Essential Retirement Planning for Solo Agers - Sara Zeff Geber
2018-04-15

A practical yet humorous guide to aging solo gracefully and achieving a happy retirement. In *Essential Retirement Planning for Solo Agers*, certified retirement coach Sara Zeff Geber coins the term "Solo Ager" to refer to the segment of society that either does not have adult children or is single and believes they will be on their own as they grow older. This book explores the path ahead for this group. That includes choices in housing, relationships, legal arrangements, finances, and more. Geber reviews the role of adult children in an aging parent's world and suggests ways in which Solo Agers can mitigate the absence of adult children by relationship building and rigorous planning for their future. Geber shares her expertise on what constitutes a fulfilling older life and how Solo Agers can maximize their opportunities for financial security, physical health, meaning and purpose in the second half of life, and, finally, planning for the end game. Through real-life stories and anecdotes, the author explores housing choices, relationships, and building a support system. You will learn about: · different levels of care and independence in various types of living arrangements · how to initiate discussions among friends and relatives about end-of-life treatment · "what if" scenarios · who to talk to about legal and financial decisions And it's not just the Solo Ager that can learn from this book. Financial advisors, elder law and estate attorneys, senior care managers, and others whose clientele is on the far side of sixty will benefit as well.

Financial Accounting: The Impact on Decision Makers - Gary A. Porter 2016-01-01

FINANCIAL ACCOUNTING: THE IMPACT ON DECISION MAKERS, 10E makes it easy to demonstrate that accounting is a powerful tool for business decision-making by going beyond debits and credits and keeping students focused on the big picture. For example, journal entries require students to demonstrate the balance sheet and income statement impact of transactions, helping students see how business events ultimately impact the financial statements. In addition to exposing students to annual reports of highly recognizable companies such as Nike, Porter's exclusive Ratio Decision-Model provides students with a framework for reading and interpreting financial statements to make decisions. The focus on financial statements and decision-making carries through to the end-of-chapter with a suite of case materials that have students reading and interpreting financial statements. Biomedical Visualisation - Dongmei Cui 2023-10-04

Curricula in the health sciences have undergone significant change and reform in recent years. The time allocated to anatomical education in medical, osteopathic medical, and other health professional programs has largely decreased. As a result, educators are seeking effective teaching tools and useful technology in their classroom learning. This edited book explores advances in anatomical sciences education, such as teaching methods, integration of systems-based components, course design and implementation, assessments, effective learning strategies in and outside the learning environment, and novel approaches to active learning in and outside the laboratory and classroom. Many of these advances involve computer-based technologies. These technologies include virtual reality, augmented reality, mixed reality, digital dissection tables, digital anatomy apps, three-dimensional (3D) printed models, imaging and 3D reconstruction, virtual microscopy, online teaching platforms, table computers and video recording devices, software programs, and other innovations. Any of these devices and modalities can be used to develop large-class practical guides, small-group tutorials, peer teaching and assessment sessions, and various products and pathways for guided and self-directed learning. The reader will be able to explore useful information pertaining to a variety of topics incorporating these advances in anatomical sciences education. The book will begin with the exploration of a novel approach to teaching dissection-based anatomy in the context of organ systems and functional compartments, and it will continue with topics ranging from teaching methods and instructional strategies to developing content and guides for selecting effective visualization technologies, especially in lieu of the recent and residual effects of the COVID-19 pandemic. Overall, the book covers several anatomical disciplines, including microscopic anatomy/histology, developmental anatomy/embryology, gross anatomy, neuroanatomy, radiological imaging, and integrations of clinical correlations.

[Constructive Talk in Challenging Classrooms](#) - Valerie Coultas
2006-12-04

Constructive Talk in Challenging Classrooms gives the practising teacher advice on how to make learning fun through the use of 'talk' and collaborative group work. Using clear examples, tried and tested in some of the most challenging classrooms in inner city schools, the book offers practical and honest advice on both the difficulties and rewards that can be gained when employing all forms of talk-based teaching in the classroom. Packed with real examples of successful talk based lessons with children of all abilities and needs, this book will show teachers how they can succeed in overcoming problems of disruption and engage even the most difficult pupils in real learning through talk. The book shows that bringing the child's individual experience into a lesson through talk has huge emotional and psychological benefits - this can be particularly marked in classrooms where there are low levels of literacy, behaviour

issues or where pupils' first language is not English. The author argues that talk is vital for building positive relationships and essential for successful teaching, particularly in the difficult classrooms. This inspiring title is essential reading for any teacher interested in building trust and making learning fun and meaningful for all.
