Plato's Styles and Characters -
Gabriele Cornelli 2015-11-27
The significance of Plato's literary
style to the content of his ideas is

perhaps one of the central problems
in the study of Plato and Ancient
Philosophy as a whole. As Samuel
Scolnicov points out in this

collection, many other philosophers have employed literary techniques to express their ideas, just as many literary authors have exemplified philosophical ideas in their narratives, but for no other philosopher does the mode of expression play such a vital role in their thought as it does for Plato. And yet, even after two thousand years there is still no consensus about why Plato expresses his ideas in this distinctive style. Selected from the first Latin American Area meeting of the International Plato Society (www.platosociety.org) in Brazil in 2012, the following collection of essays presents some of the most recent scholarship from around the world on the wide range of issues related to Plato's dialogue form. The essays can be divided into

three categories. The first addresses general questions concerning Plato's literary style. The second concerns the relation of his style to other genres and traditions in Ancient Greece. And the third examines Plato's characters and his purpose in using them.

American Heart Association Complete Guide to Women's Heart Health - American Heart Association 2011-12-27
Heart disease poses the greatest health threat that women in the United States face: One in every three women will die from it each year. But that doesn't have to be the case. Heart disease is not an inevitable part of growing older. In fact, if you reach the age of 50 without developing the major risk factors for heart disease, you can live your entire life without it, and

your chances of dying from it decrease from 50 percent to a strikingly low 8 percent. The key to preventing heart disease is embracing a heart-healthy lifestyle—and the sooner, the better. In this groundbreaking book, the American Heart Association shows you how even the smallest changes can make a big difference over time to protect the health of your heart. The Complete Guide to Women's Heart Health explains how gradual and sustainable shifts in your routine, such as using just a little more than one percent of your time each week to exercise or losing just 10 percent of your body weight, can have a far-reaching impact on your health. With specific pointers on diet, exercise, and health care, this book shows you how to get past the common obstacles as

well as how to make taking care of your heart easy and attainable for the busy life you lead, at every age. In chapters targeted for every decade of a woman's life from her 20s to her 70s and beyond, the American Heart Association gives women age-appropriate advice on healthy lifestyle choices and heart-health care. Additional information addressing issues of special interest to women and how those issues affect the heart include: · Smoking · Pregnancy · Menopause and hormone therapy · Aging · Diabetes and other health conditions With the latest guidelines on prevention, suggestions on how to work with your healthcare providers to maintain and improve your vitality, details on screening technologies, and facts about common diagnoses and treatment options, this

book is the ultimate resource to help you—and all the women in your life—fight heart disease. From the Hardcover edition.

Problems and Paradigms of Unity -

Laura Maria Castelli 2014-10-22

Social Problems - Anna Leon-Guerrero
2015-06-18

Empower your students to become part of the solution. With a clear and upbeat voice, author Anna Leon-Guerrero's thought-provoking overview of social problems challenges readers to understand and recognize social problems in their communities and inspires them to become part of the solution. The Fifth Edition of *Social Problems: Community, Policy, and Social Action* goes beyond the typical presentation of contemporary social problems and their consequences by

emphasizing the importance and effectiveness of community involvement to achieve real solutions. With an overarching focus on social inequalities and policy, this proven text provides a platform for discussion that encourages critical thinking and inspires hope. "The extra emphasis on social action and movements is a real strength...I like that the three major perspectives are used in each chapter as I feel many texts just put that in the first chapter and then forget about it." –Todd Michael Callais, University of Cincinnati

The Timbuktu School for Nomads -

Nicholas Jubber 2016-09-08

The Sahara: a dream-like, far away landscape of Lawrence of Arabia and Wilfred Thesiger, The English Patient and Star Wars, and home to nomadic communities whose ways of life stretch back millennia. Today it's a teeth-janglingly dangerous destination, where the threat of jihadists lurks just over the horizon. Following in the footsteps of 16th century traveller Leo Africanus, Nicholas Jubber went on a turbulent adventure to the forgotten

places of North Africa and the legendary Timbuktu. Once the seat of African civilization and home to the richest man who ever lived, this mythic city is now scarred by terrorist occupation and is so remote its own inhabitants hail you with the greeting, 'Welcome to the middle of nowhere'. From the cattle markets of the Atlas, across the Western Sahara and up the Niger river, Nicholas joins the camps of the Tuareg, Fulani, Berbers, and other communities, to learn about their craft, their values and their place in the world. The Timbuktu School for Nomads is a unique look at a resilient city and how the nomads pit ancient ways of life against the challenges of the 21st century. Dinner at the Center of the Earth - Nathan Englander 2018-09-04

A political thriller set against the Israeli-Palestinian conflict, from the Pulitzer-nominated, bestselling author of *For the Relief of Unbearable Urges*. A Los Angeles Times Best Book of the Year "Blends elements of spy thriller and love

story, magical realism, and an all-too-real history of one of the world's most intractable problems: peace between Israel and its neighbors." –The Boston Globe In the Negev desert, a nameless prisoner languishes in a secret cell, his only companion the guard who has watched over him for a dozen years. Meanwhile, the prisoner's arch nemesis–The General, Israel's most controversial leader–lies dying in a hospital bed. From Israel and Gaza to Paris, Italy, and America, Englander provides a kaleidoscopic view of the prisoner's unlikely journey to his cell. Dinner at the Center of the Earth is a tour de force—a powerful, wryly funny, intensely suspenseful portrait of a nation riven by insoluble conflict, and the man who improbably lands at the center of it

all.

Philosophy and the Idea of Communism

- Alain Badiou 2015-05-06
In a well-known text called 'The Communist Hypothesis', first published in 2007, the renowned philosopher Alain Badiou breathed fresh life into the idea of communism as an intellectual representation that provides a critical perspective on existing politics and offers a systemic alternative to capitalism. Now, in the course of this wide-ranging conversation with Peter Engelmann, Alain Badiou explains why he continues to value the idea of communism against the background of current social crises and despite negative historical experiences. From the anticipation of a communism without a state to the problem of the concept of democracy and an analysis of capitalism as a system, the two thinkers discuss the key political

issues of our time. Whilst explaining his political philosophy, Badiou also reflects on current socio-political developments such as the turmoil in the Middle East and the situation in China. This compelling dialogue is both a highly topical contribution to the question of how we might organize our societies differently and an accessible introduction to Badiou's philosophical thinking.

Posthumanism - Stefan Herbrechter
2013-08-01

What does it mean to be human today? The answer to this question, which is as old as the human species itself, is becoming less and less certain. Current technological developments increasingly erode our traditional humanist reflexes: consciousness, emotion, language, intelligence, morality, humour, mortality - all

these no longer demonstrate the unique character and value of human existence. Instead, the spectre of the 'posthuman' is now being widely invoked as the 'inevitable' next evolutionary stage that humans are facing. Who comes after the human? This is the question that posthumanists are taking as their starting point. This critical introduction understands posthumanism as a discourse, which, in principle, includes everything that has been and is being said about the figure of the 'posthuman'. It outlines the genealogy of the various posthuman 'scenarios' in circulation and engages with their theoretical and philosophical assumptions and social and political implications. It does so by connecting the philosophical debate about the future of humanity

with a range of texts, including examples from new media, popular culture, science and the media.
Peaks of Europe - Johan Lolos 2018
'Peaks of Europe' is not a traditional landscape photography book. It's the result of a 5-month adventure across 17 countries told through the lens of a European travel photographer who took 29 years to finally explore the continent on which in he was born. The book has been designed for a specific purpose: telling the story of a 5-month road trip and what it takes to be living out of a car for several months, with all the good and bad moments. For this project, Johan Lolos wasn't just documenting the landscapes. This book features a series of photos with a focus on the storytelling as much as the imagery. At the end, the people he met were

what he remembered most.

New Directions in Reactance Research
- Sandra Sittenthaler 2015-12-31
New insightful theory and research concerning reactance processes
Psychological reactance theory, formulated by Jack Brehm in 1966, is one of the most popular social psychological theories explaining how people respond to threats to their free behaviors and has attracted attention in both basic and applied research in areas such as health, marketing, politics, and education. A review article published

40 years later by Miron and Brehm pointed out several research gaps. That article inspired the editors to develop this special issue in order to present recent research and developments in reactance theory that both offer new knowledge and illuminate issues still in need of resolution. Topics covered include:- Reactance theory in association with guilt appeals- Tests to study the relationship between fear and psychological reactance- The influence of threat to group identity and its associated values and norms on reactance- Benefit of reactance research in health psychology campaigns- Construction and empirical validation of an instrument for measuring state reactance (Salzburger State Reactance Scale)- Motivation intensity theory and its implications

for how reactance motives should convert into effortful goal pursuit
Religious Authority and the Arts - Liam Gearon 2015

The transcribed conversations that represent the substance of this volume are the result of a research project funded by the United Kingdom's Arts and Humanities Research Council. This book represents a physical and political-theological journey around England and provides a snapshot of how religious leaders and authority figures respond to contemporary issues of freedom of expression.

The Good Life and Conceptions of Life in Early China and Graeco-Roman

Antiquity - R. A. H. King 2015
Chinese and Greek ethics remain influential in modern philosophy, yet it is unclear how they can be compared to one another. This volume, following its predecessor 'How should one live?' (DeGruyter 2011), is a contribution to comparative ethics, loosely centered on the concepts of life and the good life. Methods of comparing ethics are treated in three introductory chapters (R.A.H.King, Ralph Weber, G.E.R. Lloyd), followed by chapters on core issues in each of the traditions: human nature (David

Wong, Guo Yi), ghosts (Paul Goldin), happiness (Christoph Harbsmeier), pleasure (Michael Nylan), qi (Elisabeth Hsu & Zhang Ruqing), cosmic life and individual life (Dennis Schilling), the concept of mind (William Charlton), knowledge and happiness (J rg Hardy), filial piety (Richard Stalley), the soul (Hua-kuei Ho), and deliberation (Thomas Buchheim). The volume closes with three essays in comparison - Mencius and the Stoics (R.A.H. King), equanimity (Lee Yearley), autonomy and the good life (Lisa Raphals). An index locorum each for Chinese and Greco-Roman authors, and a general index complete the volume.

Homecamp - Doron Francis 2018-03-06
Homecamp is an impressive package that will inspire you to switch off and get lost in the beauty and wonder that nature has to offer. It's difficult to find nature amidst the rush, bustle and electronic pop-ups that flood our modern lives - to leave stress and hurry behind, embracing the simple pleasure to be found in pounding waves, a roaring campfire and a sky full of stars. But nature isn't as far away as you think. Homecamp is a beautiful collection of stories and images from everyday adventurers - people who have found ways to experience and embrace the outdoors, on their terms. Some have gone on epic adventures: sold their belongings and lived in a

van, trekked through the Himalayas or biked across continents. Others simply found new ways of seeing the world around them: cleaned up a beach, learned how to forage or spent a night alone in the woods. All found that their experiences in nature transformed their lives and freed them, even if only briefly, from the monotony of their 9-5 grind. This book will inspire you to rediscover the joys and the rejuvenating power of spending time outside. Along with compelling stories, interviews and imagery, you'll find a how-to guide full of helpful tips, from how to choose and set up camp to brewing the perfect campfire coffee and enjoying the outdoors without a trace.

Free Will - Mark Balaguer 2014-02-14

A philosopher considers whether the scientific and philosophical arguments against free will are reason enough to give up our belief in it. In our daily life, it really seems as though we have free will, that what we do from moment to moment is determined by conscious decisions that we freely make. You get up from the couch, you go for a walk, you eat chocolate ice cream. It seems that we're in control of actions like these; if we are, then we have free will. But in recent years, some have argued that free will is an illusion. The neuroscientist (and best-selling

author) Sam Harris and the late Harvard psychologist Daniel Wegner, for example, claim that certain scientific findings disprove free will. In this engaging and accessible volume in the Essential Knowledge series, the philosopher Mark Balaguer examines the various arguments and experiments that have been cited to support the claim that human beings don't have free will. He finds them to be overstated and misguided. Balaguer discusses determinism, the view that every physical event is predetermined, or completely caused by prior events. He describes several philosophical and scientific arguments against free will, including one based on Benjamin Libet's famous neuroscientific experiments, which allegedly show that our conscious decisions are

caused by neural events that occur before we choose. He considers various religious and philosophical views, including the philosophical pro-free-will view known as compatibilism. Balaguer concludes that the anti-free-will arguments put forward by philosophers, psychologists, and neuroscientists simply don't work. They don't provide any good reason to doubt the existence of free will. But, he cautions, this doesn't necessarily mean that we have free will. The question of whether we have free will remains an open one; we simply don't know enough about the brain to answer it definitively.

Praxisbuch Ethik in der Notfallmedizin - Fred Salomon 2015-10

Philosophy in the Present - Alain

Badiou 2009-12-14

Two controversial thinkers discuss a timeless but nonetheless urgent question: should philosophy interfere in the world? Nothing less than philosophy is at stake because, according to Badiou, philosophy is nothing but interference and commitment and will not be restrained by academic discipline. Philosophy is strange and new, and yet speaks in the name of all - as Badiou shows with his theory of universality. Similarly, Žižek believes that the philosopher must intervene, contrary to all expectations, in the key issues of the time. He can offer no direction, but this only shows that the question has been posed incorrectly: it is valid to change the terms of the debate and settle on philosophy as abnormality and excess.

At once an invitation to philosophy and an introduction to the thinking of two of the most topical and controversial philosophers writing today, this concise volume will be of great interest to students and general readers alike.

What is Up to Us? - Pierre Destrée
2014

The problem of responsibility in moral philosophy has been lively debated in the last decades, especially since the publication of Harry Frankfurt's seminal paper, "Alternate possibilities and moral responsibility" (1969).

Compatibilists - also known as "soft" determinists - and, on the other side, incompatibilists - libertarians and "hard" determinists - are the main contenders in this major academic controversy. The debate goes

back to Antiquity. After Aristotle, compatibilists, and especially the Stoics, debated this issue with the incompatibilists, notably Epicurus (though his classification as an incompatibilist has been disputed in modern scholarship), Alexander of Aphrodisias and Plutarch. The problem debated at that time and the problem debated nowadays are fundamentally the same, even though the terms and the concepts evolved over the centuries. In Antiquity, the central notion was that of "what is up to us", or "what depends on us". The present volume brings together twenty contributions devoted to examining the problem of moral responsibility as it arises in Antiquity in direct connection with the concept of what is up to us - to eph' hêmin, in Greek, or in nostra potestate and in

nobis, in its Latin counterparts, aiming to promote classical scholarship, and to shed some light on the contemporary issues as well. *Bessersprecher Italienisch* - Sandro Mattioli 2015-11-19
