Car Guys vs. Bean Counters - Bob Lutz 2011-06-09

A legend in the car industry reveals the philosophy that's starting to turn General Motors around. In 2001, General Motors hired Bob Lutz out of retirement with a mandate to save the company by making great cars again. He launched a war against penny pinching, office politics, turf wars, and risk avoidance. After declaring bankruptcy during the recession of 2008, GM is back on track thanks to its embrace of Lutz's philosophy. When Lutz got into the auto business in the early sixties, CEOs knew that if you captured the public's imagination with great cars, the money would follow. The car guys held sway, and GM dominated with bold, creative leadership and iconic brands like Cadillac, Buick, Pontiac, Oldsmobile, GMC, and Chevrolet. But then GM's leadership began to put their faith in analysis, determined to eliminate the "waste" and "personality worship" of the bygone creative leaders.

Management got too smart for its own good. With the bean counters firmly in charge, carmakers (and much of American industry) lost their single-minded focus on product excellence. Decline followed. Lutz's commonsense lessons (with a generous helping of fascinating anecdotes) will inspire readers at any company facing the bean counter analysis-paralysis menace.

Consumers in Europe - Statistical Office of the European Communities 2001

This is the first edition of this publication which presents a comprehensive collection of data on consumption patterns in the EU, including spending patterns, prices, consumption habits, consumer attitudes and quality indicators, as well as providing details of European policy initiatives. The data has been taken from various sources including Eurostat and other surveys, and has been compiled using the COICOP (Classification of Individual Consumption by Purpose) classification. The primary aim of this publication is to provide policy-makers with relevant information for the evaluation and development of consumer policy, but will also be of interest to others concerned with consumer affairs such as consumer organisations, public authorities, advertisers and other businesses interested in European-wide markets.

Mecanismos - GrainArt 2018-09-27

You're walking through Sheffield City Centre and see somebody buying some flowers at a market stall. Nothing special about that but you do a double take as sunlight blinks from something metallic. The street seller isn't human! A beaten and battered robot is behind the counter. It's Hank, one of the vintage robots living in Sheffield doing his day job. Mecanismos is a series of snapshots drawn by local artist GrainArt that feature members of the

robot Brown family and their friends. Look deeply into the drawings and feel what it would be like to be in their shoes.

Also in these pages, you'll find details on such lesser-known yet no less intriguing marques as Abarth, DAF, Frazer Nash, Humber, Iso, Nardi, Panhard, Peerless, Sabra and Skoda. The book also highlights model changes and corporate histories and provides value information on the most popular models of imported cars.

Structural Fire Engineering - Venkatesh Kodur 2020-02-28

Actionable strategies for the design and construction of fire-resistant structures This hands-on guide clearly explains the complex building codes and standards that relate to fire design and presents hands-on techniques engineers can apply to prevent or mitigate the effects of fire in structures. Dedicated chapters discuss specific procedures for steel, concrete, and timber buildings. You will get step-by-step guidance on how to evaluate fire resistance using both testing and calculation methods. Structural Fire Engineering begins with an introduction to the behavioral aspects of fire and explains how structural materials react when exposed to elevated temperatures. From there, the book discusses the fire design aspects of key codes and standards, such as the International Building Code, the International Fire Code, and the NFPA Fire Code. Advanced topics are covered in complete detail, including residual capacity evaluation of fire damaged structures and fire design for bridges and tunnels. Explains the fire design requirements of the IBC, IFC, the NFPA Fire Code, and National Building Code of Canada Presents design strategies for steel, concrete, and timber structures as well as for bridges and tunnels Contains downloadable spreadsheets and problems along with solutions for instructors

The Korean Automotive Industry, Volume 1 - A. J. Jacobs 2021-12-10

In 1962, South Korea assembled just 1,100 new automobiles. By 1996, this total had soared to 2,812,714. What explains this remarkable growth? The answer is complex, and involves a combination of a supportive State, timely technology alliances, a skilled but historically low-paid workforce, aggressive pricing, savvy entrepreneurs, and fortuitous circumstances. Despite this amazing ascent, comparatively little has been written about the Korean auto industry in English. In the first of a two-volume set, this 11-chapter book seeks to help fill this void by providing in-depth examinations of all six of Korea's automakers from their beginnings through 1996. Uniquely written from the perspective of industry analysts at the time (without knowledge of the Asian Fiscal Crisis), the book should prove informative to practitioners, scholars, and students interested in automotive history, international political economy, Asian studies, and more.

Car Suspension and Handling - Donald Bastow 2004

Through appendices and diagrams, Car Suspension and Handling, Fourth Edition, outlines the purpose and history of vehicle suspension systems, while defining the basic parameters of suspension geometry. In addition, the book delves into human sensitivity to vibration and offers data on durability, tyre background information, steering calculations and suspension calculations. While always recognizing that there are differences in suspension requirements for different classes of vehicles and in various markets of the world for a given vehicle, this book focuses on the suspension and handling of cars or automobiles, as opposed to those characteristics of other types of road vehicles. Engineers in the automotive industry who are involved with handling analysis and design, students seeking more thorough understanding of the fundamental concepts and potential problem areas, and university/college libraries.

Autocar & Motor - 1992-04

Porsche 911 - Ulf Poschardt 2017

The thinking man's sports car: a symbol of the relentless desire for peak power and limitless performance. The Porsche 911 inspires a worldwide ripple effect. When Ferdinand Porsche could not find a sports car he liked, he decided to build one himself. And now, the rest is history: Jerry Seinfeld drives it; Boris Johnson admires it; Steve McQueen loves it; and Jeremy Clarkson hates it. The Porsche 911 moves the world. Despised by many in Germany as a set of wheels for fat cats, it is the favorite car of free spirits and intellectuals in the U.S. and across the globe. The Porsche 911 was not just invented by one of the most fascinating and controversial families - it is also a technical masterpiece. Since its launch in 1963, the 911 has built a reputation for itself as "the thinking man's sports car." Both a car and a cultural icon, it has earned a fan base that spans from young to old, East to West, connoisseur to enthusiast. Porsche 911: The Ultimate Sportscar as Cultural Icon explains how this German car became a global phenomenon and a symbol of aspiration, freedom, and the appetite for perfection, and even more, why, around the world, the 911 continues to fascinate gentlemen, ladies, and rogue drivers. In this book, Ulf Poschardt sends Porsche drivers to the shrink and concludes that a little narcissism can be a healthy thing; he then

takes them on an engaging journey through the checkered history that defines their pride and joy. Not everyone can, nor indeed should, drive a Porsche, but Porsche 911: The Ultimate Sportscar as Cultural Icon lays bare the raw driving force behind the 911 for anyone intrepid enough to discover.

Montessori Madness - Trevor Eissler 2009

"We know we need to improve our traditional school system, both public and private. But how? More homework? Better-qualified teachers? Longer school days or school years? More testing? More funding? No, no, no, no, and no. Montessori Madness! explains why the incremental steps politicians and administrators continue to propose are incremental steps politicians and administrators continue to propose are incremental steps in the wrong direction. The entire system must be turned on its head. This book ask parents to take a look--one thirty-minute observation--at a Montessori school. Your picture of what educations should look like will never be the same"--
