Electronic Evidence -

Stephen Mason 2017-05
This fourth edition of the well-established practitioner text sets out what constitutes an electronic signature, the form an electronic signature can take, and discusses the issues relating to evidence - illustrated by analysis of relevant case law and legislation from a wide range of common law and civil law jurisdictions. Stephen Mason is a leading authority on electronic signatures and electronic evidence, having advised global corporations and governments on these topics. He is also the editor of *Electronic Evidence* and *International Electronic Evidence*, and he founded the international open-source journal *Digital Evidence* and *Electronic*

Signature Law Review in 2004. This book is also available online at [http://](http://ials.sas.ac.uk/digital/humanities-digital-library/observing-law-ials-open-book-service-law)

Strict Responsibility -
Colin Howard 1963

The Creation of States in International Law -
James R. Crawford
2007-03-15

Statehood in the early 21st century remains as much a central problem as it was in 1979 when the first edition of *The Creation of States in International Law* was published. As Rhodesia, Namibia, the South African Homelands and Taiwan then were subjects of acute concern, today governments, international organizations, and other institutions are seized of such matters as the

membership of Cyprus in the European Union, application of the Geneva Conventions to Afghanistan, a final settlement for Kosovo, and, still, relations between China and Taiwan. All of these, and many other disputed situations, are inseparable from the nature of statehood and its application in practice. The remarkable increase in the number of States in the 20th century did not abate in the twenty five years following publication of James Crawford's landmark study, which was awarded the American Society of International Law Prize for Creative Scholarship in 1981. The independence of many small territories comprising the 'residue' of the European colonial empires alone accounts for a major increase in States since 1979; while the disintegration of

Yugoslavia and the USSR in the early 1990s further augmented the ranks. With these developments, the practice of States and international organizations has developed by substantial measure in respect of self-determination, secession, succession, recognition, de-colonization, and several other fields. Addressing such questions as the unification of Germany, the status of Israel and Palestine, and the continuing pressure from non-State groups to attain statehood, even, in cases like Chechnya or Tibet, against the presumptive rights of existing States, James Crawford discusses the relation between statehood and recognition; the criteria for statehood, especially in view of evolving standards of

democracy and human rights; and the application of such criteria in international organizations and between states. Also discussed are the mechanisms by which states have been created, including devolution and secession, international disposition by major powers or international organizations and the institutions established for Mandated, Trust, and Non-Self-Governing Territories. Combining a general argument as to the normative significance of statehood with analysis of numerous specific cases, this fully revised and expanded second edition gives a comprehensive account of the developments which have led to the birth of so many new states.

Marine Cyanobacteria -
Loïc Charpy 1999

The linguistic integration of adult migrants: from one country to another, from one language to another
- 2014-01-01

The linguistic integration of migrants affects every aspect of settling in a new country (employment, health, etc.). The aim of this collection of texts is to propose a number of specific measures member states can take to help adult migrants become acquainted with the language of the host country. The main focus is on organising language courses that meet migrants' real communication needs. It is not enough for authorities simply to consider the technical aspects of such courses, they should also design and conduct them in accordance with the fundamental values of the Council of Europe. A

number of issues concerning the linguistic integration of adult migrants are presented here, beginning with the notion of linguistic integration itself. Family reunion, the nature of citizenship and the function of language tests, among others, are dealt with from the point of view of language and language use. Readers are invited to reflect on the type of language competences that need to be acquired as well as an appropriate use of the Common European Framework of Reference for Languages. The collection also sets out approaches and instruments designed to assist in implementing effective policies.

Corruption in International

Arbitration - Inan Uluc 2018

Corruption's involvement

in arbitration is far from novel, but, there remains a lack of uniformity among arbitral tribunals on how to tackle corruption. This study delves into these controversial concerns and analyses practical solutions within the context of theory and practice.

The Whirlwind War -

Frank N. Schubert 1995
CMH Publication 70-30.

Edited by Frank N. Schubert and Theresa L. Kraus. Discusses the United States Army's role in the Persian Gulf War from August 1990 to February 1991. Shows the various strands that came together to produce the army of the 1990s and how that army in turn performed under fire and in the glare of world attention. Retains a sense of immediacy in its approach. Contains maps which were carefully researched and

compiled as original documents in their own right. Includes an index.

Crop ecology, cultivation and uses of cactus pear - Food and Agriculture Organization of the United Nations
2018-06-05

Cactus plants are precious natural resources that provide nutritious food for people and livestock, especially in dryland areas. Originally published in 1995, this extensively revised edition provides fresh insights into the cactus plant's genetic resources, physiological traits, soil preferences and vulnerability to pests. It provides invaluable guidance on managing the resource to support food security and offers tips on how to exploit the plant's culinary qualities.

The Cambridge History of War: Volume 2, War and the Medieval World -

David A. Graff
2020-09-30

Volume II of The Cambridge History of War covers what in Europe is commonly called 'the Middle Ages'. It includes all of the well-known themes of European warfare, from the migrations of the Germanic peoples and the Vikings through the Reconquista, the Crusades and the age of chivalry, to the development of state-controlled gunpowder-wielding armies and the urban militias of the later middle ages; yet its scope is world-wide, ranging across Eurasia and the Americas to trace the interregional connections formed by the great Arab conquests

and the expansion of Islam, the migrations of horse nomads such as the Avars and the Turks, the formation of the vast Mongol Empire, and the spread of new technologies - including gunpowder and the earliest firearms - by land and sea.

Regional Conference on building a future for sustainable small-scale fisheries in the Mediterranean and the Black Sea - Food and Agriculture Organization of the United Nations 2018-10-31

According to the report, the conference focused on the main challenges for the sustainable development of small-scale fisheries, including promoting political commitment and tailored strategies, raising awareness, and sharing knowledge.

The Mamba Mentality - Kobe Bryant 2018-10-23
The Mamba Mentality: How

I Play is Kobe Bryant's personal perspective of his life and career on the basketball court and his exceptional, insightful style of playing the game—a fitting legacy from the late Los Angeles Laker superstar. In the wake of his retirement from professional basketball, Kobe "The Black Mamba" Bryant decided to share his vast knowledge and understanding of the game to take readers on an unprecedented journey to the core of the legendary "Mamba mentality." Citing an obligation and an opportunity to teach young players, hardcore fans, and devoted students of the game how to play it "the right way," *The Mamba Mentality* takes us inside the mind of one of the most intelligent, analytical, and creative basketball players ever. In his own words, Bryant

reveals his famously detailed approach and the steps he took to prepare mentally and physically to not just succeed at the game, but to excel. Readers will learn how Bryant studied an opponent, how he channeled his passion for the game, how he played through injuries. They'll also get fascinating granular detail as he breaks down specific plays and match-ups from throughout his career. Bryant's detailed accounts are paired with stunning photographs by the Hall of Fame photographer Andrew D. Bernstein. Bernstein, long the Lakers and NBA official photographer, captured Bryant's very first NBA photo in 1996 and his last in 2016—and hundreds of thousands in between, the record of a unique, twenty-year relationship between one athlete and one

photographer. The combination of Bryant's narrative and Bernstein's photos make *The Mamba Mentality* an unprecedented look behind the curtain at the career of one of the world's most celebrated and fascinating athletes.

UNCITRAL Model Law on International Credit Transfers - United Nations Commission on International Trade Law 1994

Bio-Inspired Innovation and National Security -

National Defense University 2010-10-01
Despite the vital importance of the emerging area of biotechnology and its role in defense planning and policymaking, no definitive book has been written on the topic for the defense policymaker, the military student, and the private-sector bioscientist interested

in the "emerging opportunities market" of national security. This edited volume is intended to help close this gap and provide the necessary backdrop for thinking strategically about biology in defense planning and policymaking. This volume is about applications of the biological sciences, here called "biologically inspired innovations," to the military. Rather than treating biology as a series of threats to be dealt with, such innovations generally approach the biological sciences as a set of opportunities for the military to gain strategic advantage over adversaries. These opportunities range from looking at everything from genes to brains, from enhancing human performance to creating renewable energy, from

sensing the environment around us to harnessing its power.

Infusing Ethics into the Development of Engineers

- National Academy of Engineering 2016-02-17
Ethical practice in engineering is critical for ensuring public trust in the field and in its practitioners, especially as engineers increasingly tackle international and socially complex problems that combine technical and ethical challenges. This report aims to raise awareness of the variety of exceptional programs and strategies for improving engineers' understanding of ethical and social issues and provides a resource for those who seek to improve ethical development of engineers at their own institutions. This publication presents 25 activities and programs that are exemplary in

their approach to infusing ethics into the development of engineering students. It is intended to serve as a resource for institutions of higher education seeking to enhance their efforts in this area.

The Formations of
Modernity - Bram Gieben
1993-01-04

Formations of Modernity is a major introductory textbook offering an account of the important historical processes, institutions and ideas that have shaped the development of modern societies. This challenging and innovative book 'maps' the evolution of those distinctive forms of political, economic, social and cultural life which characterize

modern societies, from their origins in early modern Europe to the nineteenth century. It examines the roots of modern knowledge and the birth of the social sciences in the Enlightenment, and analyses the impact on the emerging identity of 'the West' of its encounters through exploration, trade, conquest and colonization, with 'other civilizations'. Designed as an introduction to modern societies and modern sociological analyses, this book is of value to students on a wide variety of social science courses in universities and colleges and also to readers with no prior knowledge of sociology. Selected readings from a broad range of classical writers (Weber, Durkheim, Marx, Freud, Adam Smith, Montesquieu,

Hobbes, Locke, Rousseau) and contemporary thinkers (Michael Mann, E.P. Thompson, Edward Said) are integrated in each chapter, together with student questions and exercises.

An Introduction to Indian Government Accounts and Audit - India. Comptroller and Auditor-General 1963

Microbial Growth in Drinking Water Supplies

- Dick van der Kooij
2013-09-14

Maintaining the microbial quality in distribution systems and connected installations remains a challenge for the water supply companies all over the world, despite many years of research. This book identifies the main concerns and knowledge gaps related to regrowth and stimulates cooperation in future research. Microbial Growth in Drinking Water

Supplies provides an overview of the regrowth issue in different countries and the water quality problems related to regrowth. The book assesses the causes of regrowth in drinking water and the prevention of regrowth by water treatment and distribution. Editors: Dirk van der Kooij and Paul W.J.J. van der Wielen, KWR Watercycle Research Institute, The Netherlands

Computational Stochastic Mechanics - P.D. Spanos
2012-12-06

Over a period of several years the field of probabilistic mechanics and computational mechanics have progressed vigorously, but independently. With the advent of powerful computational hardware and the development of novel mechanical techniques, the field of stochastic mechanics has progressed in such a

manner that the inherent uncertainty of quite complicated systems can be addressed. The first International Conference on Computational Stochastic Mechanics was convened in Corfu in September 1991 in an effort to provide a forum for the exchanging of ideas on the current status of computational methods as applied to stochastic mechanics and for identifying needs for further research. The Conference covered both theoretical techniques and practical applications. The Conference also celebrated the 60th anniversary of the birthday of Dr. Masanobu Shinozuka, the Sollenberger Professor of Civil Engineering at Princeton University, whose work has contributed in such a great measure to the development of Computational Stochastic

Mechanics. A brief summary of his career and achievements are given in the Dedication. This book comprises some of the papers presented at the meeting and covers sections on Theoretical Reliability Analysis; Damage Analysis; Applied Reliability Analysis; Theoretical Random Vibrations; Stochastic Finite Element Concept; Fatigue and Fracture; Monte Carlo Simulations; Earthquake Engineering Applications; Materials; Applied Random Vibrations; Applied Stochastic Finite Element Analysis, and Flow Related Applications and Chaotic Dynamics. The Editors hope that the book will be a valuable contribution to the growing literature covering the field of Computational Stochastic Mechanics.

**European
Constitutionalism -**

Kaarlo Tuori 2015-07-16
This book provides a new understanding of the European constitution as a multidimensional process of constitutionalization, constantly interacting with Member State constitutions.

Strengthening Forensic Science in the United States - National Research Council
2009-07-29

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards,

and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including

upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The Continental Army - Robert K. Wright 1983
A narrative analysis of the complex evolution of the Continental Army, with the lineages of the 177 individual units that comprised the Army, and fourteen charts depicting regimental organization.

Secession - Marcelo G Kohen 2006-03-21
This book is a comprehensive study of

secession from an international law perspective.

Investing in Cultural Diversity and Intercultural Dialogue - Unesco 2009-01-01

This report analyses all aspects of cultural diversity, which has emerged as a key concern of the international community in recent decades, and maps out new approaches to monitoring and shaping the changes that are taking place. It highlights, in particular, the interrelated challenges of cultural diversity and intercultural dialogue and the way in which strong homogenizing forces are matched by persistent diversifying trends. The report proposes a series of ten policy-oriented recommendations, to the attention of States, intergovernmental and non-governmental

organizations, international and regional bodies, national institutions and the private sector on how to invest in cultural diversity. Emphasizing the importance of cultural diversity in different areas (languages, education, communication and new media development, and creativity and the marketplace) based on data and examples collected from around the world, the report is also intended for the general public. It proposes a coherent vision of cultural diversity and clarifies how, far from being a threat, it can become beneficial to the action of the international community.

Burma Law Reports - 1908

Perspectives for the Unification and Harmonisation of Family

Law in Europe - Katharina Boele-Woelki 2003

Is the unification and harmonisation of (international) family law in Europe necessary? Is it feasible, desirable and possible? Reading the different contributions to this book may certainly inspire those who would like to find the right answers to these questions.

Choice of Law in Copyright and Related Rights - Mireille M. M. van Eechoud 2003-01-01 Nobody denies that the traditional territorial approach to copyright and other intellectual property rights has come under pressure. Yet it persists. Faced with the need to determine the applicable law in cross-border cases, lawyers everywhere wrestle with the implications of the territorial nature of copyright and related

rights. In this book Mireille van Eechoud clears the way to the formulation of conflict rules that reflect the purpose of copyright law- to protect creators and stimulate the production and use of information- without reverting to old-fashioned notions of territoriality. She shows how the applicable law can be determined for four distinct legal avenues of intellectual property law: Which exclusive rights exist in an intellectual creation and for how long; Who is considered to own such right; How can these rights be transferred; and What continues infringement of copyright and related rights. Mireille van Eechoud shows how, when each of these questions is approached in the light of the different allocation principles used in modern choice of

law, a new clarity begins to emerge that promises in time to build a set of conflict rules well suited to the unprecedented copyright and related rights issues that we find so difficult to resolve today. Her in-depth analysis draws in the classis multilateral conventions and treaties, underlying policies, technological and economic developments, utilitarian grounds versus justice considerations, and issues of infringement in the digital environment. INFORMATION LAW SERIES 12.

Principles of Geographic Information Systems - Rolf A. de By 2004

Reducing Inequalities - Rémi Genevey 2013-01-01
The reduction of inequalities within and between countries stands as a policy goal, and

deserves to take centre stage in the design of the Sustainable Development Goals agreed during the Rio+20 Summit in 2012. The 2013 edition of *A Planet for Life* represents a unique international initiative grounded on conceptual and strategic thinking, and “ most importantly “ empirical experiments, conducted on five continents and touching on multiple realities. This unprecedented collection of works proposes a solid empirical approach, rather than an ideological one, to inform future debate. The case studies collected in this volume demonstrate the complexity of the new systems required to accommodate each country's specific economic, political and cultural realities. These systems combine technical, financial,

legal, fiscal and organizational elements with a great deal of applied expertise, and are articulated within a clear, well-understood, growth- and job-generating development strategy. Inequality reduction does not occur by decree; neither does it automatically arise through economic growth, nor through policies that equalize incomes downward via ill conceived fiscal policies. Inequality reduction involves a collaborative effort that must motivate all concerned parties, one that constitutes a genuine political and social innovation, and one that often runs counter to prevailing political and economic forces.

The Cambridge History of Medieval Monasticism in the Latin West 2 Volume Hardback Set - Alison Beach 2020-01-31

Managing aquifer recharge - UNESCO
2021-11-25

Litteratura

Coleopterologica

(1758-1900) - Yves Bousquet 2016-12-02
"Bibliographic references to works pertaining to the taxonomy of Coleoptera published between 1758 and 1900 in the non-periodical literature are listed. Each reference includes the full name of the author, the year or range of years of the publication, the title in full, the publisher and place of publication, the pagination with the number of plates, and the size of the work. This information is followed by the date of publication found in the work itself, the dates found from external sources, and the libraries consulted for

the work. Overall, more than 990 works published by 622 primary authors are listed. For each of these authors, a biographic notice (if information was available) is given along with the references consulted"-- [p. 1].

Collection of Essays by Legal Advisers of States, Legal Advisers of International Organizations and Practitioners in the Field of International Law - United Nations. Office of Legal Affairs 1999

The world has changed radically since 1989, when the General Assembly declared the period from 1990 to 1999 as the United Nations Decade of International Law. During that time, the international community claimed some major achievements as reflected by the adoption of conventions

and treaties. This publication presents a collection of essays from legal advisers of States and international organizations, all of whom are among those committed to promoting respect for international law. Their contribution provides a practical perspective on international law, viewed from the standpoint of those involved in its formation, application and administration.

The Managed Heart -
Arlie Russell Hochschild
2012-03-31

In private life, we try to induce or suppress love, envy, and anger through deep acting or "emotion work," just as we manage our outer expressions of feeling through surface acting. In trying to bridge a gap between what we feel and what we "ought" to feel, we take guidance from "feeling rules"

about what is owing to others in a given situation. Based on our private mutual understandings of feeling rules, we make a "gift exchange" of acts of emotion management. We bow to each other not simply from the waist, but from the heart. But what occurs when emotion work, feeling rules, and the gift of exchange are introduced into the public world of work? In search of the answer, Arlie Russell Hochschild closely examines two groups of public-contact workers: flight attendants and bill collectors. The flight attendant's job is to deliver a service and create further demand for it, to enhance the status of the customer and be "nicer than natural." The bill collector's job is to collect on the service, and if necessary, to deflate the status of

the customer by being "nastier than natural." Between these extremes, roughly one-third of American men and one-half of American women hold jobs that call for substantial emotional labor. In many of these jobs, they are trained to accept feeling rules and techniques of emotion management that serve the company's commercial purpose. Just as we have seldom recognized or understood emotional labor, we have not appreciated its cost to those who do it for a living. Like a physical laborer who becomes estranged from what he or she makes, an emotional laborer, such as a flight attendant, can become estranged not only from her own expressions of feeling (her smile is not "her" smile), but also from what she actually feels (her managed friendliness). This

estrangement, though a valuable defense against stress, is also an important occupational hazard, because it is through our feelings that we are connected with those around us. On the basis of this book, Hochschild was featured in Key Sociological Thinkers, edited by Rob Stones. This book was also the winner of the Charles Cooley Award in 1983, awarded by the American Sociological Association and received an honorable mention for the C. Wright Mills Award.

Labour Rights as Human Rights - Philip Alston 2005

Are efforts to protect workers' rights compatible with the forces of globalization? How can minimum standards designed to protect labour rights be implemented in a world in which national labour law is more and more at

the mercy of international forces beyond its control? And does it make any difference if we see rights such as the right to freedom of association, to non-discrimination in the workplace, to freedom from child labour, and to safe and healthy working conditions in terms of international human rights law? Or are they more appropriately seen as 'principles' to be promoted as and where appropriate? The contributors to this volume argue that international agreements and institutions are of central importance if labour rights are to be protected in a globalized economy. But the report cards they give to the World Trade Organization, the European Union, NAFTA,

and the Free Trade Agreement of the Americas are generally very critical. While there is a strong rhetorical commitment to labour rights, at least on the part of the US and the EU, the substance of what has been achieved to date is hardly impressive. The role of the International Labour Organization is central and the authors explore some of the options that are open to governments, civil society, and the labour movement in the years ahead.

A treatise on political economy; or, The production, distribution, and consumption of wealth.
Tr. by C.R. Prinsep,
with notes - Jean Baptiste Say 1821

Maneuver and Firepower -
John B. Wilson 1998
