Full Employment and Social Justice – Michael J. Murray 2017-11-30
This edited collection investigates how full employment programs can sustain the economy and the environment, promote social justice, and reinvigorate local communities. The contributing authors focus on the formation of institutions to eliminate the opportunity gap for

marginalized populations, enact environmentally sustainable methods of production and consumption, and rebuild local economies through education, training, and community redevelopment programs. They argue that the formation and implementation of a federally funded, locally operated Job Guarantee program is a vital component to

address a variety of complex and interweaving concerns. Through the formation of alternative institutions and encouraging local economies, the Job Guarantee approach has the potential to alter economic, social, and political structures away from an exploitative market-oriented structure toward one that is refocused on humanity and the sustainability of the earth and its peoples, cultures, and communities.

Relativization in Ojibwe

- Michael D. Sullivan
2020-01-01

In *Relativization in Ojibwe*, Michael D. Sullivan Sr. compares varieties of the Ojibwe language and establishes subdialect groupings for Southwestern Ojibwe, often referred to as Chippewa, of the Algonquian family. Drawing from a vast corpus of both primary and archived sources, he presents an overview of two strategies of relative clause formation and shows that

relativization appears to be an exemplary parameter for grouping Ojibwe dialect and subdialect relationships. Specifically, Sullivan targets the morphological composition of participial verbs in Algonquian parlance and categorizes the variation of their form across a number of communities. In addition to the discussion of participles and their role in relative clauses, he presents original research linking geographical distribution of participles, most likely a result of historic movements of the Ojibwe people to their present location in the northern midwestern region of North America. Following previous dialect studies concerned primarily with varieties of Ojibwe spoken in Canada, *Relativization in Ojibwe* presents the first study of dialect variation for varieties spoken in the United States and along the border region of

Ontario and Minnesota. Starting with a classic Algonquian linguistic tradition, Sullivan then recasts the data in a modern theoretical framework, using previous theories for Algonquian languages and familiar approaches such as feature checking and the split-CP hypothesis. Automotive Maintenance & Light Repair - Rob Thompson 2013-03-29
AUTOMOTIVE MAINTENANCE AND LIGHT REPAIR (AM&LR) was designed to meet the needs of automotive programs that teach to the competencies specified in NATEF's Maintenance & Light Repair (MLR) program standard. Designed for entry-level students, the primary features of AM&LR are the focus on the foundational principles and knowledge for the MLR tasks, and the activities to supplement student learning. In addition, Automotive Maintenance and Light Repair is written to engage students not just in automotive competencies, but also in applied

academic skills and lifelong learning skills, including math, science, and communication. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

A Naturalist's Guide to the Great Plains - Paul A. Johnsgard 2018
This book documents nearly 500 US and Canadian locations where wildlife refuges, nature preserves, and similar properties protect natural sites that lie within the North American Great Plains, from Canada's Prairie Provinces to the Texas-Mexico border. Information on site location, size, biological diversity, and the presence of especially rare or interesting flora and fauna are mentioned, as well as driving directions, mailing addresses, and phone numbers or internet addresses, as available. US federal sites include 11 national grasslands,

13 national parks, 16 national monuments, and more than 70 national wildlife refuges. State properties include nearly 100 state parks and wildlife management areas. Also included are about 60 national and provincial parks, national wildlife areas, and migratory bird sanctuaries in Canada's Prairie Provinces. Many public-access properties owned by counties, towns, and private organizations are also described.

Assessment of Biodiversity for Improved Forest Planning

- Peter Bachmann

2013-04-17

The 'Global Biodiversity Strategy' signed in 1992 in Rio de Janeiro, and the resolutions at the Ministerial Conferences on the Protection of Forests in Europe in Strasbourg, 1990, and Helsinki, 1993, commit the signatory states to monitor nationally the state of biodiversity and to sustain the characteristic natural variation in the country. Sustainability

and long-term planning are the two terms best describing the philosophy of traditional forest management practices. However, the traditional planning techniques are not primarily developed to maintain sustainability of biodiversity. The gap between the international commitments and the practices in forest assessment and management is obvious. This publication presents experience in methodology for assessing and monitoring the variation of ecosystems and habitats in relation to biodiversity conservation and for integrating biodiversity in regional planning of forest management and land use. The state of the art in the field of natural resource assessments with special reference to forest biodiversity is reviewed, progress in integrating data on biodiversity in forest management planning is

presented and the information needs regarding biodiversity conservation and the question to what degree assessment methods for forest biodiversity can be simplified for practical applications are discussed. The book is intended for researchers and practitioners in the field of forest and environmental planning and environmental policies.

The Wetlands Handbook, 2 Volume Set - Edward Maltby 2009-07-23

Forty-two chapters by international experts from a wide range of disciplines make *The Wetlands Handbook* the essential tool for those seeking comprehensive understanding of the subject. A departure from more traditional treatises, this text examines freshwater wetland ecosystem science from the fundamentals to issues of management and policy. Introductory chapters address the scope and significance of wetlands globally for communities, culture and biodiversity. Subsequent

sections deal with processes underpinning wetland functioning, how wetlands work, their uses and values for humans and nature, their sensitivity to external impacts, and how they maybe restored. The text is illustrated by numerous examples, emphasising functional and holistic approaches to wetland management, including case studies on the wise use and rehabilitation of wetlands in farmed, urban, industrial and other damaged environments, highlighting the long-term benefits of multiple use. The Wetlands Handbook will provide an invaluable reference for researchers, managers, policy-makers and students of wetland sciences.

Flames of Discontent - Gary Kaunonen 2017
On June 2, 1916, forty mostly immigrant mine workers in Aurora, Minnesota, walked off the job? a labor disturbance that would mushroom into one of the

most contentious battles between organized labor and management in the early 1900s. Gary Kaunonen tells the story of what this pivotal moment meant for workers and immigrants, mining and labor relations in Minnesota and beyond -- publisher's description.
Women's Orients: English Women and the Middle East, 1718-1918 - Billie Melman 2016-01-06

In this highly acclaimed study, Billie Melman recovers the unwritten history of the European experience of the Middle-East during the colonial era. She focuses on the evolution of Orientalism and the reconstruction - through contact with other cultures - of gender and class. Beginning with the eighteenth century Billie Melman describes the many ways in which women looked at oriental people and places and developed a discourse which presented a challenge to hegemonic notions on the exotic and 'different'. Through her examination of the writings of famous

feminist writers,
travellers,
ethnographers,
missionaries,
archaeologists and
Biblical scholars, many
of which are studied
here for the first time,
Billie Melman challenges
traditional
interpretations of
Orientalism, placing
gender at the forefront
of colonial studies.
'This book provides a
real extension to Edward
Said's writing not only
in the sense of
challenging Edward
Said's perspective, but
also by adding a
significant empirical
and conceptual element
to the discussion on
orientalism. Those
interested in women's
history, in the cultural
politics of cross-
cultural encounters and
in feminist or cultural
theory will find much to
engage them, inform them
and challenge them in
Melman's book.' - Joanna
De Groot, Times Higher
Education Supplement
'Using the perspectives
of both gender and class
Melman sets an
alternative view of the

Orient against that of
Said... a much less
monolithic and much more
complex and heterogenous
than that of Said' -
Francis Robinson, Times
Literary Supplement
'Women's Orients is an
important contribution
to our understanding of
Orientalism. Melman's
work is characterized by
a fruitful bringing
together of the skills
of the historian with
the sensitive reading of
the British women
writers...' - Catherine

Review 'An excellent
work... This book is a
must for anyone
interested in women's

Crash at Corona - Don Berliner 2010-04-01
IF UFOS DON'T EXIST, THEN THEY CAN'T CRASH.
But something did crash near Corona, a tiny town not far from Roswell, New Mexico, in 1947. And that crash has been dissected and debated ever since.
Aviation/science writer Don Berliner and nuclear physicist Stanton Friedman, the original civilian investigator of the so-called Roswell incident, have delved

into the controversy to find the truth. They sifted through once-classified government documents, interviewed military and civilian witnesses, pieced together evidence, considered alternative theories, and concluded that a UFO crashed near Corona-and the U.S. government knew it and covered it up. Crash at Corona proves that what was found in the New Mexico desert wasn't a weather balloon or a secret weapon-it was a UFO. "One of the more credible books arguing the existence of UFOs...Most arresting of all is the testimony of those who handled the debris, who had no opportunity to compare notes, yet have described the materials ...in almost identical language."-Publishers Weekly
DON BERLINER has written more than 300 magazine articles and 25 books on aviation history and space and was also a staff writer for the National Investigations Committee on Aerial Phenomena

(NICAP). He is board chairman of the non-profit Fund for UFO Research, Inc., and is a delegate to the UFO Research Coalition.

STANTON T. FRIEDMAN is a nuclear physicist who has worked for General Electric, General Motors, Westinghouse, and other corporations. He is also the author of TOP SECRET/MAJIC and has appeared on Larry King, Unsolved Mysteries, and Nightline, and was involved with the documentaries UFOs Are Real and Flying Saucers Are Real. He was the final speaker at the fiftieth anniversary conference at the International UFO Museum and Research Center at Roswell, and has given more than 700 lectures on the subject of UFOs. *The Ballad of the Lone Medievalist* - Kisha G. Tracy 2018

Working medievalists are often the only scholar of the Middle Ages in a department, a university, or a hundred-mile radius. While working to build a body of focused

scholarly work, the lone medievalist is expected to be a generalist in the classroom and a contributing member of a campus community that rarely offers disciplinary community in return. As a result, overtasked and single medievalists often find it challenging to advocate for their work and field. As other responsibilities and expectations crowd in, we come to feel disconnected from the projects and subjects that sustain our intellectual passion. An insidious isolation even from one another creeps in, and soon, even attending a conference of fellow medievalists can become a lonely experience. Surrounded by scholars with greater institutional support, lower teaching loads, or more robust research agendas, we may feel alienated from our work - the work to which we've dedicated our careers. The Lone Medievalist (the collaborative community and the book) is

intended as an antidote to the problem of professional isolation. It is offered in the spirit of common weal that marks the ideals (if not always the realities) of so many of the communities we study - agricultural, professional, national, notional, and of course, monastic. The Ballad of the Lone Medievalist isn't only about scholarship, or teaching, or institutional life, or the pursuit of new learning - it's about all of them. The essays in this volume address all aspects of the professional and intellectual life of medievalists. Though many of us acknowledge and address the challenges in being Lone Medievalists, these essays are not intended as voces clamantium; they are offered to provide strategies, camaraderie, and an occasional bit of inspiration. They are a call to action, a sharing of hard-won wisdom, and a helping

hand - and, above all, a reminder that we are not alone.

Mathematics for the Physical Sciences -

Leslie Copley 2015-03-30

The book begins with a thorough introduction to complex analysis, which is then used to understand the properties of ordinary differential equations and their solutions. The latter are obtained in both series and integral representations.

Integral transforms are introduced, providing an opportunity to complement complex analysis with techniques that flow from an algebraic approach. This moves naturally into a discussion of eigenvalue and boundary value problems. A thorough discussion of multi-dimensional boundary value problems then introduces the reader to the fundamental partial differential equations and "special functions" of mathematical physics. Moving to non-

homogeneous boundary value problems the reader is presented with an analysis of Green's functions from both analytical and algebraic points of view. This leads to a concluding chapter on integral equations.

Between Necessity and Probability: Searching for the Definition and Origin of Life - Radu Popa
2004-02-20

Systematically explores the early origins and basic definition of life. Investigates the major theories of the origins of life in light of modern research with the aim of distinguishing between the necessary and the optional and between deterministic and random influences in the emergence of what we call 'life.' Treats and views life as a cosmic phenomenon whose emergence and driving force should be viewed independently from its

Earth-bound natural history. Synthesizes all the fundamental life-related developments in a comprehensive scenario, and makes the argument that understanding life in its broadest context requires a material-independent perspective that identifies its essential fingerprints

Victorian Writing about Risk - Elaine Freedgood
2000-09-28

In Victorian Writing about Risk, first published in 2000, Elaine Freedgood explores the geography of risk produced by a wide spectrum of once-popular literature, including works on political economy,

sanitary reform, balloon flight, Alpine mountaineering and African exploration. The consolations offered by this geography of risk are precariously predicated on the stability of dominant Victorian definitions of people and places. Women, men, the labouring and middle classes, the English and the Irish, Africa and Africans: all have assigned identities which allow risk to be located and contained. When identities shift and boundaries fail, danger and safety begin to appear in all the wrong places. The texts that this study focuses on reveal the ways in which risk moralizes and naturalizes the economic and political institutions of industrial, imperial culture during a period of unprecedented expansion and change.

Federal and State Indian Reservations and Indian Trust Areas - United States. Department of Commerce 1974

This directory provides information relative to the incorporated Native American villages of Alaska and the American Indian reservations of mainland U.S. There are approximately 170 Alaskan entries which identify the name of the Native American corporation, its address, the number of villages incorporated, population number, racial distribution, and land status. Each of the some 400 entries on the American Indian reservations include the following items of information: (1) reservation name; (2) county and state location; (3) tribal name; (4) address of tribal headquarters; (5)

population number; (6) land status; (7) a brief history; (8) a brief cultural sketch; (9) tribal government; (10) tribal economy; (11) climate; (12) transportation (in terms of accessability); (13) community facilities; and (13) vital statistics (population of Indians residing on or adjacent to reservation, labor force, employment vs unemployed, and average educational level when identifiable). Reference is also made to recreational activities in some entries. Population data is derived from the Bureau of Indian Affairs' 1969-1973 census figures.

An International Perspective on Developments in

Victimology - Janice Joseph 2020-06-29

This festschrift in honor of the work and legacy of Dr. Marc Groenhuijsen provides an international and holistic overview of recent developments in

victimology, taking a global scope but grounded in everyday experiences of victims. Its multidisciplinary perspective reflects a range of approaches and practices in victimology, including contributions from the fields of social work, criminology, sociology, psychology, and law. Firstly, the volume introduces new perspectives in victimology, and then analyzes different forms of victimization in countries worldwide. It gives special attention to victims' rights and participation in the criminal justice system, detailing victim-centered approaches to justice through practices such as restorative justice and restitution. Highlighting the growth and development of victimology from a specialization in criminology to an academic discipline in its own right, this book reflects the range of approaches and depth of scholarship in the

field. This will be an essential resource to students of victimology, researchers, policy makers, and victim's advocates.

A Guide to Starting a Business in Minnesota - Charles A. Schaffer 2009
"This twenty-seventh edition of *A Guide to Starting a Business in Minnesota*, like its predecessors, is intended to provide a concise, summary discussion of the major issues faced by those starting a business in Minnesota. This edition of the Guide contains three major sections: the narrative text; a Resource Directory, which provides addresses and telephone numbers of organizations referenced in the text; and the Directory of Licensed and Permits, which lists all business licenses and permits required by the State of Minnesota, the state agency which issues or administers the license or permit, and a telephone number for obtaining more information. Topics presented in the

narrative text are presented in the order in which the new business owner typically must address them."--

why the system is what it is and why it does what it does—and what are the results of those actions." -Milton C. Hill, Stephen F. Austin State University
Criminal (In)Justice: A Critical Introduction takes an unflinching look at the American criminal justice system and the social forces that affect the implementation of justice. Author Aaron Fichtelberg uses a unique, critical perspective to introduce students to criminal justice and encourages them to look closer at the intersection of race, class, gender, and inequality in the criminal justice system. Covering each of the foundational areas of the criminal justice system—policing, courts, and corrections—this book takes an in-depth look at the influence of inequality, making it ideal for instructors who want students to critically assess and understand the American criminal justice system. *Dickens, Journalism, and*

Nationhood - Sabine Clemm 2010-04-15
Dickens, Journalism, and Nationhood examines Charles Dickens' weekly family magazine *Household Words* in order to develop a detailed picture of how the journal negotiated, asserted and simultaneously deconstructed Englishness as a unified (and sometimes unifying) mode of expression. It offers close readings of a wide range of materials that self-consciously focus on the nature of England as well as the relationship between Britain and the European continent, Ireland, and the British colonies. Starting with the representation and classification of identities that took place within the framework of the Great Exhibition of 1851, it suggests that the journal strives for a model of the world in concentric circles, spiraling outward from the metropolitan center of London. Despite this apparent orderliness,

however, each of the national or regional categories constructed by the journal also resists and undermines such a clear-cut representation.

Germans in Minnesota -

Kathleen Neils Conzen
2014-11-20

A concise history of Germans in Minnesota including immigration pattern, the Catholic and Lutheran churches, cultural organizations, business and politics especially in the World War 1 year. Minnesota is often associated with its Scandinavian heritage, but in fact Germans are the largest single immigrant group in Minnesota history and were the largest ancestry group in the 2000 census. Author Kathleen Neils Conzen tells the story of German Americans and their profound influence on Minnesota history and culture. Conzen recounts their triumphs and struggles over the last 150 years in a clear and concise narrative. Landing in poverty, Germans transformed

acres of wilderness into productive farms and brought to America their love of art, music and sociability. Immigrants came to America intent on creating in the words of one agent, "an earthly paradise of this Minnesota" and "a new Germany" soon rose in Stearns Country. Conzen explores not only the well known enclaves in Brown and Stearns Countries but also looks at the smaller communities of Winona, on the Iron Range, and along the North Shore, as well as in the Twin Cities. In recent times, a renewed interest in German heritage can be seen in towns like New Ulm, home to the thirty-two-foot statue of Hermann the German, hero of the wars against the ancient Roman legions, and Heritagefest, the ethnic heritage festival that occurs every summer. Germans in Minnesota is the fifth book in The People of Minnesota, a new series dedicated to telling the history of the state through the stories of

its ethnic groups in accessible and illustrated paperbacks. Future volumes include Chinese in Minnesota (due Fall 2003), Mexicans in Minnesota (due Spring 2004), Swedes in Minnesota (due Spring 2004), Poles in Minnesota (due Fall 2004), Ojibwe in Minnesota, Dakota in Minnesota, and Hmong in Minnesota.
