I've got too many people who love me. There's no way I'm dying like this. In the dead of night on July 24, 2013, John Aldridge was thrown off the back of the Anna Mary while his fishing partner, Anthony Sosinski, slept below. As desperate hours ticked by, Sosinski, the families, the local fishing community, and the U.S. Coast Guard in three states mobilized in an unprecedented search effort that culminated in a rare and exhilarating success. A tale of survival, perseverance, and community, A Speck in the Sea

Ranger Confidential - Andrea Lankford 2010-04-02

For twelve years, Andrea Lankford lived in the biggest, most impressive national parks in the world, working a job she loved. She chaperoned baby sea turtles on their journey to sea. She pursued bad guys on her galloping patrol horse. She jumped into rescue helicopters bound for the heart of the Grand Canyon. She won arguments with bears. She slept with a few too many rattlesnakes. Hell yeah, it was the best job in the world! Fortunately, Andrea survived it. In this graphic and yet surprisingly funny account of her and others' extraordinary careers, Lankford unveils a world in which park rangers struggle to maintain their idealism in the face of death, disillusionment, and the loss of a comrade killed while holding that thin green line between protecting the park from the people, the people from the park, and the people from each other. Ranger Confidential is the story behind the scenery of the nation's crown jewels—Yosemite, Grand Canyon, Yellowstone, Great Smokies, Denali. In these iconic landscapes, where nature and humanity constantly collide, scenery can be as cruel as it is redemptive.

The soul-body problem was among the most controversial issues discussed in thirteenth-century Europe, and it continues to capture much attention today as the quest to understand human identity becomes more and more urgent. What made the discussion about this problem particularly interesting in the scholastic period was the tension between the traditional dualist doctrines and a growing need to affirm the unity of the human being. This debate is frequently interpreted as a conflict between the "new" philosophy, conveyed by the rediscovered works of Aristotle and his followers, and doctrinal requirements, especially the belief in the soul's immortality. However, a thorough examination of Parisian texts, written between approximately 1150 and 1260, leads to surprising conclusions. In *The Soul-Body Problem at Paris, ca. 1200-1250*, the study and edition of some little-known texts of Hugh of St-Cher and his contemporaries, ranging from Gilbert of Poitiers to Thomas Aquinas, reveals an extremely rich and colorful picture of the Parisian anthropological debate of the time. This book also offers an opportunity to reconsider some received views concerning medieval philosophy, such as the conviction that the notion of "person" did not play any major role in the anthropological controversies.

Motorized Obsessions - Paul R. Josephson 2007-09-02
From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent - and loud - fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it - personal watercraft (PWCs) on inland lakes and rivers; all-

terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.
