The Joy of Search - Daniel M. Russell

2023-06-06

How to be a great online searcher, demonstrated with step-by-step searches for answers to a series of intriguing questions (for example, “Is that plant poisonous?”). We all know how to look up something online by typing words into a search engine. We do this so often that we have made the most famous search engine a verb: we Google it—“Japan population” or “Nobel Peace Prize” or “poison ivy” or whatever we want to know. But knowing how to Google something doesn't make us search experts; there's much

more we can do to access the massive collective knowledge available online. In *The Joy of Search*, Daniel Russell shows us how to be great online researchers. We don't have to be computer geeks or a scholar searching out obscure facts; we just need to know some basic methods. Russell demonstrates these methods with step-by-step searches for answers to a series of intriguing questions—from “what is the wrong side of a towel?” to “what is the most likely way you will die?” Along the way, readers will discover essential tools for effective online searches—and learn some fascinating facts and interesting

stories. Russell explains how to frame search queries so they will yield information and describes the best ways to use such resources as Google Earth, Google Scholar, Wikipedia, and Wikimedia. He shows when to put search terms in double quotes, how to use the operator (*), why metadata is important, and how to triangulate information from multiple sources. By the end of this engaging journey of discovering, readers will have the definitive answer to why the best online searches involve more than typing a few words into Google.

[My Best Mistake](#) - Terry O'Reilly 2021-10-26

The host of CBC Radio's Under the Influence, Terry O'Reilly, uncovers the surprising power of screwing up. The Incredible Hulk was originally supposed to be grey, but a printing glitch led to the superhero's iconic green colour. NHL hall-of-famer Serge Savard's hockey career nearly ended prematurely, not because of an injury, but because of an oversight. And the invention of a beloved treat, the Popsicle, began with a simple mistake. In his fascinating and meticulously researched new book, Terry O'Reilly recounts how some of the biggest breakthroughs and best-loved products originated with a mistake. Some

people’s “mistakes” led to dramatic life changes—losing their jobs, their companies and often their credibility—only for them to discover new opportunities on the other shore. Other people’s mistakes seemed minor, almost insignificant—and yet they unexpectedly resulted in a famous brand, a legendary band or a groundbreaking work of art. And in a few instances, a mistake actually saved lives. The fear of failing often holds us back. My Best Mistake will change the way you think about screwing up. It will encourage you to accept mistakes and embrace the obstacles that may

arise from these errors, leading you to unexpected breakthroughs and silver linings of your own.

Fluent Forever - Gabriel Wyner 2014-08-05

NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. “A brilliant and thoroughly modern guide to learning new languages.”—Gary Marcus, cognitive psychologist and author of the New York Times

bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn’t learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he’s discovered. Starting with pronunciation, you’ll learn how to rewire your ears and turn foreign sounds into familiar sounds. You’ll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you’ll begin to tackle words, and connect sounds and

spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

Nerves of Steel - Captain Tammie Jo Shults

2019-10-08

Nerves of Steel is the captivating true story of Tammie Jo Shults’s remarkable life—from growing up the daughter of a humble rancher, to breaking through gender barriers as one of the Navy’s first female F/A-18 Hornet pilots, to safely landing the severely crippled Southwest Airlines Flight 1380 and helping save the lives of 148 people. Tammie Jo Shults has spent her entire life loving the skies. Though the odds were against her, she became one of the few female fighter pilots in the Navy. In 1994, after serving her country

honorably for eight years, Tammie Jo left the Navy and joined Southwest Airlines in the early 1990's. On April 17, 2018, Tammie Jo was called to service once again. Twenty minutes into a routine domestic flight, Captain Shults was faced with the unthinkable—a catastrophic engine failure in the Boeing 737 caused an explosion that severed hydraulic and fuel lines, tearing away sections of the plane, puncturing a window, and taking a woman's life. Captain Shults and her first officer, Darren Ellisor, struggled to stabilize the aircraft. Drawing deeply from her well of experience, Tammie Jo was able to wrestle the

severely damaged 737 safely to the ground. Not originally scheduled for that flight, there is no doubt God had prepared her and placed her right where she needed to be that day.

The Tyranny of Merit - Michael J. Sandel

2020-09-10

A TLS, GUARDIAN AND NEW STATESMAN BOOK OF THE YEAR 2020 The new bestseller from the acclaimed author of *Justice* and one of the world's most popular philosophers "Astute, insightful, and empathetic...A crucial book for this moment" Tara Westover, author of *Educated*

These are dangerous times for democracy. We live in an age of winners and losers, where the odds are stacked in favour of the already fortunate. Stalled social mobility and entrenched inequality give the lie to the promise that "you can make it if you try". And the consequence is a brew of anger and frustration that has fuelled populist protest, with the triumph of Brexit and election of Donald Trump. Michael J. Sandel argues that to overcome the polarized politics of our time, we must rethink the attitudes toward success and failure that have accompanied globalisation and rising inequality. Sandel

highlights the hubris a meritocracy generates among the winners and the harsh judgement it imposes on those left behind. He offers an alternative way of thinking about success - more attentive to the role of luck in human affairs, more conducive to an ethic of humility, and more hospitable to a politics of the common good.

We Need To Talk - Celeste Headlee 2017-09-05

Take a moment to consider how many outcomes in your life may have been affected by poor communication skills. Could you have gotten a job you really wanted? Saved a relationship? What about that political conversation that got out

of hand at a dinner party? How is it that we so often fail to say the right thing at the right time? In her career as an NPR host, journalist Celeste Headlee has interviewed hundreds of people from all walks of life, and if there's one thing she's learned, it's that it's hard to overestimate the power of conversation and its ability to both bridge gaps and deepen wounds. In We Need to Talk, she shares what she's learned on the job about how to have effective, meaningful, and respectful conversations in every area of our lives. Now more than ever, Headlee argues, we must begin to talk to and, more importantly, listen

to one another - including those with whom we disagree. *We Need to Talk* gives readers ten simple tools to help facilitate better conversations, ranging from the errors we routinely make (put down the smart phone when you're face to face with someone) to the less obvious blind spots that can sabotage any conversation, including knowing when not to talk, being aware of our own bias, and avoiding putting yourself in the centre of the discussion. Whether you're gearing up for a big conversation with your boss, looking to deepen or improve your connection with a relative, or trying to express your child's needs to

a teacher, *We Need to Talk* will arm you with the skills you need to create a productive dialogue.

WITH A NEW INTRODUCTION BY BILL GATES

In this warm, insightful portrait of the Winner of the Nobel Prize for Physics in 1965, we see the wisdom, humour and curiosity of Richard Feynman through a series of conversations with his friend Ralph Leighton. Winner of the Nobel Prize for Physics in 1965, Richard Feynman was one of the world's greatest theoretical physicists, but he was also a man who fell, often jumped,

into adventure. An artist, safecracker, practical joker and storyteller, Feynman's life was a series of combustible combinations made possible by his unique mixture of high intelligence, unquenchable curiosity and eternal scepticism. Over a period of years, Feynman's conversations with his friend Ralph Leighton were first taped and then set down as they appear here, little changed from their spoken form, giving a wise, funny, passionate and totally honest self-portrait of one of the greatest men of our age.

Smalltalk and Object Orientation - John Hunt

2012-12-06

This book was originally written to support an introductory course in Object Orientation through the medium of Smalltalk (and VisualWorks in particular). However, it can be used as a book to teach the reader Smalltalk, to introduce object orientation as well as present object oriented design and analysis. It takes as its basic premise that most Computer Scientists | Software Engineers learn best by doing rather than from theoretical notes. The chapters therefore attempt to introduce concepts by getting you the reader to

do things, rather than by extensive theoretical discussions. This means that these chapters take a hands-on approach to the subject and assume that the student/reader has a suitable Small talk environment available to them. The chapters are listed below and are divided into six parts. The reader is advised to work through Parts 1 and 3 thoroughly in order to gain a detailed understanding of object orientation. Part 2 then provides an introduction to the Smalltalk environment and language. Other chapters may then be dipped into as required. For example, if the reader wishes to hone their Smalltalk skills

then the chapters in Part 4 would be useful.

However, if at that point they wish to get on and discover the delights of graphical user interfaces in Smalltalk, then Part 5 could be read next. Part 6 presents some more advanced subjects such as metaclasses and concurrency which are not required for straight forward Small talk development.
