Herbal Bioactives and Food Fortification - D.

Suresh Kumar 2016-02-12

Recent major shifts in global health care management policy have been instrumental in renewing interest in herbal medicine. However, literature on the development of products from herbs is often scattered and narrow in scope.

Herbal Bioactives and Food Fortification:

Extraction and Formulation provides information on all aspects of the extraction of biological actives from plants and the development of dietary supplements and fortified food using herbal extracts. The book begins with a brief survey of the use of herbs in different civilizations and traces the evolution of herbal medicine, including the emergence of nutraceuticals from the discipline of ethnopharmacology and the Alma Ata Declaration of 1978. It moves on to describe various aspects of the extraction process, including selection of plant species, quality control of raw materials, the comminution of herbs, and the selection of solvents. It also describes the optimization of extraction in relation to response surface methodology before describing uses of herbal extracts in food supplements and fortified foods. With special attention paid to stability

analysis and the masking of tastes, the book gives an overview of the formulation of various types of tablets, capsules, and syrups using herbal extracts. It also describes the benefits of foods fortified with herbal extracts such as soups, yogurt, sauces, mayonnaise, pickles, chutneys, jams, jellies, marmalades, cheese, margarine, sausages, bread, and biscuits, as well as some beverages. *Herbal Bioactives and Food Fortification* covers the fundamental steps in herbal extraction and processing in a single volume. It explains how to choose, optimize, analyze, and use extracts for fortification, making it an excellent source for nutraceutical researchers and practitioners in science and industry.

NGOs in the Muslim World - Susumu Nejima

2015-10-30

Muslim NGOs are continuously expanding their field of activities to various areas, including education, medical services, environment, aging societies, gender issues, and inter-religious dialogue. They are visible in an urban slum in Pakistan, rural development in Indonesia, and even in Fukushima in Japan to distribute hot meals among the affected people. Muslim NGOs have become a global phenomenon. Though

there have been many studies on "political Islam", only a few approaches to broaden our understanding of Muslim NGOs have appeared. *NGOs in the Muslim World* brings together contributors familiar with the local language who have each been engaged with fieldwork for many years. Based on empirical anthropological and sociological studies in Japan, Indonesia, Pakistan, Iran, Turkey, and Jordan, they explore key issues concerning the role and work of Muslim NGOs, from the inspirations Muslims take from holy texts to the religious expectations of volunteers devoting their time to charitable causes. The book discusses the relationship of Muslim organizations with Islamic institutions, as well as their interpretations of the contemporary issues faced by NGOs within a specifically Islamic framework. As a result, *NGOs in the Muslim World* provides fresh insight into Muslims' faith-based initiatives concerning contemporary issues. This book will be of interest to students and scholars from diverse disciplines including anthropology, sociology, political science and history, as well as Middle Eastern and Islamic Studies.

MODERN LETTER WRITING COURSE - ARUN

SAGAR 'ANAND' 2015-01-06

Hazardous Substances in India and the World -

T. R. Subramanya 2021-05-25

This book examines the nature of hazardous substances and the law governing them, including

international conventions, relevant directives and Indian legislation from the pre-independence period to the present. It focuses on legislations passed in the area of hazardous substances, highlighting the background relevant to the continued growth of international environmental law across the globe. It reviews existing strategies available in developing countries and the lack of a systematic approach in administering hazardous substances management programs. The author unfolds the dynamics of hazardous substances, the trade of such substances, transboundary movements and their restrictions through rigorous analyses and evaluation of cases. The book explores the question of liability in hazardous substance litigation, offers an understanding of several judicial decisions in the context, and suggests measures to control and manage the problem of hazardous substances. Authoritative, lucid and comprehensive, this book will be useful to students, researchers and policymakers working on environment, law, international environmental law and development studies, as well as to legal professionals, judicial officers and NGOs.

Offend, Shock, or Disturb - Gautam Bhatia 2016-01-14

Offend, Shock, or Disturb is a comprehensive examination of free speech under the Indian

Constitution. It explores Indian free speech jurisprudence from a doctrinal, comparative, and philosophical perspective. Taking as its point of departure the constitutional guarantee of the freedom of speech and expression—Articles 19(1)(a) and 19(2) of the Constitution of India—the book discusses, clause by clause, the development of law from colonial times to present-day controversies. Issues relating to public order, sedition, obscenity and pornography, hate speech, film and online censorship, privacy

and defamation, the contempt of court, the nature of speech and the relationship between free speech and economic structure, and the inter-relationships between them have been comprehensively examined. As free speech campaigns gain intensity by the day, the book presents the myriad understandings and limitations of the free speech law, and suggests possible pathways for the future.
