*Introduction to Islamic Banking and Finance* -  
Brian Kettell 2011-10-07

*Introduction to Islamic Banking and Finance* is a succinct guide to the key characteristics of Islamic banking highlighting how these differ from conventional banking. This detailed book illustrates how Islamic banking is consistent

with the Sharia'a, a key element of which is the prohibition on collecting and paying interest. This central religious precept appears to rule out most aspects of modern finance but it does allow money to be used for trading tangible assets and business, which can then generate a profit. Brian Kettell's book looks at all aspects of Islamic banking, including chapters on its creation and evolution through to detailed discussions of the issues involved in the Sharia'a contracts of Murabaha, Mudaraba, Musharaka, Ijara, Istisna'a, and Salam. Islamic insurance (Takaful) is also covered. Finally the book takes a look at Sharia'a law and Sharia'a boards, indicating the roles and responsibilities that come with membership. Islamic banks have been operating in places such as Bahrain, Saudi Arabia, Malaysia and Dubai for some time. Conventional bankers have traditionally viewed the sector as a small, exotic niche but recent years have seen a dramatic surge in popularity. A number of Western investment banks have started working

with Muslim clerics to create new ranges of financial products designed for devout Muslims, a large and growing market. Although estimates of the size of the Islamic finance industry vary greatly, everyone agrees that it is expanding rapidly and this is the perfect book for anyone looking to understand the industry.

**An Introduction to Islamic Economics** -

Muhammad Akram Khan 1994-01-01

The contemporary economic systems have failed to solve the economic problems of mankind. The failure of socialism is too obvious to need any documentation. The track record of capitalism is far from being promising. Although a small minority has achieved unprecedentedly high material standards of living, a vast majority lives under conditions of abject Poverty. The problems of unemployment, inflation, poverty amidst affluence, unequal distribution of wealth, frequent bouts of business recession, environmental pollution and ecological imbalance still bedevil man's present life and threaten his future. The present book contends

that the Islamic economic order has the potential of ushering in an age of human bliss; and the resources to build a free, just and responsible world for everyone on the earth.

*Bourdieu's Secret Admirer in the Caucasus* -

Georgi M. Derluguian 2005-07-15  
Bourdieu's Secret Admirer in the Caucasus is a gripping account of the developmental dynamics involved in the collapse of Soviet socialism. Fusing a narrative of human agency to his critical discussion of structural forces, Georgi M. Derluguian reconstructs from firsthand accounts the life story of Musa Shanib—who from a small town in the Caucasus grew to be a prominent leader in the Chechen revolution. In his examination of Shanib and his keen interest in the sociology of Pierre Bourdieu, Derluguian discerns how and why this dissident intellectual became a nationalist warlord. Exploring globalization, democratization, ethnic identity, and international terrorism, Derluguian contextualizes Shanib's personal trajectory from de-Stalinization through the nationalist rebellions of the 1990s, to the recent rise in Islamic militancy. He masterfully reveals not only how external economic and political forces affect the former Soviet republics but how those

forces are in turn shaped by the individuals, institutions, ethnicities, and social networks that make up those societies. Drawing on the work of Charles Tilly, Immanuel Wallerstein, and, of course, Bourdieu, Derluguian's explanation of the recent ethnic wars and terrorist acts in Russia succeeds in illuminating the role of human agency in shaping history.

**Weapons of the Weak** - James C. Scott  
2008-10-01

Weapons of the Weak is an ethnography by James C. Scott that studies the effects of the Green Revolution in rural Malaysia. One of the main objectives of the study is to make an argument that the Marxian and Gramscian ideas of false consciousness and hegemony are incorrect. He develops this conclusion throughout the book, through the different scenarios and characters that come up during his time of fieldwork in the village. This publication, based on 2 years of fieldwork (1978-1980), focuses on the local class relations

in a small rice farming community of 70 households in the main paddy-growing area of Kedah in Malaysia. Introduction of the Green Revolution in 1976 eliminated 2/3 of the wage-earning opportunities for smallholders and landless laborers. The main ensuing class struggle is analyzed being the ideological struggle in the village and the practice of resistance itself consisting of: foot-dragging, dissimulation, desertion, false compliance, pilfering, feigned ignorance and sabotage acts. Rich and poor are engaged in an unremitting if silent struggle to define changes in land tenure, mechanization and employment to advance their own interests, and to use values that they share to control the distribution of status, land, work and grain.

Sufism in the West - Jamal Malik 2006-04-18  
With the increasing Muslim diaspora in post-modern Western societies, Sufism - intellectually as well as sociologically - may eventually become Islam itself due to its versatile potential. Although Sufism has always provoked considerable interest in the West, no volume has

so far been written which discusses this aspect of Islam in terms of how it is practised in Western societies. Bringing together leading international authorities to survey the history of Islamic mysticism in North America and Europe, this book elaborates the ideas and institutions which organize Sufism and folk-religious practices. The chapters cover: the orders and movements their social base organization and institutionalization recruitment-patterns in new environments channels of disseminating ideas, such as ritual, charisma, and organization reasons for their popularity among certain social groups the nature of their affiliation with the countries of their origin. Providing a fascinating insight into how Sufism operates within different spheres of society, Sufism in the West is essential reading for students and academics with research interests in Islam, Islamic history and social anthropology.

**Faithful Education** - Ali Riaz 2008-09-03

In the wake of the terrorist attacks on September 11, 2011, discussions on ties between Islamic religious education institutions, namely madrassahs, and transnational terrorist groups have featured prominently in the Western media. In the frenzied coverage of events, however, vital questions have been overlooked: What do we know about the madrassahs? Should Western policymakers be alarmed by the recent increase in the number of these institutions in Muslim countries? Is there any connection between them and the "global jihad"? Ali Riaz responds to these questions

through an in-depth examination of the madraassahs in Pakistan, Bangladesh, and India. In *Faithful Education*, he examines these institutions and their roles in relation to current international politics.

*Handbook of Education Systems in South Asia* -

Padma M. Sarangapani 2021-08-29

This handbook is an important reference work in understanding education systems in the South Asia region, their development trajectory, challenges and potential. The handbook includes the SAARC (South Asian Association for Regional Cooperation) countries for discussion---

Afghanistan, Pakistan, India, Nepal, Bhutan, Bangladesh, and Sri Lanka---while also considering countries such as Myanmar and the Maldives that have considerable shared history in the region. Such a comparative perspective is largely absent within the literature given the present paucity of intra-regional interaction. South Asian education systems are viewed primarily through a development lens in terms of inequalities, challenges and responses. However, the development of modern institutions of education and the challenges that it faces requires cultural and historical understanding of indigenous traditions as well as indigenous modern thinkers and education movements. Therefore, this encompassing referenc e work covers indigenous education traditions, formal education systems, including school and preschool education, higher and professional education, education financing systems and structures, teacher education systems, addressing huge linguistic and other

diversities, and marginalization within the formal education system, and pedagogy and curricula. All the countries in this region have their own unique geographical, cultural, economic and political character and histories of interest and significance, and have responded to common issues such as overcoming the colonial legacy, language diversity, or girls' education, or minority rights in education, in uniquely different ways. The sections therefore include country-specific perspectives as far as possible to highlight these issues. Internationally renowned specialists of South Asian education systems have contributed to this important reference work, making it an invaluable resource for researchers and students of education interested in South Asia.

*Sufi Martyrs of Love* - C. Ernst 2016-04-30

Sufism is a religion which emphasizes direct knowledge of the divine within each person, and meditation, music, song, and dance are seen as crucial spiritual strides toward attaining unity with God. **Zoonotic Diseases and One Health** - Marcello Otake Sato 2020-05-27

Humans are part of an ecosystem, and understanding our relationship with the environment and with other organisms is a prerequisite to living together sustainably. Zoonotic diseases, which are spread between animals and humans, are an important issue as

they reflect our relationship with other animals in a common environment. Zoonoses are still presented with high occurrence rates, especially in rural communities, with direct and indirect consequences for people. In several cases, zoonosis could cause severe clinical manifestations and is difficult to control and treat. Moreover, the persistent use of drugs for infection control enhances the potential of drug resistance and impacts on ecosystem balance and food production. This book demonstrates the importance of understanding zoonosis in terms of how it allows ecosystems to transform, adapt, and evolve. Ecohealth/One Health approaches recognize the interconnections among people, other organisms, and their shared developing environment. Moreover, these holistic approaches encourage stakeholders of various disciplines to collaborate in order to solve problems related to zoonosis. The reality of climate change necessitates considering new variables in studying diseases, particularly to

predict how these changes in the ecosystems can affect human health and how to recognize the boundaries between medicine, veterinary care, and environmental and social changes towards healthy and sustainable development.
