Rethinking International Skilled Migration - Micheline van Riemsdijk 2016-10-04

In today's global knowledge economy, competition for the best and brightest workers has intensified. Highly skilled workers are an asset to companies, knowledge institutions, cities, and regions as they contribute to knowledge creation, innovation, and economic growth and development. Skilled migrants cross, and many times straddle, international borders to pursue professional opportunities. These spatial relocations provide opportunities and challenges for migrants and the cities and regions they inhabit. How have international skilled migratory flows been formed, sustained, and transformed over multiple spaces and scales? How have these processes affected cities and regions? And how have multiple stakeholders responded to these processes? The contributors to this book bring together perspectives from economic, social, urban, and population geography in order to address these questions from a myriad of angles. Empirical case studies from different regions illuminate the multiscaled processes of international skilled migration. In particular, the contributions rethink skilled migration theories and provide insights into: the experiences of highly skilled labor migrants and international students; issues related to transnational activities and return migration; and policy implications for both immigrant source and destination countries. It also charts a future research agenda for international skilled migration research. Rethinking International Skilled Migration provides a comparative perspective on the experiences of skilled migrants across the local, regional, national, and/or global scale, paying particular attention to spatial and place-based dimensions of international skilled migration. It will be of interest to scholars and professionals in international migration, regional and national development policymakers, international businesses, and NGOs.

Science Education Research and Practice in Asia-Pacific and Beyond - Jennifer Yeo 2017-10-16

This book is based on presentations at the International Science Education Conference (ISEC) 2014. It showcases a selection of the best papers by researchers and science teachers from the Asia-Pacific region, North America and the United Kingdom. Centered on the theme of "Pushing the boundaries - Investing in our future", they pursue new ways of helping learners appreciate the diversity and changes in science that result from a globalised world facing complex and diverse environmental and technological issues. The chapters touch on various themes in science education that explore and investigate issues of scientific literacy, societal challenges and affect, and teacher professional development. Its comprehensive themes make it a valuable textbook for graduate students of master's and Ph.D. programs. It also appeals to pre-service and in-service teachers as a resource on innovative pedagogical practices and creative methods of professional development. With a selection that emphasises the research-practice nexus in education research, it serves as an introductory handbook for teachers to connect with the current issues facing science education.

The SIJORI Cross-Border Region - Francis E Hutchinson 2016-06-14

Twenty-five years ago, the governments of Singapore, Malaysia, and Indonesia agreed to jointly promote the city-state, the state of Johor in Malaysia, and the Riau Islands in Indonesia. Facilitated by common cultural references, a more distant shared history, and complementary attributes, interactions between the three territories developed quickly. Logistics networks have proliferated and production chains link firms based in one location with affiliates or transport facilities in the other territories. These cross-border links have enabled all three locations to develop their economies and enjoy rising standards of living. Initially economic in nature, the interactions between Singapore, Johor, and the Riau Islands have multiplied and grown deeper. Today, people cross the borders to work, go to school, or avail of an increasing range of goods and services. New political, social, and cultural phenomena have developed. Policymakers in the various territories now need to reconcile economic imperatives and issues of identity and sovereignty. Enabled by their proximity and increasing opportunities, families have also begun to straddle borders, with resulting questions about citizenship and belonging. Using the Cross-Border Region framework - which seeks to analyse these three territories as one entity simultaneously divided and bound together by its borders - this book brings together scholars from a range of disciplines. Its 18 chapters and more than 20 maps examine the interaction between Singapore, Johor, and the Riau Islands over the past quarter-century, and seek to shed light on how these territories could develop in the future.

Can You Complete The Puzzle? Volume 4 - Dr. Verdree B. Stanley 2013-11

Overriding its Look In his fourth volume Dr. Verdree B. Stanley encourages the individual to keep faith. Often times when we read between the lines and look outside the box the end result can be puzzling. Each of the One Hundred and Four crossword Puzzles are designed to increase one's faith in their daily life. As in his previous book (volume 3); Dr. Stanley says life situations does not always progress from left to right and from the bottom upward. The completion of any puzzle as it relates to life goes beyond the point of outside looking inward but rather the individual or group putting themselves in the inward position looking outward. The perspective growth process and the newness of life can now begin to take shape.

[The Rise of Africa's Middle Class](#) - Henning Melber 2016-12-15

Across Africa, a burgeoning middle class has become the poster child for the 'Africa rising' narrative. Ambitious, aspirational and increasingly affluent, this group is said to embody the values and hopes of the new Africa, with international bodies ranging from the United Nations Development Programme to the World Bank regarding them as important agents of both economic development and democratic change. This narrative, however, obscures the complex and often ambiguous role that this group actually plays in African societies. Bringing together economists, political scientists, anthropologists and development experts, and spanning a variety of case studies from across the continent, this collection provides a much-needed corrective to the received wisdom within development circles, and provides a fresh perspective on social transformations in contemporary Africa.

The Beatitudes through the Ages - Rebekah Eklund 2021-04-27

The Beatitudes are among the most influential teachings in human history. For two millennia, they have appeared in poetry and politics, and in the thought of mystics and activists, as Christians and others have reflected on their meaning and shaped their lives according to the Beatitudes' wisdom. But what does it mean to be hungry, or meek, or pure in heart? Is poverty a material condition or a spiritual one? And what does being blessed entail? In this book, Rebekah Eklund explores how the Beatitudes have affected readers across differing eras and contexts. From Matthew and Luke in the first century, to Martin Luther King Jr. and Billy Graham in the twentieth, Eklund considers how men and women have understood and applied the Beatitudes to their own lives through the ages. Reading in the company of past readers helps us see how rich and multifaceted the Beatitudes truly are, illuminating what they might mean for us today.

The Global Muslim Brotherhood in Britain - Damon L. Perry 2018-07-17

Since 2011, with the British Government's counter-radicalisation strategy, Prevent, non-violent Islamist groups have been considered a security risk for spreading a divisive ideology that can lead to radicalisation and violence. More recently, the Government has expressed concerns about their impact on social cohesion, entryism, and women's rights. The key protagonists of non-violent Islamist 'extremism' allegedly include groups and individuals associated with the Muslim Brotherhood and Jama'at-i-Islami. They have been described as part of the 'global Muslim Brotherhood', but do they constitute a singular phenomenon, a social movement? This book shows that such groups and individuals do indeed comprise a movement in Britain, one dedicated to an Islamic 'revival'. It shows how they are networked organisationally, bonded through ideological and cultural kinship, and united in a conflict of values with the British society and state. Using original interviews with prominent revivalist leaders, as well as primary sources, the book also shows how the movement is not so much 'Islamist' in aspiring for an Islamic state, but concerned with institutionalising an Islamic worldview and moral framework throughout society. The conflict between the Government and the global Muslim Brotherhood is apparent in a number of different fields, including education, governance, law, and counterterrorism. But this does not simply concern the direction of Government policy or the control of state institutions. It most fundamentally concerns the symbolic authority to legitimise a way of seeing, thinking and living. By assessing this multifaceted conflict, the book presents an exhaustive and up-to-date analysis of the political and cultural fault lines between Islamic revivalists and the British authorities. It will be useful for anyone studying Islam in the West, government counter-terrorism and counter-extremism policy, multiculturalism and social cohesion.
