Lights, Camera, Community Video - Cabot Orton 2001

Citizens in towns across America have long struggled to find ways to discover and articulate a common vision for their communities. Our high-speed, hyper-individualized, Internet- and TV-dependent culture only complicates this struggle, making it difficult to invigorate the community spirit of the American town. In an effort to rejuvenate the community spirit, the Orton Family Foundation

developed Community Video Projects to stimulate community dialogue and inspire citizen participation in community issues. A community video project uses the power and excitement of video to encourage residents to convene publicly to discuss the issues and opportunities facing their community and to consider choices regarding their future. Lights, Camera, Community Video will show you how to use video technology to both stimulate and document a community visioning exercise. It will guide you through equipment needs, getting the word out to the community about your video project, scheduling interviews, choosing filming locations, editing, and more. When the video is completed the community can come together for a public screening. This event will serve as a great opportunity to get feedback and to discuss the future

of your neighborhood. This report includes pertinent information and ideas from the authors' own community video projects combined with additional reference sources. Also included is a list of references to help you produce your own video, regardless of prior experience. This report, sponsored by APA's Northern New England Chapter, includes a DVD containing the community videos from Swanton, Vermont, and Fruita, Colorado.

Handbook of Human-Computer Interaction - M.G. Helander 1997-08-18

This completely revised edition, of the Handbook of Human-Computer Interaction, of which 80% of the content is new, reflects the developments in the field since the publication of the first edition in 1988. The

handbook is concerned with principles for design of the Human-Computer Interface, and has both academic and practical purposes. It is intended to summarize the research and provide recommendations for how the information can be used by designers of computer systems. The volume may also be used as a reference for teaching and research. Professionals who are involved in design of HCI will find this volume indispensable, including: computer scientists, cognitive scientists, experimental psychologists, human factors professionals, interface designers, systems engineers, managers and executives working with systems development. Much of the information in the handbook may also be generalized to apply to areas outside the traditional field of HCI.

Michael Rubin explains in under 200 pages all users need to know to get great shots, add sound, organize the footage, and use basic editing techniques. They will learn how to start and actually finish that video project they had in mind--in less than a day.

Blender for Video Production

Quick Start Guide - Allan Brito
2018-11-30

Use Blender to edit and produce video for YouTube or any other social media platforms Key Features Use the Blender Video editing toolkit and UI Make 3D info-graphics and interactive video with the latest Blender toolkit Prepare a video production with live markings for tracking Book Description One of the critical components of any workflow related to video production is a reliable tool to create and edit media such as video and audio. In most cases, you will find video producers using software that can only cut and mount video in a "traditional" way. What if you could use a software that offers not only options to edit and cut video, but also create 3D content and animation? With Blender, you can make use of a fantastic set of tools to edit and cut video, and also produce 3D content that will enable you to take your

productions to the next level. Do you want to take footage from a camera and cut or add sound and titles? This book will show you how Blender can do that for you! You will learn to add 3D virtual objects to the same footage that will help you to create a full 3D environment. Using some camera tricks, you can even turn Blender into a powerful 2.5D animation software to create compelling infographics to produce educational, marketing, and instructional videos. You will also learn how to work with motion tracking to mix live-action footage with virtual objects. You will then learn how to use the video editing capabilities of Blender and match 3D content to your project for YouTube or any other media. Toward the end of the book, you will export the project to YouTube using optimal settings for the best performance in the platform. What you will learn Import video and audio

Editing Digital Video - Robert M. Goodman 2002-10

Rebecca Harding Davis was a prominent author of radical social fiction during the latter half of the nineteenth century. In stories that combine realism with sentimentalism, Davis confronted a wide range of contemporary American issues, giving voice to

working women, prostitutes, wives seeking divorce, celibate utopians, and female authors. Davis broke down distinctions between the private and the public worlds, distinctions that trapped women in the ideology of domesticity. By engaging current strategies in literary hermeneutics with a strong sense of historical radicalism in the Gilded Age, Jean Pfaelzer reads Davis through the public issues that she forcefully inscribed in her fiction. In this study, Davis's realistic narratives actively construct a coherent social work, not in a fictional vacuum but in direct engagement with the explosive movements of social change from the Civil War through the turn of the century.
