The Anatomy of the Swipe - Ahmed Siddiqui 2020-04-08

Have you ever wondered what happens during a swipe of a credit card? Every major tech company will become a payments company. Yet, not many people understand how payment systems in the US work. Those that do "get it" are unlocking multi-billion dollar opportunities. If you've ever wondered what happens when you actually swipe/dip/tap your credit card or debit card then The Anatomy of the Swipe breaks down the details in the simplest manner possible. Here are some questions answered within these pages: How does money move from my credit card to my favorite coffee shop? How can I build a neo-bank? How can I build my own debit or credit card? How can I accept card based payments? The Anatomy of the Swipe speaks to software developers and entrepreneurs who are looking at implementing card-based payments for the first time, merchants who want to be able to accept payments for a website or store, or those who want to issue their own debit/credit card. This book walks beginners through modern innovations created because of card-based payments, as well as the motivations and revenue models of each party in the payments ecosystem.

The Physiology Colouring Workbook is a comprehensive review of key physiological processes like respiration, digestion, cell membrane polarization, synaptic interaction, reproduction etc. Mosby's Pathology for Massage Therapists - E-Book - Susan G. Salvo 2013-12-27
Written by a massage therapist for massage therapists, Mosby's Pathology for Massage Therapists, 3rd Edition provides direct information along with focused recommendations. Coverage of over 340 pathologies helps you appropriately tailor massage treatment, and more than 750 full-color photographs and illustrations make it easier to recognize common pathologies. This edition includes a new chapter on geriatric massage and has been extensively reviewed by over a dozen experts in the massage and medical fields. Written by massage therapy educator and practitioner Susan Salvo, this resource provides the pathology knowledge you need to succeed on licensure and certification exams and in practice. A traffic light icon appears before each pathology in the book, designating whether massage is contraindicated (red), local contraindication (yellow), or indicated (green) for that particular pathology. Consistent format for each chapter makes it easy to find key information with learning objectives, list of pathologies, system overview, and pathologies, including description, etiology, signs and symptoms, treatment, and massage considerations. Student-friendly features in each chapter include learning objectives and self-tests that measure your comprehension. Medical Technology boxes highlight special populations, such as clients in wheelchairs or with pacemakers, and explain what the medical device is, and what special precautions or contraindications you should be aware of before working on these clients. Spotlight on Research boxes summarize recent studies of massage therapy and its effects. Student resources on an Evolve companion website include interactive activities, video clips of techniques, animations, the Body Spectrum coloring book, flashcards, review questions, additional case studies, an image collection, an audio glossary, study tips, stress-busting tips, research updates, and more. Mosby's Pathology for Massage Therapists Online reinforces content covered in the book and provides a dynamic way to learn key concepts, with features including recall activities, rollover glossary terms and definitions, animations, quizzes, and Clinical Tips boxes. (Available separately.)

A Photographic Atlas for Anatomy & Physiology - Nora Hebert 2014-10-14

For 2-semester A&P lab course and 1-semester human anatomy lab course A Photographic Atlas for Anatomy & Physiology is a new visual lab study tool that helps students learn and identify key anatomical structures. Featuring photos from Practice Anatomy Lab (TM) 3.1 and other sources, the Atlas includes over 250 cadaver dissection photos, histology photomicrographs, and cat dissection photos plus over 50 photos of anatomical models from leading manufacturers such as 3B Scientific(R), SOMSO(R), and Denoyer-Geppert Science Company. Two-page spreads with cadaver and anatomical model photos side-by-side help students to better learn and identify structures. The Atlas is composed of 13 chapters, organized by body system, and includes a final chapter with cat dissection photos.
