Crime and Criminal Justice in Modern Germany - Richard F. Wetzell 2014-05-01

The history of criminal justice in modern Germany has become a vibrant field of research, as demonstrated in this volume. Following an introductory survey, the twelve chapters examine major topics in the history of crime and criminal justice from Imperial Germany, through the Weimar and Nazi eras, to the early postwar years. These topics include case studies of criminal trials, the development of juvenile justice, and the efforts to reform the penal code, criminal procedure, and the prison system. The collection also reveals that the history of criminal justice has much to contribute to other areas of historical inquiry: it explores the changing relationship of criminal justice to psychiatry and social welfare, analyzes representations of crime and criminal justice in the media and literature, and uses the lens of criminal justice to illuminate German social history, gender history, and the history of sexuality.

The Crisis of the 14th Century - Martin Bauch 2019-12-16

Pre-modern critical interactions of nature and society can best be studied during the so-called "Crisis of the 14th Century". While historiography has long ignored the environmental framing of

historical processes and scientists have over-emphasized nature's impact on the course of human history, this volume tries to describe the at times complex modes of the late-medieval relationship of man and nature. The idea of 'teleconnection', borrowed from the geosciences, describes the influence of atmospheric circulation patterns often over long distances. It seems that there were 'teleconnections' in society, too. So this volume aims to examine man-environment interactions mainly in the 14th century from all over Europe and beyond. It integrates contributions from different disciplines on impact, perception and reaction of environmental change and natural extreme events on late Medieval societies. For humanists from all historical disciplines it offers an approach how to integrate written and even scientific evidence on environmental change in established and new fields of historical research. For scientists it demonstrates the contributions scholars from the humanities can provide for discussion on past environmental changes.

Performing Justice - Elizabeth A. Wood

2018-05-31

After seizing power in 1917, the Bolshevik regime faced the daunting task of educating and bringing culture to the vast and often illiterate mass of Soviet soldiers, workers, and peasants. As part of this campaign, civilian educators and political instructors in the military developed didactic theatrical fictions performed in workers' and soldiers' clubs in the years from 1919 to 1933. The subjects addressed included politics, religion, agronomy, health, sexuality, and literature. The trials were designed to permit staging by amateurs at low cost, thus engaging the citizenry in their own remaking. In reconstructing the history of the so-called agitation trials and placing them in a rich social context, Elizabeth A. Wood makes a major contribution to rethinking the first decade of Soviet history. Her book traces the arc by which a regime's campaign to educate the masses by entertaining and disciplining them culminated in a policy of brute shaming. Over the course of the 1920s, the nature of the trials changed, and this process is one of the main themes of the later chapters of Wood's book. Rather than humanizing difficult issues, the trials increasingly made their subjects (alcoholics, boys who smoked, truants) into objects of shame and dismissal. By the end of the decade and the early 1930s, the trials had become weapons for enforcing social and political conformity. Their texts were still fictional—indeed, fantastical—but the actors and the verdicts were now all too real.

Lucia Joyce - Carol Loeb Shloss 2005-03-01

"Whatever spark or gift I possess has been transmitted to Lucia and it has kindled a fire in her brain." —James Joyce, 1934 Most accounts of James Joyce's family portray Lucia Joyce as the mad daughter of a man of genius, a difficult burden. But in this important new book, Carol Loeb Shloss reveals a different, more dramatic truth: her father loved Lucia, and they shared a deep creative bond. Lucia was born in a pauper's hospital and educated haphazardly across Europe as her penniless father pursued his art. She wanted to strike out on her own and in her twenties emerged, to Joyce's amazement, as a harbinger of expressive modern dance in Paris. He described her then as a wild, beautiful, "fantastic being" whose mind was "as clear and as unsparing as the lightning." The family's only reader of Joyce, she was a child of the imaginative realms her father created, and even after emotional turmoil wrought havoc with her and she was hospitalized in the 1930s, he saw in her a life lived in tandem with his own. Though most of the documents about Lucia have been destroyed, Shloss painstakingly reconstructs the poignant complexities of her life—and with them a vital episode in the early history of psychiatry, for in Joyce's efforts to help her he sought the help of Europe's most advanced doctors, including Jung. In Lucia's world Shloss has also uncovered important material that deepens our understanding of *Finnegans Wake*, the book that redefined modern literature.

A Slap in the Face - Abbas Khider 2022-03-22

Now in paperback, the touching, timely story of an Iraqi refugee in Germany. In our era of mass migration, much of it driven by war and its aftermath, *A Slap in the Face* could not be more timely. It tells the story of Karim, an Iraqi refugee living in Germany whose right to asylum has been revoked in the wake of Saddam Hussein's defeat. But Hussein wasn't the only reason Karim left, and as Abbas Khider unfolds his story, we learn both the secret struggles he faced in his

homeland and the battles with prejudice, distrust, poverty, and bureaucracy he has to endure in his attempts to make a new life in Germany. As he erupts in frustration at his caseworker, and finally forces her to listen to his story, we get an account of a contemporary life upended by politics and violence, told with a warmth and humor that, while surprising us, does nothing to lessen the outrages Karim describes.

The Body of Evidence - Francesco Paolo De Ceglia 2020

"When, why and how was it first believed that the corpse could reveal 'signs' useful for understanding the causes of death and eventually identifying those responsible for it?

The Body of Evidence. Corpses and Proofs in Early Modern European Medicine, edited by Francesco Paolo de Ceglia, shows how in the late Middle Ages the dead body, which had previously rarely been questioned, became a specific object of investigation by doctors, philosophers, theologians and jurists. The volume sheds new light on the elements of continuity, but also on the effort made to liberate the semantization of the corpse from what were, broadly speaking, necromantic practices, which would eventually merge into forensic medicine"--

Reconsidering the Emergence of the Gay Novel in English and German - James P. Wilper 2016-02-15
In *Reconsidering the Emergence of the Gay Novel in English and German*, James P. Wilper examines

a key moment in the development of the modern gay novel by analyzing four novels by German, British, and American writers. Wilper studies how the texts are influenced by and respond and react to four schools of thought regarding male homosexuality in the late nineteenth and early twentieth centuries. The first is legal codes criminalizing sex acts between men and the religious doctrine that informs them. The second is the ancient Greek erotic philosophy, in which a revival of interest took place in the late nineteenth century. The third is sexual science (or "sexology"), which offered various medical and psychological explanations for same-sex desire and was employed variously to defend, as well as to attempt to cure, this "perversion." And fourth, in the wake of the scandal caused by his trials and conviction for "gross indecency," Oscar Wilde became associated with a homosexual stereotype based on "unmanly" behavior. Wilper analyzes the four novels—Thomas Mann's *Death in Venice*, E. M. Forster's *Maurice*, Edward Prime-Stevenson's *Imre: A Memorandum*, and John Henry Mackay's *The Hustler*—in relation to these schools of thought, and focuses on the exchange and cross-cultural influence between linguistic and cultural contexts on the subject of love and desire between men.

Sign Talk - Ernest Thompson Seton 2020-02-10

In offering this book to the public after having had the manuscript actually on my desk for more than nine years, let me say frankly that no one realizes better than myself, now, the magnitude of the subject and the many faults of my attempt to handle it. My attention was first directed to the Sign Language in 1882 when I went to live in Western Manitoba. There I found it used among the various Indian tribes as a common language, whenever they were unable to understand each other's speech. In later years I found it a daily necessity when traveling among the natives of New Mexico and Montana, and in 1897, while living among the Crow Indians at their agency near Fort Custer, I met White Swan, who had served under General George A. Custer as a Scout. He had been sent across country with a message to Major Reno, so escaped the fatal battle; but fell in with a party of Sioux, by whom he was severely wounded, clubbed on the head, and left for dead. He recovered and escaped, but ever after was deaf and practically dumb.

However, sign-talk was familiar to his people and he was at little disadvantage in daytime. Always skilled in the gesture code, he now became very expert; I was glad indeed to be his pupil, and thus in 1897 began seriously to study the Sign Language. In 1900 I included a chapter on Sign Language in my projected Woodcraft Dictionary, and began by collecting all the literature. There was much more than I expected, for almost all early travellers in our Western Country have had something to say about this lingua franca of the Plains. As the material continued to accumulate, the chapter grew into a Dictionary, and the work, of course, turned out manifold greater than was expected. The Deaf, our School children, and various European nations, as well as the Indians, had large sign vocabularies needing consideration. With all important print on the subject I am fairly well conversant, besides which I have had large opportunities in the field and have tried to avail myself of them to the fullest extent, carrying my manuscript from one Indian tribe to another, seeking out always the best sign-talkers among them, collecting and revising, aiming to add all the best signs in use to those already on record.

A Short History of Medicine - Erwin H. Ackerknecht 2016-05-01

A bestselling history of medicine, enriched with a new foreword, concluding essay, and bibliographic essay. Erwin H. Ackerknecht's *A Short History of Medicine* is a concise narrative, long appreciated by students in the history of medicine, medical students, historians, and

medical professionals as well as all those seeking to understand the history of medicine. Covering the broad sweep of discoveries from parasitic worms to bacilli and x-rays, and highlighting physicians and scientists from Hippocrates and Galen to Pasteur, Koch, and Roentgen, Ackerknecht narrates Western and Eastern civilization's work at identifying and curing disease. He follows these discoveries from the library to the bedside, hospital, and laboratory, illuminating how basic biological sciences interacted with clinical practice over time. But his story is more than one of laudable scientific and therapeutic achievement. Ackerknecht also points toward the social, ecological, economic, and political conditions that shape the incidence of disease. Improvements in health, Ackerknecht argues, depend on more than laboratory knowledge: they also require that we improve the lives of ordinary men and women by altering social conditions such as poverty and hunger. This revised and expanded edition includes a new foreword and concluding biographical essay by Charles E. Rosenberg, Ackerknecht's former student and a distinguished historian of medicine. A new bibliographic essay by Lisa Haushofer explores recent scholarship in the history of medicine.

Artists and Agents - Kata Krasznahorkai 2020-06-23

Subversion does not belong to anyone. It can come from artists who outwit the state or from intelligence agencies who infiltrate the art scene on behalf of the state. But what happens when the two sides meet? After the old state security archives in many Eastern European countries were opened, it became possible for this interaction to be studied in detail. Drawing on scientific essays and artistic contributions, the book shows how the secret police monitored happenings, performance art, and action art and looks at the debates they had about the new art form; it also demonstrates not only how the police documented artistic actions in detail using forensic techniques but also how they manipulated them and sought to thwart them with counter-actions. In addition to this, the book also reveals how artists dealt with the possibility that they were being observed by the secret police and how they now work with the material stored in the archives maintained by the

intelligence services.0Kata Krasznahorkai is a curator and research assistant on the ERC project "Performance Art in Eastern Europe 1950?1990: History and Theory" at the University of Zurich's Slavisches (Slavonic) Seminar.0Sylvia Sasse, author and curator, is professor of Slavonic Literature at the University of Zurich and heads the ERC project "Performance Art in Eastern Europe 1950?1990: History and Theory".00Exhibition: Hartware MedienKunstVerein, Dortmund, Germany (26.10.2019 - 23.02.2020).

A Cultural History of the Modern Age - Egon Friedell 2017-07-12

Volume three of A Cultural History of the Modern

Age finishes a journey that begins with Descartes in the first volume and ends with Freud and the psychoanalytical movement in the third volume. Friedell describes the contents of these books as a series of performances, starting with the birth of the man of the Modern Age, followed by flowering of this epoch, and concludes with the death of the Modern Age. This huge landscape provides an intertwining of the material and the cultural, the civil and the military, from the high points of creative flowering in Europe to death and emptiness. The themes convey multiple messages: romanticism and liberalism opens the cultural scene, encased in a movement from The Congress of Vienna and its claims of peaceful co-existence to the Franco-German War. The final segment covers the period from Bismarck's generation to World War I. In each instance, the quotidian life of struggle, racial, religious, and social class is seen through the lens of the mighty figures of the period. The works of the period's great figures are shown in the new light of the human search for symbolism, the search for superman, the rise of individualism and decline of history as a source for knowledge. This third volume is painted in dark colors, a foreboding of the world that was to come, of political extremes, and intellectual exaggerations. The author looks forward to a postmodern Europe in which there is a faint gleam of light from the other side. What actually appeared was the glare of Nazism and Communism, each claiming the future.

Body Soviet - Tricia Starks 2009-01-06

In 1918 the People's Commissariat of Public Health began a quest to protect the health of all Soviet citizens, but health became more than a political platform or a tactical decision. The Soviets defined and categorized the world by interpreting political orthodoxy and citizenship in terms of hygiene. The assumed political, social, and cultural benefits of a regulated, healthy lifestyle informed the construction of Soviet institutions and identity. Cleanliness developed into a political statement that extended from domestic maintenance to leisure choices and revealed gender, ethnic, and class prejudices. Dirt denoted the past and poor politics; health and cleanliness signified mental acuity, political orthodoxy, and modernity. Health, though essential to the revolutionary vision and crucial

to Soviet plans for utopia, has been neglected by traditional histories caught up in Cold War debates. The *Body Soviet* recovers this significant aspect of Soviet thought by providing a cross-disciplinary, comparative history of Soviet health programs that draws upon rich sources of health care propaganda, including posters, plays, museum displays, films, and mock trials. The analysis of propaganda makes *The Body Soviet* more than an institutional history; it is also an insightful critique of the ideologies of the body fabricated by health organizations.

History of Law and Other Humanities. Views of the legal world across the time - Valerio Massimo Minale 2019-07-09

The collection of essays presented here examines the links forged through the ages between the realm of law and the expressions of the humanistic culture. We collected thirty-five essays by international scholars and organized them into sections of ten chapters based around ten different themes. Two main perspectives emerged: in some articles the topic relates to the conventional approach of law and/in humanities (iconography, literature, architecture, cinema, music), other articles are about more traditional connections between fields of knowledge (in particular, philosophy, political experiences, didactics). We decided not to confine authors to one particular methodological framework, preferring instead to promote historiographical openness. Our intention was to create a patchwork of different approaches, with each article drawing on a different area of culture to provide a new angle to the history being told. The variety of authorial nationalities gives the collection a multicultural character and the breadth of the chronological period it deals with from antiquity to the contemporary age adds further depth of insight. As the element that unites the collection is historiographical interpretation, we wanted to bring to the fore its historical depth. Thus for every chapter we

organized the articles in chronological order according to the historical context covered. Looking at the final outcome, it was interesting to learn that more often than not the connection between law and humanities is not simply a relation between a specific branch of the law and a single field of the humanities, but rather a relation that could be developed in many directions at once, involving different fields of knowledge, and of arts and popular culture. We are grateful to Luigi Lacchè for his contribution to

this collection. His essay outlines the coordinates of the law and humanities world, laying out the instruments necessary for an understanding of the origins of a complex methodology and the different approaches that exist within it. This project is the result of discussions that took place during the XXIII Forum of the Association of Young Legal Historians held in Naples in the spring of 2017. The book was made possible thanks to the advice and support of Cristina Vano. The Editors
