The Art of Classic Planning - Nir Haim Buras 2020-01-28
"An accomplished architect and urbanist goes back to the roots of what makes cities attractive and livable, demonstrating how we can restore function and beauty to our urban spaces for the long term. Nearly everything we treasure in the world's most beautiful cities was built over a century ago. Cities like Prague, Paris, and Lisbon draw millions of visitors from around the world because of their exquisite architecture, walkable neighborhoods, and human scale. Yet a great deal of the knowledge and practice behind successful city planning has been abandoned over the last hundred years—not because of traffic, population growth, or other practical hurdles, but because of ill-considered theories emerging from Modernism and reactions to it. The errors of urban design over the last century are too great not to

question. The solutions being offered today—sustainability, walkability, smart and green technologies—hint at what has been lost and what may be regained, but they remain piecemeal and superficial. In *The Art of Classic Planning*, architect and planner Nir Haim Buras documents and extends the time-tested and holistic practices that held sway before the reign of Modernism. With hundreds of full-color illustrations and photographs that will captivate architects, planners, administrators, and developers, *The Art of Classic Planning* restores and revitalizes the foundations of urban planning. Inspired by venerable cities like Kyoto, Vienna, and Venice, and by the great successes of L'Enfant's Washington, Haussmann's Paris, and Burnham's Chicago, Buras combines theory and a host of examples to arrive at clear guidelines for best practices in classic planning for today's world. *The Art of Classic Planning* celebrates the enduring principles of urban design and invites us to return to building beautiful cities."

2018-03-20

A life-changing journey intertwining high romance, gastronomy, and an unsurpassable joie de vivre for readers of Julie and Julia and My Paris Kitchen. Susan's life would never be the same after she meets Peter Buckley. A man who was larger than life, Peter pulls Susan out of her comfort zone to taste the fine life, literally. Together they embark on a rollicking adventure through Michelin-starred restaurants in France to the souks of Morocco and the waters of the Red Sea and the Caribbean. They explore the world,

and along the way discover the most desired tables (sometimes in a tent) and the best markets, moving from Peter's adventures with Hemingway to sampling delectable treasures in an Alpine meadow. When they return to New York, Susan and Peter—a writer, photographer, gourmand, as well as an inventive chef—incorporate their adventures into their daily American life. As they explore three-star restaurants, French farms, and Italian cheesemakers, the reader gets a taste of famous gastronomic dishes and their chefs, in addition to learning about mouth-watering recipes, culinary moments around the Buckley's kitchen and table with family and friends, and many of their New York food secrets. If much has been written about La Haute Cuisine in the past, nothing compares to the fresh, personal, and tantalizing tone Eating with Peter offers. All twenty-eight recipes in the book have thoroughly been tested, and should invite the reader to recreate the joys of Susan and Peter's experience.

Last Days of the Concorde - Samme Chittum 2018-09-25

The gripping true tale of a devastating plane crash, the investigation into its causes, and the race to prevent similar disasters in the future. On July 25, 2000, a Concorde, the world's fastest passenger plane, was taking off from

Charles de Gaulle Airport in Paris when it suddenly burst into flames. An airliner capable of flying at more than twice the speed of sound, the Concorde had completed 25 years of successful flights, whisking wealthy passengers—from diplomats to rock stars to corporate titans—between continents on brief and glamorous flights. Yet on this fateful day, the chartered Concorde jet, en route to America, crashed and killed all 109 passengers and crew onboard and four people on the ground. Urgent questions immediately arose as investigators scrambled to discover what had gone wrong. What caused the fire? Could it have been prevented? And, most urgently, was the Concorde safe to fly? Last Days of the Concorde addresses these issues and many more, offering a fascinating insider's look at the dramatic disaster, the hunt for clues, and the systemic overhauls that followed the crash.

The European Landscape Convention -
Michael Jones 2011-02-09

This important and insightful book provides, for the first time, a broad presentation of ongoing research into public participation in landscape conservation, management and planning, following the 2000 European Landscape Convention which came into force in 2004. The book examines both the theory of participation and what lessons can be learnt from specific European examples. It explores in what manner and to what extent the provisions for participation in the European Landscape Convention have been followed up and implemented. It also presents and compares different experiences of participation in selected countries from northern, southern, eastern and western Europe, and provides a critical examination of public participation in practice. However, while the book's focus is necessarily on Europe, many of the conclusions drawn are of global relevance. The book provides a valuable reference for researchers and advanced students in landscape policies and management, as well as for professionals and others interested in land-use planning and environmental management.

The History of Cartography, Volume 6
- Mark Monmonier 2015-05-18

For more than thirty years, the History of Cartography Project has charted the course for scholarship on cartography, bringing together research from a variety of disciplines on the creation, dissemination, and use of maps. Volume 6, *Cartography in the Twentieth Century*, continues this tradition with a groundbreaking survey of the century just ended and a new full-color, encyclopedic format. The twentieth century is a pivotal period in map history. The transition from paper to digital formats led to previously unimaginable dynamic and interactive maps. Geographic information systems radically altered cartographic institutions and reduced the skill required to create maps. Satellite positioning and mobile communications revolutionized wayfinding. Mapping evolved as an important tool for coping with complexity, organizing knowledge, and influencing public opinion in all parts of the globe and at all levels of society. Volume 6 covers these changes comprehensively, while thoroughly demonstrating the far-reaching effects of maps on science, technology, and society—and vice versa. The lavishly produced volume includes more than five hundred articles accompanied by more than a thousand images. Hundreds of expert contributors provide both original research, often based on their own participation in the developments they describe, and interpretations of larger trends in cartography. Designed for use by both scholars and the general public, this definitive volume is a reference work of first resort for all who study and love maps.

[Au Revoir to All That](#) - Michael Steinberger 2009-06-01
Au Revoir to All That takes us on an entertaining and intriguing journey into France's identity, directly through the tastebuds... Offering a fresh and entertaining approach to understanding French history, through its food and wine, Steinberger reveals a radically changing France; a country moving through social and political reform, economic crises and, importantly, the loss of their seemingly unbreakable dominance in all things gastronomic. If the state of France's celebrated cuisine

is the bellwether for the state of the nation, things are looking bleak. Top chefs are renouncing their Michelin stars and prized farmhouse cheeses are going extinct because there is no one to make them. Bistros, brasseries and cafés fold by the scores and hypermarkets and superstores account for 75% of retail food sales. The famed wine-producing Languedoc is home to the world's first wine-terrorist organization - winemakers resorting to violence to protect their struggling industry. But while there may be better baguettes in Tokyo than in Paris, and Spain has become the darling of the gastronomic world, there are glimpses of hope. There are up-and-coming culinary stars and outdoor food festivals, pockets of exuberance amid the gloom. And, as long as a praline millefeuille can be celebrated, savoured and allowed to assume talismanic qualities at a Right Bank tea salon, all is not lost. *Au Revoir to All That* is an essential - almost edible - book for lovers of food, France and culinary history.

The History of Foreign Investment in the United States to 1914 - Mira Wilkins 1989

From the colonial era to 1914, America was a debtor nation in international accounts--owing more to foreigners than foreigners owed to us. By 1914 it was the world's largest debtor nation. Mira Wilkins provides the first complete history of foreign investment in the United States during that period. The book shows why the United States was attractive to foreign investors and traces the changing role of foreign capital in the nation's development, covering both portfolio and direct investment. The immense new wave of foreign investment in the United States today, and our return to the status of a debtor nation--once again the world's largest debtor nation--makes this strong exposition far more than just historically interesting. Wilkins reviews foreign portfolio investments in government securities (federal, state, and local) and in corporate stocks and bonds, as well as foreign direct investments in land

and real estate, manufacturing plants, and even such service-sector activities as accounting, insurance, banking, and mortgage lending. She finds that between 1776 and 1875, public-sector securities (principally federal and state securities) drew in the most long-term foreign investment, whereas from 1875 to 1914 the private sector was the main attraction. The construction of the American railroad system called on vast portfolio investments from abroad; there was also sizable direct investment in mining, cattle ranching, the oil industry, the chemical industry, flour production, and breweries, as well as the production of rayon, thread, and even submarines. In addition, there were foreign stakes in making automobile and electrical and nonelectrical machinery. America became the leading industrial country of the world at the very time when it was a debtor nation in world accounts.
