The Practice of Assessment in Music Education - Frank Abrahams 2010

Self-Evaluation in European Schools - Lars Jakobsen 2003-09-02
In a political and economic climate in which school performance is made public, performance tables and inspectors' reports can only tell a partial story. This is a unique book. It tells the story of one school seen through the eyes of a pupil, a parent, a teacher, a headteacher and a critical friend. The story is a compelling journey through the process of school improvement; theories of school effectiveness and school improvement are progressively clarified. This book is based on a well-known and well-documented research project that represents eighteen European countries, which clearly sets it in a European Policy context. It includes a wealth of practical tools for raising standards for teachers and school managers to refer to, and guidance on how to use them. This eagerly awaited follow-up to Schools Must Speak for Themselves by John MacBeath (RoutledgeFalmer 1999) is a vital and useful source of good ideas, challenging insights and practical strategies for real schools.
The Inside Story - Molly Harrower 2013-06-17
This unusual book was written to provide a glimpse into the inner "Rorschach" world of individuals -- psychology students in training -- representing the basic Rorschach subtypes. The Rorschach records of these graduate students in clinical psychology are presented along with their own interpretations and analyses of their records. In short, The Inside Story offers both a new approach to learning projective diagnostic methods such as the Rorschach and a new experience in the adventure of self-understanding.

Behavior Management: From Theoretical Implications to Practical Applications - John W. Maag 2016-09-14
Authored by nationally recognized scholar and behavioral consultant Dr. John W. Maag, this book focuses primarily on students' observable behaviors and the environmental factors that affect their expression. As Maag points out, behavior management is probably one of the most misunderstood concepts in education. Written in a very accessible style, this book demystifies stereotypical beliefs and misconceptions regarding the use of reinforcement, punishment, and self-control. Maag offers clear, but detailed descriptions of proven intervention techniques, supplemented by a range of step-by-step guidelines, sample forms, charts, graphs, and illustrations that assist teachers in implementing the techniques. Although the techniques described in the book are based on a sound theoretical and empirical foundation, the author limits the use of technical jargon and infuses real-life examples and case studies that clarify and illuminate the presentation. Promoting Spontaneous Use of Learning and Reasoning Strategies - Emmanuel Manalo 2017-10-03

In this book, scholars from around the world develop viable answers to the question of how it may be possible to promote students' spontaneity in the use of learning and reasoning strategies. They combine their expertise to put forward new theories and models for understanding the underlying mechanisms; provide details of new research to address pertinent questions and problems; and describe classroom practices that have proven successful in promoting spontaneous strategy use. This book is a must for educators and researchers who truly care that schooling should cultivate learning and reasoning strategies in students that would prepare and serve them for life. A seminal resource, this book will address the basic problem that many educators are well acquainted with: that students can learn how to effectively use learning and reasoning strategies but not use them of their own volition or in settings other than the one in which they learned the strategies.

Bloomsbury CPD Library: Using Technology in the Classroom - José Picardo 2017-11-16

Designing a Continuing Professional Development (CPD) programme can be daunting. Whether you are looking to better your own practice or coach your colleagues, it can be hard to know where to start. But don't worry, the Bloomsbury CPD Library is here to help! Divided into two unique sections, Teach Yourself and Train Others, this book is perfect for individual teachers, middle leaders and those looking to introduce whole-school CPD training programmes. The provision of technology focused CPD is often based on the 'whizz and bang' approach, promoting the use of eye-catching digital tools and equipment in classrooms without due consideration to pedagogical factors and, crucially, the individual school's context. José Picardo's new book will consider how technology is used in schools and provide research-informed strategies to help improve teaching and learning by using technology effectively. It focuses on the need to train staff in the skills required to choose the right technology to have lasting impact and combines not only information about how technology can best work in the classroom, but also what makes great teaching and how technology can complement this. The goal of the book is to help teachers integrate technology seamlessly into daily practice so that technology is used almost reflexively, effectively and without fuss. It also provides guidance on how to integrate this methodology and way of thinking across your school as well as training other teachers to successfully choose and use the best technology for their subject and their students. The book provides ten ready-to-use training plans, equating to a cost of just £2.30 per CPD session!

Self-Esteem Issues and Answers - Michael H. Kernis 2013-04-15

Research and theory on self-esteem have flourished in recent years. This resurgence has produced multiple perpectives on fundamental issues surrounding the nature of self-esteem and its role in psychological

functioning and interpersonal processes. Self-Esteem Issues and Answers brings together these various perspectives in a unique format. The book is divided into five sections. Section I focuses on core issues pertaining to the conceptualization and assesment of self-esteem, and when self-esteeem is optimal. Section II concentrates on the determinants, development, and modifiability of self-esteem. Section III examines the evolutionary significance of self-esteem and its role in psychological processes and therapeutic settings. Section IV explores the social, relational, and cultural significance of self-esteem. Finally, Section V considers future directions for self-esteem researchers, practitioners, parents and teachers. This volume offers a wealth of perspectives from prominent researchers from different areas of psychology. Each expert contributor was asked to focus his or her chapter on a central self-esteem issue. Three or four experts addressed each question. The result is that Self-Esteem Issues and Answers provides a comprehensive sourcebook of current perspectives on a wide range of central self-esteem issues.

Entrepreneurship and Intrapreneurship in Social, Sustainable, and Economic Development - Sebastian Aparicio 2021-01-25

Entrepreneurship and intrapreneurship have become a vehicle that offers solutions for social, environmental, and economic problems. Even though the level of entrepreneurial activity and its diversity have been motivated through public policies, social support has also played an important role in encouraging people to think of entrepreneurship as a desirable career choice. This book brings together analyses of those elements required for entrepreneurial and intrapreneurial intention and action, which ultimately become important leverages of development. Chapters highlight the importance of rural, urban, university, organizational, and family environments for a bunch of intentions and behaviors such as green, sport, social, corporate, innovative, traditional, and gender entrepreneurship. This entrepreneurial diversity is translated into higher development through the empowerment of women, environmental consciousness, and efficient production. Policymakers, scholars, and practitioners can find different examples and cases useful for decision-making, learning, and practice in this book.

Teaching Students How to Use Self-Management - Margaret E. King Sears 2019-03-22
Self-management is a robust technique whereby students of all ages and ability levels learn how to control their learning and social behaviors. When students effectively self-manage, teachers spend more time on instruction and less time reminding students how to behave, which benefits teachers and students. Additionally, students learn independence when they self-manage. This guide presents a 10-step instructional sequence for teaching students three types of self-management: self-monitoring, self-evaluation, and self-reinforcement. Each type can be taught to a whole class, small groups, or individual students (grades K-12). Any type can be used with both learning and social behaviors. Through this simple 10-step process, students learn what self-management is, why to use it, how to apply it, and when to use it. Instruction includes role-playing, modeling, and demonstrating mastery during guided practice and in the actual setting. Instruction takes about one hour, spread across multiple sessions. After instruction, follow-up is necessary to reinforce students' use of self-management and confirm that accurate self-management occurs.

Bloomsbury CPD Library: Secondary Curriculum and Assessment Design - Summer Turner 2016-09-22
In the past few years, the way we think about assessment has undergone a revolution. From the re-organisation of qualifications and examinations at national level (including removing National Curriculum levels at secondary school) to the increasing focus on active research to develop feedback strategies with a measurable impact, assessment has never been so much at the forefront of educational thought. While previously assessment was bound to the curriculum, now there is a demand for schools to develop assessment systems that are merely driven by it. Despite raising serious questions and challenges, these dramatic changes provide a reason for teachers to evaluate their practice. Simultaneously, the nature of CPD has been reinvigorated in the 'digital age', with teachers galvanised by online resources, Twitter and educational blogs. The result? Teachers can take their development into their own hands, and re-professionalise teaching! Bringing together these two movements, this book provides an opportunity for teachers to grasp what formative assessment means, how it complements the curriculum when used effectively, how to employ it in their classroom and school, and how they can improve their assessment systems and practice within the classroom. Divided into two parts, train yourself and teach others, this book

will dispel concerns, and help teachers and school leaders to embrace and excel in all areas of formative assessment!

How to Be Good at Performance Appraisals - Dick Grote 2011-07-05
Do you supervise people? If so, this book is for you. One of a manager's toughest—and most important—responsibilities is to evaluate an employee's performance, providing honest feedback and clarifying what they've done well and where they need to improve. In How to Be Good at Performance Appraisals, Dick Grote provides a concise, hands-on guide to succeeding at every step of the performance appraisal process—no matter what performance management system your organization uses. Through step-by-step instructions, examples, do-and-don't bullet lists, sample dialogues, and suggested scripts, he shows you how to handle every appraisal activity from setting goals and defining job responsibilities to evaluating performance quality and discussing the performance evaluation face-to-face. Based on decades of experience guiding managers through their biggest challenges, Grote helps answer the questions he hears most often: • How do I set goals effectively? How many goals should someone set? • How do I evaluate a person's behaviors? Which counts more, behaviors or results? • How do I determine the right performance appraisal rating? How do I explain my rating to a skeptical employee? • How do I tell someone she's not meeting my expectations? How do I deliver bad news? Grote also explains how to tackle other thorny performance management tasks, including determining compensation and terminating poor performers. In accessible and useful language, How to Be Good at Performance Appraisals will help you handle performance appraisals confidently and successfully, no matter the size or culture of your organization. It's the one book you need to excel at this daunting yet critical task.

Bloomsbury CPD Library: Stretch and Challenge - Debbie Light 2017-01-12
In the past schools have labelled the most able students in a class or year group as 'gifted and talented'. While segregating these students may help them to achieve their academic potential, there is little benefit in this practice for their 'less able' classmates. Even less so for those who are left in the middle space, identified as neither highly academic nor severely struggling. The Stretch and Challenge model focuses on setting high expectations for all students, regardless of their ability. Encouraging all children to meet universally high targets introduces flexibility between, otherwise rigid, ability groups, and gives children greater opportunities to exceed. Split into two parts, Stretch and Challenge focuses on different ways of thinking about and implementing this model in school. Debbie Light begins by helping teachers to create a culture of high expectations in their classroom by setting challenging learning objectives, creating opportunities for students to develop independence and supporting students, as they become resilient learners. The second half of the book advises teachers how to create an inclusive learning environment where all children feel challenged by encouraging teacher questioning, designing tasks, grouping students and effectively using teaching assistants. Filled with honest, experienced and undeniably helpful advice, Debbie Light's Stretch and Challenge is a must have guide for all teachers who want to collectively maximise their students' learning and achievement. The book provides a set of ready-to-use training plans to help you train your colleagues and is accompanied by PowerPoint slides available to download online for free. It offers 19 hours of CPD, equating to a cost of just £1.20 per hour of training!

Bloomsbury CPD Library: Mentoring and Coaching - Marcella McCarthy 2017-04-20
Mentoring and coaching are positive and encouraging ways for schools to manage staff performance and leadership development, but turning to outside bodies for training and expertise can be expensive and time-consuming. Internally equipping staff with the skills to coach others is a fantastic way to overcome this boundary and, over time, these highly transferable skills will further teachers' professional development and help them realise their career ambitions. In Bloomsbury CPD Library: Mentoring and Coaching, Marcella McCarthy draws on her experiences as a school leader to explain different theories of coaching and mentoring, examine research and demonstrate its advantages in various situations, so as to guide you step-by-step through practical methods of coaching and mentoring that can be easily implemented in your own school. There are example scenarios to tackle that will prepare you for a multitude of real-life situations and the easy-to-understand, concise methods of self-evaluation help ensure that mentors track their development and continuously improve their approach. The book provides a set of ready-to-use training plans to help you develop mentoring and coaching across your school and is accompanied by PowerPoint

slides and resources available to download online for free. It offers 14 hours of CPD, equating to a cost of just £1.65 per hour of training!

Bloomsbury CPD Library: Senior Leadership - Jon Tait 2018-09-06
Being an outstanding classroom teacher does not always translate into being an outstanding senior leader – the skill set can be very different. A senior leader's focus must shift from delivering high-quality classroom teaching, towards leading staff rather than children. Experienced Deputy Headteacher, Jon Tait, sets out to help with this transition by teaching aspiring senior leaders how to lead staff and gain vital knowledge and experience in their new role. This easy-to-follow title in the Bloomsbury CPD Library specifically focuses on the next stage in a teacher's career: senior leadership. It includes a full set of helpful, ready-to-use training plans for 20 hours of CPD sessions with your school and senior leadership team. All hand-outs and presentations are provided in the book or available as a free download from the companion website.

Bloomsbury CPD Library: Independent Learning - John L. Taylor 2018-02-08
Independent learning is an ideal which many teachers aspire to but find difficult to achieve. This book provides ten training plans that enable you to easily deliver hours of CPD sessions in your school. All presentations and hand-outs are provided in the book and online, making Bloomsbury CPD Library: Independent Learning all you need to help your students think independently, for a richer learning experience, and to impress inspectors. It is common for school inspectors to comment on the need for students to learn more independently, and from higher education admissions officers and employers there is a constant call for students to be better equipped to be able to learn and think for themselves. Students themselves enjoy and benefit from lessons in which they are given the opportunity to begin to take charge of the learning process, particularly when there is space for them to explore and inquire into topics that grab their attention. At the same time, there is enormous pressure on schools to 'teach to the test', leading many teachers to feel that they have to play safe and cannot risk giving their students genuine responsibility for their own learning, lest results suffer. Critics also argue that students need to be taught directly, as the capacity for meaningful inquiry is not one that most students possess, and even when it is present, the open-ended nature of the inquiry process can make learning inefficient. In this book, John L. Taylor shows how the rhetoric about independent learning can be turned into a practical reality. The book explores the foundations of effective learning and demonstrates how it is possible to implement an approach to learning which encourages students to learn to think for themselves. It shows how by teaching students to think better, teachers can ensure that they both succeed in jumping assessment hurdles and also enjoy a richer, more meaningful educational experience.

Bloomsbury CPD Library: Supporting Children with Special Educational Needs and Disabilities - Cherryl Drabble 2016-09-22
According to the most recent SEND Code of Practice, every teacher is a teacher of children with special educational needs and disabilities, and yet teachers often receive little or no training in this area. Despite their best intentions they are therefore often ill-equipped to rise to the challenge of helping their students achieve the best possible educational outcomes. This comprehensive resource will equip primary and secondary teachers and SENDCos with the training and skills they need to fully support children with SEND in mainstream classrooms. Cherryl Drabble draws on her vast experience as a CPD leader, NQT mentor and her many years of working with SEND to share guidance, practical activities and strategies for evaluating and strengthening your practice and that of your colleagues. The book provides a set of ready-to-use training plans, accompanied by PowerPoint slides available to download online for free, so you can train your colleagues in this essential area and ensure the best support possible for students with SEND across your school. In total, the book offers over 50 hours of CPD, equating to a cost of less than 50p per hour of training!
