Learning to Fly - Steph Davis 2015-11-03

"It's not so surprising that on the day of my fifth wedding anniversary I would be crouched in the open door of an airplane, thirteen thousand feet above the Colorado plains, about to jump out. That coincidence of timing really wasn't." Steph Davis is a superstar in the climbing community and has ascended some of the world's most awe-inspiring peaks. But when her husband makes a controversial climb in a national park, the media fallout—and the toll it takes on her marriage—suddenly leaves her without a partner, a career, a source of income . . . or a purpose. In the company of only her beloved dog, Fletch, Davis sets off on a search for a new identity and discovers skydiving. Though falling out of an airplane is completely antithetical to the climber's control she'd practiced for so long, she turns each daring jump into an opportunity to fly, first as a skydiver, then as a base jumper, and finds herself indelibly changed. As she opens herself to falling, she also finds the strength to open herself to love again, even in the wake of heartbreak. And before too long, she fortuitously meets someone who shares her passions. *Learning to Fly* is Davis's fascinating account of her transformation. From her early tentative skydives, to zipping into her first wingsuit, to surviving devastating accidents against the background of breathtaking cliffs, to soaring beyond her past limits, she discovers new hope and joy in letting go. *Learning to Fly* isn't just an adventure but a woman's story of risk-taking and self-discovery, with love at its heart.

Bird Dream - Matt Higgins 2014-07-31

PEN / ESPN Award for Literary Sports Writing (2015 LONGLIST) "[P]erversely entertaining... In a truly intoxicating read that was hard to put down, Matt Higgins has managed to make real a world about as far removed from daily life as it gets." --Daily Beast "Matt Higgins cracks open this astonishingly dangerous sport and captures the spectacular adrenaline surges it delivers." --The Wall Street Journal "[R]iveting... a must-read. A highflying, electrifying story." --Kirkus (STARRED) A heart-stopping narrative of risk and courage, *Bird Dream* tells the story of the remarkable men and women who pioneered the latest advances in aerial exploration—from skydiving to BASE jumping to wingsuit flying—and made history with their daring. By the end of the twentieth century BASE jumping was the most dangerous of all the extreme sports, with thrill-seeking jumpers parachuting from bridges, mountains, radio towers, and even skyscrapers. Despite numerous fatalities and legal skirmishes, BASE jumpers like Jeb Corliss of California thought they had discovered the

ultimate rush. But all this changed for Corliss in 1999, when, high in the mountains of northern Italy, he and other jumpers watched in wonder as a stranger—wearing a cunning new jumpsuit featuring “wings” between the arms and legs—leaped from a ledge and then actually flew from the vertiginous cliffs. Drawing on intimate access to Corliss and other top pilots from around the globe, *Bird Dream* tracks the evolution of the wingsuit movement through the larger than life characters who, in an age of viral video, forced the sport onto the world stage. Their exploits—which entranced millions of fans along the way—defied imagination. They were flying; not like the Wright brothers, but the way we do in our dreams. Some dared to dream of going further yet, to a day when a wingsuit pilot might fly, and land, all without a parachute. A growing number of wingsuit pilots began plotting ways in which a human being might leap from the sky and land. A half dozen groups around the world were dedicated to this quest for a “wingsuit landing,” conjuring the pursuit of nations that once inspired the race to first summit Everest. Given his fame as a stuntman, the brash, publicity-hungry Corliss remained the popular favorite to claim the first landing. Yet *Bird Dream* also tracks the path of another man, Gary Connery—a forty-two-year-old Englishman—who was quietly plotting to beat Corliss at his own game. Accompanied by an international cast of wingsuit devotees—including a Finnish magician, a parachute tester from Brazil, an Australian computer programmer, a gruff hang-gliding champion-turned-aeronautical engineer, a French skydiving champion, and a South African costume designer—Corliss and Connery raced to leap into the unknown, a contest that would lead to triumph for one and nearly cost the other his life. Based on five years of firsthand reporting and original interviews, *Bird Dream* is the work of journalist Matt Higgins, who traveled the world alongside these extraordinary men and women as they jumped and flew in Europe, Africa, Asia, and the Americas. Offering a behind-the-scenes take on some of the most spectacular and disastrous events of the wingsuit movement, Higgins's *Bird Dream* is a riveting, adrenaline-fueled adventure at the very edge of human experience.

The Battle of the Bridges - Frank van Lunteren 2014-06-19

Operation Market Garden has been recorded as a complete Allied failure in World War II, an overreach that resulted in an entire airborne division being destroyed at its apex. However, within that operation were episodes of heroism that still remain unsung. On September, 17, 1944, the 504th Parachute Infantry Regiment, 82nd Airborne Division, floated down across the Dutch countryside, in the midst of German forces, and proceeded to fight their way to vital bridges to enable the Allied offensive to go forward. The 101st Airborne was behind them; the British 1st Airborne was far advanced. In the 82nd's sector the crucial conduits needed to be seized. The Germans knew the importance of the bridge over the Waal River at Nijmegen as well as

James Gavin and his 82nd troopers did. Thus began a desperate fight for the Americans to seize it, no matter what the cost. The Germans would not give, however, and fought tenaciously in the town and fortified the bridge. On September 20 Gavin turned his paratroopers into sailors and conducted a deadly daylight amphibious assault in small plywood and canvas craft across the Waal River to secure the north end of the highway bridge in Nijmegen. German machine guns and mortars boiled the water on the crossing, but somehow a number of paratroopers made it to the far bank. Their ferocity thence rolled up the German defenses, and by the end of day the bridge had fallen. This book draws on a plethora of previously unpublished sources to shed new light on the exploits of the "Devils in Baggy Pants" by Dutch author and historian Frank van Lunteren. A native of Arnhem—the site of "The Bridge too Far"—the author draws on nearly 130 interviews he personally conducted with veterans of the 504th, plus Dutch civilians and British and German soldiers, who here tell their story for the first time.

Congressional Record - United States. Congress 1950
The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)
[Austin, Cleared for Takeoff](#) - Kenneth B. Ragsdale
2010-01-01

Austin, Texas, entered the aviation age on October 29, 1911, when Calbraith Perry Rodgers landed his Wright EX Flyer in a vacant field near the present-day intersection of Duval and 45th Streets. Some 3,000 excited people rushed out to see the pilot and his plane, much like the hundreds of thousands who mobbed Charles A. Lindbergh and The Spirit of St. Louis in Paris sixteen years later. Though no one that day in Austin could foresee all the changes that would result from manned flight, people here—as in cities and towns across the United States—realized that a new era was opening, and they greeted it with all-out enthusiasm. This popularly written history tells the story of aviation in Austin from 1911 to the opening of Austin-Bergstrom International Airport in 1999. Kenneth Ragsdale covers all the significant developments, beginning with military aviation activities during World War I and continuing through the barnstorming era of the 1920s, the inauguration of airmail service in 1928 and airline service in 1929, and the dedication of the first municipal airport in 1930. He also looks at the University of Texas's role in training pilots during World War II, the growth of commercial and military aviation in the postwar period, and the struggle over airport expansion that occupied the last decades of the twentieth century. Throughout, he shows how aviation and the city grew together and supported each other, which

makes the Austin aviation experience a case study of the impact of aviation on urban communities nationwide.

Boys' Life - 1939-03

Boys' Life is the official youth magazine for the Boy Scouts of America. Published since 1911, it contains a proven mix of news, nature, sports, history, fiction, science, comics, and Scouting.

Orange Coast Magazine - 1981-06

Orange Coast Magazine is the oldest continuously published lifestyle magazine in the region, bringing together Orange County's most affluent coastal communities through smart, fun, and timely editorial content, as well as compelling photographs and design. Each issue features an award-winning blend of celebrity and newsmaker profiles, service journalism, and authoritative articles on dining, fashion, home design, and travel. As Orange County's only paid subscription lifestyle magazine with circulation figures guaranteed by the Audit Bureau of Circulation, Orange Coast is the definitive guidebook into the county's luxe lifestyle.

Bulletin - 1996

My First 1,000 Jumps - Norm Heaton 2019-06-10

You are holding the only comprehensive history of the early days of the sport of skydiving yet published. It is the story of not just one skydiver but the story of many, the true pioneers of the sport. Just as important this book includes a complete history of the national organization established for the express purpose of promoting sport parachuting. While this history is restricted to a short fifteen years (1961-1975), those years were the most productive, most far-reaching, and the most exciting for the fledgling idea of jumping out of perfectly good airplanes for the sheer joy of it all, eventually establishing the sport of skydiving as an integral part of the world of aviation sports. This book tells the story of those formative years with details of battles fought to maintain freedom of the skies for all parachutists when government and corporate interests made numerous attempts to severely restrict the right of skydivers to use our nation's airspace. This story is told by a man who dedicated his life to the advancement of the sport, serving for twelve years as the chief executive officer of the national organization for skydivers, the Parachute Club of America / US Parachute Association. The reader will embark on a most exciting journey, a journey not told before, continually laced with personal stories that will touch your heart, make you smile, and occasionally make you laugh. This book contains over 400 photographs and 1,500 names of people from around the world who participated in that wonderful and exhilarating sport called skydiving.

[United States Army Aviation Digest](#) - 1965

[Magnificent Failure](#) - Craig Ryan 2003-10-17

Locked in a desperate Cold War race against the Soviets to find out if humans could survive in space and live through a free fall from space vehicles, the Pentagon gave civilian adventurer Nick Piantanida's Project Strato-Jump little notice until May Day, 1966. Operating in the shadows of well-funded, high-visibility Air Force and Navy projects, the former truck driver and pet store owner set a new world record for manned balloon altitude. Rising more than 23 miles over the South Dakota prairie, Piantanida nearly perished trying to set the world record for the highest free fall parachute jump from that height. On his next attempt, he would not be so lucky. Part harrowing adventure story, part space history, part psychological portrait of an extraordinary risk-taker, this story fascinates and intrigues the armchair adventurer in all of us.

The B-25 in the Backyard - Wally Soplata 2020-06-29
Only in America could Walter A. Soplata, the son of penniless Czech immigrants, accomplish so much single-handedly saving historic aircraft from World War II and other periods. After a childhood spent building model airplanes while dreaming about having his own airfield, Soplata worked in a large scrapyards taking apart hundreds of warplane engines. Shocked to see a rare engine or sometimes a complete warplane on its way to the recycling furnace, he began collecting whatever he could find and afford. He eventually collected nearly 20 complete airplanes and countless pieces of others. One of his Corsair fighters included the experimental F2G Corsair #74 that won the Cleveland National Air Races in 1947. Among other priceless airplanes he rescued was an experimental XP-82 Twin Mustang, an F-82E Twin Mustang, an X-prototype Skyraider, a stainless steel BT-12, and an F7U Cutlass--Soplata hauled the Cutlass fuselage home by stuffing it inside a junked school bus for its 600-mile journey. The story of a workaholic father and his aviation-obsessed son, this book records the accomplishments of a rare bird, just like the many airplanes he saved.
