Civil Procedure in Egypt - Fathi Waly 2020-09-22

Derived from the renowned multi-volume International Encyclopaedia of Laws, this convenient volume provides comprehensive analysis of the legislation and rules that determine civil procedure and practice in Egypt. Lawyers who handle transnational matters will appreciate the book's clear explanation of distinct terminology and application of rules. The structure follows the classical chapters of a handbook on civil procedure: beginning with the judicial organization of the courts, jurisdiction issues, a discussion of the

various actions and claims, and then moving to a review of the proceedings as such. These general chapters are followed by a discussion of the incidents during proceedings, the legal aid and legal costs, and the regulation of evidence. There are chapters on seizure for security and enforcement of judgments, and a final section on alternative dispute resolution. Facts are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. Succinct, scholarly, and practical, this book will prove a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in Egypt will welcome this very useful guide, and academics and researchers will appreciate its comparative value as a contribution to the study of civil procedure in the international context.

Delivery of Justice Sector Services to the Poor - Paul Prettitore

The justice sector provides numerous services to citizens. These are often focused around court proceedings, involving criminal, civil and family law cases, and include legal aid services (information, counseling and representation) and waiver/deferment of court fees. Like services in other sectors, those in the justice sector may prove more difficult for poor persons to access. The obstacles they face include considerable lack of awareness of available services and the procedures they must undertake to access them, complicated procedures for accessing services, non-existence of services in practice, and the relatively high costs related fees. In recognition of these obstacles, governments in the Middle East region have taken some steps to fill
