Every entry from the original edition has been readdressed, rewritten, and made fuller, with more suggestions for places to stay, restaurants to visit, festivals to check out. [Chasing Epic: the Snowboard Photographs of Jeff Curtes](#) - Steve Crist 2017-10-15

Snowboarding as a winter sport has exploded in popularity in the last 25 years. One of the most prolific and talented photographers of this extreme sport is Jeff Curtes. CHASING EPIC: THE SNOWBOARD PHOTOGRAPHS OF JEFF CURTES is not only the ultimate document of snowboarding but an impressive artistic achievement as well. Curtes's camera juxtaposes the best snowboarders of our time, including Shaun White and many others, across impossibly beautiful, majestic, and insane mountainsides. His compositions emphasize the lone individual soaring across awe-inspiring landscapes in an almost surreal and sometimes abstract figure/ground/sky relationship. Curtes's images capture the skill, courage, and freedom that these athletes possess in their pursuit of the perfect ride. Jeff Curtes has been at the forefront of the snowboarding industry's imagery since his first published work back in 1992. In 1994, Curtes signed with Burton Snowboards and had been their principal photographer until 2012, nearly 20 years behind the lens on the snow. Jeff's work with Burton, originating with action-centric images, was unique in that it came from within the core snowboarder's lifestyle. He was living and breathing snowboarding with his brother, Joe Curtes, as they traveled from the Midwest to the Mountains of the West Coast. Burton allowed Curtes to travel the world in search of the epic conditions that every snowboarder dreams of, and, in return, Curtes's camera delivered an overwhelming collection of photographs to their light table. These images not only made incredible advertising and catalog content but also defined a subculture and captured the early history of snowboarding like no others before.

[The Lost Girls of Camp Forevermore](#) - Kim Fu 2019-02-15

A portrait of friendship and of the families we build for ourselves, and the pasts we can't escape. A group of young girls descend on a sleepaway camp where their days are filled with swimming lessons, friendship bracelets, and songs by the fire. Filled with excitement and nervous energy, they set off on an overnight kayaking trip to a nearby island. But before the night is over, they find themselves stranded, with no adults to help them survive or guide them home. *The Lost Girls of Camp Forevermore* traces these five girls through and beyond this fateful trip. We see them through successes and failures, loving relationships and heartbreaks; we see what it means to find, and define, oneself, and the ways in which the same experience is refracted through different people. 'Kim Fu skillfully measures how long and loudly one formative moment can reverberate' Celeste Ng 'A propulsive storyteller, using clear and cutting prose' The New York Times 'Fu precisely renders the banal humiliations of childhood, the chilling steps humans take to survive, and the way time warps memory' Publishers Weekly 'An ambitious and dynamic portrayal of the harm humans - even young girls - can do' Kirkus Review 'The first truly great novel I've read in 2018... As intricately fashioned and as bold-hearted as books by novelists who've been publishing for decades' Seattle Review of Books 'Fu offers an unblinking view of the social and emotional survival of the fittest that all too often marks the female coming of age' Toronto Star 'These portraits of sisterhood, motherhood, daughterhood, wifehood, girlfriendhood, independent womanhood, and other female-identified-hoods sing and groan and scream with complexity and nuance, and they make me want to read her next ten books' The Stranger 'To say this is a story of survival is too simple... Fu avoids the obvious and tidy, allowing us to imagine what happens next' Winnipeg Free Press 'I loved it for its portrayal of each of the girls... and for showing that a single incident can colour your entire life' Canadian Living 'A thoroughly entertaining, complex novel full of intricate insights into human nature' Quill & Quire

Books like *Predictably Irrational* and *Sway* have revolutionized how we view human behavior. Now, Stanford professor Clifford Nass has discovered a set of rules for effective human relationships, drawn from an unlikely source: his study of our interactions with computers. Based on his decades of research, Nass demonstrates that-although we might deny it-we treat computers and other devices like people: we empathize with them, argue with them, form bonds with them. We even lie to them to protect their feelings. This fundamental revelation has led to groundbreaking research on how people should behave with one another. Nass's research shows that: Mixing criticism and praise is a wildly ineffective method of evaluation Flattery works-even when the recipient knows it's fake Introverts and extroverts are each best at selling to one of their own Nass's discoveries provide nothing less than a new blueprint for successful human relationships.

**Cat Wars** - Peter P. Marra 2016-09-20

Why our cats are a danger to species diversity and human health In 1894, a lighthouse keeper named David Lyall arrived on Stephens Island off New Zealand with a cat named Tibbles. In just over a year, the Stephens Island Wren, a rare bird endemic to the island, was rendered extinct. Mounting scientific evidence confirms what many conservationists have suspected for some time—that in the United States alone, free-ranging cats are killing birds and other animals by the billions. Equally alarming are the little-known but potentially devastating public health consequences of rabies and parasitic *Toxoplasma* passing from cats to humans at rising rates. *Cat Wars* tells the story of the threats free-ranging cats pose to biodiversity and public health throughout the world, and sheds new light on the controversies surrounding the management of the explosion of these cat populations. This compelling book traces the historical and cultural ties between humans and cats from early domestication to the current boom in pet ownership, along the way accessibly explaining the science of extinction, population modeling, and feline diseases. It charts the developments that have led to our present impasse—from Stan Temple's breakthrough studies on cat predation in Wisconsin to cat-eradication programs underway in Australia today. It describes how a small but vocal minority of cat advocates has campaigned successfully for no action in much the same way that special interest groups have stymied attempts to curtail smoking and climate change. *Cat Wars* paints a revealing picture of a complex global problem—and proposes solutions that foresee a time when wildlife and humans are no longer vulnerable to the impacts of free-ranging cats.
