traditionally localized seem to have limitations in the current paradigm among geographically adjacent states. Security in the era of regionalization is no longer remote thus electoral management insecurity is likely to have impact to the existing peace and security in a regional network of states. The electoral management dynamics (political architecture, systemic models, operational issues, and security strategies) despite many previous elections with internal violence unprecedentedly caused threats to East Africa regional security architecture in socio-eco-political perspectives. This book examined electoral management dynamics to East Africa regional security architecture perspectives of Kenya's 2007 election violence. The research proceeded to establish electoral Management architecture towards East Africa regional security, finding out the challenges of Kenya's 2007 electoral management to East Africa regional security, assessing the effects of Kenya's 2007 electoral management to East Africa regional security, and finally examining electoral management policy frameworks to mitigate East Africa regional security. In light of complexities that exist in Inter-State Security Arrangements (ISSA) due to functional-structural weakness of core state institutions, the researcher focused the study theoretically using Buzan and Waever Regional Security Complex Theory (RSCT) in Regions and Power which address areas of internal "security interdependence" and securitization among states linked geographically. Additionally, the study dialectically probed the possibility of Regional Institutional Perspective Theory (RIPT) being applicable together with RSCT in a regional integration framework. The RIPT application in form of Extra- State Security Structure (ESSS) may be a better alternative to Intra-State Security Structure (ISSS) in African sub-regions. Where national security no longer meets its obligations in terms of securitization, an inclusive security response may need to be adopted in a regional network of states as a way of preservation of the subjects (citizens) in the smaller entities (states). It is apparent in this book that the East Africa regional security was eco-socio-politically affected in a number of ways as a result of electoral management dynamics in Kenya's 2007 election. The book highlights that EM conflicts in Kenya that led to EARS is cyclic in nature and that EM challenges across East Africa region are similar in many ways. It recommends among others; First, in light of EM dynamics in Kenya that there is urgent need to deal with hidden political feuds (the violence root cause in ethnicity to define the form state) and monoethnic dominance through attainment of federal system for multinational (multiethnic) states of Africa. Secondly, redesigning the role of Commander -in- chief during elections, and thirdly, making EMBs really independent as to (decisional, secretariat, and institutional independence).

Microbial-Based Biopesticides - Travis R. Glare 2016-08-27

This volume focuses on the developmental areas of biopesticides: production, formulation, application and field efficacy. Chapters guide readers through methods and techniques on environmental, mammalian, safety, and registration. Written in the highly successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and cutting-edge, Microbial-Based Biopesticides aims to ensure successful results in the further study of this vital field.

Towards Sustainable Global Food Systems - Ruerd Ruben 2019-04-30

One of the major knowledge challenges in the domain of Resilient and Sustainable Food Systems refers to the integration of perspectives on consumption, patterns that support public health, inclusive value chains, and environmentally sustainable food production. While there is a long record of the analysis of separate interventions, this special issue

generates integrated insights, provides cross-cutting perspectives, and outlines practical and policy solutions that address these global challenges. The collection of papers promotes the view that sustainable food systems require thorough insights into the structure and dynamics of agri-food production systems, the drivers for integrating food value chains and markets, and key incentives for supporting healthier consumer choices. On the production side, potential linkages between agricultural commercialization and intensification and their effects for food security and nutritional outcomes are analyzed. Value Chains are assessed for their contribution to improving exchange networks and markets for food products that simultaneously support efficiency, circularity, and responsiveness. Individual motives and market structures for food consumption need to be understood in order to be able to outline suitable incentives to enhance healthy dietary choice. The contributed papers focus on interfaces between food system activities and processes of adaptive change that are critical for overcoming key constraints and trade-offs between sustainable food and healthy diets.

Competency Based Education And Training - John Burke 2005-10-18

A selection of papers from the first symposium devoted to competency based learning held in March 1989. The book provides an historical backdrop for anyone coming new to the study of Competency-Based Education and Training (CBET).

Kidneys for the King - Miguna Miguna 2013-02

Food Safety and Informal Markets - Kristina Roesel 2014-10-03

Animal products are vital components of the diets and livelihoods of people across sub-Saharan Africa. They are frequently traded in local, unregulated markets and this can pose significant health risks. This volume presents an accessible overview of these issues in the context of food safety, zoonoses and public health, while at the same time maintaining fair and equitable livelihoods for poorer people across the continent. The book includes a review of the key issues and 25 case studies of the meat, milk, egg and fish food sectors drawn from a wide range of countries in East, West and Southern Africa, as part of the "Safe Food, Fair Food" project. It describes a realistic analysis of food safety risk by developing a methodology of 'participatory food safety risk assessment', involving small-scale producers and consumers in the process of data collection in a data-poor environment often found in developing countries. This approach aims to ensure market access for poor producers, while adopting a realistic and pragmatic strategy for reducing the risk of food-borne diseases for consumers.

The Architecture of Innovative Apprenticeship - Ludger Deitmer 2012-12-14

Benefiting from the support and involvement of two major international research networks, this collection features the latest research findings in TVET. Members of INAP, the International Network on Innovative Apprenticeship, and VETNET, the Vocational Education and Training Network, have contributed key research findings to this detailed survey of the field. Featuring the inclusion of the internationally recognized memorandum released in April 2012 by the INAP Architecture Apprenticeship Commission, the volume covers a wealth of issues relating to technical and vocational education and training, including exemplar architectures such as successful school-to-work transitions, competence assessment and development models, and governance, including the role of stakeholders. The book provides many opportunities to explore in depth the scholarly debate on TVET, as well as to learn from positive international experiences. It aims to inform the practice of TVET professionals as much as the decision making of administrators.

Shaping the future we want - Buckler, Carolee 2014-11-10

State of University Education in Kenya - Eusebius J. Mukhwana 2016
