Wittgenstein's Secret Diaries - Dinda L. Gorlée 2020-02-06
Ludwig Wittgenstein's works encompass a huge number of published philosophical

manuscripts, notebooks, lectures, remarks, and responses, as well as his unpublished private diaries. The diaries were written mainly in coded script to

interpolate his writings on the philosophy of language with autobiographic passages, but were previously unknown to the public and impossible to decode without learning the coding system. This book deciphers the cryptography of the diary entries to examine what Wittgenstein's personal idiom reveals about his public and private identities. Employing the semiotic doctrine of Charles S. Peirce, Dinda L. Gorfée argues that the style of writing reflects the variety of Wittgenstein's emotional moods, which were profoundly affected by his medical symptoms. Bringing Peirce's reasoning of abduction together with induction and deduction, the book investigates how the semiosis of the emotional, energetic, and logical

interpretations of signs and objects reveal Wittgenstein's psychological states in the coded diaries.

Egon Eiermann - Immo Boyken 2004

Text in English and German. When the German Embassy in Washington was completed in 1964, the architectural critic of the Washington Post wrote that the express aim of those commissioning the building had been to make an architectural statement that would embody the spirit of the young German democracy and avoid any form that could revive grim memories of the past. The paper felt that it

had been right to engage Egon Eiermann for this project, as he had already solved the same problem of 'architectural diplomacy' with his German Pavilion for the Brussels World Fair in 1958.

Xenosophia and Religion. Biographical and

Statistical Paths for a Culture of Welcome -

Heinz Streib 2018-07-20

This book documents the current polarization in Germany regarding the issue of refugee immigration. It presents quantitative estimates for both xenophobia and xenophilia in the German population, including short-time changes. The book suggests a conceptual change of perspectives. It focuses not only on the pathogenic model that accounts for outcomes such as xenophobia, Islamophobia and other forms of (inter-religious) prejudice, but on a salutogenic model. In the book's view, the salutogenic model entails xenosophia: the wisdom, creativity and inspiration that emerges from the encounter with the strange and the strange religion. The book addresses

individual dispositions, which may lead to xenophobia or xenosophia, and takes into account predictors such as religiosity, religious schemata, value preferences, tolerance of complexity, and violence legitimizing norms of masculinity. A selection of case studies present typical biographical trajectories toward xenosophia.

Effective Sustainability Communication for Music Festivals and other Mega-Events - Franziska Hillmer 2016-03-23
Festivals are an

important part of the music event industry, especially for young adults. But compared to the beginnings, their meanings have changed: Attendees want to celebrate without any compromises. However, today mankind is confronted with the greatest sustainability challenges, which are not satisfactorily tackled. Still, with a rising awareness of these issues, companies' interest in including sustainability issues in their communications strategy has increased. This study attempts to explore how a Sustainability Communication (SC) concept needs to be designed to reach fans of music festivals and influence them towards a more sustainable behaviour. For that purpose, it deals with sustainability management, background

information about SC and the attendees' needs. Moreover, it shows rays of hope for this issue in the festival landscape. Afterwards the results of a survey conducted among festival fans (more than 750 participants), examining their attitude regarding sustainability issues, were assessed. This study aims to equip the reader with a thorough knowledge of the potential of Sustainability Communication within and through festivals, as well as give an insight into how a SC strategy must consider the needs of fans to realize a more sustainable event.

Experiences of Intervention Against Violence - Carol

Hagemann-White
2016-10-24

The stories in this
anthology emerged from
interviews with women
and young people about
their experience of
intervention when they
were escaping a
situation of abuse,
neglect and/or sexual
exploitation. They come
from the research
project "Cultural
Encounters in
Intervention Against
Violence (CEINAV)" in
four countries – England
& Wales, Germany,
Portugal and Slovenia.
Through support services
the women and young
people were contacted;
they came from a
minority or migration
background and had
travelled through a
history of violence and
intervention, and were
asked to tell who
intervened, what had

been helpful and what had not.

Winnetou - Alfred P.
Donhauser 1968
Winnetou is an
abridgment of the most
popular novel by the
"Zane Grey" of Germany.
Laid in the Wild West of
frontier days, this
action-filled, often
comical story of
adventures with
buffaloes, bears, and
Indians nonetheless has
a serious, universal
theme. The hero, "Old
Shatterhand," a German
immigrant prospecting
for a railway company,
becomes the defender of
the red man's rights and
blood brother of
Winnetou, son of the
Apache chief. A simple,
conversational
vocabulary and a
familiar American
setting make this an

ideal reader for
beginning and
intermediate-level
students. - Back cover.

Biodiversity Offsets
Between Regulation and
Voluntary Commitment -
Marianne Darbi
2020-05-20

We are witnessing an
alarming, global
biodiversity crisis with
an ongoing loss of
species and their
habitats. In response, a
number of tools and
approaches – including
some that are contested
– are being explored and
promoted. Biodiversity
offsets are one such
approach, and deserve
critical examination
since the debate
surrounding them has

often been oversimplified and lacking practical evidence. As such, this study presents a refined typology including seven types of biodiversity offsets and taking into account different contexts, governance arrangements and drivers. It draws on a detailed analysis of theoretical concepts to explain the voluntary implementation of biodiversity offsets using an internet-based (netnographic) research approach. Furthermore it builds on a broad global explorative base of 72 practical examples and presents in-depth case studies for each type. The results reveal a number of global tendencies that allow recommendations to be made for different locations, contexts and stakeholders. They also encourage the expansion of this research field

to respond to the pressing needs of policy and practice.

**Dissension and Face-work
Strategies in German**

Dialogues - Selma
Martins Meireles
2015-03-30

Dissension, defined as a
propositional attitude
of the speaker's
disagreement is
classified into four
categories according to
its scope. Its
occurrences in German
discussions were
analyzed according to
their linguistic
expressions and 'Face-
work'. No specific
linguistic means for
expressing Dissension
was found, although most
cases display

semantically negative
lexical components. 38
Face-work strategies
were defined based on
Brown/Levinson (1978,
1987). Linguistic
elements from many word
classes as well as
devices such as Deixis
manipulation were used
for Face-work purposes.
