Getting Involved, Workshops for Parents - Ellen Frede 1984

This guide for leaders of parent workshops is based on the Getting Involved booklets (which suggest ways parents of children in Head Start, day care, and other preschool programs can support children's learning through everyday family activities using materials at hand). This workshop leaders' guide offers suggestions for helping parents become more involved with their children's learning. Chapter 1 gives specific suggestions for planning, conducting, and evaluating workshops for parents. Chapters 2 through 10 give examples of workshop activities that focus on the following topics: children's attitudes toward learning, play, language, reading, writing, math, science, television, and problem solving. Each of these chapters is divided into sections concerning what parent workshops achieve; often-raised questions; workshop displays; choosing workshop activities; and introducing and generating ideas for activities. Because each group of parents has different interests, concerns, and outlooks, each workshop leader will use the workbook differently to select activities suited to his or her particular group of parents, to modify activities, or to create new activities particularly suited to local parent concerns. Why doesn't it run or fly or play or hunt like the rest of us? "Why are you so slow?" the howler monkey inquires. Storybridge to Second Language Literacy - Irma-Kaarina Ghosn 2013-09-01

Storybridge to Second Language Literacy makes a case for using authentic children's literature—alternately also referred to as 'stories' or 'real books'—as the medium of instruction in teaching English to young learners, particularly in contexts where children must access general curriculum subjects in English. The author first proposes theoretical foundations for the argument that illustrated children's books are superior to traditional language teaching courses in the primary school. She builds the case around the motivational power of stories, the language and content of quality children's literature, and the potential of literature to contribute to development of second language academic literacy. She then reviews research of the past thirty years that clearly supports her claim. Finally, she uses transcripts from real classrooms to illustrate how teachers in diverse contexts make use of stories. Through the classroom vignettes, a practical model of literature-based instruction emerges that is adaptable to a wide range of primary school teaching contexts, including English as a second language contexts in core-English countries. Storybridge to Second Language Literacy compiles in one volume solid theoretical foundations for story-based instruction, research evidence of the past thirty years supporting the approach (not currently available in a single source), and extensive classroom vignettes illustrating diverse practical applications (not lesson plans). This makes the book valuable for anyone in the field of young learner ELT. MA students in TESOL will find the book useful and

will develop an understanding of why and how literature-based instruction works and develop insight to guide their practice. Members of TESOL Elementary Education, EFL, and Bilingual Education SIGs, and IATEFL Young Learner SIG will be interested in the volume.

Instructors of teacher development courses should also find the proposed volume a valuable addition to assigned readings. Each chapter is followed by 'Think about it' questions and 'Try it out' suggestions.
