Should companies care about climate change? Should they

be vanquishing the gender pay gap? Should they be advancing human rights in their supply chains? And if we think they should - can we, as ordinary people, bring about these sorts of changes? The answer is, technically, yes. In the UK, the majority of us now own shares in listed companies - whether that be through a stocks and shares ISA, a self-invested portfolio or a workplace pension scheme. What few

people know is that every share comes with a vote in company decisions, over everything from executive pay to corporate strategy. The technology exists to allow us to vote - all we need to do is learn how to use it. In *Share Power*, Merryn Somerset Webb, Editor-in-Chief of MoneyWeek, takes us deep into the world of corporate capitalism - from the privatisation of state-owned companies in the 1980s to the financial crash of 2008 and the growth of the modern multinational - to show us how capitalism went wrong and how, with six simple recommendations, every one of us now has the power to make it work for us.

Kazuo Ishiguro 2010-07-15

BOOKER PRIZE WINNER •

From the winner of the Nobel Prize in Literature, here is “an intricate and dazzling novel” (The New York Times) about the perfect butler and his fading, insular world in post-World War II England. This is Kazuo Ishiguro's profoundly compelling portrait of a butler named Stevens. Stevens, at the end of three decades of service at Darlington Hall, spending a day on a country drive, embarks as well on a journey through the past in an effort to reassure himself that he has served humanity by serving the “great gentleman,” Lord Darlington. But lurking in his memory are doubts about the true nature of Lord Darlington's “greatness,” and much graver doubts about the nature of his own life.

The Effect - Nick Huntington-Klein 2021-12-20

The Effect: An Introduction to Research Design and Causality is about research design, specifically concerning research that uses observational data to make a causal inference. It is separated into two halves, each with different approaches to that subject. The first half goes through the concepts of causality, with very little in the way of estimation. It introduces the concept of identification thoroughly and clearly and discusses it as a process of trying to isolate variation that has a causal interpretation. Subjects include heavy emphasis on data-generating processes and causal diagrams. Concepts are demonstrated with a heavy emphasis on graphical intuition and the question of what we do to data. When we “add a control variable” what does that actually do? Key Features: • Extensive code examples in R,

Stata, and Python • Chapters on overlooked topics in econometrics classes: heterogeneous treatment effects, simulation and power analysis, new cutting-edge methods, and uncomfortable ignored assumptions • An easy-to-read conversational tone • Up-to-date coverage of methods with fast-moving literatures like difference-in-differences

What is Essential to Being Human? - Margaret S. Archer 2021-07-14

This book asks whether there exists an essence exclusive to human beings despite their continuous enhancement – a nature that can serve to distinguish humans from artificially intelligent robots, now and in the foreseeable future. Considering what might qualify as such an essence, this volume demonstrates that the abstract question of ‘essentialism’ underpins a range of social issues that are too often considered in isolation and usually justify ‘robophobia’, rather than

'robophilia', in terms of morality, social relations and legal rights. Any defence of human exceptionalism requires clarity about what property(ies) ground it and an explanation of why these cannot be envisaged as being acquired (eventually) by AI robots. As such, an examination of the conceptual clarity of human essentialism and the role it plays in our thinking about dignity, citizenship, civil rights and moral worth is undertaken in this volume. What is Essential to Being Human? will appeal to scholars of social theory and philosophy with interests in human nature, ethics and artificial intelligence.
