Red Guard Factionalism And The Cultural Revolution In Guangzhou (canton) - Stanley Rosen 2019-06-04

When the Chinese Great Proletarian Cultural Revolution (GPCR) of the middle and late 1960s burst forth, the initial response both in China and the West seemed primarily to be one of mystification. The spectacle of severe splits among leaders long thought to be compatible, of armed struggles between factional units whose uniform pledges to Chairman Mao and the Party Center appeared to make their similarities greater than their differences, and of destructive Red Guards who were bent on "tearing down the old world to build a new one" was at first difficult to explain.

Game Theory, Alive - Anna R. Karlin 2017-04-27

We live in a highly connected world with multiple self-interested agents interacting and myriad opportunities for conflict and cooperation. The goal of game theory is to understand these opportunities. This book presents a rigorous introduction to the mathematics of game theory without losing sight of the joy of the subject. This is done by focusing on theoretical highlights (e.g., at least six Nobel Prize winning results are developed from scratch) and by presenting exciting connections of game theory to other fields such as computer science (algorithmic game

theory), economics (auctions and matching markets), social choice (voting theory), biology (signaling and evolutionary stability), and learning theory. Both classical topics, such as zero-sum games, and modern topics, such as sponsored search auctions, are covered. Along the way, beautiful mathematical tools used in game theory are introduced, including convexity, fixed-point theorems, and probabilistic arguments. The book is appropriate for a first course in game theory at either the undergraduate or graduate level, whether in mathematics, economics, computer science, or statistics. The importance of game-theoretic thinking transcends the academic setting—for every action we take, we must consider not only its direct effects, but also how it influences the incentives of others.

The Art of Xu Bing - Britta Erickson

2001

Xu Bing (born 1955) stands out as a leading figure in the international art world. His works and installation pieces, including *Ghosts Pounding the Wall* (an actual rubbing of the Great Wall done at Jinshanling in 1990) and *Wu Street* (1993), and his ongoing exploration of language have brought worldwide attention to this unassuming provocateur. As a teenager in China during its Cultural Revolution, Xu Bing experienced the emotional and social upheavals that marked this tumultuous time. He was removed from his "reactionary" parents in Beijing and sent to the provinces to work in a small farming commune as part of Mao Zedong's "rustication" program in 1974. His forced participation in the revolution led him to question and re-examine all he had known, from the meaning and appearance of Chinese characters to the purpose of the Great Wall of China and the value of art and culture. An accomplished calligrapher, printmaker, and art teacher, Xu Bing turned his simultaneous interest in and mistrust of language into an extended examination of Chinese characters. The result was *the Book from the Sky*, a powerful installation of books, scrolls, and panels for which Xu Bing invented hundreds of new characters in the late 1980s. This uneasy play between the familiar and the unknown—these words without meaning—caused an uproar in Beijing art community and led the Chinese government to censor Xu Bing and his art. The artist emigrated to the United States in 1990. Featuring works in *Square Word Calligraphy*, his whimsical, invented language, *The Art of Xu Bing* traces the calligrapher's career and provides illustrations and in-depth descriptions of his works, which have been shown from Finland to Australia and the United States. Author and art

historian Britta Erickson leads his insightful look at Xu Bing's development as a significant artist, and Xu Bing himself contributes a fascinating chapter on his life and work.

Powerful Occupational Therapists -

Christine Olga Peters 2014-07-10

Powerful Occupational Therapists examines the life and times of a small group of occupational therapy leaders and scholars in a post-1950s America, to market their profession as one of increasing importance. Participating in the 1950s rehabilitation, the 1960s equal rights, and the 1970s women's movements, these innovators, being primarily women, aimed to define themselves as having professional and scientific authority that was distinct from the male-dominated medical model. The community of therapists faced challenges such as that of retaining the appearance of being "ladylike" whilst doing "unladylike" tasks. This book describes the personal experiences of 12 differing occupational therapists and it identifies how a group of them strengthened and developed the profession in the face of diverse challenges. This volume would be of interest to those studying occupational therapy, women and medicine and the history of medicine.

This book was originally published as a special issue of Occupational Therapy in Mental Health.

Economics is the nexus and engine that runs society, affecting societal well-being, raising standards of living when economies prosper or lowering citizens through class structures when economies perform poorly. Our society only has to witness the booms and busts of the past decade to see how economics profoundly affects the cores of societies around the world. From a household budget to international trade, economics ranges from the micro- to the macro-level. It relates to a breadth of social science disciplines that help describe the content of the proposed encyclopedia, which will explicitly approach economics through varied disciplinary lenses. Although there are encyclopedias of covering economics (especially classic economic theory and history), the SAGE Encyclopedia of Economics and Society emphasizes the contemporary world, contemporary issues, and society. License to Drill - Cari L. Votava
2018-08-07
Natural resources have the transformational potential to support

economic and political stability as well as contribute to national prosperity and economic development. However, in countries dependent upon natural resource sectors, poor management of these sectors often contributes to corruption, illicit financial flows (IFFs) and thus, poverty. Adequate transparency and accountability in regulatory management of these sectors is a challenge for resource rich countries. Poor licensing decisions in natural resource management can open a Pandora's box of corruption risks. This manual provides methods and options based on good practices to improve transparency, accountability, and integrity in the regulatory licensing process and integrity due diligence. The manual borrows models from the Basel Core Principle 'fit and proper' concept, and provides options for conducting effective (a) beneficial ownership; (b) criminal/legal; and (c) conflicts of interest checks, with a goal of integrating these into the regulatory licensing process. The manual also identifies common legal framework defects that can facilitate corruption risks, and offers options based on principles of regulatory integrity to reduce these risks. The good practices identified can help countries allocate limited financial resources in conducting thorough background checks in a cost-effective manner, as well as meet EITI's requirements for public disclosure of beneficial owners and politically exposed persons. These strategies for reducing opportunities for corruption in extractive sectors can help reduce IFFs that can sap resources from the economy and inhibit a country's ability to achieve the Sustainable Development Goals.

Last Boat Out of Shanghai - Helen Zia
2019-01-22

The dramatic real life stories of four young people caught up in the mass exodus of Shanghai in the wake of China's 1949 Communist revolution—a heartrending precursor to the struggles faced by emigrants today. “A true page-turner . . . [Helen] Zia has proven once again that history is something that happens to real people.”—New York Times bestselling author Lisa See
NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR AND THE CHRISTIAN SCIENCE MONITOR • FINALIST FOR THE PEN/JACQUELINE BOGRAD WELD AWARD FOR BIOGRAPHY
Shanghai has historically been China's jewel, its richest, most modern and westernized city. The bustling metropolis was home to sophisticated intellectuals, entrepreneurs, and a thriving middle class when Mao's proletarian revolution emerged victorious from the long civil war. Terrified of the horrors the Communists would wreak upon their lives, citizens of Shanghai who could afford to fled in every direction. Seventy years later, members of the last generation to fully recall this massive exodus have revealed their stories to Chinese American journalist Helen Zia, who interviewed hundreds of exiles about their journey through one of the most tumultuous events of the twentieth century. From these moving accounts, Zia weaves together the stories of four young Shanghai residents who wrestled with the decision to abandon everything for an uncertain life as refugees in Hong Kong, Taiwan, and the United States. Benny, who as a

teenager became the unwilling heir to his father's dark wartime legacy, must decide either to escape to Hong Kong or navigate the intricacies of a newly Communist China. The resolute Annuo, forced to flee her home with her father, a defeated Nationalist official, becomes an unwelcome exile in Taiwan. The financially strapped Ho fights deportation from the U.S. in order to continue his studies while his family struggles at home. And Bing, given away by her poor parents, faces the prospect of a new life among strangers in America. The lives of these men and women are marvelously portrayed, revealing the dignity and triumph of personal survival. Herself the daughter of immigrants from China, Zia is uniquely equipped to explain how crises like the Shanghai transition affect children and their families, students and their futures, and, ultimately, the way we see ourselves and those around us. Last Boat Out of Shanghai brings a poignant personal angle to the experiences of refugees then and, by extension, today. “Zia's portraits are compassionate and heartbreaking, and they are, ultimately, the universal story of many families who leave their homeland as refugees and find less-than-welcoming circumstances on the other side.”—Amy Tan, author of The Joy Luck Club

Real Men Don't Sing - Allison McCracken 2015-09-02

The crooner Rudy Vallée's soft, intimate, and sensual vocal delivery simultaneously captivated millions of adoring fans and drew harsh criticism from those threatened by his sensitive masculinity. Although Vallée and other crooners reflected the gender fluidity of late-1920s popular culture, their challenge to the Depression era's more conservative masculine norms led cultural authorities to stigmatize them as gender and sexual deviants. In *Real Men Don't Sing* Allison McCracken outlines crooning's history from its origins in minstrelsy

through its development as the microphone sound most associated with white recording artists, band singers, and radio stars. She charts early crooners' rise and fall between 1925 and 1934, contrasting Rudy Vallée with Bing Crosby to demonstrate how attempts to contain crooners created and dictated standards of white masculinity for male singers. Unlike Vallée, Crosby survived the crooner backlash by adapting his voice and persona to adhere to white middle-class masculine norms. The effects of these norms are felt to this day, as critics continue to question the masculinity of youthful, romantic white male singers. Crooners, McCracken shows, not only were the first pop stars: their short-lived yet massive popularity fundamentally changed American culture.
