*Care Without Coverage* - Institute of Medicine 2002-06-20

Many Americans believe that people who lack health insurance somehow get the care they really need. *Care Without Coverage* examines the real consequences for adults who lack health insurance. The study presents findings in the areas of prevention and screening, cancer, chronic illness, hospital-based care, and general health status. The committee looked at the consequences of being uninsured for people suffering from cancer, diabetes, HIV infection and AIDS, heart and kidney disease, mental illness, traumatic injuries, and heart attacks. It focused on the roughly 30 million-one in seven-working-age Americans without health insurance. This

group does not include the population over 65 that is covered by Medicare or the nearly 10 million children who are uninsured in this country. The main findings of the report are that working-age Americans without health insurance are more likely to receive too little medical care and receive it too late; be sicker and die sooner; and receive poorer care when they are in the hospital, even for acute situations like a motor vehicle crash.

*Guide to U.S. Health and Health Care Policy* - Thomas R. Oliver 2014-09-03  
*Guide to U.S. Health and Health Care Policy* provides the analytical connections showing students how issues and actions are translated into public policies and institutions for resolving or managing health care issues and crises, such as the recent attempt to reform the national health care system. The Guide highlights the decision-making cycle that requires the cooperation of government, business, and an informed citizenry in order to achieve a comprehensive approach to advancing the nation's health care policies. Through 30 topical, operational, and relational essays, the book addresses the development of the U.S. health care system and policies, the federal agencies and public and private organizations that frame and administer those policies, and the challenges of balancing the nation's health care needs with the rising costs of medical research, cost-effective treatment, and adequate health insurance. Key Features: The 30 topical essays investigate the fundamental political, social, economic, and procedural initiatives that drive health and health care policy decisions affecting Americans at the local, regional, and national levels Essential themes traced throughout the chapters include providing access to health care, national and international intervention, nutrition and health, human and financial resource allocation, freedom of religion versus public policy, discrimination and

health care policy, universal health care coverage, private health care versus publicly funded health care, and the immediate and long-term costs associated with disease prevention, treatment, and health maintenance A Glossary of Key Health Care Policy Terms and Events, a selected Master Bibliography, and a thorough Index are included. This must-have reference for political science and public policy students who seek to understand the issues affecting health care policy in the U.S. is suitable for academic, public, high school, government, and professional libraries.

**Setting the Course** - Institute of Medicine 2002-03-03

The federal and state partnership in supporting immunization programs that benefit the general population evolved over the last half of the 20th century from a simple cost-sharing arrangement for vaccine purchase for disadvantaged children to a more complicated mix of programs, health care coverage benefits, and public-private partnerships. The mix of financial arrangements that support immunization efforts was the subject of a study by the Institute of Medicine, resulting in the publication of the report Calling the Shots. In June 2001, a group of 50 health officials, public health experts, health care providers, health plan representatives, and community leaders met at the University of Illinois in Chicago to explore the implications of the IOM findings and recommendations for the states of Illinois and Michigan. The one-day workshop was the first in a series of four meetings organized by IOM with support from the Centers for Disease Control and Prevention to foster informed discussions about future financing strategies for the public health infrastructure that supports immunization efforts. This report of the Chicago workshop summarizes the findings of the IOM study and reviews the challenges that remain in establishing a reliable financial base for the U.S. immunization system. The report high-lights strategies presented by workshop speakers and discussants for achieving immunization goals, including

increases in state and federal public health budgets, the addition of quality improvement measures in health plans, performance-based contracting, public policy actions, and the creation of public-private partnerships.

**Health Insurance Resources** - Kimberly Calder, MPS 2006-12-08

The second edition of Health Insurance Resources: A Guide for People with Chronic Disease and Disability continues to be a uniquely helpful reference for those who need and use health insurance most often but have the least access to it. The book was developed to assist individuals living with disability and chronic health conditions, as well as health care professionals, in understanding the health care system and maximizing their rights and entitlements within that system. The manual is completely updated throughout, and reflects the changes in the system since the first edition's publication in 2003.

Crucially, the book includes new information about the new Medicare Prescription Drug Coverage plan, which took effect in January 2006. It also covers: Social Security Disability Insurance and Supplemental Security Income COBRA HIPAA State High Risk, Pools Insurance glossary State pharmacy assistance programs And much, much more! This essential guide contains information about a wide variety of options that will be of assistance to individuals who are uninsured, underinsured, or who have questions about insurance and don't know where to begin. It will also serve those who

work with chronically ill individuals and their families, such as health care professionals and para-professionals, consumer and patient advocates, and the educators and institutions that serve them.
