Kit 2000: 3rd Edition - Saxon 2002-04
Saxon math programs produce confident students who are not only able to correctly compute, but also to apply concepts to new situations. These materials gently develop concepts, and the practice of those concepts is extended over a considerable period of time. This is called "incremental development and continual review." Material is introduced in easily understandable pieces (increments), allowing students to grasp one facet of a concept before the next one is introduced. Both facets are then practiced together until another one is introduced. This feature is combined with continual review in every lesson throughout the year. Topics are never dropped but are increased in complexity and practiced every day, providing the time required for concepts to become totally familiar. Algebra 1/2, third edition is made up of five instructional components: Introduction of the New Increment, Examples with Complete Solutions, Practice of the Increment, Daily Problem Set, and Cumulative Tests. Algebra 1/2 covers all topics normally taught in pre-algebra, as well as additional topics from geometry and discrete mathematics. It is recommended for seventh-graders who plan to take first-year algebra in the eighth grade, or for eighth-graders who plan to take first-year algebra in the ninth grade. Algebra 1/2 represents the culmination of the study of pre-algebra mathematics. This set contains a student text, answer key and test forms. A solutions manual is available separately. Grade 8.

Home Study Packet for Math 76 - Stephen Hake 1992

Saxon Math - Saxon Publishers 2007-05-01

This is not intended to be an end-of-the-year test, and it should be used only with children who have not previously been in a Saxon mathematics program. Administer the test to one child at a time in a quiet, calm environment. You may wish to have someone else present to record the child's responses and comments. Read through the questions

and prepare all materials prior to beginning the test. Follow the instructions and dialogue on the following pages. Answers are shown beside the questions. Depending on the answer, the child will receive 0 or 1 point for each question or set of questions. (See the boxed numbers.) Add the points at the end of each section for proper scoring. Before beginning, explain to the child that this is an opportunity for you to find out what the child already knows. This is not a teaching situation. Do not correct the child when he or she responds incorrectly or provide hints when the child hesitates. Record the child's answer without indicating to the child whether the answer is correct. Praise the child for focusing on the task and listening carefully. Begin with Part A of the Placement test. At the end of each section, read the directions to determine whether to continue. - p. [1].
