Exam Literacy - Jake Hunton 2018-08-13  
In *Exam Literacy: A guide to doing what works (and not what doesn't) to better prepare students for exams*, Jake Hunton

focuses on the latest cognitive research into revision techniques and delivers proven strategies which actually work. Foreword by Professor John Dunlosky. 'Read, highlight, reread, repeat if such a revision cycle sounds all too wearily familiar, you and your students need a better route to exam success. And in light of the recent decision to make all subjects at GCSE linear, so that students will be tested in one-off sittings, it will be even more important that students are well equipped to acquire and recall key content ahead of their exams. In this wide-ranging guide to effective exam preparation, Jake Hunton casts a careful eye over a wide range of research into revision techniques and details the strategies which have been proven to deliver the best results. With plenty of practical suggestions and subject-specific examples, Exam Literacy provides teachers with user-friendly advice on how they can make the content they cover stick,

and shares up-to-date, evidence-based information on: - The nature of learning and the various types of memory. - How to improve students' retention of knowledge and recall of content. - Why popular revision techniques, such as rereading, highlighting and summarising, may not be as effective as you think. - How revision strategies that have been identified as being more effective such as interleaving, elaborative interrogation, self-explanation and retrieval practice can be embedded into day-to-day teaching. - How students can be encouraged to make use of these winning strategies when revising independently.
