The Economic Psychology of Tax Behaviour - Erich Kirchler 2007-06-21

Tax evasion is a complex phenomenon which is influenced not just by economic motives but by psychological factors as well. Economic-psychological research focuses on individual and social representations of taxation as well as decision-making. In this 2007 book, Erich Kirchler assembles research on tax compliance, with a focus on tax evasion, and integrates the findings into a model based on the interaction climate between tax authorities and taxpayers. The interaction climate is defined by citizens' trust in authorities and the power of authorities to control taxpayers effectively; depending on trust and power, either voluntary compliance, enforced compliance or no compliance are likely outcomes. Featuring chapters on the social representations of taxation, decision-making and self-employed income tax behaviour, this book will appeal to researchers in economic psychology, behavioural economics and public administration.

**Company Law and Sustainability** - Beate Sjøfjell 2015-05-21

This book advances an innovative, multi-jurisdictional argument for the necessity of company law reform to reorient companies towards environmental sustainability.

**Where's the Wisdom in Service-Learning?** - Robert Shumer 2017-04-01

The service-learning field is 50 years old in the United States. Much has been developed over that time in the fields of K-12 schooling, higher education, and community organizations. People who have been involved in the movement have worked individually and collaboratively to include servicelearning as an effective pedagogy and program in educational settings. They have created opportunities for students, teachers, faculty, and community members to learn about academic content and personal commitment to serving others for social change and community impact. In this book we hear from individuals who have been involved in the effort for more than 30 or 40 years about what they have learned from their experiences and what wisdom they can share with others who will be involved for the next several decades. Their experience, insight, and understanding will hopefully help younger people to improve and expand on the movement and place service-learning and community engagement as a regular part of American education. "Robert Shumer has been a stalwart of the service learning movement for decades. He's a practitioner, a researcher, an experimenter. This book gives valuable perspective for all of us going forward." ~ Paul Loeb, Author of Soul of a Citizen "At a moment when many are asking how higher education can better serve our democracy, Robert Shumer's book reminds us that we still have much to learn from those who built the movement for community engagement through service learning. As befits the field, the chapters in this book derive wisdom from experience and, in so doing, give us insight and inspiration for identifying the way forward." ~ Andrew J. Seligsohn, President, Campus Compact "This book provides a strong foundation for promoting

discussions on how the service-learning movement has evolved over the past 30-40 years. Rob Shumer has pulled together several key leaders in the service-learning movement to share their stories and experiences. This book will be useful to a younger generation of service-learning practitioners and faculty who will continue to build the field that these pioneers so generously cultivated." ~ Elaine K.

**Everyday Communication** - William Murinda 2017-04-20

Everyday Communication is a book that looks at how the environment and perceptions define and impact how mankind, entities, and nonhuman beings communicate. The book also tries to analyze how communication affects culture or how culture itself impacts on how we communicate. Man-made structures and natural phenomena impact the way human beings and nonhuman beings communicate or communication between human beings and nonhuman beings.

**In The Shadow of Mandela** - Alexander Johnston 2019-12-12

This outstanding and original work goes to the heart of South Africa's political problems - doubts as to the sustainability of the post-apartheid settlement, beset with divisions in the ruling ANC, factionalism, corruption and the widening of fault-lines in state and society. The 'leadership issue' has become key and this will be the first specific examination of leadership in the light of Mandela's legacy and its effect on his successor as potential and actual leaders - all in 'the shadow of Mandela' as the architect of the transition from apartheid to democracy, and with overarching moral authority and international reputation. Alexander Johnston shows how his successors are judged against Mandela's achievements, including the potentially impressive 'lost' leaders and concentrating on his immediate successors, Thabo Mbeki and Jacob Zuma. The book concludes with an in-depth assessment of new president Cyril Ramaphosa's potential to be a leader for a 'new dawn'. This is an objective and critical work by a close observer who acknowledges the achievement of South African leadership but is acutely aware of the doubts as to the sustainability of South Africa's hard won democratic settlement. An essential read for all readers interested in leadership and in the traumatic history and future of Africa's leading state, as the continent rises to global importance.

The Logic of Life - Tim Harford 2009-02-24

In The Logic of Life, bestselling author Tim Harford quite simply makes sense of this world. Life often seems to defy logic. The receptionist is clearly smarter than the boss who earns fifty times her salary. Arbitrary lines starkly divide the desirable districts of the city from the dangerous ones. Voters flock to the polling booths to elect candidates who'll rip them off to favour special interests. None of it makes logical sense - or does it? Economist and acclaimed

author Tim Harford thinks it does. By weaving stories from locations as diverse as a Vegas casino to a barroom speed date, Harford aims to persuade you that people are, in fact, surprisingly logical. When a street prostitute agrees to unprotected sex, or a teenage criminal embarks on a burglary – perhaps especially when a racist employer disregards a black job applicant – we would seem to be a million miles from rational behaviour. Harford shows that, discomfitingly, we are not. It turns out that the unlikeliest of people are complying with the logic of economics and responding to future costs and benefits, often without realizing it; and socially tragic outcomes can have their roots in individually rational decisions. Brilliantly reasoned, always entertaining and often provocative, *The Logic of Life* is a book to help you understand yourself and the world around you.

**Socially Responsible Higher Education** - Budd L. Hall 2021

**Sustaining High Performing Public Enterprises** - Silver Mugisha 2019-02-15

*Sustaining High Performing Public Enterprises* presents steps taken by National Water and Sewerage Corporation of Uganda, a typical public enterprise, to sustain a high performance momentum after over 15 years of successful utility reforms. Specifically, the author pinpoints key achievements during the period 2013–2018 including growth in geographical coverage from 23 to 240 towns, increase in connections from 310,000 to about 600,000; revenues growing more than three times and network growth improving from 80kms per year to over 2000kms per year. The concept of new public management (NPM) is used to set the scene for a case description of various initiatives and innovations implemented. A balanced scorecard framework is used to characterize the various activities. The book highlights a shift from over-emphasis on positive cash-flows alone to a balanced approach to 'water for all' citizens. The need to balance technical work and political aspirations is highlighted. Also featured is the nexus between utility operations and environmental protection to ensure sustainable water supply. The cardinal role of aligning staff needs to organizational needs and working for win-win solutions is also highlighted. *Sustaining High Performing Public Enterprises* presents strong lessons and conclusions for utility leaders and policy makers intending to reform their utilities to create value for citizens. It is also of value to academicians and researchers for scholarly studies in water and sanitation governance and management.

Integrated Reporting - Chiara Mio 2016-08-11

This book is a timely addition to the fast-growing international debate on Integrated Reporting, which offers a holistic view of the evolution and practice of Integrated Reporting. The book covers the determinants and consequences of Integrated Reporting, as well as examining some of the most relevant issues (particularly in the context of the United States) in the debate about Integrated

Reporting.

Quest for Exceptional Leadership - Ravi Chaudhry 2011-02-14

*Quest for Exceptional Leadership: Mirage to Reality* outlines the emergence of a new fifth phase of human enterprise that is redefining the criteria of success as well as re-configuring the routes to success. The author analyses the changing paradigms and provides a down-to-earth, realistic blueprint to acquire the relevant leadership traits. Corporations do not have the option to wait; they have to re-align themselves with the new reality – now. The author makes a compelling case that those who embrace the new realism will achieve sustained profitability for their companies and 'Triple Top Line' of joy, peace, and contentment in their personal lives.

Engaging the Six Cultures of the Academy - William H. Bergquist 2007-10-19

In *The Four Cultures of the Academy*, William H. Bergquist identified four different, yet interrelated, cultures found in North American higher education: collegial, managerial, developmental, and advocacy. In this new and expanded edition of that classic work, Bergquist and coauthor Kenneth Pawlak propose that there are additional external influences in our global culture that are pressing upon the academic institution, forcing it to alter the way it goes about its business. Two new cultures are now emerging in the academic institution as a result of these global, external forces: the virtual culture, prompted by the technological and social forces that have emerged over the past twenty years, and the tangible culture, which values its roots, community, and physical location and has only recently been evident as a separate culture partly in response to emergence of the virtual culture. These two cultures interact with the previous four, creating new dynamics.

Accounting and Corporate Reporting - Soner Gokten 2017-09-20

We have spent a great deal of time on the continued development of accounting and auditing standards, which are used as a primary component of corporate reporting, to reach today's financial reporting framework. However, is it possible to say that, currently, financial statements provide full and prompt disclosure? Or will they still be useful as a primary element with their current structures in corporate reporting? Undoubtedly, we are deeply concerned about these issues in recent times. This volume contains chapters to discuss the today's and tomorrow's accounting and corporate reporting phenomena in a comprehensive and multidimensional way. Therefore, this book is organized into six sections: "Achieving Sustainability through Corporate Reporting", "International Standardization", "Financial Reporting Quality", "Accounting Profession and Behavioral Aspects", "Public Sector Accounting and Reporting", and "Managerial Accounting".

Financial Inclusion, Regulation, and Education - Naoyuki Yoshino 2017

Financial inclusion is receiving increasing attention as having the potential to contribute to economic and financial development while at the same time fostering more inclusive growth and greater income equality. Although substantial progress has been made, there is still much to achieve. East Asia, the Pacific, and South Asia combined account for 55% of the world's unbanked adults, mainly in India and the People's Republic of China. This book surveys the experience of a number of advanced and Asian emerging economies to assess factors affecting the ability of low-income households and small firms to access financial services, including financial literacy, financial education programs, and financial regulatory frameworks, as well as identify policies that can improve their financial access while maintaining financial stability. It aims to identify successful experiences and important lessons that can be adopted by other emerging economies. The studies cover the experiences of Germany, the United Kingdom, Bangladesh, India, Indonesia, the Philippines, Sri Lanka, and Thailand. The book adopts a practical and holistic approach to issues related to financial inclusion. For example, innovative methods of promoting financial access, such as mobile phone banking and microfinance, require corresponding innovations in regulatory frameworks, perimeters, and capacity. Moreover, programs in the areas of financial education and consumer protection are needed to enable households and firms to take full advantage of improvements in financial access.

**The Routledge Companion to Accounting Information Systems** - Martin Quinn 2017-12-22

Information technology has permeated all walks of life in the past two decades. Accounting is no exception. Be it financial accounting, management accounting, or audit, information technology and systems have simplified daily tasks and routine work, simplified reporting, and changed how accounting is done. The Routledge Companion to Accounting Information Systems provides a prestige reference work which offers students and researchers an introduction to current and emerging scholarship in the discipline. Contributions from an international cast of authors provides a balanced view of both the technical underpinnings and organisational consequences of accounting information systems. With a focus on the business consequences of technology, this unique reference book will be a vital resource for students and researchers involved in accounting and information management.

**Accounting for Sustainability** - Anthony Hopwood 2010-09-23

If businesses and other organizations are to meet the many and complex challenges

of sustainable development, then they all, both public and private, need to embed sustainability considerations into their decision-making and reporting. However, the translation of this aspiration into effective action is often inhibited by the lack of systems and procedures that take sustainability into account. Accounting for Sustainability: Practical Insights will help organizations to address these issues. The book sets out a number of tools and approaches that have been developed and applied by leading organizations to: - embed sustainability into decision-making, extending beyond an organization's boundaries to take into account suppliers, customers and other stakeholders; - measure and link sustainability and financial performance; - integrate sustainability into 'mainstream' reporting, both to management and external stakeholders. In-depth cases studies from Aviva, BT, the Environment Agency, EDF Energy, HSBC, Novo Nordisk, Sainsbury's and West Sussex County Council show in detail how accounting for sustainability works in practice in a wide range of organizational contexts. Published with The Prince's Charities: Accounting for Sustainability The Huffin Puff Express - David L. Harrison 1974

*Lion Lights: My Invention That Made Peace with Lions* - Richard Turere 2022-08-02  
A story of ingenuity and perseverance. Richard Turere's own story: Richard grew up in Kenya as a Maasai boy, herding his family's cattle, which represented their wealth and livelihood. Richard's challenge was to protect their cattle from the lions who prowled the night just outside the barrier of acacia branches that surrounded the farm's boma, or stockade. Though not well-educated, 12-year-old Richard loved tinkering with electronics. Using salvaged components, spending \$10, he surrounded the boma with blinking lights, and the system works; it keeps lions away. His invention, Lion Lights, is now used in Africa, Asia, and South America to protect farm animals from predators.

**Corporate Governance Codes for the 21st Century** - Jean J. du Plessis 2017-04-19

The book is the first comprehensive consideration, since the UK Cadbury Report recommended a voluntary Corporate Governance Code, of the question whether Corporate Governance Codes are the most effective way of ensuring adherence to good corporate governance principles. There is no doubt that the idea of voluntary compliance with good corporate governance practices, based on the principle of 'comply or explain', has captured the imagination of the world. It is probably one of the best and most comprehensive examples of 'self-regulation' ever seen in any area where the society could be affected significantly, for current purposes by corporations. However, is this the most effective way of ensuring that corporations act responsibly and adhere to good corporate governance principles? Have these Codes really improved corporate governance practices significantly? Is it time for a rethink and, at least in certain areas, start to rely more on 'hard law' and clearer expectations to ensure compliance? All these issues are addressed in the book.

**Taxation of Crypto Assets** - Niklas Schmidt 2020-11-27

The emergence of crypto assets has required taxation authorities worldwide to develop unprecedented policies and compelled tax lawyers to apply existing laws in new ways. This book – the only one to focus solely on the taxation of crypto

assets – provides a detailed country-by-country analysis of how the tax law of thirty-nine countries may apply to this rapidly developing area, including different use cases and compliance and documentation requirements. Following an overview of the technology and key characteristics of crypto assets, as well as the key tax concepts and types of taxes that could apply to them, leading practitioners in each particular jurisdiction summarize the relevant tax law in that country. Fully explained are such aspects of crypto assets as the following and how they are interrelated: sales; exchanges; receipt as remuneration; forks; airdrops; mining; staking; initial coin offerings; security token offerings; and initial exchange offerings. Contributors describe how each jurisdiction applies income and capital gains taxation, value-added tax and sales tax, withholding taxes, transfer taxes, and gift, inheritance, estate and wealth taxes in the context of crypto assets. Reporting requirements and enforcement are also covered. Tax law, as it applies to crypto assets, is new and continues to evolve. This book will be welcomed as the premier resource for tax practitioners, government officials, advisors, investors, issuers, users of crypto assets, and taxation academics who are seeking informed awareness of the policy choices countries make in dealing with the taxation of this new technology. Tax lawyers dealing with crypto assets will have comprehensive practical guidance on how to comply with the tax laws of multiple jurisdictions.

**The Sustainable Development Goals in Higher Education** - Wendy Steele 2021-08-26  
This book explores the role universities have to play in fulfilling the Sustainable Development Goals (SDGs). At the heart of “sustainable development” is the legacy of unsustainable development with its roots in modernity and colonialism. Critical engagement with the SDGs involves recognising these roots are shared by universities and the reciprocal need for maintenance, repair and regeneration. Universities are not just enablers of change, but also important targets of change. By focusing on the role of education about, for and through the SDGs, the authors seek to advance critical engagement with higher education that is both progressive and meaningful. We are all responsible for bearing witness to our age. This book will appeal to all those who hope that more sustainable future worlds are still possible.

**Social and Sustainability Marketing** - Jishnu Bhattacharyya 2021-09-26  
“... an important intervention in the conversation around social and ecological sustainability that draws on both micromarketing and macromarketing scholarship to help the reader understand the challenges with illustrations from insightful cases both from emerging and developed economies. This compilation should be essential reading for the discerning student of sustainable consumption and production.” -- Professor Pierre McDonagh, Associate Editor, Journal of Macromarketing (USA); Professor of Critical Marketing & Society, University of Bath, UK Experts in the field of economics, management science, and particularly in the marketing domain have always been interested in and acknowledged the importance of sustaining profitable businesses while incorporating societal and environmental concerns; however, the level of existing literature and availability of teaching cases reflect a dearth of real case studies, especially those focused on marketing for social good. This book of actual case studies will address that need. In addition, this book is important and timely in providing a case book for instructors (those in both industry and academia) to help them in teaching and training the next generation of leaders through corporate training and universities. Currently, marketing for social good is increasingly becoming a part of most curriculums under the umbrella of different titles, such as social marketing, green marketing,

and sustainability marketing. The relevance of these studies is increasing across the globe. This book is composed of long and short real cases with varying complexity in different sectors. This case book will also cover some review articles for an overview of the recent developments in the study area. With these case studies, collections of questions, teaching materials, and real-life marketing scenarios, this book offers a unique source of knowledge to marketing professionals, students, and educators across the world. The main objective of this case book is to understand the applicability of marketing science (marketing for social good context, such as social marketing and sustainability marketing) in internet marketing related to e-buying behavior and e-WOM. In addition, it illustrates the various types of existing marketing practices that are relevant from both theoretical and practical points of view in this electronic era, as well as discussing other non-electronic marketing practices and focusing on consumer buying behavior. As a result, marketing managers can treat their customers according to their desired value. This book particularly explores the possibilities and advantages created by social marketing and sustainability marketing through the presentation of thorough review articles and case studies. This case book helps corporate training centers and universities with compact teaching reference materials in their relevant courses.

**Creating a University** - Roberta Buchanan 2019-05

Creating a University is a collection of memoirs by more than 30 former faculty and staff of Memorial University -- a series of "MUNographies,"-- about personal and professional experiences working at Newfoundland's only university. It is something of a Memorial University family reunion, without a drunken uncle. In the years covered by this volume, primarily 1950 to 1990, few Memorial faculty were Canadians, let alone Newfoundlanders. These "come from aways" arrived in the middle of a post-colonial cultural renaissance, which saw a movement toward new interdisciplinary studies, and laid the groundwork for many of the programs and courses that are offered at the University today.

**The Art of Feminism, Revised Edition** - Helena Reckitt 2022-11-01

Featuring a new package and an additional 60 pages of material, this revised edition of The Art of Feminism covers an even more impressive range of artworks, artists, movements, and perspectives. Since the debut of the original volume in 2018, The Art of Feminism has offered readers an in-depth examination of its subject that is still unparalleled in scope. The comprehensive survey traces the ways in which feminists—from the suffragettes and World War II-era workers through twentieth-century icons like Judy Chicago and Carrie Mae Weems to the contemporary cutting-edge figures Zanele Muholi and Andrea Bowers—have employed visual arts in transmitting their messages. With more than 350 images of art, illustration, photography, and graphic design, this stunning volume showcases the vibrancy of the feminist aesthetic over two centuries. The new, updated edition of the book features revised and expanded material in each of the book's original sections, as well as entirely new material dedicated to the art pieces that have shifted the landscape of feminist art today. This new material includes: women artists of the Bauhaus; grassroots and experimental curatorial efforts; a broader range of performance artists; and recent art shows and works, such as Kara Walker's *Fons Americanus*, which debuted at London's Tate Modern museum in 2020. **UNIQUE IN SCOPE:** The breadth and inclusiveness of this volume sets it apart and makes it the definitive book on international feminist art. The new edition brings the book into the current moment, ensuring that this groundbreaking volume remains relevant and fresh. It features an astonishing roster of artists, including: Barbara Kruger

Sophie Calle Marina Abramovic Judy Chicago Faith Ringgold Cindy Sherman Ana Mendieta Zanele Muholi Mickalene Thomas Louise Bourgeois Shirin Neshat Andrea Bowers Pina Bausch JEB Amrita Sher-Gil Luchita Hurtado Ayana Jackson Patrisse Cullors  
EXPERT AUTHORS: Lead author Helena Reckitt has assembled a team of experts who are superbly qualified to unpack the rich history, power, and symbolism of feminist art for a new modern-day audience. UPDATED AND INCLUSIVE: This edition of the book features an even more diverse array of artists and artworks than the original, from the beautiful figurative paintings of Hungarian-Indian artist Amrita Sher-Gil to the thoroughly researched and extravagantly costumed self-portraits of American photographer Ayana Jackson. Perfect for: Feminists and activists Art history lovers College and graduate students

**Corporate Social Responsibility and International Development** - Michael Hopkins  
2012-05-04

Presenting ideas for how business can lead the way in deriving the good from globalisation, this book makes the case that governments and their international agencies, grouped under the umbrella of the United Nations, have failed in their attempts to rid the planet of underdevelopment and poverty.

Sustainability Accounting and Integrated Reporting - Charl de Villiers 2017-11-03  
Sustainability Accounting and Integrated Reporting deals with organizations' assessment, articulation and disclosure of their social and environmental impact on various groups in society. There is increasingly an understanding that financial information does not sufficiently discharge organizational accountability to members of society who are demanding an account of the social and environmental impacts of companies' and other organizations' activities. As a result, organizations report ever more social and environmental information, and there are simultaneous movements towards providing the information in an integrated fashion, showing how social and environmental activities influence each other, members of society and the financial aims of the organization. The book Sustainability Accounting and Integrated Reporting provides a broad and comprehensive review of the field, focusing on the interconnection between different elements of these topics, often dealt with in isolation. The book examines the accounting involved in the collection and analysis of data, control processes over the data, how information is reported to external parties, and the assurance of the information being reported. The book thereby provides an overview useful to practitioners (including sustainability managers, consultants, members of the accounting profession, and other assurance providers), academics, and students.

**Integrated Reporting** - Samuel O. Idowu 2019-01-04

This book critically examines the implementation and adoption of integrated reporting (IR) in organizations and corporations. A relatively new area of policy and practice, IR has rapidly gained considerable prominence since the formation of the International Integrated Reporting Committee in 2010. The book analyzes the outcomes and benefits as well as the shortfalls of integrated reporting. It offers an introduction to the foundations of IR and a comprehensive overview of its use through a number of detailed case studies. Lastly, it discusses the outlook for further developments in sustainability accounting and reporting.

**Breakthrough: Corporate South Africa in a Green Economy** - Nhamo, Godwell  
2014-05-05

This book addresses hot issues pertaining to the manner in which corporate South Africa has engaged the emerging green global economy. Firstly, the book profiles the green and low carbon economy landscape in South Africa and interfaces it with global trends. This way, the book aligns very well in terms of the Rio+20 outcomes on 'The Future We Want' that fully embraces the green global economy in the context of sustainable development and poverty eradication. The rest of the chapters in the book profile breakthroughs from selected companies. The book also comes as the second in a series that is addressing global and national concerns on the green global economy agenda. The first book entitled 'Green Economy and Climate Mitigation: Topics of Relevance to Africa' was produced as part of the 17th Session of the Conference of Parties' collaborative work carried out by the Institute of Global Dialogue, the Africa Institute of South Africa and Unisa's Institute for Corporate Citizenship. The book 'Breakthrough: Corporate South Africa in the Green Economy' comes in seven parts. Part I focuses on the Green Economy Landscape. This part considers both the international and national perspectives. Parts II-VI present different sector initiatives namely: Mining and Energy (Part II), Banking and Insurance (Part III), Forest and Paper (Part IV), Industrial (Part V) and Retailing and Aviation (Part VI). The last part is made up of a single chapter dealing with Emerging Issues and Way Forward.

*The Routledge Companion to Accounting Education* - Richard M.S. Wilson 2014-04-29  
Many enquiries into the state of accounting education/training, undertaken in several countries over the past 40 years, have warned that it must change if it is to be made more relevant to students, to the accounting profession, and to stakeholders in the wider community. This book's over-riding aim is to provide a comprehensive and authoritative source of reference which defines the domain of accounting education/training, and which provides a critical overview of the state of this domain (including emerging and cutting edge issues) as a foundation for facilitating improved accounting education/training scholarship and research in order to enhance the educational base of accounting practice. The Routledge Companion to Accounting Education highlights the key drivers of change - whether in the field of practice on the one hand (e.g. increased regulation, globalisation, risk, and complexity), or from developments in the academy on the other (e.g. pressures to embed technology within the classroom, or to meet accreditation criteria) on the other. Thirty chapters, written by leading scholars from around the world, are grouped into seven themed sections which focus on different facets of their respective themes – including student, curriculum, pedagogic, and assessment considerations.

Financial Accounting and Reporting - Barry Elliott 2011

Financial Accounting and Reporting is the most up to date text on the market. Now fully updated in its fourteenth edition, it includes extensive coverage of International Accounting Standards (IAS) and International Financial Reporting Standards (IFRS). This market-leading text offers students a clear, well-structured and comprehensive treatment of the subject. Supported by illustrations and exercises, the book provides a strong balance of theoretical and conceptual coverage. Students using this book will gain the knowledge and skills to help them apply current standards, and critically appraise the underlying concepts and financial reporting methods.

*The Man Who Founded the ANC* - Bongani Ngqulunga 2017-06-19

In 1912, just over a year after returning from his studies at Columbia and Oxford, the thirty-year-old Pixley ka Isaka Seme succeeded where others had failed in forming a political organisation that represented all black South Africans. Seme

also established a national newspaper, became one of the pioneering black lawyers in South Africa, bought land from white farmers for black settlement at the time when opposition to it was gaining momentum, became an adviser and confidant to African royalty, and was considered a leading visionary for black economic empowerment. And yet, when he became president general of the ANC in the 1930s, he brought it to its knees through sheer ineptitude and an authoritarian style of leadership. On more than one occasion he was found guilty for breaching the law, which partly led to him being struck off the roll of attorneys. This book discusses in detail Seme's extraordinary life, tracing it back to his humble beginnings at Inanda Mission to his triumphs and disappointments across the continents, in his public and private life. When Seme died in 1951 he was bankrupt and his political standing had suffered greatly. And yet he was praised as one of the greatest South Africans ever to have lived. For all this, he has largely been forgotten. This biography brings the remarkable life of this extraordinary South Africa back to public consciousness.
