The Book Of Origins - Trevor Homer 2012-03-08

A treasure-trove of information on the origins of everything - from tea-bags to mobile phones Everything has an origin. This book is for people who want to know how, or when, things began, where they came from, why they started. And when it has a human origin, such as the Mongol Empire or Ferrari cars, the name of the person who started it. Everyday items such as the clothes we

wear, the food we eat, the films we watch, the medicines that cure us, the languages we use, all began somewhere (and the answers are often not what you expect). The Book of Origins celebrates the work of explorers, scientists and inventors people who wanted to know how the world works and ended by discovering something no one had ever seen before. · Ever wondered who the first Olympic Champion was? · Did you know who invented the radio (and it wasn't Marconi!)? · Or who really discovered America? The answers are all in this fascinating fact-filled book.

The History and Politics of Motor Racing - Damion Sturm 2023-07-11

This book explores the history and politics of motor racing, one of the most popular and lucrative elements in the international sport industry. Written by a group of international scholars and motor racing specialists it discusses the sport's origins, the relationship of motor racing to nation building and modernity (noting its links to fascism and dictatorship), the links between motor racing and

the automobile industry, motor racing and the politics both of gender and of race, motor racing, the media and postmodernity, and motor racing, the spatial and globalization. This book speaks to scholars in history, politics, sport studies, the sociology of sport, sport management and cultural studies, along with the many lay readers who are interested in the relationship between motor sport and society.

LIFE - 1963-12-20

LIFE Magazine is the treasured photographic magazine that chronicled the 20th Century. It now lives on at LIFE.com, the largest, most amazing collection of professional photography on the internet. Users can browse, search and view photos of today's people and events. They have free access to share, print and post images for personal use.

BMW MINI - Sophie Williamson-Stohtert 2016-06-30

The R-Series BMW MINI had a lot to live up to. Launched in 2001, it was riding in the wake of the classic 1959-2000 Mini. At the time, BMW were going to have to create something as special and innovative as its longstanding predecessor in order to silence the naysayers. And they did. Since its launch in 2001, BMW's modern MINI has become the pinnacle of small yet funky family cars in the premium small (and sometimes not so small) car segment. Now in its third generation, having unveiled the new F-Series in 2014, BMW MINI offers 3- and 5-door hatchback models and convertibles, the estate Clubman, the five-door Countryman, the Coupe, the Roadster and the three-door crossover Paceman. MINI enthusiast and motoring journalist Sophie Williamson-Stohtert explores the journey from 1959 to the present day, covering design and development of the new MINI, launch and reception by the press, its many model variations and special editions, and an owner's and buyer's guide. Superbly illustrated with 170 colour photographs.

1968 Shelby Mustang GT350, GT500 and GT500KR - Greg Kolasa 2017-01-16

There were Mustangs, and then there were Mustangs. Ford wanted its new little Pony Car to appeal to the masses, and in executing that plan, the Mustang could be had in anything from a plain-Jane version with an economical 6-cylinder engine (often referred to as a "secretary's car"), all the way up to the sporty GT models with optional 271-hp V-8s. Unfortunately, although road-going Mustangs were considered sporty, they were not officially sports cars, at least according to the Sports Car Club of America (SCCA). And Lee Iacocca knew that on-track performance led to showroom performance, so he needed to go racing. Enter Carroll Shelby. Shelby worked with the SCCA to modify the Mustang to meet the SCCA's requirements and enter the racing arena. The result was the now-legendary Shelby Mustang. This volume of CarTech's In Detail series covers the 1968 Shelby GT350, GT500, and GT500KR. In 1968, Ford sought to take over much of the process of producing Shelby Mustangs and increased that production dramatically to meet anticipated sales demand, so it was a bit of a transition year. In an effort to appeal to muscle car fans rather than race fans, the cars were losing their edgy race car feel and were becoming more high-end performance road cars with a long list of performance and comfort options including 428 Cobra Jet Engines, automatic transmissions, and air conditioning. They may have no longer been sports cars, but they were now fantastic muscle cars. As in all In Detail Series books, you get an introduction and historical overview, an explanation of the design and concepts involved in creating the car, a look at marketing and promotion, and an in-depth study of all hardware and available options, as well as an examination of where the car is on the market today. Also included is an appendix of paint and option codes, VIN and build tag decoders, as well as production

numbers.

Porsche - Gui Bernardes 2017-06-30

In Stuttgart-Zuffenhausen, August 1939, the 60K10 project, under the supervision of one Professor Ferdinand Porsche, builds a car in anticipation of a race, Berlin to Rome, that will never take place. With this model, the idea for a light and aerodynamic car, with a small engine but remarkable performance was born. Nine years later this idea bore fruit and the company released their first automobile, the 356, created by Ferdinand's son, Ferry Porsche, which would launch the company into automotive history. Porsche - Cars with Soul tells the story of Porsche, from the unique perspective of the cars themselves, through the most significant events and races of the marque's celebrated history. It covers exhilarating accounts of races in which Porsche cars competed, from 1951 to 2015 and it tracks the development of Porsche models from the first model 356, to the defining model 911, and beyond. Beautifully illustrated with rarely seen full-colour and vintage photographs from the Porsche archives.

Road & Track - 1999-05

Brick by Brick - Martyn Nutland 2012-10-08

The myth that Alec Issigonis conceived the Mini is just one whisp of the smoke screen that obscures the untold story of post-War Britains greatest industrialist. This is more than a motoring story. You will find commentary on life in the first half of the 20th century as you explore the drama of one mans determination to overcome adversity. Someone who shot from the hip as no other tycoon. This is a tale of political and military intrigue. Of

spectacular business acumen. Of bitter, violent, industrial conflict. An account of savage jealousies and sexual intrigue. To record the life of Leonard Lord the author has visited a vast number of sources. In recent times some have sought to implant the roots of the British motor industrys ills and ultimate collapse in the policies of Leonard Lord. This is both disingenuous and unjust. This, for the first time, is his story.

The Big Healeys - John Nikas 2017-07-15

The story of the iconic and powerful Big Austin-Healey sports cars.

The American Desk Encyclopedia - Steve Luck 1998-10-22

Here is one of the most up-to-date, affordable, and convenient encyclopedias on the market, offering more than 15,000 alphabetically arranged entries, placing a world of information within arm's reach. The ENCYCLOPEDIA also offers an attractive page layout, with 300 black-and-white illustrations, along with a 16-page color map section.

Boys' Life - 1967-09

Boys' Life is the official youth magazine for the Boy Scouts of America. Published since 1911, it contains a proven mix of news, nature, sports, history, fiction, science, comics, and Scouting.

Monte Carlo Rally - Graham Robson 2007-11-15

Hundreds of entrants, in cars of all shapes and sizes, battled through mid-winter snow, fog, ice and darkness from far-flung starting points towards the magical principality of Monaco. Mishaps, breakdowns and smashes abounded, and competitors had tales to tell of cars teetering on the edge of precipices or rammed into snowbanks, frantically improvised repairs, close encounters and feats of crazy bravado. The first rally was run in 1911, with just 20 starters. In 1930 there were 100, in 1949 205, and in the peak year, 1953, there were no less than 404. In this book every Monte Carlo Rally held between 1911 and 1980 is

covered individually, with results listings and route maps. As the years unfold we see the successes of Hotchkiss in the late 1940s, Sunbeam-Talbot in the early 1950s, Mini-Cooper in the 1960s, Porsche 911 in the late '60s, and the dominance of Alpine Renault and Lancia Stratos in the 1970s. The author also provides essential information on regulations, routes, on what competitors were required to do, on the tests held after arrival in Monaco, on classes of entries, and on the various Concours, including for instance the Concours de Confort, that were there to be won. Thus a complete picture of the aims and nature of the rally as it evolved is formed. Written by the world's leading rally historian, and featuring more than 300 archive photographs, this book provides both the definitive history of the greatest motor rally of all time and an evocative view of a golden age of motoring history.

Motor Sport - William Boddy 1968

Triumph Stag - Matthew Vale 2014-05-31

The Triumph Stag was a two-door, four-seat, luxury touring car, designed to be Triumph's flagship model for the 1970s. Styled by prolific designer Giovanni Michelotti, and engineered by Harry Webster and Spen King, the Stag had no direct competitors throughout its production life and was the blueprint for the many four-seat convertibles on the market today. It was in production from 1970 through to 1977, but suffered from a lack of development and gained a reputation for engine problems caused by poor cooling. Triumph Stag - An Enthusiast's Guide explores the history, design and development of the car, taking a special look at the Stag's unique Triumph V8 engine - and how Stag owners today have largely solved the cooling problems. It also covers owners' experiences, specialist modifications and

improvements, and the car clubs that help the Stag remain one of the most popular classic cars in the UK. Superbly illustrated with 121 colour photographs.

Goodwood Festival of Speed - Doug Nye 2004-09

A celebration in words and pictures of the world's biggest and most diverse classic motor sports event. Endorsed by the Goodwood Estate, edited by a leading authority on both classic and modern cars and featuring contributions from celebrities ranging from Jeremy Clarkson to Mick Mason, this is a must-have book for all motor racing devotees. Each year over a hundred thousand visitors from around the world gather in the grounds of Goodwood House near Chichester to celebrate their passion for motor cars and motor sport. It is the only meeting in the world where fans can see some of the greatest cars in the history of motor sport together with the drivers who drove them. Goodwood Festival of Speed is the official book on this unique occasion in the sporting calendar. Starting from informal beginnings in 1993 through to the record-breaking 11th anniversary meeting televised throughout Europe and America, the story captures the nostalgia and thrill of a much-loved extravaganza -- where beautiful Alfa Romeos, thirties' American Streamliners and outrageous fifties' Cadillacs stand alongside World Championship winning Ferraris, fabulous racing bikes, and the latest expensive F1 machines. And

Municipal Engineering; Sanitary Record and the Municipal Motor - 1936

16,000 Miles to Mexico City - Robert Connor 2022-03-21
Imagine driving 16,000 miles in 25 days over some of the roughest terrain in the world, at altitudes up to 16,000 feet, where engines and lungs gasp for air. Imagine 500-mile speed trials over rocky mountain tracks, racing against the clock and 95 other cars. Imagine attempting this more than 50 years ago, without GPS or cell phones or modern safety equipment. In April 1970, 241 men and women from more than 20 nations did just that, setting out from London in cars ranging from a dune buggy to family sedans to Porsches, Rolls-Royces, camper vans and a Jeep Wagoneer, determined to get to Mexico City. Drawing on personal recollections of competitors, organizers, marshals and mechanics, this book recounts the ecstasies and agonies of perhaps the toughest endurance motorsports event ever--the London to Mexico World Cup Rally.
Motor Cycling and Motoring - 1985

The Daily Mirror World Cup Rally 40 - Graham Robson 2010-04-08
Lasting six weeks, and covering 16,000 miles from London to Mexico City via some of the most varying, tortuous and difficult terrain on three continents, the 1970 World Cup Rally was a unique high-speed event, attracting many serious works teams such as Ford and British Leyland. Despite the tremendous amounts of money spent choosing and developing new cars, completing months-long route surveys, and analysing every detail of diets, oxygen provision, and the number of crew members, out of an entry of more than 100 cars, only 23 cars made it to the finish. It was then, and remains now, the toughest rally of all time.
The Book of the Standard Motor Company - Graham Robson 2011-07-15
Starting with the original Standard prototype of 1903, this book covers the scores of Standard models built until the brand was

discontinued in 1963 (Britain) and 1987 (India). It also covers the Ferguson tractor involvement, military aero-engine manufacture, military aircraft manufacturer (including Beaufighter and Mosquito fighter-bombers), Rolls-Royce Avon turbo-jet military engine manufacture, and Triumph cars.

The Illustrated History of Triumph Sports and Racing Cars - G. William Krause 2017-11-15
The Triumph Motor Company is known around the world for its iconic sports cars. The hugely popular TR series, Spitfires, and GT-6s represent the quintessential British sports car; rugged good looks were combined with performance and economy at a price everyone could afford. These sports cars are always in demand and prized by British car collectors, racers, and open-air motoring enthusiasts. Triumph understood the connection between competition success and sales success and was able to parlay rally and road racing wins into the best-selling sports cars in the world, particularly in the United States during the 1950s and 1960s. The Works competition cars notched victories at Le Mans, Sebring, the Monte Carlo rally, and many others and inspired privateers to take their cars to the track. Every model came from a bloodline of racing. Triumph historian G. William Krause reviews every model in the sports car lineup. He covers the history, design evolution, and performance specifications from the first sports cars in the 1930s through the final cars built in 1981. Throughout Triumph's history a number of pivotal moments could have significantly changed the company's fortunes. This book also looks at the "what if" cars that never made it into production, including photos. Although they have not been built for more than three decades, their mark on sports car history is undeniable. Whether you're a fan of the spartan brutes of the 1950s or the refined comfort and performance of the last TRs, you will find the backstory of your favorites here. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial}
Road and Track - 1990

American Auto Racing - J.A. Martin 2014-07-15

As soon as there were automobiles, there was racing. The first recorded race, an over road event from Paris to Rouen, France, was organized by the French newspaper Le Petit Journal in 1894. Seeing an opportunity for a similar event, Hermann H. Kohlsaat--publisher of the Chicago Times-Herald--sponsored what was hailed as the "Race of the Century," a 54-mile race from Chicago's Jackson Park to Evanston, Illinois, and back. Frank Duryea won in a time of 10 hours and 23 minutes, of which 7 hours and 53 minutes were actually spent on the road. Race cars and competition have progressed continuously since that time, and today's 200 mph races bear little resemblance to the event Duryea won. This work traces American auto racing through the 20th century, covering its significant milestones, developments and personalities. Subjects included are: Bill Elliott, dirt track racing, board track racing, Henry Ford, Grand Prix races, Dale Earnhardt, the Vanderbilt Cup, Bill France, Gordon Bennett, the Indianapolis Motor Speedway, the Mercer, the Stutz, Duesenberg, Frank Lockhart, drag racing, the Trans Am, Paul

Newman, vintage racing, land speed records, Al Unser, Wilbur Shaw, the Corvette, the Cobra, Richard Petty, NASCAR, Can Am, Mickey Thompson, Roger Penske, Mario Andretti, Jeff Gordon, and Formula One. Through interviews with participants and track records, this text shows where, when and how racing changed. It describes the growth of each different form of auto racing as well as the people and technologies that made it ever faster.

Mitsubishi Lancer EVO I to X - Brian Long 2007-02-01

The definitive international history of one of the world's most successful rally cars. Covers every Lancer model - including all special editions, and Dodge, Colt, Plymouth, Valiant, Eagle, Proton and Hyundai variants - from 1973 to date. Includes a Foreword by Shinichi Kurihara, Mitsubishi's Evo team leader.

A Life Awheel - Richard Skelton 2016-04-15

A veteran motoring journalist's extraordinary life, told through delightfully eccentric stories and charming diary extract. This unique book is packed with fascinating stories about classic cars and motorcycles, set in a bygone world, and properly fixed in time. (Fiction.)
