Working Memory and Learning - Susan Gathercole 2008-01-09

Dr Tracy Alloway has been awarded the prestigious Joseph Lister Award from the British Science Association. 'The authors have written a guide for practitioners that is both highly practical, and yet based upon sound theoretical principles...This book achieves a successful, yet often elusive, link between theory, research and practice, and deserves to have a high readership. I will have no hesitation in recommending it to a range of readers' - Jane Mott, Support for Learning 'This book fulfils its aim to explain working memory and the limits it places on children's classroom learning. For teachers it gives a very clear guide and fills a gap in understanding that can only lead to more child-centred approaches to teaching and learning' - Lynn Ambler, Support for Learning 'A clear and accessible account of current theory and research, which is then applied to children's learning in the classroom...The range of strategies...are well grounded in theory derived from research and sit within a coherent conceptual model' - The Psychologist 'An easy to read yet informative book that explains the concepts clearly and offers practitioners ways to support those with poor

working memory in the classroom' - SNIP `The topic of working memory nowadays tends to dominate discussions with teachers and parents, and both groups can helpfully be directed to this easy-to-read but serious text ... (it) is likely to prove a turning-point in the management and facilitation of hard-to-teach children. In a situation muddled by ever-multiplying syndromes and disorders, this book delivers a clarifying and reassuring isolation of the major cognitive characteristic that cuts across all the boundaries and leaves the class teacher and SENCO empowered. I think very highly of the book and shall be recommending it steadily' - Martin Turner, Child Center for Evaluation and Teaching, Kuwait Susan Gathercole is winner of the British Psychological Society's President's Award for 2007 A good working memory is crucial to becoming a successful learner, yet there is very little material available in an easy-to-use format that explains the concept and offers practitioners ways to support children with poor working memory in the classroom. This book provides a coherent overview of the role played by working memory in learning during the school years, and uses theory to inform good practice. Topics covered include: - the link between working memory skills and key areas of learning (such as literacy & numeracy) - the relationship between working memory and children with developmental disorders - assessment of children for working memory deficits - strategies for supporting working memory in under-performing children This accessible guide will help SENCOs, teachers, teaching assistants, speech and language therapists and educational psychologists to understand and address working memory in their setting.

Year 5 Naplan*-style Tests - James A. Athanasou 2011 This book is designed for parents who want to help their children and for teachers who wish to prepare their class for the NAPLAN Tests. NAPLAN Tests are sat by Year 5 students Australia-wide. These tests are held in May every year. The tests are in literacy and numeracy. In literacy there are three tests: Language Conventions - %spelling, grammar and punctuation: there are around 50 questions in this test Reading - %comprehension: there are around 35 questions in this test Writing% - written expression: there is one piece of writing in this test In the numeracy test mathematics is tested. There are 40 questions in this test. Parents may also use these books separately from the tests and just as a general way of revising or when tutoring their children. This book is divided into sample questions and practice tests. It starts with samples of the literacy (Reading and Language Conventions) and numeracy questions. This is then followed by four practice tests for numeracy, four practice tests for reading and four practice tests for language conventions. There is a sample writing task and four practice writing tasks. Samples can be revised if the practice tests are not completed. * This is not an officially endorsed publication of the NAPLAN program and is produced by Pascal Press independently of Australian governments.

Educating Indigenous Children in Australian Juvenile Justice Systems - Bronwyn Ewing 2023-02-06

This book addresses key issues in the context of the

national policy of educating children accused of crimes in Juvenile Courts in Australia. For several decades, National and State Governments in Australia have struggled to define education, constantly seeking to improve the way society applies the concept. This book presents an accurate portrayal of consequences of the education policy of trying to educate troubled children and young people in trouble with the law. It describes the work of juvenile detention centre mathematics teachers and their teaching contexts. It portrays teachers as learners, who ventured with researchers with a theoretical perspective. This book focuses on culturally responsive pedagogies that seek to understand the ways Indigenous children and young people in juvenile detention make sense of their mathematical learning, which, until the time of detention, has been plagued by failure. It examines how the underperformance of Aboriginal and Torres Strait Islander students, and students from low socioeconomic backgrounds are strong determinants of their overrepresentation in the juvenile justice system in Australia. This book presents the argument that if the students' literacy and numeracy levels can be improved, there is opportunity to build better futures away from involvement in the juvenile justice system and towards productive employment to improve life chances.

The Minimum Core for Numeracy: Knowledge, Understanding and Personal Skills - Sheine Peart 2009-06-02

The teacher training framework, introduced in September 2007, requires all teachers in the post-16 sector to possess knowledge, understanding and personal skills to at least level 2 in the minimum core for numeracy. Coverage and assessment of the core have to be embedded in all Certificate and Diploma courses leading to QTLS and ATLS status. This book is a practical guide to numeracy for trainee teachers in the Lifelong Learning sector. It enables trainee teachers to identify and develop their own numeracy skills and also to support their students' numeracy.

Improving Learning, Skills and Inclusion - Frank Coffield 2008-03-10

How can opportunities for teaching and learning be improved to ensure that many more people participate, gain qualifications and obtain decent jobs? Will government policies enable us to achieve these goals? What new ideas do we need to ensure a more inclusive, equitable and efficient learning system? These are some of the main concerns which underlie this thought-provoking book coming from a major research project looking at how policies affect learners, tutors, managers and institutional leaders in Further Education Colleges, Adult and Community Learning centres and in Work Based Learning sites. Post compulsory education in the UK has been constantly restructured by the New Labour government and has been subject to considerable policy turbulence over the last few years. This book attempts to understand this important but poorly understood sector by both talking to students and front-line staff and by interviewing the officials responsible for managing post-compulsory education and lifelong learning. By examining the sector simultaneously from the 'bottom up' and from 'top down', the authors show how recent policy is affecting three disadvantaged groups - 16-19 year olds who have fared poorly in official tests at school; unemployed adults learning basic skills; and employees at work learning basic skills. The authors conclude that there are serious failings and suggest principles and features of a more equitable and effective learning system.

A New Grammar Companion for Teachers - Beverly Derewianka 2011

The new edition of this bestselling text employs standard grammatical terminology, but it also uses terms which allow for a more functional interpretation. Aligned with the new Australian Curriculum: English, this edition is organised around the main functions that language plays in our lives: interacting with others, structuring coherent texts and expressing and developing ideas. Another major difference is that the content now extends into secondary schooling, dealing with the language challenges faced by older students.
