Nutrition - Mary B. Grosvenor 2005-02-21

Nutrition: Everyday Choices provides students with the decision-making skills needed throughout their lifespan to navigate the myriad of choices they will face in promoting their good health and in preventing disease. A critical thinking approach and a solid underpinning of the process of science empowers students to be knowledgeable consumers when faced with diverse information about emerging diseases such as SARS, biotech foods and gene therapy. As

students apply the thought processes and decision-making skills learned throughout the course, they come to understand that there are not "good" foods and "bad" foods, but rather that each choice is only part of an overall healthy diet and that it is the sum of those choices that determines good nutrition.

Visualizing Nutrition - Mary B Grosvenor 2021-03
"Visualizing Nutrition: Everyday Choices, 5e is an introductory text for undergraduate students with little or no nutrition background. The goal in creating this text is to provide students with a basic knowledge of nutrition along with the critical thinking skills they need to apply this to

their everyday food and nutrition choices. The text uses a concise writing style combined with an engaging, consistent art program that make the scientific concepts accessible and understandable. Student interest is maintained by integrating health and disease discussions throughout the text as these are often of personal interest to students. The presentation of metabolism is also integrated, allowing this challenging material to be taught incrementally, reinforcing understanding while not overwhelming students."
