Inclusive Transport - Hans Jeekel 2018-10-29
Inclusive Transport: Fighting Involuntary Transport Disadvantages offers readers profound and multifaceted insights into transportation and social equity, guiding transportation and urban studies researchers, planners, and policy makers in evaluating potential solutions to this complex issue. It considers discrimination and its societal consequences, providing a needed perspective on who is left out of transportation planning, and why. The book is systematically divided into 2 parts, Part A is problem oriented and explores the main problems to the transportation disadvantaged; accessibility and affordability. It looks at the consequences of non-accessibility, the problems non-car owners face, and the interplay between housing and transportation; Part B is policy oriented and analyses how current policies tend to forget transport disadvantages. It looks at pragmatic solutions for transport disadvantaged and ends with a design for inclusive transport, being a more radical approach combining sustainability challenges, people's behaviours and emotions, creating more just and equitable mobility. Synthesizes academic research and narratives on transport disadvantage and the transport disadvantaged, linking the research with current mobility policies and practices Connects the fight on transport disadvantages with sustainable and smart mobility strategies and looks into car sharing, ride sharing and individualising public transport while de-individualizing car use Has an extensive usage of data, figures, and examples from around the world, and inspiring mobility plans and policies

Ride a Bike! - Becker Annette 2018-04-23
Bicycles as a means of transport in cities are playing an ever more important role. The reasons are: reduction of motorcar traffic, sustainable traffic planning, reduction of noise and exhaust emissions, enhancement of the value of public space, healthier form of transport, savings potential in national health services and infrastructure expenditure. The book illustrates urban design ideas and architectural projects which go far beyond purely redesigning road layouts; its eight essays focus on the trend in urban design, landscape design, and traffic planning, it introduces nine exemplary bicycle traffic concepts in various cities (Barcelona, Copenhagen, New York, and Oslo amongst others), and presents 28 forward-looking individual bicycle infrastructure

projects.

Time for Outrage - Stéphane Hessel 2011-09-20
This controversial, impassioned call-to-arms for a return to the ideals that fueled the French Resistance has sold millions of copies worldwide since its publication in France in October 2010. Rejecting the dictatorship of world financial markets and defending the social values of modern democracy, 93-old Stéphane Hessel -- Resistance leader, concentration camp survivor, and former UN speechwriter -- reminds us that life and liberty must still be fought for, and urges us to reclaim those essential rights we have permitted our governments to erode since the end of World War II.
