A Second Edition and translation into English of the French book "L'Hydraulique dans les Civilisations Anciennes". The book abounds with descriptions of hydraulic techniques in the civilizations of the classical era and the Middle Ages, including illustrations and translated

descriptions of ancient observers and authors. The work is unique in offering an engineer's perspective not only on the history of water technology, but also demonstration of the genesis of ideas and the transmissions of ideas and technology from one age and civilization to the next. Divine Interiors - Eric M. Moormann 2011

"Divine interiors" is een onderzoek naar de aankleding van Griekse en Romeinse heiligdommen met wandschilderingen. Machtige marmeren façades, beeldhouwwerken en schilderingen speelden een belangrijke rol in het aanzien van deze monumenten. Terwijl de officiële tempels, die met de steden of de staat waren verbonden, meestal een plechtige maar sobere uitstraling

hadden, waren de gebouwen die gericht waren op meer volkse uitingen van religiositeit juist bont beschilderd. Scènes uit het leven van de vereerde godheid, aanhangers en beoefenaren van de cultus, planten en dieren konden de bezoekers van deze heiligdommen in hogere sferen brengen. Het valt op dat er in de uitgestrekte Grieks-Romeinse wereld veel overeenkomsten te vinden zijn tussen vaak ver van elkaar gelegen tempels. De muurschilderkunst kende net als andere kunstvormen stijl- en smaakveranderingen, maar die hadden wel overal dezelfde uitstraling.

Atlas, or the Anxious Gay Science - Georges Didi-Huberman 2018-10-11
Aby Warburg's Mnemosyne Atlas (1925–1929) is a prescient work of mixed media assemblage, made up of hundreds of images culled from antiquity to the Renaissance and arranged into startling juxtapositions. Warburg's allusive atlas sought to illuminate the pains of his final years, after he had suffered a breakdown and been institutionalized. It continues to influence contemporary artists today, including Gerhard Richter and Mark Dion. In this illustrated exploration of Warburg and his great work, Georges Didi-Huberman leaps from Mnemosyne Atlas into a set of musings on the relation between suffering and knowledge in Western thought, and on

the creative results of associative thinking. Deploying writing that delights in dramatic jump cuts reminiscent of Warburg's idiosyncratic juxtapositions, and drawing on a set of sources that ranges from ancient Babylon to Walter Benjamin, *Atlas*, or the Anxious Gay Science is rich in Didi-Huberman's trademark combination of elan and insight.

Celtic Astrology from the Druids to the Middle Ages - M.G. Boutet
2017-06-23

Our understanding of Celtic astrology is based mainly on the speculations of modern authors--mostly drawn from classical Greek and Roman writings--and suffers from many misconceptions. European astrology uses the Greek model, containing many Babylonian and Egyptian elements. But Celtic astrology (and other Indo-European astrologies) developed earlier, with

relationships to Middle Eastern systems, as well as their own independent forms. This well documented study takes a fresh look at the development of Celtic astrology and the Druids' systems of cosmology, astronomy and astrology. The author analyzes commentaries found in manuscript sources from antiquity to the Middle Ages, comparing them with cosmological and astronomical lore found in Celtic cultures. Ancient constellations, calendars, deities and rituals reveal a rich worldview.

The Greek City - Gustave Glotz
2013-12-19

First published in 2006. The Polis or City-State was the most striking feature of Ancient Greece, and its evolved form is one of the most important contributions of the Greeks to Western civilisation. In this classic study of the Greek city which combines history and sociology, Glotz

traces the evolution of the Greek institutions, their essential characteristics, details of their construction and the underlying concepts that created and sustained them, mixing description and analytical insight, always remembering that human societies are not theoretical abstractions, but are comprised of living beings. Glotz's unique sensitivity to the many

aspects of the Polis have made this volume required reading for all those interested in classical civilisation and ancient history and politics for over seventy years and there are many thought-provoking parallels with the politics of today.
