THIS CASEBOOK contains a selection of U. S. Court of Appeals decisions that analyze and discuss issues surrounding election law. Volume 1 of the casebook covers the District of Columbia Circuit and the First through the Fifth Circuit Court of Appeals.* * *
According to the constitutional blueprint for implementing the Electoral College, the States alone (through their legislatures) possess the power to determine the manner of appointing presidential electors. See U.S. Const. art. II, § 1, cl. 2; id. amend. XII. The text of the Elector Clause reads: "Each state shall appoint in such Manner as the Legislature thereof may direct, a Number of Electors equal to the whole Number of Senators and Representatives to which the State may be entitled in the Congress. . . ." Id. art. II, § 1, cl. 2. In interpreting the bounds of the Elector Clause, the Supreme Court

has stated that "[t]he state legislature's power to select the manner for appointing electors is plenary." Bush, 531 U.S. at 104 (citing McPherson, 146 U.S. at 35). It is precisely for this reason that the Constitution does not prescribe or endorse any selection method in particular. See McPherson, 146 U.S. at 28 ("The final result [of the constitutional convention] . . . reconciled contrariety of views by leaving it to the state legislatures to appoint directly by joint ballot or concurrent separate action, or through popular election by districts or by general ticket, or as otherwise might be directed."); see also id. at 27 ("The constitution does not provide that the appointment of electors shall be by popular vote, nor that the electors shall be voted for upon a general ticket, nor that the majority of those who exercise the elective franchise can alone choose the electors."). State legislatures have utilized a

variety of appointment mechanisms since the framing of the Constitution, but in recent memory, "[h]istory has . . . favored the voter." Bush, 531 U.S. at 104. Of course, the hand that giveth, also taketh away (if it so desires). See *id.* (citing *McPherson*, 146 U.S. at 35) ("The State . . . after granting the franchise in the special context of Article II, can take back the power to appoint electors."). Plenary as a state legislature's power to dictate the manner of appointing presidential electors may be, it is not beyond judicial review. On the contrary, it is "always subject to the limitation that [it] may not be exercised in a way that violates other specific provisions of the Constitution." Rhodes, 393 U.S. at 29; see also *Williams*, 288 F. Supp. at 626 (noting that in order to pass muster, "the manner of appointment must itself be free of Constitutional infirmity"). The Equal Protection Clause

of the Fourteenth Amendment is one such well-established limitation (the First Amendment is another, as we will explain later). See Rhodes, 393 U.S. at 29 ("[N]o State can pass a law regulating elections that violates the Fourteenth Amendment[. . .]"); *Wesberry v. Sanders*, 376 U.S. 1, 17-18 (1964) ("Our Constitution leaves no room for classification of people in a way that unnecessarily abridges [their] right [to vote]."). *Lyman v. Developing Sustainable Food Value Chains - David Neven 2014

Using sustainable food value chain development (SFVCD) approaches to reduce poverty presents both great opportunities and daunting challenges. SFVCD requires a systems approach to identifying root problems, innovative thinking to find effective solutions and broad-based partnerships to implement programmes that

have an impact at scale. In practice, however, a misunderstanding of its fundamental nature can easily result in value-chain projects having limited or non-sustainable impact. Furthermore, development practitioners around the world are learning valuable lessons from both failures and successes, but many of these are not well disseminated. This new set of handbooks aims to address these gaps by providing practical guidance on SFVCD to a target audience of policy-makers, project designers and field practitioners. This first handbook provides a solid conceptual foundation on which to build the subsequent handbooks. It (1) clearly defines the concept of a sustainable food value chain; (2) presents and discusses a development paradigm that integrates the multidimensional concepts of sustainability and value added; (3) presents,

discusses and illustrates ten principles that underlie SFVCD; and (4) discusses the potential and limitations of using the value-chain concept in food-systems development. By doing so, the handbook makes a strong case for placing SFVCD at the heart of any strategy aimed at reducing poverty and hunger in the long run.

Management in India: Challenges and Strategies” - provides a practical and realistic understanding of the evolving status of disaster management in India. The book discusses techno-legal systems for disaster management and their real-life effectiveness based upon the author’s own professional experience as well as available literature including studies, reviews and audits reports. A case study of the 2001 Bhuj Earthquake conducted by the author is at the nucleus of the book and provides a clear understanding on how interdependent sub-systems (social, organisational, infrastructure) can fail during sever incidents, and the consequences thereof. Lack of resources, lack of coordination, and poor communication are endemic to severely damaged disaster environments like the 2001 Bhuj earthquake and are very commonly seen across the world. What is more

important for the future is that new methods are being evolved that overcome the potential risks posed by such initial conditions for improving organizational performance. Lessons from the 2001 Bhuj earthquake highlighted in this book are still relevant and provide directions for well-designed future interventions. The book critically examines performance status of disaster management in the post DM Act 2005 period and identifies many relevant issues and challenges - including development of effective institutions for disaster risk management. At the end, the book proposes intervention strategies for strengthening and improving disaster management systems keeping in mind the latest developments and best-practices suited to Indian conditions. Drawing on the author’s decades of experience both in the domains of disaster management and

technology, the book provides tips on - Emergency Operations Center design and development; Media integration into DM, emergency Resources Management systems development and Crowd management.

Stolen Years - Pavit Kaur
2014-09-11

In 1984, Simranjit Singh Mann resigned from the Indian Police Service in protest of Operation Blue Star, the Indian Army operation ordered by Indira Gandhi, then prime minister, that cleared the Golden Temple complex of Sikh militants. Mann was subsequently charged, among other things, with conspiracy to assassinate Prime Minister Indira Gandhi. A passionate Sikh whose radical beliefs were honed by his family, Mann went underground and was apprehended while trying to flee the country. He spent five years in prison, after which all charges were

dropped. Three decades after Blue Star, his daughter Pavit Kaur looks back on the years her father spent in prison. In this disarmingly honest and emotionally charged account, Pavit Kaur documents her father's hellish journey through the Indian prison system. This is also a personal story and the story of a family during one of the most fraught times in India's history.
