Human Communication as Narration -

Walter R. Fisher 2021-06-03

This book addresses questions that have concerned rhetoricians, literary theorists, and philosophers since the time of the pre-Socratics and the Sophists: How do people come to believe and to act on the basis of communicative experiences? What is the nature of reason and rationality in these experiences? What is the role of values in human decision making and action? How can reason and values be assessed? In answering these questions, Professor Fisher proposes a reconceptualization of humankind as homo narrans, that all forms of human communication need to be seen as stories—symbolic interpretations of aspects of the world occurring in time and shaped by history, culture, and character; that individuated forms of discourse should be considered "good reasons"—values or value-laden warrants for believing or acting in certain ways; and that a narrative logic that all humans have natural capacities to employ ought to be conceived of as the logic by which human communication is assessed.

Resonate - Nancy Duarte 2013-07-02

with the audience and move them to transformative action. Just as the author's first book helped presenters become visual communicators, Resonate helps you make a strong connection with your audience and lead them to purposeful action. The author's approach is simple: building a presentation today is a bit like writing a documentary. Using this approach, you'll convey your content with passion, persuasion, and impact. Author has a proven track record, including having created the slides in Al Gore's Oscar-winning An Inconvenient Truth Focuses on content development methodologies that are not only fundamental but will move people to action Upends the usual paradigm by making the audience the hero and the presenter the mentor Shows how to use story techniques of conflict and resolution Presentations don't have to be boring ordeals. You can make them fun, exciting, and full of meaning. Leave your audiences energized and ready to take action with Resonate.

At War with Metaphor - Erin Steuter
2009-07-15

When photographs documenting the torture and humiliation of prisoners at Abu Ghraib came to the attention of a horrified public, national and international voices were raised in shock, asking how this happened. *At War with Metaphor* offers an answer, arguing that the abuses of Abu Ghraib were part of a systemic continuum of dehumanization. This continuum has its roots in our public discussions of the war on terror and the metaphors through which they are repeatedly framed. Arguing earnestly and incisively that these metaphors, if left unexamined, bind us into a cycle of violence that will only be

intensified by a responsive violence of metaphor, Steuter and Wills examine compelling examples of the images of animal, insect, and disease that inform, shape, and limit our understanding of the war on terror. Tying these images to historical and contemporary uses of propaganda through a readable, accessible analysis of media filters, *At War with Metaphor* vividly explores how news media, including political cartoons and talk radio, are enmeshed in these damaging, dehumanizing metaphors. Analyzing media through the lenses of race and Orientalism, it invites us to hold our media and ourselves accountable for the choices we make in talking war and making enemies.

How do we get ourselves out of the foreground of our thoughts and achieve compassion? The speech captures Wallace's electric intellect as well as his grace in attention to others. After his death, it became a treasured piece of writing reprinted in The Wall Street Journal and the London Times, commented on endlessly in blogs, and emailed from friend to friend. Speak Out, Call In - Meggie Mapes

Mirror Meditation - Tara Well
2022-06-01

Discover the power of mirror meditation to help you awaken self-compassion, increase self-awareness, and gain the confidence needed to thrive. Seeing ourselves clearly isn't always easy—especially in the age of social media. Technology has eroded our capacity for authentic self-reflection. As a result, we feel more anxious and depressed, have shorter attention spans, and have become more estranged from ourselves and each other. We've also become more critical of our physical appearance, and this self-criticism can damage our confidence and stand in the way of our happiness. In order to heal, we must come face to face with our true selves—not the images of ourselves that we alter and post online. If you're ready for self-reflection that has nothing to do with selfies, this book will reveal the way. Based in cutting-edge neuroscience, Mirror Meditation offers mindful practices for increasing your self-awareness, managing stress and emotions, developing self-compassion, and increasing your confidence and personal presence. Using the three principles of mindfulness meditation—attention to the present moment, open awareness, and kind intention toward oneself—you'll realize just how much your self-criticisms are affecting you. Then you'll have a choice—and a practice—to treat yourself with more self-acceptance. Self-awareness can help you break free from both your inner critic and the external world that stokes the fears and anxieties that we are never good enough, never have enough, and are never safe enough. The simple self-mirroring technique in this unique guide isn't grounded in technology—just a commitment to be present with

yourself.

Toy rocket in hand, the boy finds himself in a crowded, stuffy lecture hall. At first he is amazed by the charts and the figures. The Art of Public Speaking - Dale Carnegie 2018-04-28

The efficiency of a book is like that of a man, in one important respect: its attitude toward its subject is the first source of its power. A book may be full of good ideas well expressed, but if its writer views his subject from the wrong angle even his excellent advice may prove to be ineffective. This book stands or falls by its authors' attitude toward its subject. If the best way to teach oneself or others to speak effectively in public is to fill the mind with rules, and to set up fixed standards for the interpretation of thought, the utterance of language, the making of gestures, and all the rest, then this book will be limited in value to such stray ideas throughout its pages as may prove helpful to the reader—as an effort to enforce a group of principles it must be reckoned a failure, because it is then untrue.
