*Science Success Book for Class 7* - Neelima Jain 2019-01-01

The series Science Success is meant for Pre-primary and Classes 1 to 8. It fulfills the vision of National Curriculum Framework (NCF) is meant for the schools affiliated to CBSE and other schools affiliated to various State Education Boards. This series emphasizes meaningful learning of science for the overall development of learners. It focuses on helping children understand their natural environment and correlate science with their everyday experiences in an interesting and comprehensive manner. The text has

been designed with beautiful illustrations to help children develop skills of observation, investigation, and scientific attitude. Goyal Brothers Prakashan  
**Science for Ninth Class Part 1 Physics** - Lakhmir Singh & Manjit Kaur  
A series of books for Classes IX and X according to the CBSE syllabus and CCE Pattern

Tune Into Grammar for ICSE Class 1 - Pearson  
Tune in to Grammar presents a systematic and step-wise strategy for approaching grammar at any grade. The series presents grammar rules lucidly and leads the learner to assimilate and apply them to communication in everyday life. The learner is introduced to the concept with a warm-up and led through clearly demarcated stages of acquiring proficiency in grammar. The culmination of a chapter corresponds to the learner being able to use the language in games, projects, activities and a wide range of situations which involve working individually or in groups.

**RATAN BHARATI 6 HINDI READER** - Mukul Priyadarshni  
The content of this series is based on the valuable inputs from experienced teachers who have

participated in the workshops for meaningful and effective Hindi teaching. These books deal with a variety of historical and literary topics which give the children a comprehensive view of Hindi literature.

*All of Us in Our Own Lives* -

Manjushree Thapa 2018-09-11

A beautiful story of strangers who shape each other's lives in fateful ways, *All of Us in Our Own Lives* delves deeply into the lives of women and men in Nepal and into the world of international aid. Ava Berriden, a Canadian lawyer, quits her corporate job in Toronto to move to Nepal, from where she was adopted as a baby.

There she struggles to adapt to her new career in international aid and forge a connection with the country of her birth. Ava's work brings her into contact with Indira Sharma, who has ambitions of becoming the first Nepali woman director of a NGO; Sapana Karki, a bright young teenager living a small village; and Gyanu, Sapana's brother, who has returned home from Dubai to settle his sister's future after their father's death. Their journeys collide in unexpected ways. *All of Us in Our Own Lives* is a stunning, keenly observant novel about human interconnectedness, about privilege, and about the ethics of international aid (the earnestness and idealism and yet its cynical, moneyed nature).

**Integrated Approach to Environmental Data Management Systems** - Nilgun B.

Harmanciogamalu 2012-12-06

An integrated approach to environmental data management is necessitated by the complexity of the environmental problems that need to be addresses, coupled with the interdisciplinary approach that needs to be adopted to solve them. Agenda 21 of the Rio Environmental Conference mandated international programmes and organizations to take steps to develop common data and information management plans, and steps have been taken in this direction. The key word that defines the framework of the present book is 'integration'. The book establishes the basics of integrated approaches and covers environmental data management systems within that framework, covering all aspects of data management, from objectives and constraints, design of data collection networks, statistical and physical sampling, remote sensing and GIS, databases, reliability of data, data analysis, and the transformation of data into information.

Creative English Course Book for class 2 - Rev. Fr. Cosmos 2015-04-01

It is after years of teaching English to young children that this new course, *Creative English*, has been put together. Two things were in mind during its preparation: · What do children enjoy while learning a language? Stories are based on children's interests and therefore hold their attention. For the first few classes, the lessons draw upon pupils' everyday experience, allowing links to be made between home and school. · What does a teacher need while teaching a language? The books are structured to meet the requirements of teachers across the board. Someone who has just started a career in teaching would find it stimulating enough to give his or her best. Others, with years of experience, could use it as a tool to carry forward all the good they have

been doing. Goyal Brothers Prakashan

**Basic Computational Techniques for Data Analysis** - D Narayana 2023-06-20

This book is designed to equip students to navigate through MS Excel and basic data computation methods, which are essential tools in research or professional settings and in classrooms. It illustrates the concepts used in research and data analysis and economic and financial decision-making in business and in daily life. The book will help students acquire knowledge and develop skills in statistical techniques and financial analysis using MS Excel. With illustrations and examples, it will help the readers to:

- Visualize, present, and analyze data through MS Excel spreadsheets and tables and create personal or business spreadsheets
- Learn how to work with spreadsheets, use formulae, and perform calculations and analysis
- Create tables including Pivot Tables
- Become familiar with basic statistical and financial measures
- Design creative spread sheets and communicate effectively in business using spreadsheets and data analysis

This revised and updated second edition will be an essential resource for students of economics, commerce, management, and other social science subjects, and will be useful to those studying econometrics, financial technology, basic computational techniques, data analysis, and applied economics. Content The book is developed through three phases, with each phase standing on its own as well as providing a foundation for the next. In the first phase, Excel is introduced for the students to

learn entry of data, manipulation of data, carrying out operations and develop presentations. The second phase introduces basic statistical measures of data summarisation and analysis, following which these are illustrated in Excel spreadsheets with the techniques introduced in the first phase. In addition, a few advanced tools of statistical analysis are introduced and illustrated in Excel. The third phase introduces financial measures of common use, their general computation and working them out in Excel. The book intends to illustrate the concepts used in economic and financial decision-making in business and in daily life; it helps demonstrate a deeper understanding from both theoretical and practical perspectives. An effort has been made to make the book student-friendly by using simple language and giving a number of illustrations in each chapter, solved in such a simple manner that they can be easily understood by the students. Practical questions have been included at the end of each chapter so that the students can independently solve them and test their understanding of the concepts and computations introduced in the chapter. Outcome At the end, students will be able to describe what a spreadsheet is and what Excel's capabilities are and can work with elements that make up the structure of a worksheet. They will be able to work with spreadsheets and enter data in Excel, use formulae and calculations, and create tables, charts and pivot tables. They will be familiar with basic statistical and financial measures of general use. They will be able to do basic computations in statistics and finance in Excel. Students will acquire the capacity to create personal and/or business spreadsheets following current professional and/or

industry standards. Their potential for critical thinking to design and create spreadsheets and communicate in a business setting using spreadsheet vocabulary will be enhanced. In the digital age, students necessarily need to know data, data sources and how to 'dirty' their hands with data. There can be no substitute to 'talking through numbers'. The book introduces students to a variety of Indian and International data sources and teaches them how to import data-be it social, economic, financial and so on-to the Excel sheet. Once they master it, the data world is there for them to conquer! The educational background required for the student to understand the text is some basic English and Mathematics of school-leaving level. Some fl air for numbers will be an asset and for them it will be a breeze; others will have to make an effort but ample illustrations and practice questions make life simple, whether it is basic statistics or slightly intricate finance!

**The Blue Planet – Environmental Studies Course Book for class 3 -**

GEETA NAIR 2020-04-01

The Blue Planet: Environmental Studies is a series of five books for Classes 1 to 5. The series is planned to meet the vision of NCF(National Curriculum Framework), by the National Council of Educational Research and Training(NCERT). Salient features of the series · Each chapter is developed with well graded topics closely linked with the daily experiences of the children from their surroundings. · Concepts or topics are presented using simple language, illustrated with vibrant colourful pictures. · All the text are given in a logical manner for better understanding. · Each chapter is introduced with an interesting and interactive warm-up exercise as a

Starter. · Many interesting facts related to each chapter are placed under Factopedia to develop the natural curiosity in young minds and become a useful tool for extended learning. · In-text exercises and some hands-on activities are provided in Pause to Do section to sharpen the concepts thoroughly. · Application and analysis based questions are put in Hots to develop logical thinking skills in children. · Pair and Share section provides some interesting topics which are to be discussed and shared with the friends and elders. · Classroom or project based activities are given in Activity time. · A variety of questions are provided in Let's Revise section at the end of each chapter, which encourage children to recall, compare and analyse different concepts and phenomena learnt in each chapter. · Various outdoor activities are also incorporated to make learning more interesting. · Life skill based questions, are designed to inculcate moral values and skills needed for betterment of life from the very young age. · Suggestive guidelines for teachers are given in Teacher's Note to enhance the teaching learning process. · Two test papers are provided for Half Yearly Examination and Annual Examination in each book.
