Human Resource Management for the Hospitality and Tourism Industries - Dennis Nickson 2007-02-19
Human Resource Management for the Hospitality and Tourism Industries takes an integrated look at HRM policies and practices in the tourism and hospitality industries. Utilising existing human

resource management (HRM) theory and practice, it contextualises it to the tourism and hospitality industries by looking at the specific employment practices of these industries, such as how to manage tour reps or working in the airline industry. It initially sets the scene with a broad review of the evidence of HRM practice within the tourism and hospitality industries. Having identified the broader picture, the text then begins to focus much more explicitly on a variety of HR policies and practices such as:

- recruitment and selection: the effects of ICT, skills required specific for the industry and the nature of advertising
- legislation and equal opportunities: illegal discrimination and managing diversity
- staff health and welfare: violence in the workplace, working time directives, smoking and alcohol and drug misuse
- remuneration strategies in the

industry: the 'cafeteria award' approach, minimum wage and tipping Human Resource Management for the Hospitality and Tourism Industries is illustrated throughout with both examples of best practice for prescriptive teaching and discussion, and international case studies to exercise problem solving techniques and contextualise learning. It incorporates a user friendly layout and includes pedagogic features such as: chapter outlines and objectives, HRM in practice - boxed examples, reflective review questions, web links' discussion questions and further reading. Accompanying the text are online supplementary lecturer materials including downloadable figures from the book, PowerPoint slides, further cases and extra exercises and points for discussion.

Accounting and Financial Analysis in the Hospitality Industry -

Jonathan Hales

2006-08-11

The objective of this textbook is to teach students to be conversational in speaking "numbers." This means understanding fundamental accounting concepts, developing solid financial analysis abilities, and then applying them to understand and improve the operational performance of their hotel or restaurant. The book will accomplish this by studying the current practices of some of today's leading hotel and restaurant companies. Chapters will be developed under the auspices of a select group of hospitality industry General Managers, Directors of Finance, and Regional Accounting Managers to ensure that the information is current, accurate and useful. Understanding and applying the information will be the main focus of this book. This textbook should provide hospitality managers the knowledge and experience

to be comfortable in using numbers to operate their departments. This includes developing the ability to perform all accounting and financial aspects of their position efficiently and correctly including revenue forecasting, wage scheduling, budgeting, P&L critiques, purchasing procedures and cost control methods. As a result, they will have more time to spend on the floor with their customers and employees. This knowledge will help them understand their operations and how to improve, change or expand them to increase revenues or profits.

2019** - World Bank
2018-10-31

Work is constantly reshaped by technological progress. New ways of production are adopted, markets expand, and societies evolve. But some changes provoke more attention than others, in part due to the vast uncertainty involved in making predictions about the future. The 2019 World Development Report will study how the nature of work is changing as a result of advances in technology today. Technological progress disrupts existing systems. A new social contract is needed to smooth the transition and guard against rising inequality. Significant investments in human capital throughout a person's lifecycle are vital to this effort. If workers are to stay competitive against machines they need to train or retool existing skills. A social

protection system that includes a minimum basic level of protection for workers and citizens can complement new forms of employment. Improved private sector policies to encourage startup activity and competition can help countries compete in the digital age. Governments also need to ensure that firms pay their fair share of taxes, in part to fund this new social contract. The 2019 World Development Report presents an analysis of these issues based upon the available evidence.
